As a matter of fact, the skin rids the system of more urea than the kidneys do.

If the skin, or bowels, or kidneys are unhealthy—they won't throw off enough urea. This urea is changed into uric acid—carried by the blood to joints and nerves—causing Rheumatism.

One never inherits Rheumatism. One does inherit weak kidneys, irregular bowels and bad skin action.

## Fruit-a-tives

OR "FRUIT LIVER TABLETS"

will positively cure Rheumatism because they increase the eliminating action of skin, kidneys and bowels—and make these three organs so vigorous and healthy that there can be no urea or waste retained in the system to poison the blood and irritate the nerves.

FRUIT-A-TIVES are fruit juices, combined with tonics—the whole forming the most effective cure for Rheumatism.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA.

Well Known to the Egyptians Before the Jewish Exodus.

Bells were well known to the Egyptians before the time of the Jewish Exodus. In the description of Aaron's sacerdotal robe mention is made of the fact that upon the hem of the garment here were bells of gold alternating with pomegranates of blue, of purple and of scarlet: "A golden bell and a pomegranate, a golden bell and a pomegranate upon the hem of the robe round about. And it shall be upon Aaron to minister, and his sound shall be heard when he goeth into the holy place before the Lord and when he cometh out, that he die not."

Hand bells were in common use all over the ancient world. The earliest use of bells in churches was for the purpose of frightening away the evil spirits which were believed to infest earth and air, and the earliest curfew was rung at nightfall to rid the neighborhood of the village or town and church of demons. Most old churches of Europe have a small door on the north side, and at certain points in the service this door was opened and a bell was rung to give notice to the devil, if he chanced to be present, that he might make his exit before the elevation. By the command of Pope John X. church bells were rung as a protection against thunder and lightning.

The monument of Porsena, the Etrurian king, was decorated with pinnacles, each surmounted with a bell, which tinkled in the breeze. The army of Clothaire raised the siege of Sens on account of a panic occasioned among the men by a sudden chime from the bells of St. Stephen's church.

## CLEVER ANSWERS.

Cases Where They Won Promotion in Civil and Military Life.

A long list might be given of men who have owed their advancement in life to a clever answer given at the right moment. One of Napoleon's veterans, who survived his master many years, was wont to recount with great glee how he once picked up the emperor's cocked hat at a review, when the latter, without noticing that he was a private, said carelessly, "Thank you, captain." "In what regiment, sire?" instantly inquired the quick witted soldier. Napoleon, perceiving his mistake, answered with a smile, "In my guards, for I see you know how to be prompt." The newly made officer received his commission next morning.

A somewhat similar anecdote is related of Marshal Suvaroff, who when receiving a dispatch from the hands of a Russian sergeant who had greatly distinguished himself on the Danube attempted to confuse the messenger by a series of whimsical questions, but found him fully equal to the occasion. "How many fish are there in the sea?" asked Suvaroff. "All that are not caught yet," was the answer. "How far is it to the moon?" "Two of your excellency's forced marches." "What would you do if you saw your men giving way in battle?" "I would tell them that there was plenty of whisky behind the enemy's line." Baffled at all points, the marshal ended with, "What is the difference between your colonel and myself?" "My colonel cannot make me a lieutenant, but your excellency has only to say the word." "I say it now," answered Suvaroff, "and a right good officer you will be."

## MAKING A CHEF.

It Takes Many Years of Hard Work and Training.

"When you reflect upon what a chef goes through to complete his education it is no wonder that his services command high prices," said the culinary king of a restaurant.

"The chef," he continued, "begins as a boy, as apprentice to a master. For several years he works under the vegetable cook. He learns how to make mashed potatoes that look like white roses, how to cook and to arrange all the vegetables, from the truffles down, in a hundred fine and beautiful ways. He gets no salary. He gets only his board.

"Then for a year he studies raw meats. He learns how to select them and how to cut them up. He can tell at a glance, for instance, the genuine salt meadow mutton from the false. Along with this raw meat course goes also a study of fish and of game and of poultry—how to stuff, dress, lard, truss, and so on.

"Next, for a year, at a small salary, he stands before the range, learning how to broil, fry, roast and bake.

"He now knows the foundation of his art and is admitted into the presence of the chef himself—only assistants have taught him so far. The chef teaches him to make soups, pastries, ices and the more complicated puddings and souffles. Three or four years is none too long a time to study here.

"Ten years of hard work should turn a quick apprentice into a good chef. Such a chef without difficulty earns from \$25 a week up to \$150. If he gave half as much time to the bar, the church or medicine he would earn three as much."

## STONES SET ON FIRE.

Truly Remarkable Action of Sen Water in Ireland.

All the talk was of the old country, its marvelous beauty, its marvelous happenings, and Casey said to the Texan:

"The sea setting fire to tall cliffs—you wouldn't believe that possible, I suppose."

"Assuredly not," returned the Texan. "Neither in Ireland nor elsewhere."

"By those words," said Casey, smelling his shamrock tenderly, "you prove your ignorance of Ireland, sir, and show you have never been to Ballybunion."

"The tall cliffs of Ballybunion wade knee deep in the rough Atlantic. They are the bulwarks of Erin's west coast, and since the world's beginning the wild Atlantic surges, breaking against them, have eaten them out in caves and hollows.

"These cliffs of Ballybunion contain in their depths masses of iron pyrites and alum. Now and then the salt sea water eats into these masses, and oxidation at once takes place, and flames burst forth, and the rocks crack and melt in the great heat.

"Once the cliffs of Ballybunion burned for weeks. Like a volcano, they sent up yellow flame and black, foul smelling, bitter smoke, and the Irish came from hundreds of miles to see that wonderful sight.

"Only in Ireland, only in Ballybunion, sir," said Casey, fingering his shamrock, "may you see cliffs set afire by the salt sea they stand knee deep in."

## TAMED BY KINDNESS.

The Methods of the Elephant Hunter in the Far East.

This is how elephants are hunted in Ceylon: The people begin by clearing an open space near a forest, part of which is strongly fenced in with trunks of trees, with open places for doors. Then the elephants are found and with blazing torches, rattling of noisy instruments and spears are driven toward the open doors.

At last, with a rush, the great herd enters, the entrances are barred, and the poor giants of the wood find themselves hopelessly imprisoned. An elephant's rage is dreadful to witness, but the ingenuity of man has found a way of subduing it. One by one each prisoner is freed again, and tame elephants, remarkable for their sagacity, come up to him, stroke him with their trunks and otherwise cajole him until they lead him on to a good strong tree. The natives creep up behind, and in a minute the elephant is made fast to the tree by his leg.

All the time this is going on the tame elephants are humoring their deluded victim, but as soon as he is secured they go away and leave him. Then the men bring him coconuts and leaves to eat, which, of course, he refuses, as he is again in a great passion and struggling to be free.

But hunger subdues even the fiercest, and at last his wild roaring ceases, and he eats. From that time the taming process is comparatively easy. Again and again he is fed, as he requires it, by a kind hand, and the elephant, susceptible to kindness, becomes at last a docile servant of the man.

## White Ants of Africa.

Natives of the east coast of Africa do not object to the presence of the great white ant colonies in their neighborhood. The ants exercise great fertilizing power on the crops. A resident of that country writes: "Every

## "IT SAVED MY LIFE"

### PRAISE FOR A FAMOUS MEDICINE

Mrs. Willadsen Tells How She Tried Lydia E. Pinkham's Vegetable Compound Just in Time.

Mrs. T. C. Willadsen, of Manning, Iowa, writes to Mrs. Pinkham:

Dear Mrs. Pinkham:—

"I can truly say that you have saved my life, and I cannot express my gratitude to you in words.

"Before I wrote to you, telling you how I felt, I had doctored for over two years steady and spent lots of money on medicines besides, but it all failed to help me. My monthly periods had ceased and I suffered much pain, with fainting spells, headache, backache and bearing-down pains, and I was so weak I could hardly keep around. As a last resort I decided to write you and try Lydia E. Pinkham's Vegetable Compound, and I am so thankful that I did, for after following your instructions, which you sent me free of all charge, I became regular and in perfect health. Had it not been for you I would be in my grave to-day.

"I sincerely trust that this letter may lead every suffering woman in the country to write you for help as I did."

When women are troubled with irregular or painful periods, weakness, displacement or ulceration of an organ, that bearing-down feeling, inflammation, backache, flatulence, general debility, indigestion or nervous prostration, they should remember there is one tried and true remedy. Lydia E. Pinkham's Vegetable Compound at once removes such troubles.

No other female medicine in the world has received such widespread and unqualified endorsement. Refuse all substitutes.

For twenty-five years Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, has under her direction, and since her decease, been advising sick women free of charge. Address, Lynn, Mass.

## PEPPYS AND EVELYN.

Difference in Methods of These Two Famous Diarists.

Pepys' narrative is always dramatic—himself being the center of the play—while Evelyn is historical, pathetic or didactic, as the mood seizes him. Pepys gives us the comedy of his time, as Plautus and Terence gave us the comedy of theirs. Evelyn, on the other hand, has something of Livy in his composition and not a little of Cicero. Compare, for instance, their treatment of the great fire, and you may measure the distance between them. Thus it is that Pepys' account begins: "Some of our maids, sitting up late last night to get things ready against our feast to-day, Jane called us up about 3 in the morning to tell us of a great fire they saw in the city. So I rose and slipped on my nightgown and went to her window." And now turn to Evelyn and see the temper in which he views the destruction of the city. "The clouds of smoke were dismal and reached upon computation near fifty miles in length," he writes the day after the fire. "Thus I left it this afternoon looking a resemblance of Sodom or

WALTER RATHBUN, President. H. B. SHERWOOD, Superintendent. D. A. VALLEAU, Asst. Superintendent.

do not object to the presence of the great white ant colonies in their neighborhood. The ants exercise great fertilizing power on the crops. A resident of that country writes: "Every season I have seen the wonderful effects the white ant hill produces on the Kaffirs' maize and corn. Whenever there happens to be an ant hill in a garden its immediate vicinity can be at once distinguished, as the maize and corn are fully double the size of the surrounding crop. The bush country a few miles from this place is swarming with white ants and has also a large native population. The ants do not attack green crops to any extent."

### A Taste For Dogs.

Mark Twain was once talking of war and of the hardships and privations of sieges.

"A Frenchman," he said, "called one day on a woman who had two dogs. They were ugly little brutes, and when they came near him the man pushed them out of the way with his foot."

"I perceive, sir," said the woman coldly, "that you are not very fond of dogs."

"The man started in surprise. 'I not fond of dogs,' he exclaimed. 'Why, madam, I ate more than twenty of them during the siege of Paris.'"

### A Patient Man.

The endurance of the music lover who sits out one of Wagner's long "Ring" operas has often been commented upon, but perhaps not more forcibly than in London. Well up above the stage was a burly figure in homespun, evidently a Scottish farmer who had come to London to see the sights and hear the sounds. After sitting through three long acts he murmured audibly, "Twas a patient mon that wrote all this!"

### The True Idealist.

Every human being, unless he lacks utterly the capacity to love, is an idealist. No man can boast that he accepts only the "plain facts" of existence as his guide posts. Love makes idealists of us all. Through love we are given the power to look beyond the crude husk we call the fact. Any great achievement is impossible without this power. Life thrills with meaning and magic for the true idealist.

### The Change of a Word.

A prospective woman tenant through the typewriter's omission of one all important little word of two letters received the following startling statement: "Dear Madam: You can have the flat, provided you repaint and redecorate yourself!"

### His Resources About Exhausted.

Father—Do you think you can support her in the style to which she has been accustomed? Suitor—Not in the style to which she has been accustomed since we became engaged.

What is fanaticism today is the fashionable creed tomorrow, and trite as the multiplication table a week after

destruction of the city. "The clouds of smoke were dismal and reached upon computation near fifty miles in length," he writes the day after the fire. "Thus I left it this afternoon burning, a resemblance of Sodom or the last day. It forcibly called to my mind that passage, 'Non enim hic habemus stabilem civitatem,' the ruins resembling the picture of Troy. London was, but it is no more!"

Pepys sets the scene before you like a man; Evelyn reflects upon the tragedy like a writer, ingenious in reference and quick with allusion. We need not discuss which is the better method, but it may surely be said that the world will produce another hundred Evelyns before it fashions a fitting rival for Pepys.—London Spectator.

### Cathedral's Title Chain.

There is one thing in particular in St. Patrick's cathedral in New York that you cannot see in any other building in the city, if indeed in the country. It is a framed sheet of paper hanging on the wall of the southern entrance that contains the complete chain of title of the property on which the edifice stands from the time it was first sold until the church authorities bought it. The only reason for its being there so far as any one knows is to put a stop to the old story that the property was originally purchased by the church for a dollar. To settle this point the chain of title shows how much was paid for it in the beginning, and from that point on each change of ownership is accompanied by the price it was sold for.

### Arabian Snuff.

Snuff in Arabia is not used as it is with us, although one occasionally sees a snuffer, but the snuff is ordinarily made into a pill of about the size of a robin's egg and is placed between the lower front lip and the teeth. This manner of using snuff is common among the laboring class, and almost every coolie that is met in the street has his lower lip puffed out by a ball of snuff behind it. Arabian snuff is prepared out of the ordinary powdered tobacco, unrefined sugar and potash.

### Sneezing.

Sneezing is the best brain clearer known. Many persons conclude an attack of faintness or fainting with a violent sneeze. Our ancestors took snuff from a belief in the efficacy of sneezing. But tobacco so taken is in part absorbed into the blood and hurts the system. Ticking the nostrils with a feather or straw will act as well as taking snuff. Try it when you feel faint. It cannot do harm.

### After the Race.

Owner (grately)—Yes, if you hadn't stopped to take up that girl in your machine you would have won the race. You were beaten by a mile. Chauffeur—Well, you know a miss is as good as a mile.

### A Mistake.

Hewitt—Will you watch my trunk for a minute? Jewett—What do you take me for, a chest protector?

### Sour Grapes.

Mary—Pa has forbidden you the house. John—I wouldn't have taken it anyway with the mortgage he has got on it.

### CASTORIA.

**LEIBIG'S FIT CURE**

## DANGERS OF DIETING

UNDERFEEDING LIABLE TO WEAKEN  
HEART'S ACTION.

Usually Appetite Is a Measure of Health, and the First Sign of Illness In a Man or an Animal Is Loss of the Desire For Food.

Professor Alexander Haig, an English dietary expert, has written from London to the medical fraternity of New York warning Americans against the popular belief that the average man eats too much. He says that the increasing number of deaths from heart failure is largely due to underfeeding.

The notion that science is a more unerring guide than is nature is constantly gaining ground. In the good old days men drank when they were thirsty and ate of whatever they wished until their hunger was satisfied. Now science condemns such foolishness as primitive. It prescribes one glass of water one hour before meals and one glass one hour after meals—no more, no less. If you happen not to be thirsty at those times, no matter, drink that amount anyway. If perchance you are thirsty and would like two glasses you must not yield; it is only nature that prompts you, and nature is an unsafe guide. Or, you may be "abnormally" thirsty at meals; nevertheless do not drink then.

As to our amount of food, we are directed to consume so many grams of the proteids, so many grams of the carbohydrates and so many grams of fat, while we hear learned discourses upon large calories and the supreme importance of exactly maintaining our nitrogen balance—whatever that may mean.

I have purposely not mentioned the precise numbers of grams of the different food elements, for the simple reason that our eminent authorities have not yet agreed upon this important point. All give different figures.

Scientists, however, following the lead of Russell H. Chittenden, Ph. D., LL. D., Sc. D., have pretty well agreed that the average man eats twice more than he needs. If half his customary amount of food does not satisfy him it ought to, they say, and it will eventually, provided he keeps on suppressing his natural and therefore unscientific instincts.

But just here lies a danger. It is true that one can accustom himself to a much smaller quantity of food than that to which he has been habituated and that eventually he will desire that smaller quantity and no more, but when he attains to this condition his digestive power will have been reduced by one-half. As a result he will lose from ten to thirty pounds in weight; that is to say, his muscles and organs will decrease by so much in bulk and strength. Now, if the heart decreases considerably in strength there will always be danger of its collapse, particularly if it be subjected to any extra strain, as when one runs for a car or rapidly up a flight of steps. Excitement alone may be fatal to a weak heart.

Rigorous dieting to reduce weight is always dangerous. A better plan is to work off the superfluous flesh by exercise.

Lack of sleep has a depressing effect on the heart, for during sleep cerebral circulation diminishes, when the blood can devote itself to the rest of the body.

Eating before going to bed, particularly if one is up late, is a good practice, it being most favorable to thorough body repair that the blood at night be rich in nourishment.

## Canada's First Methodist Church.

BY MAUD BENSON.

The Bay of Quinte district has aptly been called "the birthplace of empire." Rich are its points and inlets in historical associations, but unfortunately one after another, the old landmarks of the Loyalists have disappeared until but very few remain. Certainly the most interesting of the ones that are left is the old wooden building that served the purpose of the first Methodist Church in Canada. This cradle of Canadian Methodism stands on south shore of Hay Bay, a branch of the Bay of Quinte, and is in a fairly good state of preservation. A short distance away is Adolphustown and the old Loyalist burying-ground, where many of the "Empire founders" are resting from their labors.

The first itinerant Methodist preacher to visit Adolphustown was Rev. William Lossee, who came to Canada from the States in the year 1790. Playter says of him:—"Lossee was a Loyalist, and knew some of the settlers in Adolphustown before they left the United States. He desired to see them and preach to them. It was well for him that he was a Loyalist, coming as he did from the States, among British subjects who had forfeited all save honor in the cause of the mother country, for their feelings against all citizens of the new republic were very bitter; and who would blame them?"

However much to-day we boast of Anglo-America influence throughout the world, and regret the ill-judge measures of the English Government which forced the American colonies to revolt, we revere nevertheless the staunch men and women, who, although hoping against hope that the people would secure a redress of their grievances by constitutional methods, remained true to the mother country through good and ill repute. These men and women readily opened the doors of their log cabins to Lossee, who entered on his new field of labor February, 1791. Immediately he set himself to work to form classes, and on the third concession of Hay Bay, at Paul Huff's house, he established his first class. Lossee is described as being a plain and powerful speaker and his congregation increased so fast that Paul Huff's house became too small. Accordingly a subscription was taken up to build a church; the list bears date February 3, 1792, and is still in existence. Timber was collected during the remainder of the winter, a part being brought from the north side of the bay on the ice, and in the spring the building was commenced.

There is an old account book in the Bay district, in which Robert Clarke, carpenter, credits himself with 12 1/2 day's work on the chapel at 5s 6d per day. Among others who subscribed funds toward the erection of the church were Paul Huff, Peter Frederick, Elizabeth Roblin, Wm. Casey, Daniel Steel, Joseph Ellison, Wm. Green, Wm. Ruttan, Solomon Huff, Stophel German, John Green, Peter Ruttan, Joseph Clapp, John Bininger, Conrad Vandusen, Arra Ferguson, Daniel Defoe, Andrew Embury Henry Davis and Wm. Hetchison. Paul Huff gave the land on which to build and ten pounds sterling. Peter Frederick was a blacksmith and helped in many ways about the building. Conrad Vandusen gave the largest amount, fifteen pounds. He had been keeping a tavern on the Bay of Quinte shore, and when converted by Lossee took an axe and chopped down his sign. The second largest contri-

SYDENHAM.

The last few hot days brought a number of summer tourists for their annual outing on Sydenham Lake. The cottages at the beach are being reopened again.

The many friends of P. W. Brown are feeling the loss keenly, as Mr. Brown has accepted a position in Collingwood High School. During the past three years with us, he has been a very active and faithful worker, in every enterprise. In his departure, both he and Mrs. Brown carry with them the best wishes of a large circle of friends.

The Woman's Missionary Society of Sydenham, held an "At Home" on Wednesday, July 18th, on Wesley Hall's grounds to celebrate the silver anniversary of the society. A large crowd is expected if the weather proves favorable.

Miss Matthews, Toronto, is the guest of Hattie Penil.

The Misses Armitage, Newark, N. Y. with Miss Lacey. Miss Luella Asseltine is home on her holidays.

Miss Guiles, with her sister, Mrs. P. W. Brown.

Franklin Harvy, Newmarket, is also with his old friends here.

Mrs. Hayward, Bessie Lacey, and Miss Woodruff took in the excursion to Quebec last week.

Miss L. Lahey is home for a visit.

Miss Flossie Switzer, Toronto, is the guest of J. Switzer.

Sydenham Loyal Orange lodge took the Sydenham band with them on their visit to Tamworth, July 12th.

Sydenham band drove out to Hartington on Friday evening to furnish music for the lawn social.

### How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O. We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

W. A. J. CHENEY & MARTIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists. Take Hall's Family Pills for constipation.

### A Lake of Acid.

In the center of Sulphur Island, off New Zealand is a lake of sulphuric

MRS. EMMA FLEISSNER  
Suffered Over Two Years—Health Was In a Precarious Condition—Caused By Pelvic Catarrh.

## HEALTH AND STRENGTH RESTORED BY PE-RU-NA.

Mrs. Emma Fleissner, 1412 Sixth Ave., Seattle, Wash., Worthy Treasurer Sons of Temperance, writes:

"I suffered over two years with irregular and painful periods. My health was in a very precarious condition and I was anxious to find something to restore my health and strength."

"I was very glad to try Peruna and delighted to find that it was doing me good. I continued to use it a little over three months and found my troubles removed."

"I consider it a splendid medicine and shall never be without it, taking a dose occasionally when I feel run-down and tired."

Our files contain thousands of testimonials which Dr. Hartman has received from grateful, happy women who have been restored to health by his remedy, Peruna.

### A WOOD SAWING FLY.

The Tool With Which It Makes a Cradle For Its Young.

It is marvelous how many of the tiny, creatures in the insect world conceal and preserve their eggs. Some will deposit them in extraordinary places; others will insert them in the skins of living animals; others, again, deposit their eggs where the young grub, after coming from the egg, finds food close at hand.

Among these last mentioned are insects who bestow great labor in the cradle of their young. The place they select is a hard part of a leaf or the woody branch of a tree. In this they saw out a hole large enough to contain their eggs, whence their name, saw flies. For this purpose they are provided with an ovipositor of peculiar construction. It consists of two long pieces closing like a sheath over a third.

In the tenthredo this third piece contains two little saws, each of which has been compared to the tenon saw used by the cabinetmakers. The tenon saw is single, but that of the tenthredo is double, consisting of two distinct saws. The insect in using them throws out one saw and while it is returning

Eating before going to bed, particularly if one is up late, is a good practice, it being most favorable to thorough body repair that the blood at night be rich in nourishment.

Accustoming the digestive organs to a small amount of food results in a decline of appetite, whereas our object should be to increase appetite and thereby strengthen our digestive powers by judicious exercise in the open air or in a well ventilated room.

If the doctrine that a small appetite is preferable to a large appetite be true—and this is what "economy in nutrition" teaches—then open air exercise, which manifestly increases appetite, must be injurious to health. Or why should we exercise to increase appetite if we may eat only so much?

The notion is wholly absurd. The first sign of illness in a man or an animal is loss of appetite. And usually appetite is a measure of health.

To build up the heart and muscular system generally we must vigorously exercise the muscles.

It is not enough that one should stuff himself; it is all important that he should desire every morsel he eats, and this he will do only if he undergoes general physical and mental exercise. Food that is ingested, and even digested, will be absorbed only by those organs that need it—that have been exercised. This fact explains why many persons that are good "feeders" are yet inadequately nourished. If they are brain workers and take no physical exercise their brains absorb what nourishment they need; the rest is excreted.

Magnificent as are the results of brain work we must bear in mind that there could be no result without the co-operation of the body, and that the body in its turn depends primarily on the integrity of its heart, lungs and stomach.

#### Men of the People.

The American tradition is the experience of the world everywhere. There is Washington and there is Hamilton, gently born and gently bred, but somehow the heart turns rather to Franklin and to Lincoln, as of more hope for the common men "God made so many of."—Mr. Howells in Harper's Weekly.

It requires a great deal of boldness and a great deal of caution to make a great fortune, and when you have got it it requires ten times as much wit to keep it.—Rothschild.

#### A Parson's Swearing.

"Parson" Blodgett, a former local preacher residing in Linden, had in front of his house a watering trough freely patronized by people riding by. One evening a man hurriedly drove up to water his horse, and the wheel of his wagon struck the trough violently. The "parson" came out hurriedly and cried: "Hog rabbit to hemp seed tobacco! Can't you drive straight?"

"Go in and shut the door," replied the driver, "and next time you want to swear, parson, do it like other men."

#### A Funny Siamese Custom.

They have a very funny fashion in Siam. When an inferior comes into the presence of a superior he throws himself upon the ground. Then the superior sends one of his attendants forward to see whether the prostrate man has been eating anything or has any offensive odor about him. If he be blameless in this respect the attendant raises him from the ground, but if he be guilty the attendant straightway kicks him out.

Wyandotte Dairyman's Cleaner and Cleanser. MADOLE & WILSON.

ing. Conrad Vandusen gave the largest amount, fifteen pounds. He had been keeping a tavern on the Bay of Quinte shore, and when converted by Lossee took an axe and chopped down his sign. The second largest contributor was Elizabeth Roblin, who gave twelve pounds. She was the widow of Philip Roblin, who was one of the first of the Loyalists to die after reaching Adolphustown. Mrs. Roblin was a brave and grand woman. She is the ancestress of Premier Roblin of Manitoba and grandmother of the late John P. Roblin of Prince Edward, who was for many years a prominent member of the old Reform party in the Upper Canada Legislature. Many of Mrs. Roblin's descendants are honored residents of Canada to-day, and, with the exception of Premier Roblin, all belong to the old Reform school. The two Ruttan brothers were liberal subscribers to the church building fund. Peter gave four pounds and William ten pounds.

The Hay Bay district was a haven of rest for the circuit riders, and the old church was always crowded by men and women who had travelled many miles through the woods, often carrying their children in their arms or on their backs in order that they too, might listen to "the word of life." They were earnest Christians, and so also were their children after them. They are all gone now, only their memory, influence and the old church remain.

"Not here? Oh, yes, our hearts their presence feel.

Viewless, not voiceless, from the deepest shells

On memory's shore harmonious echoes steal.

And names which in the days gone by were spells

Are blent with that soft music. If there dwells

The spirit here our country's fame to spread,

While every breast with joy and triumph swells,

And earth reverberates to our measured tread,

Banner and wreath will own our reverence for the dead."

#### The Word "Papa."

For some time after the word "papa" was taken into the English language in the seventeenth century it was restricted to courtly and polite speech and was common even among adults. Long after it had become childish it was still accounted genteel. Hood wrote of one who was "genteelly taught to say, not father, but papa." "Papa" may be comparatively a new-comer into the English language, but it is as old as Homer. Nausicaa in the "Odyssey" calls her father "pappa phile"—dear papa.

#### Undoubtedly.

"My dear sir," protested the eminent senator, "I try to take a broad view of every public question."

"I notice you always stand on both sides of it," said the dissatisfied constituent.

#### A Polite Editor.

"Why did you tell that poet to hitch his wagon to a star?"

"That," answered the editor gloomily, "was my polite way of saying I wished he'd get off the earth."—Exchange.

#### He Got Her.

"Oh," she said, "your conduct is enough to make an angel weep."

"I don't see you shedding a tear," he retorted, and his ready wit saved the day.

I've never any pity for conceited people, because they carry their comfort about with them.

ing directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists. Take Hall's Family Pills for constipation.

#### A Lake of Acid.

In the center of Sulphur Island, off New Zealand, is a lake of sulphuric acid fifty acres in extent. The water contains vast quantities of hydrochloric acid and sulphuric acids, hissing and bubbling at a temperature of 110 degrees F., and great care has to be taken in approaching it to avoid suffocation.

ains two little saws, each of which has been compared to the tenon saw used by the cabinetmakers. The tenon saw is single, but that of the tentredo is double, consisting of two distinct saws. The insect in using them throws out one saw and while it is returning pushes out the other.

This alternate motion is continued until the cut is made, when the two saws, receding from each other, conduct the egg between them into its place. Not only is the edge of the saw notched into teeth, but on every tooth a number of smaller teeth appear.

## PROF. DORENWEND, OF TORONTO,

THE FAMOUS

Hair Goods Artist  
IS COMING!

Will be at Paisley House,  
Napanee, on

MONDAY, JULY 30th.

With every kind and style of LADIES' and GENTLEMEN'S WIGS, TOUPEES, BANGS WAVY and PLAIN FRONTS, SWITCHES of all long hair in every length and shade.

His ART STYLES are known and worn by all classes everywhere.

Be sure to visit his Show Rooms at the Hotel and see his new designs.

He will free of charge, demonstrate by fitting you what is the most suitable and becoming to you.

There use adds HEALTH, COMFORT and YOUNGER APPEARANCE. GENTLEMEN WHO ARE BALD should investigate and see his FEATHER WEIGHT TOUPEES AND WIGS worn on over 75,000 heads.

Please remember Day  
and Date.

Napanee Paisley House

MONDAY, JULY 30th.

ONE DAY ONLY.

## A TALE OF SOUTHERN CHINA.

### CHAPTER XX.

Larry uttered a feeble cry of dismay when his eyes fell upon this water-soaked Russian, and he knew their hopes of a peaceful entry into the city were on the verge of dissipation.

Even the bold and resourceful Lord Rackett apparently experienced something of a disagreeable shock when he realized that they had jumped from the frying-pan into the fire.

The Russian did not present a very delightful appearance as he stood there, after having roughly thrust the curious Chinese aside.

He had been in the river, our friends knew that, and his appearance gave the fact away, for his clothing was soaked and muddy, and some of the rushes still clung to his garments.

Both Lord Rackett and Larry saw, to their surprise, that this was not Count Petoskey himself, and, putting several things together, they were compelled to decide that the count had had a companion on the junk, who was now about to play his little part in the drama, which might be either comedy or tragedy, as fate decreed.

At best the Russian was no beauty, and as he stood there, glowering upon them, with the rough usage he had latterly experienced adding to his frowning appearance, he looked simply devilish.

Apparently there was that about the situation to please the man from Neva, for, despite his overowering rage, he allowed a diabolical smile to creep over his face.

So Satan might smile upon surveying a fresh batch of victims whipped into his hands by the lesser imps of Hades.

Singular to state, in all probability that same smile was the fellow's undoing.

It aroused fierce anger in the breast of the Englishman, and caused him to throw caution to the four winds.

The situation was desperate, and, if they were to be saved, it could only be through heroic treatment.

Doubtless, with the subtle power which his race seems ever to exercise over barbarous or semi-civilized people, the Russian would gain the good-will of the Chinese, and, being able to speak their tongue, might incite their animosity against the trio through some specious tale that was utterly without foundation.

The result would be a sickening tragedy, nor would it prove the first time that Anglo-Saxons met a dreadful death beneath the very walls of the Chinese metropolis, thanks to the fierce hatred with which they have always been viewed by bigoted natives.

Plympton could see this resolution in the cynical smile of the Muscovite, and it was indignation that aroused his honest blood almost to fever heat—indignation because there was no reason for such desperate tactics on the part of the Russian, whose country was at peace with Great Britain, so that only trade differences and a mad desire for gain forced the conclusion.

Plympton was at his best when thus stirred up; his brain, while surging with excitement, could grasp the situation in an instant and see the readiest way of release.

Plympton dragged the Russian back to where the others stood spellbound by his daring action.

He thrust his revolver squarely into the man's face, so that he might experience the peculiar chilling sensation which cold steel is apt to create.

Then, in his sternest tones, he addressed him, nor could his language have been much more to the point:

"Your life is in my hands. As certain as there is a Heaven above, I will sacrifice it unless you agree to assist us to reach a place of safety. If you consent, nod your head, and unless you do so instantly I shall blow your infernal head off and take chances afterward. Your decision—quick!"

The Russian might have had a will of his own, but it had to bow before that of a master.

He looked into those blazing blue eyes, and saw his doom there if he refused.

Doubtless life was too sweet to the fellow, and he would have been a fool to have thrown away all chances of a continued existence.

He nodded his head with a great vehemence, as though to emphasize his dislike for the chilling sensation of the steel upon his brow, and the strong possibility of having his thatch blown away should the Englishman's itching finger press too heavily upon the trigger.

"Enough!" cried Plympton. "Now, tell these fellows to disperse—that you are about to accompany us to the city."

The other rattled off some jargon, which was to the effect that his plans had changed, and he meant to go with the little party before the yamen (or court), where he could get justice.

This was only a blind, of course, to dull their comprehension, and keep them quiet, for the average Chinaman has the deepest respect for a court of law, and desires to keep clear of it as much as possible.

At least this little speech had its effect, for the crowd began to melt away.

The grower of silkworms was still available to serve as their guide, and they cheerfully accepted his services.

Thus they approached the city walls, and all seemed well.

Lord Rackett had put his arm through that of the Russian, so that they were linked together. He did not mean to trust the fellow more than necessity required, and all the while he held his revolver ready in the other hand.

Nor did he forget to keep a close lookout, remembering that the Russian had allies, and one of them might creep up from behind, snatch away his shooting-iron and give the prisoner an opportunity to escape.

Larry was lost in admiration of his colleague.

To him this was the acme of diplomacy, and he grinned almost constantly at the idea of making their enemy lead them out of the wilderness.

It was turning the tables with a vengeance, and revenge is sweet to the ordinary man.

Larry did not pretend to be an angel, and made no concealment of the fact that the present peculiar condition of affairs was exceedingly gratifying to him.

One thoroughly appreciates a calm after enduring the torments of a storm.

position, and this may occur again with a change of dynasty.

A crazy old railroad takes the adventurous tourist to the outskirts of Peking, and dumps him out unceremoniously, so that he is compelled to charter a conveyance in order to reach his intended destination in the European quarter.

A little party had thus been turned loose one pleasant afternoon, not a great many days after the events which took place in Canton.

At their head was a strapping Englishman, whose knowledge of Chinese methods seemed to be equal to the task of handling those with whom he came in contact.

This was Lord Rackett, of course, and his companions could be no other than Larry and Avis.

The latter bore a mystic scrawl in the routine Chinese characters, addressed to one Foo Chong, in the Imperial city of Peking, and upon this letter they expected to depend in carrying out the desperate mission that had taken them thither.

Dr. Jack's widow had made up her mind, and nothing could change her determination.

Again and again had Plympton and Larry consulted; various were the devices to which they resorted in order to bring about some alteration of her plans.

It was useless.

Lord Rackett's accounts of the difficulties that lay in the way, and all Larry's vivid descriptions of the horrors to be met, only quickened her pulse and added fire to her eye, as she, in imagination, pictured her Jack in the midst of these scenes.

When a woman of her determination concludes to do a certain thing, difficulties only serve to make her the more positive.

The others had recognized this, and yielded to the peculiar conditions, acting under the belief that "what can't be cured must be endured."

So long as Avis was bent upon undertaking this astounding adventure, they were bound to stand by her.

True, the chances seemed to be that not one of the trio would ever return alive from beyond the walls of the Forbidden City, but that was a contingency that had little bearing on the matter in Plympton's mind; he was bound to do his level best, as though success awaited those who dared.

(To be continued.)

### ALMOST HOPELESS.

#### The Condition of Thousands of Pale, Anaemic Girls.

"Almost hopeless is the best way to describe the condition I was in about a year ago," says Miss Mamie Mannett, of Athol, N. S. "My health had been gradually giving way until I reached a condition when I feared I was sinking into chronic invalidism. I was as white as a sheet, my blood apparently having turned to water. I had no appetite, suffered from headaches and dizziness, the least exertion would leave me breathless, and it appeared that I was going into a decline. I had seen Dr. Williams' Pink Pills highly recommended by the newspapers, and I decided to give them a trial. It was a fortunate day for me when I came to this decision, as the pills have not only restored my health, but have actually made me stronger than ever I was before. I now have a good appetite, a good color, and new energy, and I am satisfied that I owe all this to Dr. Williams' Pink Pills, which I cheerfully recommend to other pale, feeble, ailing girls."

Dr. Williams' Pink Pills quickly cured Miss Mannett, simply because they make the new, rich, red blood which enables the system to throw off disease, and brings robust health and cheerfulness to pale anaemic sufferers. Dr. Williams' Pink Pills cure bloodlessness just as surely as food cures hunger, and the new blood which the pills make braces the nerves and tones and

## IN THE LAND OF BIG GAME

### ALONG THE SHORES OF LAKE NAIVASHA, EAST AFRICA.

#### Great Flock of Flamingoes and Herons Gazelles Mingling With Sheep.

The modern traveller who goes by the Uganda Railway from Mombasa to the Victoria Nyanza has many wonders in store for him. For several hours at first, as the line winds quickly upward from the coast, he may see glorious views of the Indian Ocean (the last for a long time to come) and its beautiful bays and harbors. The belt of inhabited and cultivated country is narrow and soon passed; palm trees and mangoes and bananas disappear and give place to queer looking euphorbias and yellow flowering acacias; it is a dreary and waterless land, where little but thorns will flourish.

For many hours he travels through a country that reminds him of a well stocked farm, or rather of the zoological gardens, writes A. F. R. Woolston in the Westminster Gazette. Huge herds of hartbeests, zebras and gazelles, parties of wildebeests and ostriches, bustards and cranes are scattered far and wide over the plain, and if he be lucky he may see a herd of giraffes or a family of lions. If he seems to be a stranger in the land half a dozen different fellow passengers will tell him the story of the unhappy lion hunter who slept at his post in the railway carriage and was carried out of the windows and eaten by the very lion he went out to kill. More notable still is the sight of Kilimanjaro, a huge truncated pyramid or snow rising out of the morning mists sixty miles to the southward. Kenia, too, may be seen, or more likely great cloud banks, where the

#### MOUNTAIN LIES HIDDEN.

After many years of toilsome climbing through scrub and swamp and jungle, always upward, the engine whistles—it sounds like a sigh of relief—and of a sudden we are plunging down from the Kikuyu Escarpment into the Great Rift Valley. It looks, indeed, like a Promised Land, and it is likely within a few years, if not to flow with milk and honey, at all events to be filled with cattle and sheep. The climate at this altitude of 6,000 feet and more above the sea is healthy for Europeans. Of all the beauties of the Rift Valley there is none that can be compared with the lovely and mysterious Lake Naivasha. It is hard to believe that this is Africa and but a few miles from the equator. Naivasha has been likened to many different places; one writer was reminded of a gloomy Irish lough—perhaps his visit was in a wet season, or possibly it was the snipe in the swamps; another was reminded of the Bay of Naples and the view from Posilipo. To my mind there is something of New Zealand in the air and in the scene as well.

To the wandering naturalist, whether his bent be toward birds, beasts, butterflies or plants, Naivasha is one of those happy hunting grounds that he has dreamed of but has never expected to see. The margin of the lake is fringed with sedges, tall reeds and papyrus. Beyond the papyrus is a marvel of water lilies, red and white and blue, but mostly blue. Where the shallows extend far out into the lake there must be near a mile of water lilies. In the morning, when the breeze ruffles the water and breaks up the reflections of the hills, the green of the transparent upturned leaves, the blue of the flowers, the orange of the submerged stems and the almost amethyst of the water together make

#### A VERY OPAL OF COLOR.

One of the prettiest bird sights I have ever had the good luck to see was here; in a little bay of water lilies, standing on the leaves and preening their plumage, was a party of long legged, black winged stilts, winter migrants from the

train forced the conclusion.  
Plympton was at his best when thus stirred up; his brain, while surging with excitement, could grasp the situation in an instant and see the readiest way of release.  
Men so constituted the specially fortunate, since the majority become rattled under sudden pressure, and find it hard to recover.  
The Russian, having surveyed the situation with the haughty air of a master, shouted out some words in the Chinese dialect to a couple of betraggled fellows who had evidently accompanied him during his sub-marine journey.  
Plympton caught enough to tell him the other was explaining that these parties were spies seeking to overturn their religion, defile their pagodas and steal their gods.

Thus he would inflame their minds against the little party and insure their destruction.

If the fellow labored under the impression that Plympton and Larry would surrender without a desperate resistance he showed extreme simplicity. His recent experience should teach him better, for the man who had swept the decks of the junk of a crew numbering fully twenty armed coolies could not reconcile himself to a meek surrender.

Lord Backett had a thought.  
He was wont later on to call it an inspiration, nor would anyone dispute his word.

The Russian, by chance, was within ten feet of him as he stood.

Ten feet may seem quite a little distance on ordinary occasions, but it really does not amount to much when an infuriated and aroused giant puts his netter limbs into action.

Plympton gave vent to a roar that was not unlike the sound to be heard in African wilds where the lordly king of beasts roams in search of his prey.

The British lion was aroused.

Even as he thus bellowed, he sprang straight at the haughty Muscovite.

The latter saw his danger, but too late to avoid it by leaping aside, and available weapons he had none after his immersion.

True, he did let out a shout, but it had no effect whatever in retarding the swoop of the aroused Britisher.

Thus Lord Backett fell upon him in his might, and though the Russian doubtless possessed an ordinary man's power of endurance, he found himself little better than a mere pigmy in the hands of his enemy.

Plympton having laid hands upon the man toward whom his venom was aimed, shook him much as the lion roused a mummy wolf that falls into his power.

Larry afterwards declared the fellow's teeth rattled like a set of Spanish castles.

When Plympton desisted long enough to give him a breathing spell, the fellow had quite lost his haughty and sarcastic demeanor.

In fact, he looked dizzy.

His idea embraced something beyond the mere shaking up of the conspirator—he must be utilized to carry them out of this Slough of Despond into which they had fallen, thanks to his scheming.

Exercising his wonderful strength,

Larry did not pretend to be an angel, and made no concealment of the fact that the present peculiar condition of affairs was exceedingly gratifying to him.

One thoroughly appreciates a calm after enduring the torments of a storm.

The Russian carried out his part of the programme very well indeed, and yet he hardly deserved the credit for doing so; a man who valued his existence would have been next to insane to have dreamed of any treachery, much less attempted it, while arm in arm with that giant Britisher, who had declared his readiness to snuff out his life as one extinguishes a candle if the occasion arose.

Thus they reached the walls and passed within the limits of the city.

Well did the grower of silkworms know how best to guide them to the foreign quarter so that they should attract the least possible attention from the swarms of natives to be found upon the streets, where colored lanterns hung and strings of firecrackers still burst in a continuous clatter that brought agony to the tympanum unaccustomed to such clamor.

Perhaps it was strange they had not heard this noise when endeavoring to locate the city; but what air there was stirring came from the opposite quarter, and this may have accounted for it in a measure.

At any rate, no one gave it much thought now that success had come to their banner.

When the foreign quarter was reached, Plympton dismissed the Russian. The fellow said something in his own tongue which no one understood, although they could guess that it was a hint concerning some future day when the chances of war might be in his favor—and then he bolted.

Danger was now a thing of the past, since they were surrounded by the beacon lights of civilization, and no trouble was experienced in reaching the hotel, where the silkworm merchant was rewarded according to promise, and sent on his way rejoicing, while our three friends held communion together to compare notes of the stormy voyage that had so happily reached its conclusion.

## CHAPTER XXI.

From tropical Canton to the far-away northern capital, Peking, is a huge step, and the modes of travel and communication so limited, primitive and cumbersome, that an overland journey from the one to the other would consume some months in the accomplishment.

Fortunately for the traveller desirous of looking upon these two extreme types of Chinese life, there are other means of annihilating distance than the tedious methods that have been in vogue in the empire for thousands of years.

Anglo-Saxon enterprise has stepped in and provided a line of communication quite equal to the demand.

From the wonderful metropolis of Southern China one may drop down the Pearl River for some ninety miles, and bring up at the busy English mart of Hong Kong, where commerce holds sway, and the mailed hand of Great Britain holds fast to the pulse of a huge, unwieldy nation, formed of many provinces and held together simply through the power of cohesion.

Here elegant steamers sailing under the British flag carry passengers to Shanghai and other ports still further north, where conveyance to the old capital can be secured.

The situation of Peking has amazed all travellers, since it does not lie upon a great stream like the Yang-tse-Kiang or the equally famous Yellow River of the north.

Lying not far from the Great Wall of China, its situation is admirably adapted for defense against Tartar foes; and since the present dynasty is of northern sympathies, it is probably only proper that this stronghold of China should be maintained as the capital.

There were other days far back in the past when a city more central and in a more salubrious climate held this proud

enables the system to throw off disease, and brings robust health and cheerfulness to pale anaemic sufferers. Dr. Williams' Pink Pills cure bloodlessness just as surely as food cures hunger, and the new blood which the pills make braces the nerves and tones and strengthens every organ and every part of the body. That is why these pills strike straight at the root of such common diseases as headaches, sideaches, and backaches, kidney trouble, indigestion, neuralgia, rheumatism, St. Vitus dance, paralysis, and the troubles from which women and growing girls suffer in silence. It has been proved in thousands of cases that Dr. Williams' Pink Pills cure after doctors and all other medicines have failed. But you must get the genuine pills with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. All medicine dealers sell these pills or you can get them by mail at 50 cents a box or six boxes for \$2.50 by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

## A THICK SKIN.

In one of the lesser Indian Hill wars an English detachment took an Afghan prisoner.

The Afghan was very dirty. Accordingly two privates were deputed to strip and wash him.

The privates dragged the man to a stream of running water, undressed him, plunged him in, and set upon him lustily, with stiff brushes and large cakes of white soap.

Well, after a long time, one of the privates came back to make a report. He saluted his officer and said, disconsolately:

"It's no use, sir. It's no use."  
"No use?" said the officer. "What do you mean? Haven't you washed that Afghan yet?"

"It's no use, sir," the private repeated. "We've washed him for two hours, but it's no use."

"How do you mean it's no use?" said the officer, angrily.

"Why, sir," said the private, "after rubbin' and scrubbin' him till our arms ached, blamed if we didn't come to another suit of clothes."

## SAVE THE BABIES.

Mother, an investment of 25 cents now may save your baby's life. Colic, diarrhoea and cholera infantum carry off thousands of little ones during the hot weather months. A box of Baby's Own Tablets cost but 25 cents and there is security and safety in this medicine. Give an occasional Tablet to the well child and you will keep it well. Give them to the child if trouble comes swiftly and see the ease and comfort this medicine brings. And you have the guarantee of a government analyst that this medicine contains no poisonous opiate. Mrs. R. Metlin, Halifax, N. S., says:—"Baby's Own Tablets are a valuable medicine for stomach and bowel troubles." Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont. Keep the Tablets in the house.

Mabel: "Such a joke with Mr. Gay-boy. We were out on the balcony between the dances and he got the sleeve of his dress coat over red paint from one of the posts that was just painted."  
Maud: "And did you go near the post?"  
Mabel: "No. Why?" Maud: "Oh, nothing; only you have red paint all over the back of your waist."

They Are Not Violent in Action. — Some persons, when they wish to cleanse the stomach, resort to Epsom and other purgative salts. These are speedy in their action, but serve no permanent good. Their use produces incipient chills, and if persisted in they injure the stomach. Nor do they act upon the intestines in a beneficial way. Parmelee's Vegetable Pills answer all purposes in this respect, and have no superior,

One of the prettiest bird sights I have ever had the good luck to see was here; in a little bay of water lilies, standing on the leaves and preening their plumage, was a party of long legged, black winged stilts, winter migrants from the north; behind them was a wall of graceful bending papyrus and overhead was a snowy Caspian fern. Among the lilies and on the open water beyond are a myriad coots and grebes, ducks and cormorants, and further still huge pelicans.

Overhead are circling and constantly crying a pair of fish eagles, sometimes so high up that we can barely make out two shouting specks above us, sometimes so near that we can clearly see the brilliant black and white and red brown of their plumage. On a shallow, sunken mud bank is a long line of white, which shows a tinge of black and crimson, as the great flock of flamingoes rises and flaps slowly away. Happily there are no crocodiles here, but hippos abound, and one may often catch a glimpse of nose and eyes as they lie in the shallows basking in the sun, or at night, when they feed, hear them crashing through the reeds.

It is only here and there that one can follow the water's edge; mostly the reeds are too thick and the ground too swampy for any but a waterbuck to pass. Along the outside, where the reeds meet the grass, are big flocks of Egyptian geese, which spend most of the day in sleep, but make noise enough in the evening and early morning. Here too, are black ibises, wary as curlews, and sacred ibises in small parties of two and three, always busily searching for food, scovoring every inch of ground. Prettier and more confiding are the great white heron and the smaller buff-backed heron, which hardly take the trouble to move as one approaches; they like to feed among the herds of native cattle, often perching on the backs of the beasts, as I have seen them do in Egypt. Crowned cranes, generally in pairs, stride conceitedly about within a dozen yards of us, evidently conscious of the law that protects them.

Of big game, though there is plenty in the district, one does not see very much on the eastern side of the lake. Here on the wide grassy flats and on the lower slopes of the hills immense flocks of sheep and goats find pasture. At the time of our visit there were driven every evening to the boma near our camp close upon

## 20,000 BLEATING ANIMALS.

to the accompaniment of much shrill whistling from the boys who tend them. Ugly savages are these Masai boys, clothed in little less than a long spear, and round their necks a string of beads or empty cartridge cases.

It is a pretty sight to see a herd of the graceful little Thomson's gazelle (locally called Tommies) mingling with a flock of sheep and goats, and following with the others when the boys whistle, or even needing a prod with the spear point to make them move faster. Whether they do it for amusement or for the sake of companionship or for a better protection against their enemies, the prowling lion and leopard, who shall say?

Grant's gazelle, a somewhat larger animal with beautifully curved horns, is found here, too; but he is not so tame as the former, and goes bounding away—bouncing is almost the word—as though his body were built of springs. A few lumbering haribests, hideous red brutes with all the ugly features of a cow and of the donkey combined, are seen here and there; they trot off until they are just out of range, then turn around and treat us to an insane stare.

One morning we came suddenly over a low hill and walked into the midst of a herd of zebras. Off they went, fifty or more of them, as fast as they could gallop, straight toward a newly strung wire fence. Either they did not see it, or they were too much frightened to turn aside; not one of them swerved, but all dashed through the fence, as though the wires were cobwebs, and as far as we could see not one was damaged in the least. Zebras may be seen from the railway literally in thousands on the Athi Plains, near Nairobi, and

# Sunlight Soap

again on the rolling grass lands between Naivasha and Nakuru.

**AT THE GOVERNMENT FARM,**  
a few miles from Naivasha, experiments have been made in crossing zebras, but hitherto no very satisfactory hybrid has been produced. The pure bred animal is difficult to tame and of very little use as a beast of burden; but a strong hybrid, capable of resisting the many diseases of the country, would solve the horse problem of East Africa and would go far toward insuring the prosperity of the colony.

Near the southeastern corner of the lake is an island, the largest in the lake, where we camped for a time. The voyage of a mile or more from the mainland is made in the relics of a boat, which, from its appearance, must have been brought here by the first explorers thirty years ago. It was never less than half full of water, which kept two boys busy baling with buckets, and the one and a half broken paddles threatened every moment to be reduced to none at all. Half way across are two small islets; one a favorite breeding place of herons and ibises, which nest here in hundreds, the other apparently a playground for the hippos, to judge from the trampled reeds and the crashings and gruntings which issue from it by night. The tangle by the lake shore is the haunt by day of many water buck, which swim over from the mainland and find here a sanctuary from their enemies, the lions and hyenas.

As the shadows grow longer and the sun goes down behind the Mau a troop of baboons in the rocks begin to chatter before they go to bed, and there is a stir among the geese beside the lake. Jackals, waking from their long siesta, trot over the plain and creep cautiously toward the camps of the natives. Something brown appears at the edge of the reeds; it is a water buck. At first his head and horns alone are visible, then after a wary look about him, he steps out from his shelter and, stopping here and there to crop a tuft of grass, strolls off to a favorite saltillick a mile away.

Like the red deer of Exmoor, the water buck play havoc in any unfenced garden or cultivated ground. They love to pull a plant up by the roots, and after a single bite (not always that) pass on to another. The twilight goes quickly, and in half an hour it is black night. There is a croaking chorus of frogs by the lake and the "konk" of herons overhead flying to their fishing. As we move toward the camp our steps are perhaps a little quickened when we hear the unearthly howl of hyenas and the discontented grunt of a lion.

## POTTED MEAT NOT PRESERVED.

Manufacturers' Association and Sanitary Inspector So Report.

The following extracts from reports of the National Manufacturers' Association and Inspector Hedrick, Sanitary Inspector of the City of Chicago refute the sensational charges made against the canned meat packers:

Our investigation of the Canned and Potted Meat part of the packing industry showed that the methods used make the use of preservatives unnecessary, and indicated that no preservatives or artificial coloring is now used by the Canned Meat packer.

The meat is first partially cooked in large kettles, then the fat and bone is trimmed off and the meat packed into tins. The air is then withdrawn with vacuum pumps and the cans sealed in vacuum. Next they are put into large cookers, where the cooking process is finished. In the packing of some pro-

## UNRELIABILITY OF EYESIGHT.

Geneva Professor Gives a Startling Demonstration.

Professor Claparede, of the Geneva University, Switzerland, has been making some interesting experiments to prove the unreliability of eye-witnesses of an event, and also to prove the great deterioration in the powers of observation due to the high pressure of modern life.

Recently in one of his classes the professor brought in a man who was masked and his body hidden by a white shroud. The "unknown" stayed ten seconds in the classroom, made some signs and then walked out.

A few days later the professor asked his pupils to pick out the unknown's mask, which was placed, with ten others, on a table. Four students only out of twenty-four, chose the right mask, although it differed in color and size from the others. Ten pupils chose different ones, and eight confessed that they were unable to decide.

"You see," said Professor Claparede to his class, "how unreliable is the evidence of an eye-witness of an event, even in a law court and on his oath."

During further experiments the Swiss savant came to the conclusion that not one person in nine can give a correct description of a man whom they have looked at for ten seconds. Women, he believes, are much closer observers than men.

## BEWARE OF "BY-AND-BY."

If you have hard work to do,  
Do it now.

To-day the skies are clear and blue,  
To-morrow clouds may come in view,  
Yesterday is not for you;  
Do it now.

If you have a song to sing,  
Sing it now.  
Let the notes of gladness ring  
Clear as song of bird in spring,  
Let every day some music bring;  
Sing it now.

If you have kind words to say,  
Say them now.  
To-morrow may not come your way,  
Do a kindness while you may,  
Loved ones will not always stay;  
Say them now.

## A BAD SHOWING.

"That man has a very shady record."  
"Dear me! What does he do?"  
"Puts up awnings."

## A BROAD STATEMENT.

Dr. Leonhardt's Hem-Roid will cure any case of Piles.

This statement is made without any qualifications.

It is in the form of a tablet.  
It is the only pile remedy used internally.

It is impossible to cure an established case of Piles with ointments, suppositories, injections or outward applications.

A \$1,000 guarantee with every package of Dr. Leonhardt's Hem-Roid.

\$1.00, all dealers, or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

Old Gent (proposing health of happy pair at the wedding breakfast): "And as for the bridegroom, I can speak with still more confidence of him, for I was present at his christening. I was present at the banquet given in honor of his coming of age, I am present here today, and I trust I may be spared to be present at his funeral."

Two adjoining sections, selected lands in Saskatchewan, only 8 miles from two railways, C.P.R. & G.T.P. Strong soil, 90 per cent. plough land, spring creek, no sloughs. About 40 miles N.E. of Indian Head. Price \$10.50 per acre. Write for map and full particulars.

R. PARSONS, 91 Wellesley Street, Toronto, Canada.

## SOME SORT OF ANIMAL.

"That Mr. Slopay has finally skipped without paying his board bill," said Mrs. Starvem.

"Well," replied Mr. Starbord, "you ought to be glad. You've frequently spoken to him as an elephant on your hands."

"Yes, he certainly behaved like an elephant. He took his trunk with him."

## THE WAY TO MANAGE IT.

"The clean food question is on the carpet just now."

"There ought to be some sweeping arguments to dispose of it."

## A NATURAL INQUIRY.

Mike — Well, Hooligan's shopped worrying about his life insurance policy.

Pat — Phat did he do av?

## LONG ON NAME.

Office Boy: "Want to see the guv'nor? What name shall I say?"

Visitor: "Herr Schweitzsalsburg-hausen."

Office Boy: "Oh, I shan't be able to pronounce all that. I'm leaving at the

The world extends the glad hand to the lucky man, but all it hands the victim of tough luck is a little cold sympathy.

# Libby's Food Products

make picnics more enjoyable by making the preparations easier.

Easier to carry; easier to serve; and just right for eating as they come from the can. Libby's cooks have first pick of the best meats obtainable—and they know how to cook them, as well as pack them.

If you're not going to a picnic soon you can make one tomorrow at your own table by serving some sliced Luncheon Loaf.

trimmed off and the meat packed into tins. The air is then withdrawn with vacuum pumps and the cans sealed in vacuum. Next they are put into large cookers, where the cooking process is finished. In the packing of some products it is necessary that the cans be reopened and the steam allowed to escape, the vent hole being immediately resealed while the gods are hot, so as to retain the vacuum.

The entire process is quite similar to that used by the family cook when putting up fruits and vegetables, except that meats are sealed in tin cans instead of being put in glass jars. We found that the solder in making the cans and in sealing them is all placed on the outside of the can and does not come in contact with the contents.

We were informed that much of the cause for complaint in canned meats was because of the mistaken idea that the goods would keep in perfect condition after they had been opened. This would be the fact if they were preserved with chemicals, but as they are only kept in condition because of being sealed in vacuum tins they spoil just as readily as fresh meats do after they have been opened and exposed to the air, but will keep indefinitely if the can is not punctured. It is also a well-known scientific fact that decaying meat generates a gas which will explode any package which is hermetically sealed.

Sanitary Inspector Hedrick submitted to Commissioner Whalen his analysis of conditions in the Libby, McNeill & Libby plant. He found "with reference to general conditions, that the floors, halls, stairs, tables, etc., are kept clean" and "that the entire department-viewed from our standpoint—was in a satisfactory condition. All workrooms are light, and have good ventilation."

#### ALL DOUBTFUL.

"Dat was a great wedding, Sam."  
"Deed it was."  
"Well, who was the lucky man?"  
"Dat's hahd to say. De groom thought he was de lucky man till he squinted et de bride and foun' out she had wrinkles lak a weeder map."

"Huh!"  
"Den de best man thought he was de lucky man till he foun' out de rabbit's fool de groom had gibben him was er cat's fool."

"Ian's! Den de preacher mus' hab been de lucky man?"

"Well he kinder puffed up det way till arter de ceremony en den he disobebed dat de bill de groom nad passed him as a fee was bogus."

#### PEACEFUL AND SOOTHING.

"You shall endeavor to control yourself. Your violent temper has a bad effect on your heart. Get out into the open air. Try the peaceful and soothing effects of a good baseball game."

"I have tried it. They won't let me in any more."

"Why not?"

"Three times I tried to kill the umpire."

#### IN THE PACKING HOUSE.

The Boss—Say, what are you stoppin' for?

The Foreman—We have utilized all the material, sir. There's nothing left us but patience.

The Boss—Well, utilize that, too.

## CONTINUE

Those who are gaining flesh and strength by regular treatment with

Smith: "Brown is getting to be quite absent-minded of late, isn't he?" Griffin: "Why, I haven't noticed it." Smith: "Well, he is. The other day he happened to look in a mirror at home, and he asked his wife what she was doing with that fellow's picture in the house."

For the Overworked.—What are the causes of despondency and melancholy? A disordered liver is one cause and a prime one. A disordered liver means a disordered stomach, a disordered stomach means a disturbance of the nervous system. This brings the whole body into subjection and the victim feels sick all over. Parnelee's Vegetable Pills are a recognized remedy in this state and relief will follow their use.

Harry, aged four, while visiting his grand-parents in the country, heard a mule bray for the first time. "Goodness!" exclaimed the little fellow, "That horse has whooping cough awful."

Lingering, stubborn old sores are erased from the skin by Weaver's Cerate. The good work of blood-cleansing is completed with Weaver's Syrup.

You can always make a satisfactory deal with an honest man—unless you are in the dishonest class.

A lady writes: "I was enabled to remove the corns, root and branch, by the use of Holloway's Corn Cure." Others who have tried it have the same experience.

Miss Dauber "I can generally tell what a person's profession is by looking at his face." Miss Gushe (sitting for a portrait): "Now, isn't that a coincidence? Do you know, the very first time I saw your face I said to myself, 'I'm sure that woman paints!'"

No one need fear cholera or any summer complaint if they have a bottle of Dr. J. D. Kellogg's Dysentery Cordial ready for use. It corrects all looseness of the bowels promptly and causes a healthy and natural action. This is a medicine adapted for the young and old, rich and poor and is rapidly becoming the most popular medicine for cholera, dysentery, etc., in the market.

#### THE GREAT NORTH COUNTRY.

Nimrod was a mighty hunter, but had he hunted in the "Temagami" region he would have been a mightier one. Nimrod hunted for glory, but Temagami hunters hunt for game. Those Indians who made the first canoe of birch bark long ago, were our greatest benefactors. The children of these Indians know the canoe, and they know how to use it, and if you go to Temagami this summer they will paddle your canoe in their own superb way. They will be the best guides you ever had. Students who camp in summer along the Temagami lakes are able to do two years' work in one. Finest of fishing and hunting. Easy of access by the Grand Trunk Railway System. For information and beautiful descriptive publication sent free apply to J. D. McDonald, Union Station, Toronto, Ont.

He—They say that people who marry soon grow to look alike." She—"Then you must consider my refusal as final."

"Here!" roared the old lawyer to his son, studying law with him; "you told me you had read this work on Evidence and yet the leaves are not cut." "Used X-rays," yawned the versatile son; and the father chuckled with delight as he thought what a lawyer the boy would make.

An old lady who was in the habit of saying after any event that she had foretold it was one day "sold" by her husband, who had got tired of her eternal "I told you so!" Rushing into the house, he dropped into a chair, raised his hands and exclaimed: "Oh, my dear, what do you think? The old cow has gone and eaten the grindstone!" "I told you so!" I told you so!" was the reply. "You always let it stand out of doors."

Office Boy: "Want to see the gov'nor? What name shall I say?"

Visitor: "Herr Schweitzsalsburg-hausen."

Office Boy: "Oh, I shan't be able to pronounce all that. I'm leaving at the end of the week."

To Kill Flies.—Put some beer and molasses into saucers and place them about the rooms. Change the contents of the saucers every third day.

Worms derange the whole system. Mother Graves' Worm Exterminator deranges worms and gives rest to the sufferer. It only costs 25 cents to try it and be convinced.

"I suppose," said the timid young man, "when you recall what a handsome man your first husband was, you wouldn't consider me for a minute?" "Oh, yes, I would," replied the widow, instantly; "but I wouldn't consider you for a second."

Children who are Pale and peevish want something that will make good rich blood; there is nothing to equal "Ferrovin" for this purpose. Mothers, be sure to get a bottle.

"Last night, George, you told me you loved me more than tongue could tell, and, oh, George, that wasn't true!" "Why darling, what do you mean?" "I mean that it wasn't more than my little brother's tongue could tell. He heard it all!"

Always a Good Friend. — In health and happiness we need no friends, but when pain and prostration come we look for friendly aid from sympathetic hands. These hands can serve us no better than in rubbing in Dr. Thomas' Electric Oil, for when the Oil is in the pain is out. It has brought relief to thousands who without it would be indeed friendless.

Host (at a musical reception): "My goodness, just listen to that prima donna. She has pretty cool impudence. I had to pay her \$100 to come here tonight, and now she's singing 'I Know Not Why I Sing.'"

# SAILOR SHOOT ADMIRAL

## The Much-Hated Commander of the Black Sea Fleet.

### DOOMED BY REVOLUTIONISTS.

A despatch from Sebastopol says: An attempt was made on Wednesday afternoon to assassinate Admiral Chouknin, the commander of the Black Sea fleet. No hope is held out for his recovery. The bullet pierced his lung. The would-be assassin is a sailor, who hid in the bushes and shot at the Admiral as he was walking in the garden of his villa. The culprit has not been apprehended. He is thought to be one of the sailors of the battleship Otchakoff, and his act is supposed to be in revenge for the execution of Lieut. Schmidt, the revolutionary leader.

Admiral Chouknin was universally hated by his sailors, and at the time of the execution of Schmidt the revolutionists condemned him to death, 100 of their number pledging themselves to carry out the sentence. This is the second attempt since Schmidt's execution, March 19, of this year. The first attempt was made by a woman, and after her effort had failed Admiral Chouknin ordered her to be killed on the spot, and his orderlies brutally carried out the sentence in the courtyard.

For this the Admiral was again condemned to death by the revolutionists. His name was never mentioned among his sailors unless it was accompanied by curses, on account of his overbearing and severe manner.

### BOMBS IN CZAR'S GARDEN.

A despatch from St. Petersburg says: There was wild consternation at the Imperial Palace at Peterhof on Tuesday following the discovery in the garden of that palace of several bombs filled with dynamite. The excitement and dread were indescribable. It was obvious that the bombs must have been placed there by some one connected with the palace, either as officer, guard, or servant, and everyone equally was under suspicion. Gen. Treppoff, the commandant immediately put in motion all the machinery of his office to discover the culprit, but thus far without result. In the meantime the person of the Czar is being more rigidly guarded than ever, an increase of precaution is possible.

### 22,000 ROUBLES STOLEN.

The Times' correspondent at St. Petersburg cables as follows:—During the outrage perpetrated on Wednesday at the Admiralty two porters, carrying 22,000 roubles to pay the dockyard hands, were shot inside the main entrance, and the money was taken by the assailants who coolly decamped, passing a strong force of police at the gates. One of them told the policemen

to hurry inside the building, saying, "There's murder afoot there." The police ran inside, and the assailants escaped. The porters were seriously injured. The police have warned all the banks to arm employees and keep watch on all strangers, as it is known that another robbery has been planned.

### TROUBLE IN THE FLEET.

A despatch from St. Petersburg says: There are rumors of renewed troubles in the Black Sea fleet. It is said that mutinous sailors at Sebastopol were discovered sending wireless messages to the crews of five warships on the Caucasian coast. It is feared that the latter will seize the ships.

Grand Duke Nicholas Nicolaievitch, commander of the guards corps and the troops in the military district of St. Petersburg, has tendered his resignation to the Emperor on account of the Preobrazhensky affair, but his Majesty declined to accept it.

The police have not found any trace of the men who robbed Assistant Casier Gasparovich, of the Admiralty, on Wednesday, but there is reason to believe that they were former workmen from Port Arthur, who turned revolutionists on account of the treatment to which they were subject there.

### DIED OF HIS WOUNDS.

A despatch from Sebastopol says: Vice-Admiral Chouknin, commander of the Black Sea fleet, who was shot on Wednesday, supposedly by a sailor of the battleship Otchekoff, died on Thursday morning, without having regained consciousness.

### GENERAL SHOT IN CZAR'S PARK.

A news agency despatch to London from St. Petersburg says that Gen. Kozloff, of the headquarters staff, was shot and killed with a revolver in the Czar's park at Peterhof, on Saturday. The assassin was arrested. He was well dressed. So far he has not been identified. Gen. Kozloff was in no way connected with the political agitation. The motive for the murder is as mysterious as the assassin's entry into the closely guarded park. The St. Petersburg correspondent of the Times, in reporting this shooting of Gen. Kozloff, says he had the misfortune to resemble Gen. Treppoff in personal appearance. Gen. Kozloff was a well-known military writer. The murderer carried a photograph, at which he gazed attentively before firing, as if comparing it with Gen. Kozloff. It was a picture of Gen. Treppoff.

tie belonging to a feminine wardrobe. It is at its best made of gray yarn. The weaver has accomplished the feat of providing plenty of fullness at the bust and equips it with a sailor collar and shield all of one piece with the sweater. It closes in practical fashion in front and has a peplum knit to fit the hips smoothly and not roll up in unbecoming bunches, a fault common to the sweater proper. It is possible to wear this knit waist belted beneath the skirt.

### IF THE OWNER SO SELECTS.

The sleeves are long and cuffed, but can be rolled as high as the wearer wishes without discomfort.

In yachting, dress is of first importance, after the yacht. If one be not subject to seasickness, the sport is one of the most fascinating of summer

# DOMINION PARLIAMENT

## Second Session of Tenth Parliament Is Concluded.

The second session of the tenth Parliament of Canada is now a thing of the past, prorogation taking place shortly before 1 o'clock on Friday. His Excellency was nearly five minutes ahead of the appointed hour. Not more than half the seats of the Senators were occupied by ladies, although the galleries were well filled. After assenting to some 96 bills Parliament was prorogued with the following speech from the throne:

### THE SPEECH FROM THE THRONE.

Honorable Gentlemen of the Senate: Gentlemen of the House of Commons:

In relieving you from further attendance in Parliament I desire to thank you for the care and assiduity exhibited in the discharge of your laborious and exacting duties.

Your invitation to His Majesty the King to visit this part of his dominions was duly forwarded to Buckingham Palace. That it would be a source of great rejoicing in Canada if His Majesty would favorably entertain the invitation is confirmed by many similar addresses adopted in the several provinces, cities, and towns, all expressing the hope that his Majesty may honor us with another visit.

It is very gratifying to note that Canada continues to enjoy a prosperity rarely equalled in the history of nations. The volume of exports and imports during the year just closed exceeds that of any previous record. The revenue also shows a remarkable increase, the receipts on account of consolidated fund having doubled in the last ten years.

The large number of private bills that have received approval, having for their object the incorporation of railway and other industrial enterprises, affords additional evidence of the general prosperity prevailing over the Dominion.

The stream of immigrants seeking homes in the Western provinces continues to flow in increasing volume, and owing to the favorable conditions now existing in Alberta and Saskatchewan their vacant lands are being rapidly taken up.

### ACTS OF PUBLIC UTILITY.

Several Acts of great public utility have been added to the laws in the session now drawing to a close. Among the number, I am glad to note:

An Act for the better observance of the Lord's Day.

An Act in restriction of usury.

An Act to secure the better marking of fruit.

An Act requiring that certain articles containing a proportion of gold and silver when offered for sale should be honestly marked.

An Act relating to immigrants and immigration, which, among other provisions, will enable the authorities to deport undesirable persons.

It is earnestly to be hoped that your example in passing the Act setting apart large areas for forest reserves will be followed by those provincial legislatures having jurisdiction over their public domain, and that a system of re-forestation may be adopted in all parts of the Dominion, thereby preserving the uniform flow of our rivers and of our valuable water powers.

In view of the many important Acts passed and of the numerous amendments made to existing laws during this session, it has been deemed expedient to stay the issue of the volumes of the revised statutes, in order that the recent legislation may be embodied.

Gentlemen of the House of Commons: I thank you in his Majesty's name for the supplies you have so liberally voted.

Hon. Gentlemen of the Senate: Gentlemen of the House of Commons: A copy of the convention regarding commercial relations between Japan and

# WINDSOR MAN MURDERS WIFE.

## Attempt to End His Own Life With the Same Pistol.

A Windsor, Ont., despatch says: His courage bolstered up to the murder point by whiskey, Christopher Spindleman on Saturday night shot and killed his wife as she sat on a camp stool in front of their residence at 152 Wellington Avenue, Windsor. Seven minutes after the bullet crashed through the woman's head she was dead, slain in the sight of four of her children. One of them, Robert, who boarded near by, and witnessed the crime, ran to the scene and snatched the revolver away from his frenzied father just as he was about to end his own existence. Struggling desperately, the two men rolled about the lawn. Youth triumphed, and the murderer was overcome and held until the arrival of Policeman Maitre.

"Let me look at her once more," begged Spindleman.

Maitre led him back to the lawn where the woman lay, dead.

"That is just where I intended to shoot her," said Spindleman, heartlessly. Then he was led away to the police station.

The tragedy was the result of a man's life devoted to whiskey and to abuse of his wife. Her recriminations led to bitter quarrels, which grew so in frequency that Robert, the son, left home and boarded with neighbors.

### OUTLOOK IS GOOD.

## Western Wheat is One Week Ahead of Last Year.

A despatch from Winnipeg says: The wheat has passed another critical week and the crop report of the Canadian Northern shows that the outlook is rosier than ever for a bumper yield throughout the West. With three more weeks of favorable weather, the farmers will be busy reaping the biggest crop in the history of the country. The reports were practically all of an optimistic character. "Prospects never better," "a bumper yield," "outlook magnificent," were some of the enthusiastic comments. From Emerson comes the prophecy of a yield of forty bushels to the acre.

The most favorable report for Manitoba came from Dauphin and the surrounding district. The agent exhausted his superlatives in describing the outlook. At Gilbert Plains, the district which Prof. Mavor describes as not arable, the prospects are for a magnificent yield. All the bulletins agree that the wheat is a week ahead of last year. The only district that reported rust was Belmont. It is expected the damage will not be heavy and the rust is not widespread.

### TEN THOUSAND MEN AT WORK.

## Work on Sections of Grand Trunk Pacific Is Being Rushed.

A despatch from Montreal says: A meeting of the directors of the Grand Trunk Pacific was called for Friday but was postponed. One of the directors, however, is authority for the statement that already upwards of ten thousand men are at work on various sections of the road, under contract. It is said that fully twenty thousand men could be employed if they could be obtained, and it is hoped that the employment agencies will be able to send that many by early in September.

There is one link between Winnipeg and Portage la Prairie, a distance of 54 miles, which has not been put under contract. This is the one break in the new Transcontinental's operations from Port Arthur to Edmonton. Some believe, therefore, that this means that for that section an arrangement will be made with the Canadian Northern for running rights.

### BOLD HORSE THIEVES.

## Fashion Hints.

### FASHIONS OF MIDSUMMER.

It is only the reasoned person who is able to determine at a glance whether a new waist or skirt will be practical for outing uses. But at this point in the season, unpractical things are pretty well eliminated and only the prettiest and nattiest of sporting clothes are

new waist or skirt will be practical for outing uses. But at this point in the season, impractical things are pretty well eliminated and only the prettiest and nattiest of sporting clothes are shown.

Tennis is receiving more attention this year than it has for several seasons past. Country maidens play the game on hastily improvised courts on their own back lawns or their neighbors', or more fortunately are members of some flourishing lawn club, where tea and ices after a hotly contested game invite one to study gowns and people. Here it is that one will see the smartest exhibitions of both tennis and outing costumes. White rules, with occasional touches of crisp and variegated colorings to give character to the whole. Tennis suits are in the minority now, but promise to become as well established as the riding habit, golf or yachting costume.

A few suits noticed show much originality of design. One of the best has a blouse that is loose and unconfined by belt or waist band, but fits well by reason of its darted sides. It allows a free and untrained arm movement without leaving any hunched fullness between the player's shoulders, a common fault of many belted shirts. This suit is made of white linen duck, a fabric which, by the way, must never be starched as it spoils its appearance, while its own weight is heavy enough to obviate any necessity for extra stiffening. It is also porous and, therefore, cool and is practical for tennis for this reason.

#### THE SKIRT OF ANKLE LENGTH

is a gored circular, trimmed with bias folds of the duck that are merely turned and stitched to the skirt upon one edge only. A thin mull underwaist, shaped like a corset cover is worn with the blouse. This slips on over the head is sleeveless and is made with a low round neck, shirred into shape. The over skirt is cut to show a low neck, bound with a broad sailor collar and is made with short elbow sleeves. It is trimmed with rows of cotton soutache braid and knotted with scarlet Windsor tie. The effect suggests a clever little Bolero jacket.

The usual tennis dress, however, consists of separate short skirts, made of white flannel, Danish cloth, pique or duck, accompanied by separate shirts of plain or colored madras, pique or flannel. The latest skirt lines also show China and pongee silks. These last materials are made into short-sleeved blouses, showing rolled Eton collars, buttoned high or turning back to show a well-shaped throat. In the latter instance, loose flowing, colored silk ties are worn. These silk waists will tub as well as those of linen and madras, and are receiving as much attention from golfers as they are from tennis devotees. The favorite skirts used by the players of golf are simply made linen or crash blouses for hot weather, with flannels, plain colored gloria silks and plaided materials used for cold and drizzly days or for later fall play.

#### A SMART GOLF BLOUSE

recently designed as a swagger, double-breasted and pear-buttoned white linen affair made with well-tailored revers folding low on the bust and with long, full sleeves shaped into wide turned cuffs. Another novelty is the Gorky waist, the shape, name and material of which receives its personality by duplicating in style and material the blouse worn by the Russian novelist. It is made of dark blue flannel, although it is attractive when fashioned of blue or black foulard, satin, pongee or linen. It is shaped like the usual Russian blouse, but not of the Buster Brown variety, as it is very full except at the neck and wrists. At these points it is fitted snugly by means of a number of small white or black pearl buttons. A wide strip of leather, plain or ornamented, belts the blouse at the waist, while the lower portion may be worn outside or under the skirt top.

For canoeing and camping jaunts another original idea in waists is shown in knitted form. It is meant to cover all the requirements of the flannel shirt and fill its place, and represents the evolution of the clumsy looking, oldtime sweater into some semblance of an ar-

rested. In yachting, dress is of first importance, after the yacht. If one be not subject to seasickness, the sport is one of the most fascinating of summer pleasures and it is also the one where on appropriate suit is most necessary. Here, at least, the separate waist is not. The practical, good, old blue serge blouse is used always for everyday serious yachting, despite the number of new models shown, and is as bright with braids and embroidered naval devices as ever. Those of the Pel- Thompson type that copy the naval model occupy first place in the wardrobes of young and old alike. Any woman is sure to look her prettiest when arrayed in a costume of this type and will present an especially chic appearance if she wears a smart white or blue yachting cap perched on her high-piled tresses.

For social week-end yachting jaunts white duck and pique are in demand and are much favored. A big little suit made of white duck and showing a short-sleeved jacket with wide, blue collar and cuffs is new in design, and exceedingly jaunty with its blue accessories. Unlike tennis costumes, sailor, golf and canoeing dresses may be made of colored as well as white materials. And shoes and hats peculiarly constructed to answer the requirements of each sport are to be found in the up-to-date shop.

#### A DESPERATE FIGHT.

##### One Hundred Iron Workers Attacked Three Special Policemen.

A despatch from New York says: Eight storeys above the street, on a flimsy flooring of planks laid across girders, nearly a hundred union iron workers employed on a hotel building going up at 59th street and 50th avenue on Wednesday attacked three special policemen kept there to prevent trouble between the union workmen and non-union workmen employed on the same building. One of the special policemen, Michael Butler, was fatally injured, having sustained a fracture of the skull, a broken leg and internal injuries. The other two men were severely but not fatally hurt. Later one of them identified four of the union iron workers who had attacked him, and they were arrested. The three policemen, Butler, John Cullen and Wm. O'Toole, were set upon just before the noon hour. Butler, the most seriously wounded, was thrown through an open space. He would have fallen through the eight storeys but for a few planks laid across the sixth floor framework, which caught his body and saved him. Later the four prisoners were taken to the bedside of Special Policeman Butler, whom the surgeons by powerful restoratives were able to revive for a few minutes. He identified four men as having been among those who assaulted him. Butler died a few minutes later. Fifty policemen are now guarding the non-union men at work on the building.

#### CANADIANS WON KOLAPORE CUP.

##### Were Nine Points Ahead of the Nearest Competitor.

A Bisley, England, despatch says: Canada won the Kolapore Cup on Friday. The scores were:—Canada, 729; the Mother Country, 720; India, 705; the Malay States, 704; and Guernsey, 692.

#### LAST OF THE FAMILY.

##### Edward W. Sentell Dies at Salisbury, England.

A Salisbury, Eng., despatch says: Edward W. Sentell of Brooklyn, N.Y., one of the passengers injured in the terrible railroad disaster of July 1, died at 11 o'clock on Saturday evening. The entire family is now dead as a result of the accident, including Mr. and Mrs. Sentell, their son and two daughters. All bodies are in a private mortuary here.

voted. Hon. Gentlemen of the Senate: Gentlemen of the House of Commons: A copy of the convention regarding commercial relations between Japan and Canada has now been received. The treaty has been duly ratified and exchanged, thereby giving Canada material advantages in our trade with Japan. I now beg to express the hope that on your return to your several homes you will find evidences that the coming harvest will be bountiful, thus assuring another year's prosperity throughout the Dominion.

#### 20,000 MEN CUT OFF.

##### Haldane's Proposed Sweeping Reduction of British Army.

A London despatch says: The Government's long-looked-for statement on army reform was made in the House of Commons on Thursday. Mr. Richard Burdon Haldane, Secretary for War, announced that it was proposed to reduce the army by 20,000 regulars. Prefacing his statement, Mr. Haldane said that there was no member of the House who did not regard the state of the national forces as highly unsatisfactory. He regretted the cost and the crushing burden of armaments, and thought that this great, rich, and powerful country might take the lead in reduction. He said that the proposal was to make a large reduction of men and cost, and yet leave the army, as a fighting organization, improved and strengthened. There would be no reduction in the cavalry.

It was proposed, Mr. Haldane continued, to have an expedition force of 150,000 men mobilized in the event of war and capable of expansion or reduction, so that if other nations should reduce their forces Great Britain could do the same, without impairing the efficiency of the army. It was proposed to withdraw two battalions from Malta, one from Gibraltar, and one from Ceylon.

There would be no reductions in India under the proposed new arrangements. Fifty-two battalions will be maintained there, as at present, but the colonies hereafter will have 25, instead of 32 battalions, and Great Britain 69, instead of the present 72.

Mr. Haldane said he wished he could see the day when the curse of war would be no longer existing; but until that time came, the only thing to be done was to see that every penny spent on the army was spent in obtaining fighting efficiency.

#### HARVEST PROSPECTS GOOD.

##### Never Better Since Beginning of Grain Cultivation in West.

A despatch from Montreal says: The Molsons Bank received from the managers of its branches throughout the country a very full report upon the condition of the crops in their sections. The Molson's Bank reports number about a dozen from the Province of Quebec and three dozen from Ontario, besides a large number from Manitoba and the Northwest.

The manager of the Winnipeg branch summarizes the 135 reports he received from different parts of the West as follows:—"Never since the beginning of grain cultivation in Western Canada have the prospects for an abundant harvest been more encouraging than they are this year."

#### MOTOR OMNIBUS UPSET.

##### Ten Killed and Twenty Injured Near Brighton, England.

A Crawley, England, despatch says: Ten persons were killed and 20 injured by the overturning of a motor omnibus at Handcross on Thursday. The vehicle was en route to Brighton, the seashore resort, and was descending a steep hill, when the brakes failed to work. It ran away down the hill, and was upset at the bottom.

running rights.

#### BOLD HORSE THIEVES.

##### Attempt to Shoot a Manitou, Manitoba, Farmer.

A Manitou, Manitoba, despatch says: Horse thieves are again operating in this section and along the border of Dakota, and the desperate character of the gang was evidenced on Wednesday night, when for the second time within a month they visited the stable of H. Brown, who farms south of here, and in addition to attempting to steal his fancy team of drivers they nearly murdered the owner. Mr. Brown heard them and went out. On his appearance they fled, but he found his horses bridled and ready for the road. He remained on guard several hours, and then went to the house again. Half an hour later he opened his door and looked out, and someone fired from ambush nearby, putting a bullet through his coat. Brown caught sight of the horse-thief and returned the fire, and pursued him, without avail. Next morning he found a plank saturated with blood near where the man disappeared, indicating that he had been wounded.

#### AN ARMY OF IMMIGRANTS.

##### The Plans of the Salvation Army for Next Year.

A despatch from Toronto says: Commissioner Coombes of the Salvation Army, who called on Premier Whitney at the Parliament buildings on Wednesday, says that the Army expects to bring 25,000 British immigrants to Canada next year. Its work in this regard for this season is practically over, the total of immigrants brought here being about 12,000. The commissioner says that the great majority of the Army's immigrants are doing well in Canada. Letters are constantly received at headquarters from the new settlers, expressing satisfaction and reporting steady progress.

#### ALARM ON THE RAND.

##### Natives Contemplate Rising and Servants Warn Their Employers.

A despatch from Johannesburg says: The disquieting rumors that the natives of the Rand contemplate an uprising soon are borne out by the fact that native servants have warned their mistresses to retire to places of safety. Similar rumors have been circulated in the Reef, but the police ridicule them. However, much anxiety is expressed. A paper read at a conference of the Ethiopian Church, embodying reports from the various districts, says an uprising has been openly advised.

#### PETROLEUM AND THE PLAGUE.

##### Use of Crude Oil in Bombay Has Aided in Extirpation.

A despatch from Bombay says: Dr. Turner, health officer of Bombay, on Wednesday successfully demonstrated the extraordinary efficiency of crude petroleum as a plague disinfectant. It is believed that his experiments have materially advanced the prospects of the extirpation of the plague.

#### PURE NATIVE SILVER.

##### Encouraging Find East of Portage Bay on Montreal River.

A Cobalt despatch says: One of the most encouraging finds of the season was made on Tuesday about three-quarters of a mile east of Portage Bay, on the Montreal River. This is in the famous Coleman township. The samples brought in were pure native silver, and gave great promise of this becoming a very rich mine. A small find of ruby silver has also been made on the Montreal River, between Gillies depot and Lathford.

# LEADING MARKETS

## BREADSTUFFS.

Toronto, July 17.—Flour—Ontario—90 per cent. patents are quoted at \$3.10, buyers' bags, for export. Manitoba—\$4.40 to \$4.60 for first patents, \$4 to \$4.10 for seconds and \$3.90 to \$4 for bakers'.

Bran—Ontario—Dull, \$15 to \$15.50 in bulk, outside; shorts, \$17.50 to \$18.

Wheat—Ontario—No. 2 white and red is held at 80c, with 79c to 79½c bid; spring, 75c, and goose, 73 to 74c.

Oats—Easier, No. 2 white quoted at 38 to 39c outside.

Rye—Nominal, 62 to 64c outside.

Barley—Nominal, 49 to 51c outside for No. 2.

Peas—Dull, 80 to 82c outside.

Wheat—Manitoba—Unchanged, 85c for No. 1 Northern and 83c for No. 2, lake ports.

Corn—American No. 2 yellow, 59½ to 60c, Toronto.

## COUNTRY PRODUCE.

Butter—Receipts of butter continue fairly heavy and prices are unchanged. Creamery, prints ..... 20c to 21c do, solids ..... 19c to 20c Dairy, prints ..... 16c to 17c Rolls ..... 15c to 16c Tubs ..... 14c to 16c

Cheese—12½ to 12¾c per lb. Eggs—18 to 19c per dozen.

Potatoes—Quotations are unchanged at \$1 for Ontario and \$1 to \$1.10 for Quebec.

Baled Hay—No. 1 timothy is quoted at \$10 per ton in car lots here and mixed at \$7.50.

Baled Straw—\$5.50 to \$6 per ton for car lots here.

## MONTREAL MARKETS.

Montreal, July 17.—Oats—No. 2, 43 to 43½c; No. 3, 42½c; No. 4, 41½ to 41¾c. Peas—73c f.o.b. per bushel, 78 per cent. at 51c.

Corn—No. 3 mixed, 56½c; No. 3 yellow, 57½c ex track.

Flour—Manitoba spring wheat patents, \$4.60 to \$4.70; strong bakers', \$4.10 to \$4.20; winter wheat patents, \$4.10 to \$4.30; straight rollers, \$2.90 to \$4.20; do, in bags, \$1.85 to \$2; extras, \$1.50 to \$1.70.

Millfeed—Manitoba bran, in bags, \$16.50 to \$17; shorts, \$20 to \$21 per ton; Ontario bran, in bulk, \$17; shorts, \$20 to \$20.50; milled mouillie, \$21 to \$25; straight grain mouillie, \$25 to \$27 per ton.

Rolled Oats—Per bag, \$2.10 to \$2.20 in car lots.

Cornmeal—\$1.30 to \$1.40 per bag.

Hay—No. 1, \$9.50; No. 2, \$8.50; clover, mixed, \$7.50; and pure clover, \$7 to \$8. Provisions—Barrels, short cut, mess, \$23.50; half barrels do, \$12; clear fat back, \$22.50; long cut heavy mess, \$21.50; half barrels do, \$11.25; dry salt long clear bacon, 11½ to 12½c; barrels, plate beef, at \$13.50; half barrels do, \$7.25; barrels heavy mess beef, \$11.50; half barrels do, \$6.25; compound lard, 7½ to 9½c; pure lard, 11½ to 12½c; kettle rendered, 12½ to 14c; hams, 14 to 15½c, according to size; breakfast bacon, 16 to 17c; Windsor bacon, 16 to 16½c; fresh killed abattoir dressed hogs, \$10.75 to \$11; alive, \$7.75 to \$8 per 100 pounds.

Eggs—19 to 20c for selected stock, 13 to 14c for No. 2's, and 16½c for straight receipts.

## BUFFALO MARKETS.

Buffalo, July 17.—Flour—Quiet. Wheat—Spring, strong; No. 1 Northern, 83c. Corn—Firm; No. 2 yellow, 58c; No. 2 corn, 56½ to 57c. Oats—Dull; No. 2 white, 42½c; No. 2 mixed, 40c. Canal freights—Steady.

# About the Farm

## CHICKENS IN HOT WEATHER.

If the best results are desired, growing chicks should have proper care and attention during the summer months, writes Mr. H. E. Haydock. It is important that clean and comfortable quarters be provided for them. Coops so placed as to get the sun in the morning and shade in the afternoon will be found desirable. This will prevent the coop from getting so thoroughly heated as to make it uncomfortable at night. Habit is strong in chicks and they will return to an overheated or full coop, when they should be more comfortable and roomy quarters. They may not die if left to themselves; they will probably take to the fence or trees to escape from such a coop, but they will pay the penalty in poor growth, lack of vigor and weakness, either at that time, or later in life, for this lack of care on the owner's part.

It is well to remember that chicks grow fast and a coop that had been plenty large enough for brood when young, will soon become too small, and overcrowding and in consequence injury to their health and growth will result. More room should be given at once if overcrowding is noticed, either by providing larger coops or dividing the broods. If coops and brooders are cleaned frequently, little reason will be found to complain of that great pest, lice, which otherwise might be the cause of weakness and stunted growth. Not only is it important that the coops be kept clean, but the ground in their immediate vicinity should not be allowed to become foul.

It will be found best to give growing chicks as much range as possible. If necessary to confine them, have as large yards as can be provided. Chicks should be fed from the older fowls. If all are fed together, they will be apt to get an insufficient amount of food and the older fowls will receive too much and in consequence, become too fat. The chicks seem to get plenty of grain, on account of their activity, but when one thinks that this activity is in a great measure caused by their having to dodge the pecks of older fowls, it will be seen that they are not allowed to pick up as much food as they have the appearance of doing. Regularity in feeding is another important matter. If chicks are fed at certain times when on free range, it will be found that they will be near or about the feeding place at the time and all will share alike, whereas if they are fed any old time, some may have wandered off in search of bugs and insects and therefore miss their portion.

While I consider that after a certain age a mash fed to the growing chicks is a help to their development, if given for a change and in moderation, it will be found best to confine oneself in the main to dry feeding, as in the earlier stages of a chick's life.

One of the most important things to be considered during the summer is the water supply. The water should be kept in some vessel or fountain that will prevent the chicks from walking in it, or else the water should be changed frequently. The fountain should of course always be placed in a shady spot and the water changed often.

It is well to remember in raising pure-bred fowls that a growing chick, as it nears maturity, will in a measure molt gradually, so that it does not do to condemn a chick at once for a few darker or lighter feathers than standard, as these will be in all probability replaced by the right colored feathers when the chick reaches maturity.

# HEALTH

## COLD BATHS.

Should young girls take cold baths? This is a question many physicians are asked, and it is variably answered, though the majority of doctors are agreed that the benefit derived from them depends entirely upon the constitution of the individuals.

One physician who endorses cold baths declares that they cannot be taken indiscriminately, and should never be attempted by a girl who is not strong physically and whose nerves are not capable of standing the shock and quickly reacting.

A cold bath taken in the morning just after rising is an excellent tonic, she said, for a girl in robust health. And if she is used to them there is no reason why she should not continue them throughout the entire year, even on the coldest days in winter. Of course, I would not advise any one to stay in cold water longer than is necessary to wet the body all over, for to become chilled through is neither comfortable nor conducive to strength. In a shower bath every part of the body is wet in a few seconds, while with a sponge it may take from one to two minutes, but three minutes should be the limit. After which, a brisk rubbing with a coarse towel should create a glow that flushes the flesh a rosy pink, sends the blood tingling through the veins and gives a delightful reaction that often makes the bather perspire.

Should a girl after getting out of a cold bath feel chilled and following a hard rub continue to be cold, she should realize that the cold water is too severe for her and should not attempt it again. For, instead of being a benefit and making her strong, these baths will have the opposite effect, and frequently result in illness, for the shock to the nerves is too severe.

I know of one young woman who determined to accustom herself to take cold baths each morning. Physically she had not enough energy to stand them and suffered with cold for hours after; but she persevered in the practice for six months until she grew weak and very ill and has never entirely recovered.

There is really no way I can suggest that a person can tell whether or not cold baths are good for them, except by the glow and bodily warmth that should follow. I think if the finger nails look blue and the body is covered with goose-flesh after the bath that it is too strenuous.

As to the method of taking baths, I believe that a needle, shower or sponge is best, for few are strong enough to stand a plunge, and as to sitting or standing in a tub of cold water, I would say unhesitatingly that it is unwise, for it takes too much animal heat and results in a loss of energy that is unnecessary. Frequently those who are not strong enough to take a cold water bath as it comes from the spigot will find it immensely beneficial when a bag of salt is placed in the tub; or by taking the chill off with the addition of warm water, the bath will still be practically cold, for the temperature will be much colder than the body.

## DIZZINESS.

Dizziness, or vertigo,—scientific writers sometimes try to distinguish it sense between these two words but practically, in popular usage, they mean the same thing,—is a disturbance of relation to the outside world, a loss of the sense of equilibrium. The sensation persists even when the eyes are closed. There is more or less inability to walk straight, or even to stand still and often there is nausea followed by vomiting.

Vertigo is due to a disturbance, either actual or reflex, of the nervous "centr-

## NEW YORK WHEAT MARKET.

## LIVE STOCK MARKETS.

Toronto, July 17.—Another light run of stock at the City Cattle Market this morning resulted in a rather firmer tone for the better classes of stock.

Export Cattle—Choice are quoted at from \$4.80 to \$5; medium to good \$4.30 to \$4.75; bulls \$3.75 to \$4; bulls, light, \$3.5 to \$3.75; cows, \$3.50 to \$4.

Butcher Cattle—Choice, \$4.60 to \$4.80; medium to good, \$4.25 to \$4.50; bulls, \$3 to \$3.25; cows, \$3 to \$4; canners, \$1.50 to \$1.75.

Stockers and Feeders—\$3.50 to \$3.85; common, \$2.75 to \$3.25; short-keep feeders, \$4.60 to \$4.80; heavy feeders, \$4.60 to \$4.70; stock bulls, \$2 to \$2.25.

Milch Cows—Choice, \$40 to \$50; common, \$30 to \$35; springers, \$25 to \$40. Calves—3c to 6c per lb.

Sheep and Lambs—Export ewes are quoted at \$4 to \$4.25 per cwt., bucks at \$3 to \$3.50, and culls at \$3 to \$3.50. Spring lambs are quoted firm at 7c to 7½¢ per lb.

Hogs—Despite the fact that about a thousand hogs were on the market, prices were firm, advancing another 10c per cwt. Selects are quoted at \$7.70 and lights and fats at \$7.45, fed and watered.

## KING AND KAISER TO MEET.

Will go to the Castle of Friedrichskron, Near Hamburg, in August.

A despatch from Berlin says: It is semi-officially announced that King Edward and Emperor William will meet in the latter part of August at the Castle of Friedrichskron, near Hamburg. The meeting, it is said, will be at the wish of King Edward, who is going to be at Marienbad about that time, the Emperor being at Wilhelmshöhe.

## BOY DEAD OF WHISKEY.

Ten-year-old Orillia Lad Found Flask in Lumber Pile.

A despatch from Orillia says: Daniel Fountain, a lad ten years old lies dead as a result of drinking whiskey. He was brought home on Thursday in a paralyzed condition, and after suffering from convulsions, died on Saturday night. It is said he found a flask of liquor secreted in a lumber pile. An eleven-year-old boy died in Orillia from the same cause only fourteen months ago.

## AN ORDNANCE FACTORY.

May Be Established Near the Canadian Capital.

A London despatch says: A Coventry correspondent of The Manchester Guardian says arrangements are about completed by which the Coventry ordnance works will start a factory near Ottawa for the manufacture of position artillery, field guns and general machinery. It will be started by skilled workmen from England, aided by Canadian labor. The scheme is important to Canada and the United States. This matter was referred to by Sir Frederick Borden recently.

## PLUNGE OF A STEEPLE-JACK.

Dashed to Pieces After Twenty Years' Experience as a Climber.

A Chicago despatch says: After twenty years' experience as a steeple-climber, James H. Glenn's time came on Tuesday. The rigging to which he was holding on the top of a smokestack at 36th and Butler streets, gave way, and he fell 165 feet to his death. Glenn was 40 years old.

## DREYFUS NAME CLEARED.

Sweeping Vindication by the Supreme Court.

A despatch from Paris says: The Supreme Court on Thursday announced its decision, annulling the condemnation of Dreyfus, without a retrial. The effect of the decision is a complete vindication of Dreyfus, entitling him to restoration to his rank in the army as though he had never been accused.

An extraordinary session of the Council of State was held this evening, at which it was decided to propose to the Chamber of Deputies a bill promoting Capt. Dreyfus to be a major, and ex-Col. Picquart, whose defence of Dreyfus caused him to be cashiered, to be a brigadier-general. The bill will furthermore propose Dreyfus as a candidate for the Legion of Honor.

A question now interesting the public regards Gen. Mercier, who took a very prominent part in the prosecution of Dreyfus, and who is now an officer of the Legion of Honor. There is much speculation as to whether his cross will be taken from him, but apparently the Government is anxious to allow the whole Dreyfus matter to die out as quickly as possible.

A reporter of the Temps, who saw Dreyfus after the announcement of the court's decision, says he expressed relief at having his honor restored after his long sufferings. As to his future, he said he had not learned what the Government's intentions were, but, as he was now an officer again, he could not talk for publication on that subject. He added: "I have one word to say—that of thanks to all who have defended the truth and an innocent man."

## AWAIT PACKING REFORMS.

British Grocers Pledged Not to Stock With American Meats.

A despatch from Sheffield, England, says: The question of contracts with United States packers again was brought up on Wednesday in the annual conference of the Grocers' Federation, when the resolution pledging the members not to stock with American canned meats until the packers have initiated necessary reforms was withdrawn from the small committee to which it was referred the previous day and committed to the General Purpose Committee, with power to act. It was decided that every member of an affiliated association having difficulty with respect to any contract made before the present season should lay the matter before the federation officers immediately.

It was also decided to ask President of the Local Government Board Burns to publish the result of the board's inquiries as to the qualities of canned meats sold in this country.

## A GREAT FALLING OFF.

A despatch from London says: In June of last year there arrived at the Albert Docks from Boston and New Orleans 27,000 cases of tinned meats; in June of this year the receipts were only 4,000 cases. In July, 1905, 24,000 cases were received.

## NEWFOUNDLAND PROSPEROUS.

Prospects for a Successful Fishing Season Very Bright.

A despatch from Ottawa says: A report from the commercial agent for Canada in Newfoundland received at the Department of Trade and Commerce on Saturday, says that conditions in the colony are very bright. Trade is prospering and there is every indication of a successful fishing season.

Too many people neglect their plain duty for something more attractive.

Provincial Government will locate a normal school at Hamilton.

Four members of the army service corps who were arrested at Halifax last week for refusing to go to work when ordered are to be court-martialed shortly. The charges, it is understood will be mutiny.

Roderick Mackenzie, a young coal-miner, on Saturday, started to swim across the river near New Glasgow, N. S., with Leo Fraser, a seven-year-old boy, on his back. Both were drowned.

The Crossen Car Co., of Cobourg, have received the contract for 100 box cars for the Canadian Northern Railway, to be delivered in time to move this season's crop in western Canada.

The Owen Sound Board of Education has increased the salaries of the collegiate institute staff. The head master will now receive \$1,800, and the juniors in proportion, down to \$850.

## GREAT BRITAIN.

Revolting conditions in London jam factories have been revealed.

War Secretary Haldane has announced a proposed reduction of 20,000 in the strength of the British army.

British tin-plate manufacturers have expressed concern at the prospect of Canada manufacturing her own supply.

## GENERAL.

Regalador, former President of Salvador, was killed in battle.

Hostilities have again broken out between Salvador and Guatemala.

Chinese pirates boarded the British steamer Saiman, killing Rev. Dr. MacDonald, a Methodist missionary.

The French income tax was approved on Friday by a large majority, ensuring the passage of the measure next session.

In a duel following the vote on the Dreyfus vindication, the French Under Secretary of State was seriously wounded, on Friday.

## UNITED STATES.

Monroe, Ind., has built a street railway from the profits of its other utilities.

Robert Shaffer, former associate of Andrew Carnegie, was killed in a collision between his automobile and a train on Long Island, on Thursday.

Dynamite, exploded with murderous intent under a shanty at Bellwood, Ill., killed three foreigners, on Friday.

A dog mystery is puzzling Virginia and Illinois. This: In a can of beef opened in Roxbury, Va., the other day was found a dog license tag bearing the number 13,506. Chicagoans are trying to find out (a) how the tag got into the beef can, (b) whose dog it was.

Kidnapped from her home in England 15 years ago and made to believe that she was the daughter of a couple named Halmes, of Oil City, Pa., Miss Ruby Halmes, 19 years old, was on Tuesday informed that her real name was Lee and that her mother would come over from England as soon as possible to claim her.

Pay your church membership dues and remain in good church standing or you can't be buried in the church cemetery. This canon was moved at a congregational meeting of the First Lutheran church at Selvingrove by the pastor, Rev. G. W. Genssler, and was carried, the majority of the members refraining from voting.

A special from Watertown, N. Y., says: In the vicinity of the village of Rodman they are digging up the remains of a prehistoric people, who were possibly of the Indian stripe. Within a few days eighteen skeletons have been unearthed on the farm of H. Heath.

Judge Landis in the United States District Court of Chicago on Tuesday sentenced the Chicago and Alton road, recently convicted of granting rebates, to pay a fine of \$20,000 on each of two counts. John Faithern and Fred A. Wann, former officials of the road, were sentenced to pay a fine of \$5,000 each on two counts.

tion persists even when the eyes are closed. There is more or less inability to walk straight, or even to stand still, and often there is nausea followed by vomiting.

Vertigo is due to a disturbance, either actual or reflex, of the nervous "centre of equilibrium" in the back part of the brain, or in the semicircular canals in the ear, in which the terminations of the nerves coming from the centre of equilibrium are distributed. For the most part, vertigo is a reflex trouble due to some impression which gets shunted off its own route, as it were, through nerve fibres, connecting with the equilibrium centre, and acts upon the semicircular canals of the ear. Thus it is that dizziness is a comparatively trivial affection, as a rule—disagreeable enough, but brief and of no great significance except as a symptom of trouble elsewhere in the body.

Persistently recurring, transient dizziness is often due to eye-strain, that is to say, to errors in the formation of the eye not corrected by proper glasses. Wearers of spectacles can frequently tell when a change in the eyes has occurred, necessitating a corresponding change in the glasses, by the coming back of these attacks of giddiness, especially when the gaze is suddenly moved from a near object to a remote one or the reverse.

Vertigo is a common symptom of disorders of digestion seated either in the stomach or the intestine. The treatment for this form is, of course, to treat the indigestion or constipation.

Another more serious variety of dizziness depends upon disease of the heart or of the blood-vessels, especially those of the brain.

Any disease of the ear is apt to be associated with more or less vertigo. The same is true of tumor or other disease of the brain, especially of the cerebellum—that part of the brain in which the centre of equilibrium is situated.

The dizziness of seasickness, as well as that of swinging or of rapidly turning about, is thought to be caused by an irritation of the nerves in the semicircular canals by the striking against them of the fluid in these canals.—Youths' Companion.

## KILLED ENTIRE FAMILY.

Wife and Four Children Brained with an Axe.

A Walterboro, South Carolina, despatch says: J. W. Irnegan, a well-to-do white farmer of Colleton county, on Wednesday killed his wife and four children braining them with an axe at their home, about twenty miles from Walterboro. He then went to a neighbor's house and told of his deed. Neighbors brought him to Walterboro jail. Irnegan says he killed his family, but does not know why. He is a native of Sweden. Some years ago he tried to cut his throat, and is said to be insane.

## MANY PATENTS ISSUED.

Heaviest Business for Year in the History of the Office.

An Ottawa despatch says: The year just closed was the heaviest in the history of the patent office of Canada. The total number of patents issued was 5,870, a large increase over the previous year. The amount of fees received was \$14,700 in excess of 1905. Seventy per cent of last year's patents go to American citizens.

## OUTRAGES IN TRANSVAAL.

Natives and Chinese Attack Whites at Johannesburg.

A Johannesburg despatch says: Outrages by natives continue in the town and suburbs, the perpetrators frequently using revolvers. On one occasion natives were accompanied by Chinese coolies. The authorities have warned the whites to lock up all their arms.

## WHICH COLLEGE ?

The important question to be decided by young men and women contemplating a Commercial education, and on their decision may rest their success or failure in life.

THE *Frontenac Business College* Kingston, Ont.

Prepares students for these positions requiring exceptional efficiency and paying the largest salaries. We place our Graduates.

THE BEST EQUIPPED COMMERCIAL SCHOOL IN EASTERN ONTARIO,  
Fall Term Opens September 4th.

Write for Catalogue. T. N. STOCKDALE, Principal.

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

## OBITUARY.

FRANKIE RICHARDSON.

Beloved wife of Mr. Wm. Stoddart, Jr., Deseronto, passed away on Sunday morning, aged about twenty-seven years. Deceased had been ill for the past seven or eight months, having contracted a heavy cold, which turned to pneumonia and later to consumption. She was a daughter of Mr. and Mrs. Jas. Richardson, of Napanee, and until her marriage always resided in town. Besides her husband, two small children, a boy and a girl, are left to mourn.

LEVI GOULD.

The late Levi Gould, who was accidentally killed in Deseronto, on Tuesday, July 10, was 72 years and 9 months of age. Deceased was born in the Third concession of Tyendinaga, in 1834, where he had always resided. He was a member of the M. E. Church for a number of years, and was highly respected by all who knew him. His sudden death has cast a gloom over the vicinity, in which he had lived so long, and where he was so well known. The funeral took place from his late residence on July 12, the remains were taken to Deseronto Cemetery for interment. Deceased leaves, besides his sorrowing wife, four sons, Albert, of Buffalo; Lester, of Fredericksburgh; Amos, of Idaho and Adney, at home. He was always a loving husband and kind father. The family have the heartfelt sympathy of a host of friends in their sad bereavement.

FRANK W. MORRIS.

After an illness of several months, Mr. F. W. Morris passed away on Wednesday morning, aged 72 years. Deceased had been a resident of Napanee for a long number of years, and was known and respected by all the residents of the town, and his cheery countenance will be missed. In his early years he was a sailor, afterwards becoming a United States soldier and having passed through a number of the battles of the civil war, was granted a well earned pension by the U. S. Government. Deceased conducted a restaurant in Napanee for a number of years, also the G. T. Ry restaurant at Kingston Junction, but of late years has been enjoying a well earned competence.

The funeral took place on Thursday afternoon, services being held in the Western Methodist Church, thence to the Eastern Cemetery. The members of the A. O. U. W., of which deceased was a member, attended the funeral in a body. The sympathy of the community goes out to the widow and her daughter, Mrs. A. Wolfe in this their hour of trouble.

**MADOLE & WILSON.**

Geo. Hartin, from near Morven, appeared before the Police Magistrate on Saturday, charged with having on Saturday committed a criminal assault on a girl 10 years and 6 months of age. He was sent up to Central Prison for 18 months with hard labor.

H. M. Deroche, Esq., K. C., was in Centreville on Wednesday attending appeal from Court of Revision, of Camden on behalf of the Bay of Quinte Ry Co., before His Honor Judge Madden, when appeal allowed the assessment of the Ry Co. to be reduced by \$10,000.00.

Good marble is much in demand and is rarely distributed; therefore, a very valuable kind of rock. The announcement of the discovery of an immense deposit near Bancroft, in Hastings county, is, therefore, more than ordinarily interesting from the economic point of view.

John Robinson, aged twenty-one years, son of Jacob Robinson, Watertown, late of Napanee, met with an accident which resulted in the amputation of his right arm at the shoulder. It was John's twenty-first birthday and the accident happened in Ogdensburg, where he had gone to celebrate the 4th of July.

Young men and women should write the Frontenac Business College, Kingston, Ontario, for a copy of their catalogue with views of Kingston and 1000 Islands. It will be mailed free on request. The Frontenac is the most complete and up-to-date institution of its kind in Eastern Ontario.

T. N. STOLDALE, Principal.

### MUSIC

Owing to several cases of misapprehension being recently brought before Miss McIlroy's notice, she wishes to state that the opinion, which seems to be maintained, that she receives for instruction ONLY ADVANCED pupils, is erroneous. She will discontinue teaching through July and August, resuming it September first. Residence, Centre St.

before you buy, at H. W. KELLER'S, Campbell House Corner.

### The Style of Hair Worn.

Is an important factor to produce a younger and refined face and a well shaped head to any Lady or Gentleman Prof. Dorenwend, who will beat Paisley House, Napanee, Monday, July 30th, can demonstrate this to anyone calling on him at his Show Rooms. He has Ladies' and Gents' Wigs, Toupees, Bangs, Wavy and Plain Fronts, Switches in every length and shade, that he will gladly adjust on any Lady's head free of charge to prove this. **Don't Fail to See Him.**

It is his only visit to Napanee this summer. Call as early as you can in day and avoid the rush.

The Carbo Magnetic Razor is now in 200 homes. 200 gentlemen now shave with Carbo Magnetic Razors, most perfect Razor made. Take one on trial.  
**BOYLE & SON.**

### Drowned in Big Creek.

The badly decomposed body of an unknown man was found on Sunday last in Big Creek, by Mr. Sam Asseltine. The body had probably been in the watereight or ten days, and the features were so badly decomposed as to be unrecognizable. The body was that of a man about 35 years of age, was clothed in a fairly good tweed coat and pants, and black shirt with small white stripe in it. In the clothes was found a note book containing a number of addresses of persons living in Ireland, the sum of two dollars and ninety-nine cents in cash, and a pipe. The body is supposed to be that of an Irish emigrant who was employed at Ernestown Station until a couple of weeks ago, when he became insane and quit his job and has not been heard of since, and probably wandered over to Big Creek and committed suicide. The coroner, Dr. Cowan and Chief Graham visited the scene of the ghastly find, and after examining the remains the coroner decided that an inquest was unnecessary and ordered the body taken to Napanee for burial.

### Peace for the Farmers' Cows.

The most recent discovery, in fighting the fly pest, is the new preparation, Flee-O-Fly. This mixture not only kills the flies, but keeps them away. It is non-poisonous cleanly, and easily used. One 25c bottle will make several gallons of the spraying solution. The Medical Hall, FRED L. HOOPER, Sole Agent for Napanee.

### KEEPING ADVERTISED PROMISES

#### THE BANNER UNDER WHICH WE WORK.

A store can't be run on the show plan, a show comes along and stays a day or a week, if it advertises a troop of one hundred people and there are only fifty. no person will have any serious fault to find about it. But we don't work, on the show plan. we're in Business for good and must keep every advertised promise, when we say bargain we mean "Bargain" and that's what we give.

We make no statements we can't substantiate. We don't advertise Bargains and then be sold out when the Customers come for them. We guarantee every article we sell to give satisfaction beyond the investment. Come to-day and enjoy the shopping privileges afforded you at this City like store, watch our advertising space and visit us as often as you can.

## Dress Fabrics of Merit.

"MERIT" that's what counts in the long run, and it always wins when backed by energy and honesty of purpose. Priestley's famous

### TAKE MAGIC POWDER.

#### Visions Witnessed By Three Friends in Ruined English Abbey.

Three friends staying at Whitby, England, have had an extraordinary experience. They saw in broad daylight a long procession of mediaeval monks and nuns, headed by a bishop in full canonicals, wind slowly through the ruins of Whitby Abbey.

One of the party recently received from India a packet of powder, said to have mysterious psychical powers. He experimented with it, and saw visions of the dead. The Whitby vision also followed after taking some of this powder.

The three friends each took some of it, and almost immediately one of them heard the words: "Go to the south transept," another receiving the instructions: "At the abbey to-morrow as soon as possible."

The following extract from a letter written by one of the experimenters to Light describes what they saw at the abbey:

"We entered the abbey just at mid-day, and went into the ruined south transept and stood facing the east. One of my friends at once saw a long procession of brown-clad and cowlled monks, and smelt incense very distinctly.

#### Phantom Bishop.

"Following these monks I saw several white-robed priests, followed by the bishop in full canonicals and wearing his mitre. He was conducted to a sort of throne, placed for the time being with its back to the altar.

"When he was seated, several nuns in white habits appeared from the south transept, one of which was taken before the bishop, and knelt at his feet, when he laid his hands upon her head, and I heard the words, 'The consecration of the prioress at the midday Mass.'

"During the ceremony there knelt in prayer an old lady, dressed in dull red-brown, and wearing a very peculiar white head-dress; her hands were crossed on her breast. I could not remember the date, but the word 'Agin-court,' was whispered to me from the unseen, I felt as if she had nothing to do with the ceremony, but was there merely to fix the approximate date—by her head-dress.

"As we left the abbey my other friend saw, dotted about in the grounds—where several very material cows were feeding—more monks in brown cowls and robes, who were wandering about, evidently engaged in contemplation or prayer.

"We, none of us, heard any names, but I should know that bishop again anywhere if he ever saw fit to reappear."

#### Trance Dreams.

Miss Annie Sansome, of Nottingham, a well-known psychic, has also experimented with the powder. In the following letter to Light, she describes its effect on her:

"I seemed to go into a dazed condition, and the room and articles around me went dim. Then I found myself in a large city, in a great crowd of people, and the thought came to me 'This is London.' Then the vision changed, and I saw the spirit forms of a little boy and girl, urchins of the street, first in rags and tatters, then in beautiful spirit robes, showing that, though poor on the earth, they were rich in the spirit world; that was the impression I

divided as follows: Scotch 19,500; Eng-  
lish, 77,144; Irish, 3,867.

## KEEP THE FLIES OFF FOR 25c.

A 25 Cent Bottle will make a gallon  
and a quart of the Fly Mixture. This  
preparation is used exclusively in the  
stables at the Toronto Exhibition  
grounds. The name is Zenoleum—and is  
the best thing known of for the purpose  
Sold at the Red Cross Drug Store.

**T. B. WALLACE**

A serious mutiny broke out in the  
fortress of Syeborg, Finland, in which  
the loyal troops were finally victorious.

A few good Hammocks left, at a  
bargain in, don't wait.

**At BOYLE & SON.**

is London. Then the vision changed,  
and I saw the split forms of a little  
boy and girl, urchins of the street, first  
in rags and tatters, then in beautiful  
split robes, showing that, though poor  
on the earth, they were rich in the  
spirit world; that was the impression I  
received.

"Then I saw my brother's wife, who  
had died some time ago, and heard her  
name, 'Lizzie,' breathed quite audibly.

"I got the picture of a coffin and of  
a death to occur in the future, particu-  
lars of which I shall send you later if  
it happens as I saw it in vision.

"My mother also tried the powder,  
but did not get any results. It only ap-  
pears to act on those who feel some  
psychic development. I did not feel any  
injurious effects from it, but a nice,  
soothing feeling that seems very much  
like the trance state."

## Sturgeon Weighed 323 Pounds.

The largest sturgeon ever caught in  
fresh water was received by the Doyle  
Fish Co., of Toronto, recently, and the  
remarkable catch reported to Mr. S. T.  
Bastedo, deputy commissioner of Pro-  
vincial fisheries. The mammoth fish  
was caught near Wiarton, in the Geor-  
gian Bay, and weighed 323 lbs. This is  
the biggest ever heard of in fresh wa-  
ters, the previous record being a stur-  
geon of 185 lbs., caught in the same  
district some years ago. Some idea of  
the value of the huge specimen, which  
was caught in a pound net, can be  
formed by the fact that the flesh sells  
at 12 to 15 cents per lb., and, being a  
female, has over 100 lbs. of roe, which  
sells at 70 cents per lb. Mr. Bastedo  
at once instituted steps to have the  
fish preserved and mounted, but, un-  
fortunately, its great length had so in-  
convenienced the shippers that they had  
cut off both head and tail.

## Gave Them the Wrong Title.

The London cable announcing the  
distribution of King's Birthday honors,  
published on Friday, by some curious  
mistake, stated that Hon. Adolard Tur-  
geon, Commissioner of Public Works of  
Quebec, and Mr. W. Lyon Mackenzie  
King, Deputy Minister of Labor at Ot-  
tawa, had been created "Commanders  
of the Order of St. Michael and St.  
George." Of course, they have been  
merely given the honorary title of  
C. M. G.—that is, Companions of the  
Order. If they had been created Com-  
manders they would have been entitled  
to the prefix "Sir." And in their de-  
light at the honors bestowed upon two  
good fellows, The Hamilton Times and  
La Presse congratulated both "Sir Lyon  
Mackenzie King" and "Sir Adolard Tur-  
geon" upon the Royal recognition of  
their worth.

## Rabbit as Regimental Pet.

Regiments have adopted strange pets  
from time to time, but the strangest  
probably is that of the Montgomery-  
shire Yeomanry. It is a rabbit, found  
recently by the regimental post man in  
a letter-box he was clearing. Attached  
to its neck was a label, on which were  
a halfpenny stamp and the address of  
a gentleman in Wrexham, Denbigh-  
shire.

## How She Did It.

First Landlady—"I manage to keep  
my boarders longer than you do."

Second Landlady—"O, I don't know.  
You keep them so thin that they look  
longer than they really are."—Tits-Bits.

## YACHTING NEWS.

The Pictou Yacht Club held their 2nd annual Regatta at Glen Island on Thursday, July 26th and the Napanee Yacht Club held their annual cruising race to the rendezvous on the day previous, in order to be in attendance at the Regatta. Four of the Napanee yachts took part in the club run, viz: the Madge, M. B. Mills, owner; Edna B., Selwin Black; Gladys, T. Wales; Hyku, Geo. Gibbard, Madden and Fellows.

The yachts came to anchor off Deseronto at 2.45 p.m., at 2.50 the starting gun was fired from the Madge 2nd, and all got away to a good start, with a very light breeze. The Hyku went off on port tack, while all the others took the starboard tack. The wind proved very fitful and at times died away altogether, so that a very unsuccessful race was run. The Hyku however, seemed to be favored with what little there was, and footed very fast considering, with her enormous new set of sails, and soon left all the others a long way in the rear. The Edna B. made a very good struggle to catch up, while Gladys seemed to find all the holes in the wind that was coming to her, and made a

MADOLE &amp; WILSON

# THE HEAD AND THE HEART

It Is as Much a Sacred Duty to Think as It Is to Aspire.

"Come, now, let us reason together," saith Jehovah.—Isaiah i., 18.

There are temperamental types which never reach any conclusion by pure reasoning; intuitions, emotions, and inspirations take the place of intellectual processes. It would be the height of folly to attempt to make such natures reduce their religion to syllogisms, or to ask them to bring to the bar of the head all the findings of the heart.

The emotional nature does not comprehend the manner in which the average mind must wait for its own light. These souls that move by great tides often reach sublime heights. The world would be poor, indeed, without their all compelling enthusiasms, their glorious visions, and their dominant convictions. But such ones must not forget that there is no royal road to truth; that human nature is not cast in one single unvarying mold; diversity is not necessarily heresy.

There are other natures, not less necessary to the world, not less glorious in their records of leaders, martyrs, and masters of men. These are the natures that find truth by the slow steps of reasoning; that seek the way of right, with hearts of reverence and feet of faith, in the light of the faculties heaven has given them. They do not feel, they do not understand the winds that, sighing round them, convey such mighty meaning to other souls; they cannot buy progress at the price of blindness. They are

## THE INTELLECTUAL TYPE.

The conclusion that the emotional type must, after all, be the right one is a common one. This is because it makes the most noise and the most easily apprehended demonstration. And therefore some tell us that the man who seeks to find the way of truth by the light of the intellect must, without fail, wander into the pit of error; that the only way to come to religious truth is to shut the eyes of the mind and yield to emotion.

The thinker constantly is being warned that he cannot apprehend God with his intellect; that he cannot see the way to heaven with the eyes of reason. He is urged to give up the use of his head that he may develop his heart. He even is told that faith is incompatible with reason, and love with logic. So strong is the emphasis on this that he

is led to suspect that indolence is seeking to defy ignorance, and that men whose intellectual faculties have atrophied by their subjection to the emotional now are envious of those who retain the power to think clearly, and would have them also deprived of these powers.

Nothing could be more clearly opposed to the way of truth than the notion that religion can be bought only at the price of reason, or that the consequence of using the intelligence is the losing of the power of affection for the divine, the good, and the true—the warmth of heart and feeling that often determine character and conduct.

If the faculties are God given they are given for working purposes. If man has a mind and yet may not think concerning the

## DEEPEST AND HIGHEST THINGS

of his own nature and destiny, then the giving of that mind or the permitting it to develop is the most cruel mockery known to human history.

But the simple law of nature that every faculty has some purpose, that no power is without its duty, is the answer to all this. The mind is as sacred as the heart. There is nothing too holy for men to think about, to reason about. The mind must serve the truth—must with reverence lead to larger truth.

No man is religious who represses any of his reasoning faculties. Every one of the higher powers must be brought to their greatest perfection. Not by dwarfing, denying, but by developing do men glorify their Creator. Just as the finest tree in the forest speaks most eloquently of the bounty and beauty of nature, so does the gigantic intellect glorify the intelligence that ordered its being.

Fear not to think of sacred things; nothing is sacred because it is mysterious; reverence does not dwell apart from reason. Faith does not reach its perfection in the fool; it shines most glorious where wisdom dwells. There still are the superstitious souls who confound darkness with divinity; who cry aloud against the light of knowledge. But they can no more stay the discovery of truth than the bats can hold back the dawn.

HENRY F. COPE.

# THE S. S. LESSON

INTERNATIONAL LESSON,

AUG. 5.

Lesson VI. False Pretences. Golden

Text: Luke 11, 18.

## THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Two Similar Parables.—The Parable of the Great Supper, which forms the text of this lesson, is part of the conversation of Jesus at the Pharisee's table, the first portion of which we studied in last Sunday's lesson. This visit to the home of one of the chiefs of the Pharisees belongs, as we noted in our last lesson, to the period of the Perea ministry, probably some months prior to the final arrival of Jesus at

Gentiles. It is intended for all men without distinction of class or race.

Constrain—Persuade, urge.

24. None of those men that were bidden shall taste of my supper.—Like the foolish virgins, these men, if they come at a late hour, will find the door already shut, and their opportunity gone forever.

## IN A GARDEN CITY.

London Experiment is Proving a Successful Venture.

The Garden City of Letchworth, some miles from London, England, is progressing rapidly. The other day a lot of M.P.'s and other visitors went out to see the place, and after the party had made a thorough inspection of the estate, Mr. Henry Vivian, M.P., who is one of the moving spirits in the garden city enterprise, addressed the gathering at some length. He told how a beginning was made at Letchworth; how six acres were first taken on a nine

# QUEBEC MARKET SCENES

ODD THINGS THAT THE FARMERS' WIVES BRING IN.

Early in the Morning Only Then Can the View Be Seen in All

Its Glory.

One who would see the open air market of Quebec in its full glory must rise on Saturday morning at 5 o'clock when lazy tourists are still four hours from breakfast. From Dufferin Terrace the sight well repays the sacrifice of the morning nap. Last night the terrace was crowded with home folks and visitors promenading to the music of the military band. Now it is empty, and the upper town lies in silence all around, writes a correspondent of the New York Sun.

Within a stone's throw stand some of the oldest houses in Canada. Down below beyond the edge of the mighty precipice lies a panorama of river and rolling country, yet with huge ocean liners lying quietly at dock. It is a curious impression to the New Yorker that after travelling nineteen hours inland by rail he finds here a city 900 miles from the coast which is a seaport, where the tides rise eighteen feet.

The early riser turns eastward on Buade street, and, lo, it ends in a staircase. It is a common ending for streets in Quebec, which wander up and down stairs as unconcernedly as other streets turn a corner.

Down the long stairs she plunges into the lower town, and there finds the people all astir. She has only to follow the first housewife she sees with a basket on her arm to be led eventually to the great gray stone

## CHAPLAIN MARKET HOUSE.

It is the market square without which is the attraction for the tourist. There in the sunshine sit the French-Canadian farmers and their wives, who have come in before daylight from those ribbon farms stretched back from the river in long, narrow strips.

Perhaps they left home at 3 o'clock in the morning to drive into town in the bouncing two-wheeled Quebec caleche. Perhaps they came in the market boats, catching what sleep they could on the hard wooden benches.

Here they are sitting now, ready for the thrifty housewives of Quebec, each saleswoman or saleswoman with such produce before him as his farm at that time affords.

Aside from the ordinary market vegetables there are many quaint articles for sale—spruce gum, for instance, in great lumps which resemble chunks of quartz and in sticks, which look not unlike sticks of home-made molasses candy. Bunches of herbs and roots, fresh and dried, also are offered for sale by the market woman and if the tourist can understand her language she will explain volubly and politely for what each is good and how it should be taken.

These market women sit knitting, many of them—socks of a weight and solidity which speak volumes of the winter to come. Their wares lie spread on a box before them; and among them there is sure to be

## A BUNCH OF COUNTRY POSIES.

But not only things that grow are offered for sale. A gentle "Chapeau, madame?" will call attention to the straw hats for men, peaked in crown, broad in brim. Later in the season there will be tuques for winter wear, conical caps knit of wool, with a long point to flap behind, ending in a tassel and with thick rolled edges to be pulled down over ears and forehead.

There are hanks of homespun wool, in its natural colors or dyed in all the hues of the rainbow by home-made dyes. There is toweling spun in the winter from home-grown flax; rag carpeting

# HOME.

## LUNCHES FOR THE PICNIC.

It is needless to state that the greater part of the preparation involved in a picnic lunch should be attended to the day before. Meats should be boiled, cooled and chopped or ground; the seasonings added and the mixture put in a cold place. When roast meats are used all gristle should be trimmed off and when cold a sharp knife should be employed to cut slices of waferlike thinness. The meat slices should then be neatly piled one on the other and the plate on which they are laid wrapped in an old napkin wrung out of cold water, followed by a second wrapping of stout paper. So fixed, the meat will not become hard and dry as meat usually does when cut.

When a very early start is to be made it would be quite advisable to prepare the sandwiches over night, wrapping them in damp napkins until ready to pack. The bread should be at least one day old that it may be thinly sliced. As a rule, most people (especially children) prefer sandwiches made from chopped meats as they are easy to handle when forks and knives are not to be used. The ham sandwich is always a popular one, but any meat is suitable; a few made of cheese pounded to a paste with butter and seasoning will be likely to find favor, also hard-boiled eggs prepared in the same manner. Do not forget to slip in a few sandwiches with a mustard pickle filling, chopped fine and blended with a little of the dressing. Sandwiches made with mayonnaise instead of butter tend to soak slightly but minced cress or nasturtium leaves sprinkled over the buttered slices will be found very spicy and good.

In making cake add a little more flour than usual and bake about five minutes longer; this will ensure a firmer texture for handling. Also it probably will be better to use patty or gem pans than loaf tins. Jelly and cream cakes are too fragile to be carried.

The wax or paraffine paper used by confectioners is the best thing to have. Wrap the sandwiches in parcels of two and fit them neatly side by side. Wrap the cakes in the same manner. When pies are included in the list they are best made turnover fashion and quite small.

Lemon and other fruit juices should be sweetened and bottled without the addition of water. Coffee and tea should be made at least double strength and be put up in the same way. When used it is very easy to dilute to the proper proportions.

There are several styles of picnic hampers in the market, but it is really better to use stout paper boxes which can be destroyed when emptied. Pack the sandwiches in one, cake in another, fruits and odds and ends in a fourth. Such articles as have strong odors (bananas, cheese, etc.) should be wrapped in double thickness of the waxed paper and be placed in a box by themselves. Paper napkins, light wooden plates, tin cups and other extras go into the last box. When the meal is over do not leave the ground littered with miscellaneous collection of eggshells, crumpled papers, boxes, etc., but gather all together, pack in the largest empty box, tie and drop it (if in a park) in a waste can or in some place where it can easily be destroyed.

## SANDWICH FILLING.

One—Blanch one quarter of a pound of almonds, add the same weight each of English walnuts and seeded raisins, and put through the food chopper. Moisten with grape juice till the mixture is soft enough to spread easily.

Two—Chop celery very fine, add an equal amount of cream cheese and sufficient sweet cream to moisten to a paste.

the Pharisees belongs, as we noted in our last lesson, to the period of the Perea ministry, probably some months prior to the final arrival of Jesus at Jerusalem, just preceding the last week of his life. Later, at the time of his final great struggle with the authorities in the capital city, on the eve of his passion, Jesus spoke another parable very similar to this one, namely, the Parable of the Royal Marriage Feast (Matt. 22, 1-10). The parable in Matthew is a comment of Jesus on an attempt to arrest him, and tells of rebellious subjects of a great king put to death for insulting and killing their sovereign's messengers; the parable in our present lesson is a comment of Jesus on a remark made by another guest at the Pharisee's table and tells of persons who, through indifference, forfeit the good things to which they have been invited. It is less severe in tone than the former, and even in the parts which are common to both there is little similarity of wording. To identify the two as some have attempted to do is a great mistake.

Verse 15. Sat at meat—Reclined at supper (compare Word Studies for July 29).

16. But he said—Commenting on the words spoken by a fellow guest, Jesus points out the condition under which the blessedness to which reference has been made may be secured.

He bade many—Probably sent on a general announcement of the prospective event to his friends.

17. Sent forth his servant at supper time—in harmony with an ancient Oriental custom, a second special invitation was sent out to the invited guests as the hour for the festive occasion approached. To omit this second summons would be a grievous breach of etiquette on the part of the host; to refuse the second invitation after having excused oneself at the time of receiving the first, would be an insult to the host, equivalent among Arab tribes of to-day to a declaration of war.

18. And they all with one consent began—The choice of words, and their arrangement in the original, leads one naturally to expect an affirmative answer of cordial acceptance. The word to make excuse, therefore, comes to an unexpected disappointment, and greatly heightens the effect of the narrative at this point.

Go out and see it—Interest in a newly acquired possession of value is often greater than interest in friends or any other matter.

19. I go to prove them—Not that they had not been tested before being purchased, but because of that same interest in that which has been newly acquired referred to above. Doubtless for several days the man went "to prove them" every day.

20. I cannot come—The third guest is less confident than the others. We are to think not simply of three men who failed to respond to the invitation but rather of these three as typical of a larger number.

21. Go out quickly—There is to be no delay to accommodate guests who are not prepared to come at once.

Streets and lanes—in the Greek the two words here used apply specifically to the public thoroughfares of a city.

The poor and maimed, and blind and lame—Persons who according to custom would be invited anyway. There are many instances in the New Testament illustrating the custom of admitting people from the streets into the festive hall on such occasions.

22. What thou didst command is done—Is done already. Apparently the invitation had already been extended to them and they were now in waiting.

Yet there is room—The number of this poorer class of people was doubtless much greater than that of the first class which had refused the invitation, but still there is room for others.

23. Highways and hedges—Two words which in Greek indicate public thoroughfares outside of cities. The gospel invitation was given first to the Jews but afterward also to the

city enterprise, addressed the gathering at some length. He told how a beginning was made at Letchworth; how six acres were first taken on a nine hundred and ninety-nine years' lease, 14 houses started, and spoke of the alacrity with which the co-operative method of housing had caught on. Another six acres were afterwards taken, on which 32 houses were nearly completed. Later, another seven acres were taken, and by the end of August 71 houses would be completed. These, with a few houses on detached pieces of land on the estate, would make 130 in all required by the Tenants' Society in about 18 months, and would be worth about \$150,000. The distinguishing feature of co-partnership in housing was that ownership was common, not individual. A house obtained through a building society was a man's own; but he had to take all the risks attending such property. If his employment left the district in which he resided, his house might become a burden, and even a serious loss to him. In the Garden City Tenants, Limited, he was entirely relieved of this individual responsibility for a particular house.

He occupied a house at about the ordinary rent of his district, and any profit which accrued from the whole came to him in proportion to the rent he paid, which was credited to him in shares, and not cash. Thus the question of rent was not what it was under landlordism. Common ownership gave the tenant member all that the undertaking yielded, and whether it reached him in the form of reduced rent or increased dividends was really only a detail.

### THE GARB OF ANCIENT ROME.

The Quaint Dutch City of Utrecht is Transformed.

Utrecht can congratulate herself upon having at great pains and expense afforded the twentieth century a vivid representation of life in ancient Rome when she was at the height of her civilization and power.

The occasion was a student's gala, and Utrecht quite outshone all its previous performances in this line, for, having once conceived the project of transforming a part of itself transiently into a Roman city, it spared neither cost nor energy to make the attempt a success.

Gorgeous banners and flags festooned the picturesque gables of the principal streets, varied here and there by triumphal arches of a highly elaborate character, while a Roman theatre, erected on true historic lines, and sufficiently extensive to afford scope for chariot races, formed a not unfitting climax to the general magnificence of the whole.

Of course, the usual processional masquerade was not wanting. It bore somewhat the appearance of a Roman triumph, consisting as it did of persons and equipages purely Roman, and was everywhere received with manifestations of delight. Certainly the student who represented the Emperor Germanicus in a suit of magnificent armor, richly embossed and figured, is not again likely during his university career to receive so many and such full-throated ovations.

The chariot races in the crowded arena, with its raised dais in the centre thronged with students clad in the garb of the Seven-hilled City, where a source of wonder and admiration to the numerous spectators.

"Our cashier wants a vacation this summer," said the vice-president of the bank. "He'd like to get away, he says, for about three weeks."

"Good," replied the president. "That removes a weight from my mind. I was beginning to be afraid his accounts might be in such shape that he wouldn't dare to go away."

in its natural colors or dyed in all the hues of the rainbow by home-made dyes. There is toweling spun in the winter from home-grown flax; rag carpeting home woven of close, fine strands, socks and mittens, of course, and table covers and bedspreads, woven of linen in blue and white. One may buy, too, brooms made by tying green withes to a slender, round sapling or bars of home-made hard soap and pots of soft soap.

The home-woven baskets come from the little village of Indian Lorette, where a small colony of Hurons dwell. They are quite as French as the French around them now, yet the Indian features show out startlingly at times. They make baskets of sweet grass to sell and mocassins and birch bark canoes for summer, although the mocassins are quite wearable for winter bedroom slippers.

There are hooked rags, also, in this medley of home products, hooked rugs, companions in memory with horsehair furniture and wax fruit under a glass globe. There are baskets full of little stamped pats of country butter, each wrapped in a wet lettuce leaf. But most mysterious of all are collections of objects which look like brickbats and are of about the same consistency—

### THE "BLACK PUDDING"

of the habitants is made of pigs' blood. Even the wildest desire for "local color" will scarcely lead the tourist to sample one.

One wonders how some of these market women can afford to come to market and pay the ten cents required for the privilege of a box in the market place, so small is their stock. One has only a little pall full of the blood puddings before her—nothing else; another has only a dozen bars of home-made soap and—most curious of commodities—a sheep's heart. But if she only pays her expenses one is glad, for it is a happy day's outing. She sees and talks with so many people, acquaintances, even relatives from other villages whom she sees but seldom; fellow villagers who have come to Quebec to work in the shoe factories, village girls who are waiting on tables in Quebec hotels, possibly even some young priest, lawyer or doctor who used to be one of the boys of her own village.

The market place resounds with cries of animals. Hens and geese stretch forth necks from slatted coops and protest strenuously. Penned calves add to the din. But above all is the squeaking of little pigs. The proprietor, eager to make a sale, seizes one by its curl paper tail, holds it up in the customer's view and pinches its fat, pink sides as he expatiates on its merits, while its cries rise to the upper town.

### THE FAMINE IN INDIA.

Present Scourge Likely to be the Worst in Years.

The famine which is beginning in India promises to be the most severe scourge which has been visited upon the unfortunate natives. It is even invading fertile Bengal, which has hitherto been practically immune. As an instance of the fatal consequences of the scarcity of food in Bengal the following incidents are reported from the Village of Backergunj: Two men died of starvation. Another man, in despair at seeing his family suffering hunger, attempted to kill his wife, son and daughter, severely wounding them.

Peckham: "But, my dear, I'm sorry to say you lack the courage of your convictions." Mrs. Peckham: "Now, what in the world do you mean by that, Henry?" Peckham: "You say there is no use talking, and then you go right ahead and talk some more."

Miss Elder—"Well, I maintain that women can do anything that men can." Mr. Gazzan—"Oh, no. The auctioneer's business is one a woman cannot go into." Miss Elder—"Nonsense. She'd make every bit as good an auctioneer as a man." Mr. Gazzan—"Just imagine an unmarried woman getting up before a crowd and exclaiming: Now, gentlemen, all I want is an offer!"

Two—Chop celery very fine, add 1/2 equal amount of cream cheese and sufficient sweet cream to moisten to a paste.

Three—Boil six eggs for an hour, shell them, and put through the food chopper. Make a thick sauce with one tablespoonful of butter, a half teaspoonful of curry powder, one-third of a cupful of milk, a pinch of salt, half the egg past with more salt and cayenne to season well.

Four—Stone and steam a half cupful of dates and the same quantity of seed ed raisins. When soft beat together to a paste.

Five—Stone and pound to a waste two dozen large olives. Mix with a scant half cupful of thick mayonnaise. Fricolias may be used in the same way.

Six—Blend together equal quantities of pounded English walnuts and Neuchatel cheese, moistening with thick mayonnaise.

Seven—Put one cupful of drained baked beans through the food chopper, add a teaspoonful of chopped parsley, a few drops of celery extract, one teaspoonful of onion juice, and a very little made mustard.

Eight—From some cold roast lamb trim off all fat, and put through the food chopper, then pound to a paste. Season with salt, a little curry powder and moisten with sweet cream.

### HINTS FOR THE HOME.

Yeast for bread should always have a little brown sugar added to it, for this helps the sponge to rise more quickly.

When cleaning wall-paper, use bread that is a week old, cut it so that there is a good firm piece to hold; directly the surface becomes dirty sandpaper it off and use again. For keeping the surface of the board clean always use glass or sandpaper in preference to a knife.

Coarse brown sugar is an article of constant use in a kitchen. A saltspoonful to a pound of meat assists tenderness in the case of such parts of beef as are commonly used for stews, puddings, etc. But the result is better still if a medium of apple be used.

Wash-leather gloves can be washed with warm water and yellow soap. No water will shrink and shrivel the leather. The gloves must be dried quickly in the air and sun. Then draw carefully on to the hand before they are quite dry to preserve the shape, and prevent the leather from hardening.

An excellent grease eradicant that is always in demand in a household is young folks is made as follows: Boil one ounce of soap cut small in one quart of soft water, add a teaspoonful of salt and one and a half ounces of ammonia. Keep this fluid in a bottle corked tightly and you will find that it does valuable service every week.

How to Render Cloth Waterproof.—Take of powdered alum and sugar of lead each half an ounce, and stir them into a gallon of rain water, and then the mixture is clear, pour off the upper liquid. Immerse the cloth for twenty-four hours, then dry and press it. The cloth will be unimpaired in color and texture, and will stand any amount of rain to which you are likely to be exposed.

Sufferers from tender feet and those who have to stand for long hours should avoid soaking the feet in hot water. Wash the feet as you would your neck with a soapy flannel and then rinse. Dry thoroughly with a towel and rub some neatfoot oil into the skin, especially about the ankles. The feeling of ease and comfort after the first application will be really astonishing. The oil not only relieves the aching and tenderness, but strengthens the muscles of the feet.

A Polish for Brown Boots.—Mix one ounce of muriatic acid, half an ounce of alum, half an ounce of spirit of lavender, and half an ounce of gum arabic in about one and half pints of sour skin milk. The polish should be applied to the boots with a flannel, and when dry polished with a soft clean duster. It is a good plan to wash brown boots with saddle soap about once a week before polishing.

### HELPS TO CLEANLINESS.

More attention to cleanliness in kitchens would do much for the general well-

care of the human race. Cleanliness is an inexpensive luxury and if common sense is used, perfect cleanliness may be had with very little exertion. The first law of the kitchen should be order. Have a certain day for performing certain duties. There will then be no procrastination or confusion.

Servants should be instructed from the start in habits of cleanliness and order and made to understand exactly what is expected of them. See that your plans are carried out to the letter. This will prevent the carelessness and slipshod work complained of so often. Often it is really the fault of the lax discipline of the mistress.

Another help to cleanliness is to have a place for everything and see that everything is kept in its place. This greatly reduces the work and makes it easy and pleasant. Floors, woodwork and windows must be well cleaned at least once a week to keep the kitchen bright and healthful.

Cooking vessels must be kept perfectly clean at all times. The least taint will spoil any dish, in taste as well as healthfulness. Pantry cupboards, refrigerators, etc., must come in for weekly cleaning.

In hot weather this matter of cleanliness is especially essential. Carelessness with kitchen refuse has caused many a case of sickness which might have been prevented.

## RESULTS OF MERRIMENT

### FITS OF LAUGHTER THAT HAVE LOST HUSBANDS.

#### Occasions on Which Untimely Merriment Has Parted Engaged Couples.

About six weeks ago a young man was walking with his bride to the village church of Simmenthal, Switzerland, when the former slipped in the snow and fell. At this mishap the girl burst into such an uncontrollable fit of laughter that the bridegroom, on rising, broke off the engagement in vehement terms, and left the unsympathetic bride to continue her way to the church alone, there to explain to the expectant crowd of relatives and friends the reason of her lover's absence, says London Tit-Bits.

This is by no means the only occasion on which untimely merriment has parted an engaged couple almost at the steps of the altar. A short while ago an East-end couple were, with the bridegroom's father and mother, driving to church in a four-wheeler on matrimony bent. The old couple were dressed in their best; indeed, their smartness bordered on the grotesque, which so tickled the bride's sense of humor that she was unable to control her mirth, the objects whereof were so angered that they stopped and alighted, their example being promptly followed by their son, who declared that he would never marry a girl who could

#### MAKE FUN AT HIS PARENTS.

Equally detrimental to a young couple's happiness was the presence of the bridegroom's father-in-law among a Birmingham wedding-party that were accompanying the principals to church. On the way the old gentleman waxed exceedingly jocose, and so amused the bride with his comicalities that she could no longer restrain her mirth, and despite the protestations of her fiancé literally shook with laughter. Unable to endure such inordinate levity, the young fellow took himself off there and then, leaving the girl to the care of his father, who, being a widower, subsequently displaced his sedate son in her affections, and, ere a year elapsed, made her his wife.

Rufus E. Hackett, of Philadelphia, being himself of austere temperament, disapproved of gaiety in others. His fiancé's high spirits especially grieved

## ON THE FARM

### MANAGEMENT OF SHEEP.

It is true that not every man is cut out for a shepherd. The ideal shepherd should be a man of warm heart, sympathetic nature, of good poise and possessing an eye to see things. The practical shepherd is not a theorist, having no hard and fast way of doing things; but he does things and does them on time and always with a definite object in view. The successful shepherd is a practical man, and I would like to add is a man of practice, writes Rev. Archibald Moore. Sheep are highly sensitive creatures and show readily the effect of care or neglect. The man who appreciates promptly the needs of his flock and gives the necessary attention may, other things being equal, promise himself a prosperous business. To maintain the health of the flock, the shepherd must see to it that the sheep are kept in clean, dry, healthful winter quarters, free from dampness, drafts, well ventilated and protected from storm. How often is it true that the health of sheep is destroyed by being compelled to winter in bad quarters. My practice is to give the sheep all the field range possible in open, dry weather, no matter how cold. My observation is that nothing will superinduce disease more quickly than to compel sheep to occupy damp, drafty, poorly-ventilated quarters. Sheep thus become so debilitated that it requires the most fortunate conditions of the next summer to restore them to their condition before going into winter quarters. It is not necessary to build expensive barns in order to secure favorable conditions. Good judgment with a view to practical economy help out greatly when it comes to building barns for sheep. Much devolves upon the shepherd in maintaining a good constitution in all the individuals of his flock. Some sheep die, of course, from natural causes, but the constant loss of sheep suggest something wrong, either in the shepherd's methods, or his knowledge of breeding, or both.

#### THE ALL-ROUND SHEPHERD.

must not only be a good keeper of sheep, but he must also understand the importance and art of good breeding. It is here that he addresses himself to the conditions which point to the vigor and type of his flock. He should have as a standard a definite type, and by skill, ingenuity and judgment persistently aim at his type.

In fine wool types the low carriage, the blocky carcass, the square quarters, the broad, stout loin and back, the strong heart and the brightness of the eye are not accidents, but results. Such results as will be understood by every skillful shepherd as being produced by definite causes. A flock built upon this basic principle of skillful breeding, followed by regular and intelligent attention will not only delight the shepherd's heart in general appearances, but will give him good reason to hope for reward in the good coin of the realm.

A daily visit from the shepherd, change from field to field as often as condition may suggest, access to living water, supplied with salt at all times, provided with shade or shelter from heat, a field of well-grown grass reserved for late fall or winter pasture, are conditions which should be provided for every flock. In winter they should be provided with some succulent food, such as roots or silage, fed with mixed grains such as corn, oats and bran. As roughness plenty of clover or cowpea hay should be fed. No man should ever attempt to feed sheep through the winter on timothy hay. I do not think he can do so without great disaster. Where conditions justify it, I suggest

enough to fill them. Southern Horse-looth, Red Cob Silage, and occasionally Blount's Prolific are used. The scratch-harrow is usually run over the ground two or three days before the corn is up, to upset the young weeds. After the corn is fairly up, I run a weeder over the rows. Frequent cultivation with a wheel cultivator is practiced through the season, until the corn is laid by in the late summer.

In cutting for the silo, I use a harvester, and leave the filling of the silo to parties who furnish power and cutting. I have tried sowing Whippoorwill cowpeas with the corn, but this was not very satisfactory, as the peas were either choked out, or else over ran the corn so as to make harvesting difficult. This year, I propose planting the peas after the corn is up, but not nearly so thick and possibly every other row. In this way, I hope to overcome the difficulty in harvesting.

## IF A MAN WERE DROWNING

### HERE ARE INSTRUCTIONS AS TO WHAT TO DO.

#### First Restore Breathing—Of Next Importance is to Restore Bodily Heat.

Many a person has been saved from death by drowning after life was apparently extinguished because someone was at hand who knew what should be done at once and did it. Samuel G. Dixon tells simply and briefly the process of resuscitation from drowning. He says:

"Restore breathing and restore and maintain body heat. These are two essential things to do at once, and, of course, the breathing comes first. Loosen or cut apart all neck and wrist bands so as to remove obstructions to breathing. Don't bother with taking off any of the wet clothing at this point; you might lose precious time, and a moment's delay in restoring breathing may prove fatal.

"Turn the patient on his face, with the head lower than the body; grasping the body around the middle raise it as far as you can without lifting the head off the ground. Give the body a sharp jerk to remove the mucus from the throat and the water from the windpipe. Hold the body suspended,

SLOWLY COUNT ONE, TWO, THREE, and then repeat the jerk more gently two or three times.

"This getting rid of the water and mucus is the first thing to be done toward the restoration of breathing. Now place the body on the ground again, face downward, and, standing astride the body and holding it by the points of the shoulders, raise the chest as high as you can without lifting the head from the ground; hold it there long enough to slowly count one, two, three. Replace the body on the ground with the forehead resting on the arm that has been bent at the elbow. The neck should be straightened out and the nose and mouth be free from contact with the arm, so as to take in the air.

"Placing your elbows against your knees, so as to gain a leverage, press downward and inward with increasing force against the sides of the victim's chest and over the lower ribs long enough to slowly count one, two, then let go suddenly. Grasp the shoulders as before and raise the chest, remembering to leave the forehead resting on the ground, and press upon the ribs as before. Replace the body on the ground, press downward and inward against the sides of the chest, let go suddenly, and, grasping the shoulders raise the chest and press upon the ribs. These alternate movements should be repeated for an hour at least at the rate

## THIEVES' CLEVER DODGES

### HOW BRAINY BURGLARS CARRY OUT THEIR PROJECTS.

#### Daring Robberies Are Committed Under the Very Eyes of the Police.

That the successful burglar is "born, not made," may be judged from the report of a case which recently came before the Berlin courts. The assistants at a large hairdresser's shop, on arriving early one morning, found a placard on the shutters bearing the inscription, "Closed on account of sudden death." Thinking that the proprietor, Herr Jaskowiak, had died in the night, the assistants returned home, but later in the day some of them went back to the shop. They then found, to their astonishment, their master seated at his desk making a list of goods stolen from his store. Knowing that the assistants arrived early, the burglars, three in number, put up the placard in order that they might not be disturbed.

Somewhat similar, though even more daring, was the ruse of a clever gang of international thieves which, a few years ago, robbed a firm of London goldsmiths of goods worth \$60,000. Aware that a watchman was not kept on the premises, and that the principal and employees of the firm lived in outlying suburbs, the burglars waited until nine o'clock of an evening which was both wet and dark. The shop had then been closed about an hour, and the thieves, carefully made up to resemble the men whose premises they were about to ransack, deliberately

#### TURNED ON A FLOOD OF LIGHT

and affixed notices to the windows: "Great stock-taking sale! Twenty per cent. off all marked prices. Goods sacrificed to make room for new season's stock!"

Policemen on the beat, thinking they saw the proprietor and his assistants apparently hard at work checking their goods, suspected nothing, and the burglars safely escaped with their booty to the Continent.

A clever burglar's ruse, showing careful study of the habits of the victim, was recently reported to the police. It is the custom of a business man who resides at Brixton, and has his office in Queen Victoria Street, London, to leave home every morning and not return until dinner. Recently his wife received an anonymous letter, which informed her that her husband, instead of working in his office, frequently went to a Charing Cross tea-shop accompanied by a young lady. By the same post the husband received a letter which gave the information that, while he was at his office, his wife spent her time at a certain tea-shop in the neighborhood of Charing Cross.

Husband and wife, bent on catching each other red-handed, hastened to Charing Cross, and proceeded to the tea-shop indicated in the anonymous letters. Judge of their surprise when they came face to face! There was

#### A MUTUAL EXPLANATION.

Husband and wife then came to the conclusion that someone had been playing a joke on them. They thought no more of the matter, and decided to end the day by a cosy dinner before returning home. When they did return to their house they found the place ransacked and the most valuable articles missing. The husband rushed away to his office, only to find the same confusion there. The burglars had made good hauls, both at the house and the office.

Last summer a series of very audacious burglaries occurred at the homes of New York's "Smart Set." Perhaps the most remarkable instance was the looting of the residence of Mr. Jose Aymar, a millionaire lawyer. Three

anxious, and, etc. a year ago, she married her husband.

Rufus E. Hackett, of Philadelphia, being himself of austere temperament, disapproved of gaiety in others. His fiancée's high spirits especially grieved him, and he declared that unless she could refrain from merriment until their wedding-day, fixed three months thence, she should never be a wife of his. For three months was her conduct irreproachable, but on the very morning of the day whereon the ceremony was to take place she, forgetful of her lover's prohibition, gave vent to a merry peal of laughter.

#### SHE NEVER BECAME MRS. HACKETT.

At the altar of a Hampstead Road church a couple presented themselves to be married. The bride was excessively nervous and scarcely had the ceremony commenced than her nervousness found expression in a succession of giggles that grew so loud and disconcerting that the clergyman closed his book and refused to continue the service. The bridegroom thereupon remonstrated with his bride, and as he put her behavior down, not to the true cause, but to levity of conduct, his reproof was so forcible as to throw the girl into hysterics. On her recovery the couple departed unmarried. Nor were they ever united, for, thinking her as frivolous as she considered him heartless, the young man refused to place his future happiness in her keeping.

In 1887 a young Edinburgh doctor was on the eve of being married when the trial of Madeline Smith—whom he had met on one or two occasions—for poisoning Emile L'Angelier took place at Glasgow. Being in his fiancée's company, he chanced to make some humorous remark, at which the young lady burst out into a hearty laugh—

#### A FATAL LAUGH.

for to her lover it sounded strangely like a laugh he had heard a few weeks previously—the laugh of the accused woman; and so horrified was he at the striking resemblance that he broke off his engagement.

A tragic incident occurred a year or so since at Brussels on the morning of a young couple's marriage. The wedding-party were on the point of setting out when one of them made a joke at which the bride laughed so unrestrainedly that she broke a blood-vessel. Medical aid was promptly summoned, but without avail, for the girl, who was naturally of a most delicate constitution, succumbed, and those who had been bidden to the wedding were, a few days later, constrained to enact the sad role of mourners.

#### LONG SKIRTS BARRED.

##### Silesian Authorities Try to Regulate Fashions.

The campaign against trailing skirts begun some weeks ago by the Nordhausen (Germany) Town Council, is being bravely continued by the municipal authorities at several Silesian summer resorts.

The local commissioners responsible for the administration of affairs at Salzbrunn issued a public appeal to lady visitors at this favorite health resort to abstain from wearing long skirts, or, if wearing long dresses, to prevent them from trailing on the ground.

This appeal being disregarded, the local commissioners have now passed by-laws inflicting penalties for the wearing of trailing skirts.

The local commissioners at Warmbrunn, also in Silesia, have followed abstain from wearing long skirts, or, sued an appeal, which produced no effect on female offenders, they have now promulgated municipal decrees prohibiting trailing skirts, and introducing heavy penalties as punishment for obstinate transgressors.

Ever notice how cheerfully a woman gives her order in a restaurant when there is a man along to pay the freight?

As roughness plenty of clover or cowpea hay should be fed. No man should ever attempt to feed sheep through the winter on timothy hay. I do not think he can do so without great disaster. Where conditions justify it, I suggest that lambs should come in February, as the early lamb has every advantage over the late one. The lambing season is always an interesting time for the shepherd. It is the one time in the year when the flock deserves the most and best of care. Neglect is exceedingly costly at such a time. Every morning the new arrivals with their dams should be separated from the flock, placed in another apartment of the barn and given special care until they have a good start on the journey of life.

If you would have plenty of milk for the lambs when they come, begin to feed with this end in view six weeks or two months before their arrival. Increase the flow of milk by turning the ewes on a field of rye, grown especially for the purpose. I believe every man who handles sheep should seek to be a good shepherd. Somehow I have the feeling that every good shepherd is a gentleman of fine instinct, noble bearing, whose high calling not only has the approval, but the blessing of the Great Shepherd. Such a shepherd will represent to a high degree the fine faculty of bringing his flock up to the highest standard of both merit and profit.

#### LIVE STOCK NOTES.

Do not put the young stock in an out-of-the-way pasture where they are seldom seen. They will become wild and unmanageable unless you go to them frequently with some salt or some dainty.

We consider two years of age about the proper time heifers should be brought into milk, but a month or so variation either way is not seriously objectionable. This is believed to be the general practice in Jersey.

The preparations on the market for spraying cows and horses are effective and very satisfactory. Here is a recipe for a home-made remedy: One quart of kerosene, one quart of fish oil and one ounce of oil of tar. Stir or shake well and it is ready for use. Apply with a cloth, brush, or better still, a 50 cent sprayer.

The cow that is to make money must make milk in quantities above the average. She must be a large eater, a good digester, a perfect assimilator of digested food and a ready transformer of the food into fine milk. The farmer should not look for a small eating cow, for the small eater must be a small milker, and a little extra butter fat in her milk will not make up financially for the deficiency in quantity. The manufacturer does not attempt to make a ton of steel out of materials that contain only a possible half ton. The milk producer can not force a ton of milk out of a cow whose food in a given time contains only a half ton of milk.

#### GROWING CROPS FOR THE SILO.

I generally plant my silage corn on ground that has been in corn the previous year, writes Mr. David Roberts. Sometimes I plant on sod and have some so planted this year. When ground has been in corn the previous year, I mostly sow to rye in the fall for spring pasture. I spread broadcast with a manure spreader, cow stable manure just before the land is plowed, the latter part of April. The ground is thoroughly disked, scratch-harrowed and put in as fine a condition as possible, before seeding. I use a two-horse, double-row drill and drop the grains about one grain to 8 or 9 inches in rows 4 feet apart, sometimes  $3\frac{1}{2}$  feet apart. This year, in addition to stable manure, I put on with a fertilizer, broadcast drill, a thin dressing of ground fish manure.

I have three silos, two 12 feet square and 24 feet high and one, a tank silo, 12 feet in diameter and 24 feet high. I plant about 12 to 14 acres for these silos, and some years have more than

ground, press downward and inward against the sides of the chest, let go suddenly, and, grasping the shoulders, raise the chest and press upon the ribs. These alternate movements should be repeated for an hour at last at the rate of ten to fifteen times a minute unless breathing is restored sooner. These movements should be accomplished with regularity.

#### AS IN NATURAL BREATHING.

"Keep people from crowding around the patient, as they exclude fresh air, and don't give a stimulant before the patient can swallow.

"When breathing has commenced then the thing to do immediately afterward is to restore the body heat. Warm blankets should be wrapped about the body and bottles of hot water or hot bricks applied. The head should be warmed nearly as fast as the body, or else convulsions may result. Rubbing the body vigorously with the hand or warm cloths, or slapping the fleshy parts may assist to restore warmth.

"As soon as the patient can swallow give hot coffee, tea or milk. Beware of giving too much spirits, lest depression may result. Get the patient in a warm bed and have plenty of fresh air."

Dr. Dixon offers these as a few suggestions which, he hopes, may save some lives during the present vacation.

#### WAR ON GAMBLING.

##### Editor of Australian Magazine in a Relentless Crusade.

A tremendous struggle has been proceeding in Australia for weeks between the gambling gang centering round Jack Wren, the wealthy proprietor of the illegal totalisator, and numerous race courses, and the Puritan party, whose champion is Mr. Judkins, editor of the Australasian edition of the Review of Reviews. The latter has conducted such a relentless campaign that organized bands of roughs break up his meetings, necessitating police protection to prevent physical violence.

The struggle has forced the Bent Government to promise drastic legislation and has rallied the forces of good Government to the side of Mr. Judkins.

Mr. Wren recently adopted Tammany tactics by distributing money among the unemployed and giving a number work on the race courses.

The general opinion is that the gang is making its final stand against the outraged community, which realizes that the time has come when Australia's national vice must be extirpated.

#### AWFUL.

Cecil (sentimentally): "Don't you feel gloomy when the sky is overcast with grey, when the rhythmic rain sounds a dirge upon the roof, and the landscape's beauties are hid by the weeping mist?"

Hazel (sweetly): "Yes, it's dreadfully annoying. It does make one's hair come out of curl so."

Last summer a series of very audacious burglaries occurred at the homes of New York's "Smart Set." Perhaps the most remarkable instance was the looting of the residence of Mr. Jose Aymar, a millionaire lawyer. Three burglars lived a whole week in the house, freely helping themselves to the old wines in the cellar, and removing the valuable household effects nightly. Jewels and paintings to the value of over \$125,000 were taken away.

Mr. Aymar and his family had been spending the summer in Canada, trusting to the vigilance of the police to protect their possessions. The burglars effected an entrance

#### THROUGH THE FRONT BASEMENT.

After taking an iron door off its hinges by means of a crowbar, they established themselves in a back bedroom on the second floor. Sleeping during the day, they used an alarm clock to awaken them at seven o'clock every evening, and then commenced their work of plunder. The caretaker of the adjoining house heard the alarm clock several times, but thought that some of Mr. Aymar's servants had returned home.

After about a week her suspicions were aroused and she notified the authorities. The burglars, however, decamped before the arrival of the police, taking nearly everything of value which they could carry away. They cut twenty pictures out of their frames, and many of the household effects were removed in wagons. This is by no means an isolated instance of jovial burglars making their home for days in the houses of other people.

During a round of inspection the proprietor of an hotel situated on the Grimsel Pass, Switzerland, was astonished to see smoke issuing from one of the chimneys of the hotel, which he had carefully locked up and left.

#### FOR THE WINTER MONTHS.

He unlocked a door, entered, and attracted by the sounds of a piano, went into one of the best bed-sitting rooms. There he found a young man, decked out in borrowed clothes, playing and singing. The stove was lighted, and on the tables were bottles of his best champagnes and other delicacies. The piano and a large book-case had also been dragged into the room.

"For the last month," said the youthful burglar, on seeing the proprietor, "I have been thoroughly enjoying myself. I never had such a good time in my life. I do not mind going to prison now, and I hope you will forgive me." The jovial burglar put on a coat and hat, took a last glass of champagne, then followed the proprietor to the hotel-police-station in the valley.

#### ONE WAY TO GET IT.

"You sry Mabel is in the habit of walking for her complexion?"

"Yes. To the nearest drug store."

Regret is something we feel for the mistakes of our friends.

"Why are the boys shooting holes in that tenderfoot's hat?"

"Well, he's been talking through his hat ever since he's been here and th' boys want to make it easier for him."

# AUTOCRAT OF A VAST REGION

Romantic Story of the Great Hudson's Bay Company.

AT ZENITH OF ITS POWER IT RULED OVER A TRACT LARGER THAN WESTERN EUROPE.

Canada, fearful of a repetition in Hudson Bay and adjacent waters of the Alaskan boundary dispute, is now vigorously engaged in asserting its sovereignty there by maintaining Federal cruisers and establishing police posts in the region, with the idea of making impossible the assertion of any claims by the American whalers who have been frequenting those waters for seventy years. The bay itself gives access to the great Canadian North-West, the vast territory once known as Rupert's Land. It was named from the dashing Stuart prince who was the first governor of the Hudson Bay Company, which in 1670 acquired from King Charles II. the wilderness west and south of the bay not then occupied by other governments.

The Hudson Bay Company was formed by a number of men interested in the Newfoundland trade, nobles and favorites of the "Merry Monarch," who had obtained from him extensive plantations on the coast of that and the neighboring islands.

Great annual harvests of fishes, seals, and peltries were reaped; but they were fired to dreams of immensely greater riches by the stories of two French explorers, Radisson and Groselier, who had penetrated the wilderness from Lake Superior through to Hudson Bay, and had brought to London (being rebuffed at Quebec and Paris) accounts of a country filled with fur-bearing animals and an ocean teeming with fish. They proposed to reach both by taking ships through Hudson Strait and establishing posts on the shores of the bay, thence piercing the interior and so avoiding quarrels with the French in "Canada," which, as at that time understood, meant virtually the present Province of Quebec, and the eastern districts, the western boundary ending where the pioneer warred with the savage.

The Province of Manitoba has already been created out of Ruperts Land, and westward it extended beyond the Rocky Mountains, the company holding sway over what is now British Columbia, Washington and Oregon States, and even the North Pacific Islands, while, after the new Provinces of Saskatchewan and Alberta were taken from it in 1905, there still remain the unorganized territories of Ungava, Keewatin, Mackenzie, Athabaska, and Franklin, to form the nucleus of future provinces.

## UNDISPUTED SOVEREIGNTY.

There is in the history of commercial exploitation of overseas possessions scarcely any more fascinating chapter than that which treats of this Hudson Bay Company; how it resisted nations, overcame rivals, outwitted Parliaments, subjugated natives, and made itself sovereign of a region which embraced substantially half of the continent of North America. At the zenith of its power, seventy years ago, it enjoyed dominion over a territory larger than Western Europe, with an area exceeding four million square miles, peopled by more than fifty different Indian tribes, and yielding a yearly tribute in furs and feathers the enormous value of which fairly staggers belief.

For two centuries the Hudson Bay Company had ruled its vast bulwark as despotically as the Czars ruled Russia. Only its store-ships, bringing in supplies and munitions, articles of barter and platoons of servants, and

the North-West by a payment of one and a half million dollars and some trading and landlord privileges not inconsistent with the paramountcy of the Dominion.

## AUTOCRACY TOO SEVERE.

This step became necessary because the autocratic rule of the company was not compatible with the modern theories of personal and commercial liberty. The French-Canadians and half-breeds who formed the main element in the company's couriers and trappers had formed a settlement on the Red River. Their compatriots were bent on making it a second Quebec. Scotch and English immigrants also located there; and the company sought to impose on them its galling yoke and rule them with its antiquated laws. The result was the first Riel rebellion, the intervention of Canada, and the inevitable disappearance of the company as a governing power. Henceforth it was to restrict itself to a commercial corporation, giving up all claims to administrative authority, or to possession of the soil, save a certain area round each of its trading posts, and to one-twentieth of the area of the so-called "Fertile Belt," the best wheat-growing area.

This latter concession has proved immensely productive to the company, because of the boom in farm lands in recent years, and its sales have been enormous and at constantly enhancing rates. When the Canadian Pacific chose Winnipeg as its western headquarters twenty years ago, the company realized over two million dollars on the sale of a portion of its really within the city and suburbs, which being applied to the reduction of the capital stock, brought it down to six million five hundred thousand dollars. Since then further accretions from similar sources have enabled it to be reduced to an even one million pounds, in one hundred thousand shares of ten pounds each. But every share is now worth twice its face value, and it is next to impossible to procure any in the open market, so jealously are they held by those fortunate enough to possess them.

The company has now about two hundred and fifteen posts, stretching from the Atlantic seaboard of Labrador to the remotest section of the Mackenzie delta, on the confines of the polar ocean at the inner boundary of Alaska, and being represented likewise at all centres of importance in the North-West, whether reached by rail, trail, or travois. The company owns a dozen river steamboats plying on lake and stream to reach outlying posts, carrying large cargoes of stores now for the settlers daily striking north through the wheat-belt, and conveying back the peltries obtained from the Indians and Eskimos still further beyond. The total annual realization from the fur trade is about two million dollars, even now, despite the settling of much of the country, and the profit on this branch of the business is about twenty-five per cent.

## ROMANCE STILL LINGERS.

The flavor of romance still lingers round Hudson Bay from the remarkable story of the present governor of the company, Lord Strathcona and Mount Royal. He began his career when a boy of sixteen at Mingan, a post in farthest Labrador, and remained in that icy inferno for thirty-five years, leaving his post only once in that time to walk to Montreal, a journey of over three

# IN LOVE WITH ROYALTY

MANY LOVE LETTERS SENT TO ROYAL PERSONAGES.

Correspondence Very Rarely Reaches Them, But Is Dealt With by Private Secretaries.

It would seem for some reason Royal personages are more liable than any other notabilities to excite the love passion in the hearts of utter strangers. If one may judge by the amount of correspondence of an amorous nature which pours into Royal palaces from unknown writers, an immense number of weak-minded people imagine themselves to be ardently in love with Royalty. Happily for the sanity of Kings, Princes, and Princesses, such correspondence never, or only very rarely, reaches those to whom it is addressed, but is dealt with by private secretaries and their assistants as mere ebullition of sentimental lunacy and consigned to the flames.

But a small portion of these love-letters from irresponsible strangers — 1 per cent., perhaps — receives a greater amount of attention than might be imagined; and some of the writers of such letters give an infinitude of trouble and annoyance to those Court officials whose duty it is to protect Royalty from postal pests.

In other words, it is not always possible to treat the love-letters with silent pity or contempt, as it sometimes happens that the writers are

## SO MANIFESTLY INSANE

as to constitute a real danger to the Royal personages to whom they have given their wayward hearts. Such writers have before now perished in their unwarrantable attentions during whole periods of years, and finally become so violent in their language as to necessitate steps being taken to obviate the possibility of their veiled or overt threats being carried into effect.

In such cases as these the services of the taciturn and experienced detectives who devote their whole time to safeguarding Royalty are requisitioned. But although these matters are dealt with by the police, they never become known to the general public, for prosecutions do not eventuate, the foreign stranger's generally being persuaded to enter sanatoria, or are put under restraint by friends. So that, indeed, it frequently happens that the Royal personages who have been bombarded with amorous epistles for many months hear nothing whatever of the matter.

Some years ago, the Prince of Wales, then the Duke of York, was pursued wherever he went by letters from an English lady living in Berne. The first few letters, being of the usual type, were simply ignored, but after a time the lady began importuning His Royal Highness to make an appointment with her, and to threaten that if he failed to do so she would come to London and force herself into his presence.

It then became necessary to act in the matter, and a detective journeyed to Berne to see what could be done. The lady proved to be a single person of middle age, in comfortable circumstances, living in an hotel, and, apparently, as sane as the officer who went to see her. But directly he touched on the subject of her letters her irresponsibility became manifest; she even declared that the Prince had

## PROMISED HER MARRIAGE.

and argued that his marriage to "the Princess did not preclude him contracting a morganatic union. She consented, however, to desist from attempting to see His Royal Highness or writing further letters for a time, and the detective returned to London with the object of consulting her brother, a north-country solicitor.

But the infatuated lady must have

been to many others—for he wrote imploring that the engagement should be cancelled, and urging the reason that he would be leaving school in six months' time to enter his father's office, so that he hoped soon to be making enough money to marry on. One would imagine, from his attitude, that even after the lapse of six months he would have acquired sufficient worldliness to be anything but a peril in a business office.—London Tit-Bits.

## WOMEN NURSES FOR INSANE.

New Departure in the Peoria, Illinois, Insane Asylum.

An interesting experiment is being tried in the Illinois Asylum for the Incurable Insane at Peoria, that of substituting women nurses for male attendants. There are sixteen hundred patients in the institution and already seven hundred and seventy-five men are cared for by female nurses. Public opinion has been undergoing rapid changes with regard to the insane. It is not so very long ago since men were selected to guard and tend this class because of their physical strength and ability to "control" these unfortunates by brute force. The padded cell, the straight jacket, and other devices for subduing refractory patients were considered the proper thing. Now these methods are rapidly passing away. Insanity is recognized as a disease, and the humane principle of ruling by love is found to be more efficacious than brutality. As a nurse woman is in the position for which God and nature specially qualified and designed her, and man can never hope to rival her in this sphere. Formerly the insane asylum was looked upon as a custodial institution where the chief idea was restraint; now it is given its rightful place as an hospital where these saddest of all afflicted human beings should be tenderly and humanly cared for. In Illinois the plan of substituting women for men has worked well. Dr. Mitchell, in writing of the advantage, says: "In placing women in the male wards you restore as near as possible to the patient homelike surroundings. She takes more of a personal interest in her charges than a man and looks after the many little things that go to make life pleasant and smooth. By doing so she eliminates a source of irritation to an already irritated brain. The conduct of the men improves. They become more tidy in their appearance. The violent become less violent and the profane less profane. Men who did nothing before began to brighten up and do little errands for the nurses, were praised for their efforts and found something to live for and some enjoyment in life." Undoubtedly the new system will do away with the abuse and cruelty so often charged against male attendants, and it will comfort distressed relatives who have been accustomed to regard with horror the average asylum for the insane. Here is one of the true vocations for women! And may we not hope that the example of Illinois in this matter will soon be followed by similar institutions everywhere!—J. J. Kelso, Toronto.

## CATERPILLAR FEVER.

Nature Study at Close Range Has Its Disadvantages.

Zeal for nature study, not tempered by experience, explains why so many country doctors have been called in to diagnose an epidemic of rash which has affected whole classes in some rural and urban schools, says The London Daily Mail.

The symptoms of the ailment, well-known to doctors as "caterpillar rash," are intense irritation on the palms, and sometimes on the face, accompanied by a number of blister-like swellings, which when they occur around the eyes, sometimes have the effect of obstructing vision.

The preventive is for the nature study

Company had ruled its vast bulwark as despotically as the Czars ruled Russia. Only its store-ships, bringing in supplies and munitions, articles of barter and platoons of servants, and conveying out the years accumulation of peltries and furs, could cruise in Hudson Bay. Only its factors, clerks, and trappers could venture into its inland areas, save at the risk of death. Over the northern plains the company's word was law, its tokens were currency, its factors exercised the powers of life and death, liberty and lordship. In its earliest days it had a desperate struggle to maintain its existence; for the French repudiated its charter, ignored its authority, and did actual battle to crush it out. In 1686 Troyes and Berthville captured the company's Forts Rupert and Albany and in 1697 Berthville with a small squadron invaded Hudson Bay, met and defeated the company's ships, and captured Fort Nelson. In 1772 La Perouse also captured Fort Prince of Wales, an important stronghold which had been forty years in building, and high and thick walls of masonry, and would have required four hundred men for its defense. As it had only thirty-nine, the chief factor, Samuel Hearne, the "Mungo Park" of Canada, surrendered it without firing a shot, presenting its keys to the victorious Frenchman on a silver salver; for which his memory has been exalted by the company's people ever since.

#### FIRST GOVERNOR.

The first governor of the company was Prince Rupert, and its second John Churchill, Duke of Marlborough. Its original capital was only ten thousand pounds, and it operated in only a small way at first; but so enormous were its profits that within twenty years it nominally trebled its capital, so as to make its annual dividends appear smaller. Yet in 1684 the dividend paid was fifty per cent., and in 1689 thirty per cent., although the company claimed to have lost one hundred and twenty thousand pounds during the decade by French marauding. Thirty years later the capital was trebled again. By this time the company had its posts spread all over the west in wilderness, and international amity prevailing, was compelled to meet the commercial competition of rival concerns which took life in the piping times of peace. John Jacob Astor, the founder of the New York family of that name, laid the foundation of his fortune by the establishment of the Astoria Company for the western fur trade, the story of which is told in Washington Irving's "Astoria." The N. Y. Z. Company was another rival. But the most dangerous of all was the North-West Company, which was got rid of only by being amalgamated with the Hudson Bay Company in 1821, after a bloody battle between their rival forces of trappers and voyageurs at Fort Garry (now Winnipeg), in which Governor Semple, of the latter, was killed.

These rivals disposed of, the company was able to devote its undivided energies to extending its commercial progress, until 1850, when the discovery that silk could be used instead of beaver skins in the manufacture of hats proved a disastrous blow to its leading branch of trade. After the War of 1812 the American Government excluded it from the western country then claimed by the United States. But it still maintained itself in the wilds of the Rockies and the Pacific slope; it flourished in Vancouver Island, now part of British Columbia; it invaded the Yukon country; and for many years previous to the purchase of Alaska by the United States that whole territory was leased by the company from the Russians. When the Oregon boundary dispute was settled in 1871 by Secretary Seward and Lord Lyons, the United States Government paid the Hudson Bay Company four hundred and fifty thousand dollars for the relinquishment of its territorial rights in the region transferred to the American flag, while the same year Canada extinguished its overlordship in

boy of sixteen at Mingan, a post so farthest Labrador, and remained in that icy inferno for thirty-five years, leaving his post only once in that time to walk to Montreal, a journey of over three thousand miles each way, to consult an oculist. He was reprimanded for this and ordered back, and on the return trip his two half-breed companions perished in a terrible storm, while he barely escaped. He amassed a comfortable fortune, as each factor is admitted into a partnership after fifteen years' service, and being suddenly elevated to authority, proved his executive qualities, joined in the construction of the Canadian Pacific Railway, and is now a peer of Great Britain, and so many times a millionaire that he could afford to raise, equip and pay a regiment of Canadian cavalry, known as "Strathcona's Horse," six hundred strong, for service in the Boer War.

#### THE HOME PAPER.

Isn't filled with cuts and pictures, nor the latest news despatches; And the paper's often dampened, and the print is sometimes blurred. There is only one edition, and the eye quite often catches Traces of a missing letter, and at times a misspelled word.

No cablegrams nor "specials" anywhere the eye engage; The make-up is, maybe, a trifle crude and primitive.

But an atmosphere of home life fills and permeates the pages

Of the little country paper printed where you used to live.

How the heart grows soft and tender, while its columns you're perusing; Every item is familiar, every name you know full well.

And a flood of recollections passes o'er you as you're reading

On the past and weaves about you an imaginative spell.

You can see the old home village, once again in fancy, seeming

To be clasping hand of neighbor, and of friend and relative;

And their faces rise before you, as you're idly fondly dreaming

Of the little country paper, printed where you used to live.

And you seem to leave the city, with its rush and roar and clamor.

With its busy, bustling atmosphere of turmoil and of strife;

Leave the multitude of surging, eager workers, and the glamor,

For the quiet, soothing blandishment of restful country life.

And you note a vine-clad cottage with the roses nestling round it;

Hear the voice of mother calling for the long-gone fugitive,

While the echo of her pleading, memories repeat, and sound it

Through the little country paper, printed where you used to live.

Every printed line reminds you of the days long since departed;

Here a boyhood chum is mentioned, there a schoolmate's name appears;

And the eye grows moist in reading, while the soul grows heavy hearted

O'er the changes Time has wrought throughout the swiftly passing years.

Memory's scroll has deep impressions stamped upon its face forever.

Of sweet pleasures which the busy city life can never give;

And, in fancy, you are roaming through the quiet town whenever

You peruse the country paper, printed where you used to live.

—Sunset Magazine.

#### KNOWN BY HIS WORKS.

As they passed an open gateway, a dog within the enclosure growled and bristled up very perceptibly, whereupon one of the party remarked:—

"No doubt about his being a watchdog."

"How can you tell?"

"Why, didn't you see the hair spring."

the royal highness or writing further letters for a time, and the detective returned to London with the object of consulting her brother, a north-country solicitor.

But the infatuated lady must have had her suspicions, for she was seen in London two days later. Promptly a watch was placed over her and her brother sent for. Before the latter's arrival, however, she succeeded in eluding the officer on watch, and, calling at Marlborough House, only to learn that the Prince was not in town, went to Sandringham. It happened, though, that His Royal Highness was staying in Scotland at the time, and on returning to London from Norfolk, with the apparent intention of going north, she found her brother, a Court official, and a couple of doctors waiting her return to her hotel. The upshot of it was she was certified insane and placed in a private asylum by her brother.

In the days of his youth King Edward used to have love-letters sent to him by the score, many emanating from Continental ladies. And it may here be remarked that Princes invoke far more love-letters from women than Princesses do from men. About the year 1860 a lady, the widow of a French consul, conceived a most unwelcome passion for the then heir to the British throne, to whom she had been introduced on some formal occasion.

#### SCORES AND SCORES OF LETTERS

all breathing most fervent affection, were received from her, and for a long time it seemed impossible to put a stop to the annoyance. Eventually, however, it corrected itself; she appeared to recover her mental balance, and the correspondence ceased suddenly. A year or two later she consoled herself by taking a second husband.

Since he reached a marriageable age, particularly before his marriage, the Crown Prince of Germany was subjected to the same annoying nonsense, American actresses seeming peculiarly susceptible to his charms. Shortly after his visit to the United States it became known to the Press that no fewer than seven charming and well-known actresses were regularly writing to him, each with the idea of inducing him to "name the day." As their names were disclosed it might be suspected that they were engineering cheap advertisements for themselves in the true American fashion, but this some of them authoritatively denied; and, of course, there is no questioning the word of a charming young lady. The fact remains that love-letters, many of them containing offers or suggestions of marriage, streamed across the Atlantic upon the Kaiser's heir in astonishing numbers long after his return to Germany, and there is still, it is said, some love-lorn lass in the States who write to him occasionally to remind him of imaginary occasions when he plighted his troth to them. In the same way has

#### THE YOUNG KING OF SPAIN

been bombarded for years past, and many of the epistles sent to him have emanated from wealthy women who have labored under the notion that their riches might counter-balance their general unsuitability as wives for reigning monarchs. It is understood that the method of dealing with such correspondence at Madrid is to simply return the letters in plain envelopes, without comment or remark, which is severe for so courteous a nation as the Spanish.

Very many love-letters sent to the Princesses are written by schoolboys. The Princess of Wales received a great deal of attention of this description at one time, and no doubt, contrary to the rule many of the epistles reached her by sheer merit of their amusing character. One of the Princess's youthful lovers used to seize up on every possible occasion, such as her birthday, Christmas, and St. Valentine's Day to send her small gifts, which were always accompanied by letters, and which were invariably acknowledged. The announcement of "Princess May's" engagement was a heavy blow to this young man—as, indeed, it must have

been a severe irritation on the palms, and sometimes on the face, accompanied by a number of blister-like swellings, which when they occur around the eyes, sometimes have the effect of obstructing vision.

The preventive is for the nature class to leave hairy caterpillars alone. As the "palmer worm," the hairy caterpillar of the gold-tail moth, one of the commonest and most beautiful objects of the country at midsummer, passes from hand to hand, it leaves on every palm a few of its loosely-attached hairs, and these hairs are possessed, for the protection of the caterpillar against birds and browsing animals, of what scientists call "irritating properties." "Urtica" is the Latin for "nettle."

As the barbed hairs work their way into the palm, the child feels the irritation, and scratches the palm with the other hand, thus transferring some hairs to the finger tips. Presently he touches his face, and the hairs or fragments of them begin to irritate there. But the more he rubs and scratches the more he disturbs the cause of the trouble and the worse it grows. The best procedure when the first irritation is felt is to wash the hands or rub them with dry sand or dust, and after that to resist all temptation to scratch the irritated surface or to touch the face.

Many other hairy caterpillars are almost as bad as the "palmer worm," and as a general rule the less you handle any hairy caterpillar the better.

#### ANOTHER BEAUTY RECIPE.

##### A Milk Bath and How It is to be Taken.

The latest recipe for the familiar treatment of the complexion by bathing in milk comes from Paris. It says that the face and neck should first be carefully cleaned with pieces of wadding soaked with a mixture of olive oil and cognac or olive oil and eau de cologne and the skin then dried and the milk bath applied. Let the milk dry on the face and then rub with thin slices of a raw potato or a cucumber.

Women sometimes find that the milk seems to burn the face at first, but they must persevere and the good effects will soon be perceived. The treatment must be regular and continued for a long time if good results are wanted.

The eternal milk treatment ought to be accompanied by certain internal applications, including many glasses of pure milk during the day and a large glass of hot water on going to bed, and another on getting up. Take little meat; plenty of salad, but no wine, no tea and no cake.

#### DO THE HARD THING FIRST.

He who defers an unpleasant duty does it twice. Anticipation of it may become a continued torture. It is wise to be done with it in the first place, and then contemplation of it becomes a pleasure. The undone task, resting upon your head, weighs you down and holds you back. The well-finished one, beneath your feet, raises you up, and helps you forward. Somehow or other it seems that the hard things are the important things. Maybe it is because they are hard and sometimes left undone that their importance is realized. If you have not met with success you think your efforts merit, do not sit down to groan and rail against Fate, but just quietly cast about for the disagreeable parts of your work from which you have shrunk. There you will find your point of weakness. You may not attach much importance to these things you shrink from, but you can never know how your neglect of them has changed the current of your life.

#### HOW IT WAS.

"Did you hear Miss Fimser say that she had a speaking acquaintance with that millionaire?" asked Maud, scornfully. "Yes," replied May, with equal scorn. "It's the first time I knew that she ever worked in a telephone exchange."

# RRAE TRIUMPH OF SKILL ARE YOU GETTING OLD?

## THE ALPHABET ENGRAVED ON MERE PINHEAD.

Engraver Works With Finely-tempered  
Steel Tool, Sharper Than  
a Razor.

The flat surface or top of the head of a pin is a little less than five-sixty-fourths of an inch in diameter, yet it is large enough to be engraved so that, with a strong magnifying glass, clearly discernible on its surface are all of the letters of the alphabet, including the name of Eugene Wrenger, an expert engraver at St. Louis, who did the work. The pin above described was presented by Wrenger to a friend, who in turn sent it to a museum in Philadelphia, where it was accepted as a wonder in the way of development of the engraver's art and placed on exhibition.

At various times in late years reference has been made in newspapers to fine specimens of engraving—notably that of the full text of the Lord's Prayer on one side of a watch charm. But few attempts have been made to accomplish perfect work in the engraving line on the head of a pin.

The task is so delicate that the first thing done is to flatten the head of the pin, making it perfectly smooth. If the metal is over hard it is softened by chemical processes. Then, with a glass that brings out the limit lines of the surface, but magnifies it only four times, the operator sets to work with a lozenge form graver—which is a four inch penstock holding a piece of the finest tempered steel shaped like a diamond, the elongated points of which are the knives of the workmen.

Keener they are than a razor. The scratch or mark they will make in softened metal is finer than that made by any diamond cutter. Before a mark is made on the surface of the pinhead a device which will locate 960 straight parallel lines on a surface of one inch in width is used on the surface of the pinhead, and the guide lines fixing the possibility of lettering on that surface are established. Then, operating with the aid of the magnifying glass, the work of cutting the letters is commenced.

The lines made are finer than those referred to ordinarily as "hair lines." The strongest eye in the strongest natural light cannot discern more than a web-like mass on the face of the pinhead after the work is complete. If picked up and examined casually a person with very strong eyes would declare there was nothing remarkable about the head of the pin except that it seemed to be flattened, the work having been done evidently with a very fine file. In order that no slip of the object being engraved will cause irreparable disaster, the pin is held in a delicate but strong vise, so arranged that it cannot move.

Wrenger, who was born and schooled in St. Louis, has only just reached the voting age. He has been engaged in the engraving and printing rooms of several large St. Louis establishments.

"It would hardly be true," he said to a reporter, "to say that I have devoted any particular time or attention to work of this kind. My experience has been confined almost wholly to the general line of commercial engraving. About four years ago I saw something in a newspaper about the work of a Canadian engraver who succeeded in placing a lot of lettering on the head of a pin. I practised some and finally, about two months ago, turned out the two samples one of which found its way into a Philadelphia museum.

"Is the work really difficult?" "Well, yes, I suppose it would be to any one not having a thoroughly good nervous organization. Sometimes I would not attempt such a task. If my nerves were not in good condition it would be useless. The variation of the fraction-

## OPINION CHANGES WITH ADVANCING YEARS.

Twenty-two Seemed Ripeness Once—  
All in All, It's a Hard  
Problem.

I have reached that stage in life's pilgrimage at which a man calls himself middle aged; if in company, rather ostentatiously, not so much in the manner of one hoping for contradiction as inviting it; the stage, at which, if it be implied in general conversation that he is no longer young, he requires a few serious moments in which to collect his thoughts before he draws attention to the implication with unnecessary insistence, and cordially indorses it, writes Archibald Marshall in the London Mail.

There was a time, not so many years ago—as years go now—when I thought that 22 was a very ripe age. I still thought so, years afterward, when I reached it myself; for an undergraduate in his third year looks upon a freshman as immeasurably his junior, and is oppressed with some of the weightiest cares of manhood. He knows the meaning of a financial crisis and has serious thoughts of marriage.

At 23 my temperature had gone down and I felt younger, but continued to look upon 30 as the age at which I should be able to save money on clothes and grow a beard if I felt so disposed, as nobody could be expected to care what a person at that time of life looked like.

At 25 I reckoned that I had about six more years of pleasurable existence before me, and at the end of that period it would not matter in the least whether I were rich or poor, so I had better hurry up and

### MAKE SOME MONEY.

Six years, or possibly seven, as I seemed to be wearing rather better than some of my contemporaries.

At 27 I gave myself eight more years. I knew men of 35, active and still presentable; in fact—why shirk the word—young. But, while admitting this, not without a measure of self-gratulation at being able to assign myself a few extra years of sentient existence, I felt it was useless to dally with the question any further and that 35 must be, and remain, the limit.

So I continued to think until I myself came in the course of nature to the age of 35, not, however, without serious qualms at 32 and 33, when I felt as young as possible, but said to myself that it could not be expected to last much longer.

Let me see! Was it at 35 that I left off using Flowers and Honey for the hair? I think so. I really want to get to the bottom of this question, and that might be a pointer. I will consider it later. They still say that my hair waves, and I fully believed that what is left of it does; and they still please me by saying so, though I feign indifference. (The ladies, I mean—not crudely, as it were, in frontal attack, but incidentally, when they are sizing up the points of my very small son, and comparing his personal appearance with mine, not invariably to his advantage.) But it really did wave like anything ten years ago; and, without resorting to illegitimate compulsion, I took care that it should wave to advantage. Now I just

### DIP A BRUSH IN WATER.

and if it likes to wave after that it is at liberty to do so. If not, I do not care. Honestly, I do not.

At 35, then, I claimed middle-age, but without showing the least resentment when the claim was disputed, or, indeed, feeling any. I must confess, however, that by that time I had come to cherish the secret conviction that 40

# SUNLIGHT SOAP

Clothes washed by Sunlight Soap are cleaner and whiter than if washed in any other way.

Chemicals in soap may remove the dirt but always injure the fabric.

Sunlight Soap will not injure the most dainty lace or the hands that use it, because it is absolutely pure and contains no injurious chemicals.

Sunlight Soap should always be used as directed. No boiling or hard rubbing is necessary.

Sunlight Soap is better than other soap, but is best when used in the Sunlight way.

Equally good with hard or soft water

**\$5,000 REWARD** will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Lever Brothers Limited, Toronto

## TO TUTNEL THE CHANNEL

### UNDER THE SEA BETWEEN ENGLAND AND FRANCE.

Would Abolish the Most Unpleasant  
Salt Water Passage in the  
World.

A scheme fifty years old is revived in the commission, recently given to Sir Douglas Fox, past president of the Institute of Civil Engineers, to draw up plans for a tunnel between England and France. Parliamentary sanction for the enterprise will be sought, and in view of the good relations between the two countries, and the tremendous advances in modern engineering, it is possible that the old dream will become a reality. It would abolish the most unpleasant salt water passage in the world, shorten the distance between England and every point in Southern Europe, and stimulate the intercourse between France and England. It would also deal a severe blow to some important shipping interests, and on this account it is sure to be strongly opposed.

### WERE ONCE JOINED.

By restoring land communication between England and the Continent the tunnel will undo the work done by the sea some thousands of years ago. Where the English Channel now flows was once solid land, and England was joined to France, so solidly, apparently, as France to Spain. Whether the separation was effected by some tremendous cataclysm or through centuries of erosion by the waters is not known, though the scientists favor the latter theory. Geologists speak of the separation having occurred not very long ago, which probably means within a few hundred thousand years. Whenever the disjunction took place, by whatever means, it may be properly regarded as the most important natural phenomenon since the Flood. As a part of the mainland of Europe, there would have been no England, no Empire, perhaps no America, as we knew it to-day. The waves that made Eng-

## CONQUERING THE SAHARA

### FRANCE RECLAIMS ARID AFRICA TO CIVILIZATION.

Famous Camel Cavalry the Means of  
Reaching the Wild and Law-  
less People.

France is constantly giving proofs of her mastery over the Sahara. She has won it by her new methods of desert travel, which were adopted only three years ago, and proved successful from the first. Her mechanists travel wherever they are sent. At irregular but frequent intervals they raise their flag over some new territory and attach it to one of their organized districts. The mechanists are small troops of camel cavalry mounted on animals specially trained for fast travel, so that they may go lightly laden. They depend on the oases to replenish supplies. Their latest journey is one of the most notable of their achievements.

Starting from Timbuktu they marched north and northward about 350 miles to Taudeni, arriving there May 8. Capt. Cauvin and his men camped in the town for eight days. The natives had never seen a white man before. Their fathers saw one specimen seventy-eight years ago, when Rene Caille crossed the desert. Lenz was in that neighborhood about twenty-five years ago, but passed around the place because

### HE DID NOT DARE TO ENTER IT.

Capt. Cauvin attached Taudeni to the Government of Timbuktu and his party returned to the Niger. They had met no opposition, but were much fatigued by the heat and the hardships of a desert march nearly as long as the distance between New York and Chicago.

Isolated and miserable as Taudeni is, the place has long been one of the most notable in the Sahara. It occupies a depression only about 400 feet above sea level. The waters come near the surface here and many wells are possible. This has made the settlement the converging point for all the caravan routes between Morocco and

"Is the work really difficult?" "Well, yes, I suppose it would be to any one not having a thoroughly good nervous organization. Sometimes I would not attempt such a task. If my nerves were not in good condition it would be useless. The variation of the fraction of portion of a hair in making a line would spoil the whole surface and it would have to be commenced all over again."

"Some of my companions in the shop were doubtful about the accomplishment of the task and refused to believe that it had been done until they were given a magnifying glass and permitted to look for themselves."

Some facts and conditions known only in the engraving rooms where the most difficult work is accomplished are developed in the mechanical detail of the task of engraving the head of a pin. The matter of light to work by is all-important. No kind of artificial light will serve for such an undertaking. Light—meaning sun or day light—coming from the east will not serve; neither will light coming from the west, because light coming from either side will cast a shadow opposite and cloud the surface and the delicate guide lines.

Only the light coming from the north, which throws a shadow behind, and moving with the movements of the engraving instrument, will serve. Another reason why the north light is indispensable is that it is steady, not being dependent upon the movement of the sun for its steadfastness. Engravers say this is because the north light is reflected rather than direct.

C. E. Long, a watchmaker and engraver, of Denison, Texas, has now engraved ninety-seven microscopical letters on the head of a pin, and Walter Hartwick, of Detroit, Mich., placed not only the alphabet and name numerals on the head of a pin, but his name, occupation, address and the date at which the engraving was done. The total number of characters in this instance was seventy-four.

This and Eugene Wrenger's feat interested Long, and he stated that he could exceed the record of both. Forthwith he secured a pin and began work and in one afternoon had succeeded in placing ninety-four characters on the small surface, exclusive of punctuation points. Around the edge of the pin he engraved the letters of the alphabet, the character "&" and the year "1906." To this he added, "C. E. Long, Engraver, No. 216 Main Street, Denison, Texas, Watchmaker, Jeweler and Optician." Mr. Long used ordinary engraving tools for his task.

#### BIG SALARIES YOU CAN'T LIVE ON.

It does not always pay to hold a public appointment carrying a big salary. The Lord Mayor of London's £10,000 a year looks handsome to the man in the street; but as the Lord Mayor generally spends from £20,000 to £30,000 during his year of office, the appointment is scarcely tempting to anyone anxious to make money out of it. The salary of the British Ambassador in St. Petersburg is £7,800, but at least one former ambassador found the pay insufficient. This was Lord Augustus Loftus, who, on the occasion of the marriage of the Duke of Edinburgh to the daughter of the Tsar of that day, was encouraged by our Foreign Office to celebrate the event in St. Petersburg with Royal magnificence. Lord Augustus, being a man of only small private means, he expected to be reimbursed for his outlay on this occasion by the Government; but Downing Street feared to establish a bad precedent, and left his lordship to meet his obligations the best way he could. Result, bankruptcy—which was all Lord Augustus got from a grateful country—that and sympathy!

#### PRECOCIOUS.

Pater (at 2 a.m.)—"Oh, drat the child!"  
Mater—"You must expect babies to cry when they begin teething."  
Pater—"This one's been crying ever since he began bairing."

Honestly, I do not.

At 35, then, I claimed middle-age, but without showing the least resentment when the claim was disputed, or, indeed, feeling any. I must confess, however, that by that time I had come to cherish the secret conviction that 40 was after all the natural dividing line. It was only out of deference to the callow opinions of youths still in the twenties that there was any question about the matter at all. Why, when I was 36 I heard someone say that I was a clever young fellow. It was a man of 40 who said it, and although he was one whose opinions I had despised up to that time, still, I think, that on the whole, he probably knows what he is talking about.

Now I am not so sure about 40. I am inclined to think that 45 would be nearer the mark. Mind, I do not wish it to be thought for a moment that I am 40 myself. Such a suspicion would do me a great injustice. No, I am still in the 30s, and shall be for a considerable time, probably until after this article appears in print. But, still, I wish to consider the question impartially, and it is really absurd to pretend that the difference between a man of 42 or 43 and a man of, say, 39½, is so very marked. And, if this is so, it is obvious that another two years added cannot affect the matter either one way or the other.

Well, at present, then, I am inclined to leave it at 45, without prejudice to my right to alter my opinion in a few years' time. But if I were put to it, I think I could write an article equally convincing to show that actual age has nothing to do with the question at all. I might try to show that marriage ends it, or fatherhood, but I do not think I should. I should be more likely to follow the glimmer of light that has come to me in the course of this inquiry, and point out that youth ends when personal vanity begins to diminish. I might say that when trousers which have acquired a very slight bagginess at the knee are not instantly discarded from the wardrobe, it is a sign that

#### MIDDLE AGE IS ENCRDACHING.

I might use other illustrations of the same sort; and I should certainly bring in the example of the hair and the amoument.

But if I did that I should have to acknowledge that I myself was now well on in middle-age, and that I absolutely refuse to do. Why, I am still in the 30s; I still like chocolate eclairs, though I do not ache for that form of sustenance as I did 25 years ago; young fellows in the twenties very seldom think it necessary to put Mr. before my name, and I still feel at ease in their company, though I prefer that of the rather older young men of about my own standing. Away with spitting of hairs, and away with false modesty! Whatever may be said of 45, youth has not ended at 39, and I hold to that opinion against all opposition.

P.S.—I have just overheard a subaltern with whom I had a slight difference of opinion at the club yesterday, in connection with a diamond declaration, giving a highly colored account of the episode to a companion in arms. I did not hear distinctly all he said, but I caught the expression, "Silly old fool." I am not seriously annoyed, but I do not feel quite so certain about 39.

P.P.S.—It has just occurred to me that the words I overheard were probably applied to one of our opponents at the table who took very little part in the discussion. They would be more applicable to him, as he was 40 last week. Let it stand.

#### OF LITTLE CONSEQUENCE.

"Well, well," exclaimed the first summer girl, "where did the engagement ring come from?"

"From Biffany's, of course," replied the other.

"O! I don't mean that. Who is the man who gave it to you?"

"O! Why—er—really, I've forgotten his last name. I just call him Shorty."

Whatever means, it may be properly regarded as the most important natural phenomenon since the Flood. As a part of the mainland of Europe, there would have been no England, no Empire, perhaps no America, as we knew it to-day. The waves that made England an island made North America an English continent.

#### DICKENS ON THE SCHEME.

Looking over a copy of "All the Year Round," then edited by Charles Dickens, an article came to view on the tunnel under the English Channel unsigned and it might well have been written by its editor, at least, it is a passable imitation of some of his moods. It is interesting to note that the great boon expected of the tunnel was its promise to save travellers from sea-sickness. In all its length there was no word about the time to be saved or the journey to be lessened. In 1869 the people of England did not think their time was so valuable. Nor was there in the essay any reference to the danger of a French invasion, via tunnel, a bogie so prominent in subsequent discussions of the subject. Another amusing feature of the article was its implicit assumption that the tunnel would be built in three or four years. So, a half century hence may other readers comment on the articles the project is apt to call forth.

#### ENGINEERS PREPARE PLANS.

In 1852 a French engineer proposed to connect the two countries by a bridge, and for some time the project was gravely debated. This idea was to have a structure 200 feet above the water resting on piers 400 feet long. It was estimated that \$250,000,000 would cover the expenditure. This staggering sum tended to sink the scheme, but the final blow was struck by the vessel owners, who feared they would be ruined by the wreck of their ships against the piers of the bridges. Four years later a French engineer, Mr. Thorne de Gamond, shared with Mr. William Law the honor of preparing the first scientific plans for a tunnel. The Frenchman's scheme was endorsed by experts in his native land, but collapsed through English indifference or hostility. In 1867 he showed his plans at the great Paris Exposition.

#### THROUGH THE CHALK BEDS.

In 1867 Gamond, Law and James Brentles combined and presented the plans to a committee, of which Lord Richard Grosvenor was chairman. On it were several engineering experts, and all agreed that the project was feasible, and the engineers' calculations founded on solid facts. The theory on which the most important calculation—that of boring out the rock under the channel-bed—was based is that the same chalk formation extends unbroken from Dover to Calais. This rock is excellent material for drilling operations, and has proved almost impervious to water. In this stratum a shaft was sunk 1,600 feet deep, and not a drop of water was found. Mining experts testified that the leakage from the channel down was not to be feared.

#### COST OF THE TUNNEL.

It was estimated that \$24,000,000 would build a tunnel wide enough for double tracks. This was at the rate of \$1,000,000 a mile. In four years the promoters hoped to have the work completed. Drilling machinery was ordered, or built, and the great borer was said to be able to advance at the rate of a yard an hour, and pass out the rock and earth behind it. The French Emperor approved the scheme as did the French Chamber of Commerce, but English officialdom remain cool. The result was that the grand project fell through. Since then it has been discussed more or less seriously a score of times, and the London, Chatham and Dover Railway has endeavored to arouse interest in the plan, but so far without much more success than attaches to the advancing of the metric system for England.

the place has long been one of the most notable in the Sahara. It occupies a depression only about 400 feet above sea level. The waters come near the surface here and many wells are possible. This has made the settlement the converging point for all the caravan routes between Morocco and Timbuku.

It is the centre of the largest salt industry in Africa. Here are apparently inexhaustible beds of pure rock salt, which the natives hew out in blocks three feet long, weighing seventy pounds. Four of these make a camel load. The salt is taken to Timbuku and distributed throughout the whole western Soudan. It is sold to the Timbuku merchants for a pittance, but increases in value with every day's journey of their camels to the south.

Taudeni is described by the people of Timbuku as one of the most wretched of desert settlements. The natives are of mixed Arab and negro blood. They have had no government. Every man is a law unto himself. Often the miners suffer from lack of food, as they are dependent on imports for supplies of all kinds.

#### EXCEPT WATER AND SALT.

They exact a camel from every caravan replenishing its water skins at their wells, and the animals thus acquired are kept as a food resource. It was because Lenz could not spare a camel that he replenished his water supply at Wady Tell, outside the settlement, and went on without seeing a native. Salt mining is the only industry. The heat is so intense that at times the miners are compelled to quit work and take refuge in caves.

Lenz found abundant evidence that this region, some time or other, gave support to people of a culture differing from that of the present inhabitants. He found the ruins of ancient walls, objects of ornament, tools and other articles such as are no longer in use. He learned that many of these relics are scattered over this part of the desert and specimens of finely worked and polished stone have been carried as curiosities to other Saharan towns. The French expedition may throw more light on this region.

#### WHAT IS A COW WORTH?

What are the cows worth that produce 400 pounds of butter per annum? Here I am going to make a statement and undertake to prove it correct, says Mr. H. B. Gurler, as quoted by Hoard's Dairymen. When a cow that produces 200 pounds of butter per annum at a food cost of \$39 and a labor cost of \$12.50 is worth \$35, the cow that produces 400 pounds of butter annually is worth \$400; and the owner can make net \$16 more from her after paying interest on the \$400 than he can from the cows that produce 200 pounds of butter.

There is no more labor connected with the 400 pound cows than there is with the 200 pound cows. The price at which butter has been credited, i.e., 20 cents per pound, is the net price from the creamery after the milking has been paid for. In this herd the increased cost of feed for the 400 pound cows was more than offset by the increased amount of skim milk, so we have the 200 pounds increase of butter as net profit over the 200 pound cow. Two hundred pounds of butter at 20c is \$40. We have \$400 invested in these cows, which at six per cent. interest is \$24, which we will deduct from the \$40 and we have left \$16 to the credit of the 400 pound cow.

#### SORROWFUL ROMANCE.

"'Tis strange," quoth the tramp, "as he strudged through the rain, Heaving a heavy sigh, 'That I can thus get so confounded wet And still be so awfully dry.'"

The doctor gains wealth only by p'tents and long suffering.

## Is It Your Own Hair?

Do you pin your hat to your own hair? Can't do it? Haven't enough hair? It must be you do not know Ayer's Hair Vigor! Here's an introduction! May the acquaintance result in a heavy growth of rich, thick, glossy hair! Use this splendid hair-food, stop your falling hair, and get rid of your dandruff.

Write for terms now to

THE PELHAM NURSERY CO.,  
Toronto Ont.

SEASON OF 1906.

## ANOTHER GREAT CROP.

Last year this Dominion went into ecstasies over the garnering of a wheat crop of a hundred million bushels in the West. It was a new record, a new high-water mark, and we were naturally pleased, and would continue to be pleased even if this year some slight retrocession had to be noted. But there is no retrocession. The new mark is to be several notches higher than the old one. The importance of all this it is, of course, not easy to over-estimate. For a whole year that hundred million bushel heap of wheat (to say nothing of other grains), of which in former years there was no counterpart in our annual inventory has been spreading itself out thin over the whole surface of the commerce and industry of Canada. A good-sized portion of it is discernible in the seven millions profit increase of the Canadian Pacific. In the balance sheets of other and lesser business houses its influence is not so easily traced, but it counts for a good deal in the balance of profit for the year. We in Montreal are a long way, in miles, from where the wheat was grown, but the influence of the great crop upon the fortunes of the city could be read, if the figures were handy, in the details of every factory, from those which turn out their scores of locomotives and their thousands of freight cars to those others which add ten per cent. to their output of shoes. News of big crops in the West is great news.

## WHAT OTHER PAPERS SAY

Montreal Herald.

The fact that in spite of unprecedented immigration the labor supply, even in those parts of Canada to which the human flood sets strongest, is as unprecedentedly scarce, shows that there has been a material change in the character and position of the incoming settlers. Some years ago the new settler used to consider himself lucky if he found an employer and a job.

Woodstock Sentinel-Review.

The health of the people should be their own first consideration. They should insist that whatever laws there are in existence to insure the purity of the food they consume should be strictly enforced, and if the existing laws are not sufficient they should insist on having the defects remedied as soon as possible.

Brookville Recorder.

Now, let us look at the old man in old Ontario. He is not doing much hollering one way or the other; just simply pegging away, and a kind Providence is smiling down upon him, bestowing bountiful harvests, and, incidentally lifting the heavy old mortgage that has weighted him down.

Secretary Wilson of the United States Department of Agriculture has issued the new regulations governing the inspection of meat-preserving methods. Inspectors are to watch every stage of the packing process, the penalty for infraction of regulation being the withdrawal of the Government label and the exclusion of the offending firm's goods from interstate and foreign commerce. One of the offences so penalized is failure to destroy condemned carcasses, which may no longer be utilized as food even in Chicago.

Meaford Express.

These are days when the discontented farmer's fancy lightly turns to thoughts of moving. The great railway systems of the west flood the

thoughts of moving. The great railway systems of the west flood the mails with manuals setting forth the beauties of this and that region, each claiming to be par excellence the home seekers' paradise. Agriculture has in this aspect taken the place of mining.

Barrie Northern Advance.

The old theory that ceaseless toil goes hand in hand with successful farming has about had its day. That hard work is still necessary there can be no doubt. However, method is taking the place of much that was formerly mere drudgery, and agriculturists are realizing that self-slavery is not indispensable to the production of wealth, but that this end may be reached without sacrificing the comforts of life.

Gold can be drawn into wire so fine that 550 feet will only weigh one grain.

The world's largest prune orchard—in Los Gatos, Cal.—contains 50,000 trees and yields an annual profit of \$50,000.

A new slang phrase of automobilists, used to call a halt on one who is being too talkative, is, "Hey, throw in your reverse there!"

Asbestos is flexible, noncombustible and a nonconductor of heat and electricity, and on these properties its increasing use depends.

A rich deposit of pure sea green slate has been discovered on a farm in Poultney, Vt. This is the second discovery of this kind of slate in the vicinity. It is proposed to open a quarry at once.

The highest known velocity of movement for water underground not flowing in a subterranean stream, but percolating through the soil, is 144 feet in twenty-four hours. It has passed through gravel at that rate near Tucson, Ariz.

### PLAYS AND PLAYERS.

Charles A. Stevenson, who for eight years has been Mrs. Leslie Carter's leading man, recently resigned that position.

Charles A. Bigelow has been signed by E. Ziegfeld, Jr., to be the principal comedian with Anna Held in the new musical play in which she will be seen in New York Sept. 10.

Viola Allen is to play an engagement at Wagenhals & Kemper's new theater, the Astor, in Times square, New York, during October, presenting an elaborate production of "Cymbeline."

Klaw & Erlanger will present "The Prince of India" in the Broadway theater, New York, on Oct. 1. This is a dramatic version by J. I. C. Clarke of General Lew Wallace's romantic novel.

"Everything in London nowadays seems to be musical comedy," says Charles Klein. "The only legitimate play that has been doing anything at all is Pincro's 'His House in Order,' which is a big success."

## Hump Back

SCOTT'S EMULSION won't make a hump back straight, neither will it make a short leg long, but it feeds soft bone and heals diseased bone and is among the few genuine means of recovery in rickets and bone consumption.

### Clever Rubinstein.

The Italian tenor Marconi once made a visit to Rubinstein, during which the latter's little son came tripping eagerly into the music room and said, "This is my festa, papa, and I want a present." "Very well, my son, what shall it be?" "A waltz, papa, a new waltz all for myself, and now." "What an impatient little son it is!" exclaimed the great musician. "But of course you shall have your gift. Here it is. Listen! And for you," turning to the distinguished tenor, "I will play my 'Nero.'" "It seems incredible," says Marconi, "but then and there I witnessed and heard a most remarkable phenomenon. The maestro improvised and played a charming waltz with his left hand, giving me at the same time with his right the splendid overture."

### In the Pillory.

The picturesque, but most painful, punishment known as the "pillory" has long been a thing of the past in England. A man was made to stand in a frame on a platform, probably with his head and hands fastened through holes in pieces of wood that were then padlocked to keep them firm, and thus to remain at stated periods while the crowd gaped at or even pelted him. The last time known that a man was pilloried was when Peter James Bossy was punished for perjury, June 22, 1830.—London Mail.

### Romance Versus Reality.

Cumback—What became of that pretty Miss Dreamer who used to declare she would never marry until a handsome knight rode into town on a fierce charger with a glittering sword by his side and claimed her for his own? Homer—Oh, after breaking into the spinster class she was married to a man who drove two chargers hitched to a milk wagon, and she did remarkably well at that.

Hammocks a fine assortment,  
MADOLE & WILSON.

**Old Saying With New Meaning.**  
The saying "Cast not a clout till May be out" has been understood to be a caution against laying aside winter clothing until the month of May has ended. A correspondent of London Notes and Queries says that an old gardener he knows gives a different turn to the proverb, affirming that after the May has come into bloom there is never any further danger of frost, and the saying is really a caution against throwing aside extra garments not until the month has come to an end, but until the May be out in blossom.

### A Horrible Custom.

Writing from Abyssinia, a correspondent says: "Quaint customs prevail in these parts. When a father is getting on in years the son bids him climb into a tree and jump down from the branches. If the old man staggers on landing the son spears him on the spot; his usefulness is over."

### Correct.

The New Waitress—Shall I say "Dinner is served" or "Dinner is ready," ma'am? Mistress—If that cook doesn't do any better, just say "Dinner is spoiled."

### Nerve.

"You don't even dress me decently," she cried. "I'm going home to papa." "All right," replied Doolittle. "You might say to him also that I need a new suit myself."

### Tart.

Stella—He told me I looked sweet enough to eat.

Bella—He doubtless meant you were well preserved.

Alfred de Musset once said, "None laugh better and oftener than a woman with fine teeth."

## MADE FROM NATIVE ROOTS.

### SAFE AND RELIABLE.

That the roots of many native plants, growing wild in our American forests, possess remarkable properties for the cure of human maladies is well proven. Even the untutored Indian had learned the curative value of some of these and taught the early settlers their uses. The Indian never liked work so he wanted his squaw to get well as soon as possible that she might do the work and let him hunt. Therefore, he dug "papoose root" for her, for that was their great remedy for female weaknesses. Dr. Pierce uses the same root—called Blue Cohosh—in his "Favorite Prescription," skillfully combined with other agents that make it more effective than any other medicine in curing all the various weaknesses and painful derangements peculiar to women.

Many afflicted women have been saved from the operating table and the surgeon's knife by the timely use of Doctor Pierce's Favorite Prescription. Tenderness over the lower pelvic region, with backache, spells of dizziness, faintness, bearing down pains or distress should not go unheeded. A course of "Favorite Prescription" will work marvelous benefit in all such cases, and generally effect a permanent cure if persisted in for a reasonable length of time. The "Favorite Prescription" is a harmless agent, being wholly prepared from native medicinal roots, without a drop of alcohol in its make up, whereas all other medicines, put up for sale through druggists for woman's peculiar ailments, contain large quantities of spirituous liquors, which are very harmful, especially to delicate women. "Favorite Prescription" contains neither alcohol nor harmful habit-forming drugs. All its ingredients are printed on each bottle wrapper. It is a powerful invigorating tonic, imparting health and strength in particular to the organs distinctly feminine. For weak and sickly women, who are "worn-out," or debilitated, especially for women who work in store, office, or school-room, who sit at the typewriter or sewing machine, or bear heavy household burdens, and for nursing mothers, Dr. Pierce's Favorite Prescription will prove a priceless benefit because of its health-restoring and strength-giving power.

For constipation, the true, scientific cure is Dr. Pierce's Pleasant Pellets. Mild, harmless, yet sure.

**"Old Bullion's" Arraignment.**

"Thomas H. Benton was a most remarkable man," said the late Colonel Switzer. "In some respects the most remarkable I have ever known, but he could not begin a career at this time. The people would not tolerate him. He would impress even a stranger by his appearance. He walked as if he owned the earth. With head raised at an angle of 45 degrees and hands behind his back he would stalk with measured tread down the street, looking neither to the right nor to the left, recognizing no one. If he had an appointment to speak at 2 o'clock, promptly at 2 o'clock he would arrive. He would come in his carriage unattended. He would permit no one to introduce him, but, passing through the crowd, he would make his way to the rostrum and begin, 'Citizens.' Never did he say 'Fellow citizens.' Those before him were no fellows of his. And when he had concluded he would make his way back to the hotel without personally addressing a soul in the audience. No one dared interrupt him in his speech. He refused to recognize the right of any constituent to ask him how he stood on any subject."

**How Much Air We Have.**

One hundred and thirty-one miles is the height of the atmosphere as measured by Professor T. J. J. See, who determines the thickness of the air envelope by noting the difference between the time of sunset and the complete disappearance of blue from the sky. The moment at which the blue changes into black can be observed quite easily with approximate certainty by the naked eye when the air is clear, and by trigonometry may be ascertained the distance below the horizon of the sun at the moment of change. By this means may be calculated the height of the smallest illuminated particles of oxygen and nitrogen which give to the sky its blueness of tint by the reflection of the smallest wave lengths of the sun's light. The instant of change from blue to black is possibly a little difficult of exact observation, but the method is not more doubtful than that based on the observation of shooting stars. The shooting star method gives a result not greatly differing from the vanishing blue method. The former gives the height of the atmosphere at 109 miles.

**A French Verdict.**

All juries have a way of tempering justice with mercy and strict logic with good or bad sense. French juries excel in these practices. A Mme. Canaby of Bordeaux was accused of having forged two prescriptions and of having thereby obtained large quantities of poison, some of which she administered to her husband, who nearly died and was only saved by his doctor, who suspected something wrong and took him away. The evidence was overwhelming, for the prisoner completely failed to give any plausible explanation as to why she wanted the poison—enough, as the chemist said, to kill two regiments. Nevertheless the jury found Mme. Canaby guilty of forging the prescriptions, but not guilty of attempting to poison her husband. Perhaps the jury thought the husband unpoisoned was punishment enough in himself for one crime.

**Inebriety and the Eating of Fruit.**

There is but one sure cure for the drinking disease or habit, and that is the simplest of all. The cure consists in eating fruits. That will cure the worst case of inebriety that ever afflicted a person. It will entirely destroy the taste for intoxicants and will

**GREEN TURTLES EXPENSIVE.****Where They Are Caught and How They Are Brought North.**

"The flesh of the green turtle often brings \$50 a pound," said an oyster dealer. "This rich meat comes to us from the coral reefs of the West Indies."

"The turtles are caught in nets among the rocks. They are very carefully brought north. They are deck passengers at first, but as the weather grows cold with the ship's progress they are penned in warm rooms below—regular staterooms."

"It's a different treatment that they get, though, at the natives' hands. If a native is bringing turtles north he nails them fast to the deck by their flippers. Strange creatures that they are, they appear to suffer little under such cruel treatment."

"The calipee and calipash are respectively the flesh from the breast and the back of the green turtle, tidbits which, I have heard epicures say, are unequaled in the earth beneath, the heavens above or the waters under the earth. This meat is superlatively rich, delicate and tender."

"Live green turtle fetches wholesale from a dime to a quarter a pound. What makes the meat so expensive in the end is that out of a 140 pound fish you'll only get two pounds of calipee and one of calipash."

"Several times when there has been a tight turtle market the chefs of millionaires and of certain extravagant hotels have offered me \$1 a pound for live turtles. At that rate your calipee and calipash would come to quite \$50 a pound."

**LIGHTHOUSES.****The First of Them Was One of the World's Seven Wonders.**

The first lighthouse of which there is any record in history was built by Ptolemy Philadelphus about 306 B. C. It was a tower on which wood fires were kept blazing at night. It was built on Pharos, a small island in the bay of Alexandria, and was one of the seven wonders of the world. It is an interesting fact that the modern French and Spanish names for lighthouse—the one being phare, the other faro—still preserve the memory of the island where the first attempt at seacoast illumination was located. The ruined tower in Dover castle, England, erected about A. D. 44, is claimed by some authorities to have been built for a lighthouse, upon which an enormous wood fire was kept burning.

The lighthouse on the southern end of the island of Conanicut, at the mouth of Narragansett bay, is said to be the oldest in the United States. The present structure is comparatively modern, but the first one was erected in 1750, and for nearly 100 years previous a watchtower, with a beacon fire, had existed at the same point.

The lighthouse bears the odd name of Beaver Tail. The southern portion of Conanicut island is shaped something like a beaver, with its tail pointing southward, and in early times it was known by that name, the two extremities being called head and tail.

**AN ANCIENT TELEGRAPH.****Used by Grecian Generals in the Time of Aristotle.**

Telegraphy as a means of conveying information to a distance by means of signals, etc., was used by the Grecian generals in the time of Aristotle. This

**No Names Used Without Written Consent.**

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no man. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

## LOOK ASKANCE

AT A MAN IF HE CANNOT ANSWER THE QUESTION, "HAVE YOU EVER HAD RHEUMATISM?" WITH A GOOD HONEST "NO!"

So you see how it bars happiness and comfort if you neglect the means to prevent and cure—the great

## South American Rheumatic Cure

is the effective means, and while lack of provision for your "loved ones" from such a cause may be counted secondary to a life of suffering to oneself, it is one of the many sides in the study of health that we should take in dead earnest. Every disease has its symptoms—every ailment that flesh is heir to has its note of warning, and it's for us to heed or suffer the consequences; and who does not know the signs by experience or observation?—fever, chills, sweating, shooting pains, numbness, aching muscles, stiffened and swelled joints.

The great South American Rheumatic Cure gives ease from the first dose and it gently and effectually eradicates the trouble from the system. It gets at the root of the evil and it gets there quickly—most stubborn cases cured in one to three days. Influential physicians prescribe it as the best and surest cure they know of.

ALL DRUGGISTS AND MEDICINE DEALERS SELL IT.

**SOUTH AMERICAN NERVINE** makes blood that is poor and pale rich and red—and that means good health.

stry the taste for intoxicants and will make the drunkard return to the thoughts and tastes of his childhood. No person ever saw a man or woman who liked fruit and who had an appetite for drink. No person ever saw a man or woman with an appetite for drink who liked fruit. The two tastes are at deadly enmity with each other, and there is no room for both of them in the same human constitution. One will surely destroy the other.—What to Eat.

## NO SENTIMENT IN SIGHS.

**They Are Simply Caused by a Desire For More Breath.**

The sigh, which from time immemorial and by all the poets whoever sung has been regarded as a matter of sentiment and connected with the emotions, is declared by physicians to be as purely a physical phenomenon as is the sneeze or cough. A well known Philadelphia doctor, speaking of this the other day, explained that the sigh is nature's method of making one take a deep breath. When the lungs have been getting insufficient air a sigh is the means by which they are replenished, or when the air has been impure the sigh which one often takes in stepping out into the open air is from the same cause.

The doctor admitted that people sometimes sigh from sorrow or other mental ill, but maintained that this is partly because it has been accepted as the expression of grief through ages as long as kissing and handshaking have been accepted as signs of affection or friendship. Another reason why a sigh follows a sorrowful thought is that such thoughts are often concentrated and intense enough to cause insufficient breathing. When the lungs suffer for a certain time from this insufficiency the sigh follows. Sighs are often caused, too, says the same authority, by certain sorts of indigestion.

### An Ancient Recipe.

An ancient recipe for making a sweet perfume for the ladies runs as follows: Take storax, calamite and benjamin, of each half an ounce, laudanum one ounce, musk two grains, and put them together in a fair brass mortar, which you must first warm so hot in the fire that with the heat thereof and beating with a little pestle it may work like wax, which, being thoroughly wrought, you may make it in little cakes or balls and so lay it up.

### A Marine Fire Alarm.

Many ships have a pipe running from the hold to the deck. It is a precaution against fire. If even a trifling fire occurs in the hold smoke will ascend the pipe and upon issuing from the top will be noticed by some of the crew. Checking it would then be comparatively easy. In the absence of a pipe, though, a fire might begin and remain unnoticed until it assumed such proportions that conquering it would be almost impossible.

### Dodged.

Rivers (stopping to sharpen his pencil)—How do you spell the plural of "dodo?" With or without the "e?" Brooks (who isn't quite sure)—You don't have to spell it. There's no such blamed bird now. It's extinct.

Something better always makes its appearance when the old and wornout things fail.—Andersen.

**CASTORIA**

Bears the Signature of *Chas. H. Fletcher*

generals in the time of Aristotle. This early mode of telegraphing consisted of two or more earthen vessels, exactly similar in shape and size and filled with water. These vessels were each provided with faucets of exactly the same caliber, so that an equal amount of water could be discharged from each in a given time.

In these vessels several uprights were fixed, each with disks attached, on which were certain letters and sentences. When all was in readiness the party desiring to communicate with another started a signal, which was continued until it was answered by another which signified "go ahead." When that signal was given both turned the faucets, and the water commenced to escape. The water continued to flow until the sender of the message relighted his torch, when the outlet to both was instantly stopped. The receiver then read the message on the disk which was standing level with the water, and if everything had been executed with exactness it corresponded with the message which the sender desired to convey, and which of course was the one also shown on the disk standing on a level with the water in his vessel.

### A Caustic Critic.

A local paper in Hungary published an account of the rendering of "King Lear" on the stage of a very small theater in the town where the paper appears. The Hungarian critic began his article in this way: "The historians of literature are still at daggers drawn as to who wrote Shakespeare's pieces—Shakespeare or Bacon. After tonight's performance of 'King Lear' there cannot be a doubt on the matter if any one will take the trouble to look into the tombs of those two famous men. The one who still lies on his back has not written 'King Lear,' at any rate, for the true author during tonight's performance must certainly have turned in his grave."

### Studio.

"Studio" is one of the many foreign words that have acclimatized themselves in the English language. It is a recent import from Italy, unknown to Johnson's Dictionary and apparently not occurring before the nineteenth century, but it has supplied a want. "Study," which is the real English for "studio," suggests a room for reading and writing, and "workroom" lacks distinctiveness. The French get along with "atelier," which literally means a place in which small planks are prepared—in other words, a carpenter's workshop.

### The Poppy.

The poppy throughout the east is an emblem of death. In many parts of India this flower is planted upon graves and in cemeteries. Whether or not the idea was suggested by the poisonous character of the juice is uncertain. It is believed that the poppy was known as a funeral plant to the ancient Egyptians, for upon the tombs opened by Belzoni there appeared representations of plants which were evidently intended for poppies.

### Comforting.

"Say, Elsie, look around the street corner again and see if August isn't coming yet."

"No, I don't see him. But don't be worried; the people are looking more and more like him every minute!"

### Scarcity.

"One has very few friends in this life," said the misanthrope.

"Yes," answered Miss Cayenne. "I suppose that is one reason why a friend is so likely to be overworked."

# Removed the Growth.

DOUGLAS & CO., NATHANIEL, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. I had consulted several physicians and used everything I could hear of, all to no use. Was told to use

## Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance!

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

# S. BOND & CO.,

## ODESSA.

### TO THE PUBLIC—

Our Spring Goods have now arrived and we are able to show exceptional values and patterns in Crum's Prints, Sateen Prints, Dress Ducks, Organdies, Priestley's Lustres, and Silks.

We have a full supply of Groceries, Flour, and Feed, Patent Medicines, Boots and Shoes, and Hardware, in fact everything kept by a general store.

We are able to compete with any general store in the province.

We pay Highest Price for all Farm Produce.

# S. BOND & CO., ODESSA.

# FARM LABORERS

## To Manitoba and Saskatchewan

1906 **\$12** for the going trip. **\$18** additional for the return ticket, under conditions as below.

### —GOING DATES—

**AUG. 14** Stations south of, but not including main line, Toronto to Sarnia, including Toronto.  
**AUG. 17** Main line Toronto to Sarnia and stations north, except north of Cardwell Junction and Toronto on North Bay Section.  
**AUG. 22** From all points Toronto and east to and including Sharbot Lake and Kingston, and north of Toronto and Cardwell Junction on North Bay and Midland Divisions.

One way second class tickets will be sold to Winnipeg only. Representative farmers, appointed by Manitoba and Saskatchewan Governments, will meet laborers on arrival at Winnipeg. Free transportation will be furnished at Winnipeg to points where laborers are needed. A certificate is furnished when each ticket is purchased, and this certificate, when executed by farmer showing that laborer has worked thirty days or more, will be honored from that point for a second class ticket back to starting point in Ontario, at \$18.00, prior to Nov. 1st, 1906. Tickets will be issued to women as well as to men, but will not be issued at half fare to children. Tickets are good only on special Farm Laborers' trains. For full particulars see nearest C. P. R. ticket agent, or write C. B. Foster, D. P. A., C. P. R., Toronto.

# One of Three Things Always Cause RHEUMATISM

Do you know the system rids itself of waste matter through bowels and kidneys? Yes, but by the skin as well.

As a matter of fact, the skin rids the system of more urea than the kidneys do.

If the skin, or bowels, or kidneys are unhealthy—they won't throw off enough urea. This urea is changed into uric acid—carried by the blood to joints and nerves—causing Rheumatism.

One never inherits Rheumatism. One does inherit weak kidneys, irregular bowels and bad skin action.

## Fruit-a-tives

OR "FRUIT LIVER TABLETS"

will positively cure Rheumatism because they increase the eliminating action of skin, kidneys and bowels—and make these three organs so vigorous and healthy that there can be no uric acid retained in the system to poison the blood and irritate the nerves.

FRUIT-A-TIVES are fruit juices, combined with tonics—the whole forming the most effective cure for Rheumatism.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED • OTTAWA.

## INSECT ANATOMY.

### Wonderful Breathing Apparatus of Wasps and Hornets.

If we take any moderately large insect, say a wasp or a hornet, we can see, even with the naked eye, that a series of small spotlike marks runs along the side of the body. These apparent spots, which are eighteen or twenty in number, are, in fact, the apertures through which air is admitted into the system, and are generally formed in such a manner that no extraneous matter can by any possibility find entrance.

Sometimes they are furnished with a pair of horny lips, which can be opened and closed at the will of the insect; in other cases they are densely fringed with stiff, interlacing bristles, forming a filter which allows air and air alone to pass.

But the apparatus, of whatever character it may be, is always so wonderfully perfect in its action that it has been found impossible to injure the body of a dead insect with so subtle a medium as spirits of wine, although the subject was first immersed in the fluid and then placed beneath the receiver of an air pump.

The apertures in question communicate with two large breathing tubes, which extend through the entire length of the body. From these main tubes are given off innumerable branches, which run in all directions and continually divide and subdivide, until a wonderfully intricate network is formed pervading every part of the structure and penetrating even to the antennae.

## SPICERS OF CEYLON.

Their Golden Webs Will Ensnare Birds and Lizards.

Far up in the mountains of Ceylon there is a spider that spins a web like bright yellowish silk, the central net of which is five feet in diameter, while the supporting lines or guys, as they are called, measure sometimes ten or twelve feet. The spider seldom bites or stings, but should any one try to catch him bite he will, and, though not venomous, his jaws are as powerful as a bird's beak.

The bodies of these spiders are very handsomely decorated, being bright gold or scarlet underneath, while the upper part is covered with the most delicate slate colored fur.

So strong are the webs that birds the size of larks are frequently caught therein, and even the small but powerful scaly lizard falls a victim. A writer says that he has often sat and watched the yellow monster—measuring, when waiting for his prey, with his legs stretched out, fully six inches—striding across the middle of the net and noted the rapid manner in which he winds his stout threads round the unfortunate captive.

He usually throws the coils about the head until the wretched victim is first blinded and then choked. In many unfrequented dark nooks of the jungle you come across skeletons of small birds caught in these terrible snares.

## ENGRAVED PICTURES.

Their Romantic Origin Dates back to the Fifteenth Century.

The art of engraved pictures dates its romantic origin to the chamber of a Florentine goldsmith, Maso Finiguerra, in the fifteenth century, about the time that Gutenberg was struggling with his printing from movable types. Before that day pictures were drawn or painted by hand. Finiguerra was a celebrated worker in metals, and, being commissioned to make a pax of gold engraved with a coronation of the Virgin, he sought to test his design by filling in the lines with a preparation of oil and lampblack, which threw the picture into relief. By chance the face was laid face downward on a piece of damp linen, and when taken up it was discovered that the picture was printed. Sheet after sheet of damp paper was impressed by the same plate and the good news that the art of printing pictures was born spread like wildfire throughout Europe. The collection of old prints introduces Albrecht Durer, the "father of line engraving" (1471) in four brilliant impressions of "Adam and Eve," "Little Horse," "Melancholia" and "St. Jerome." "Melancholia" is a strange composition of extraordinary originality, and has been a mystery for over four centuries. This bit of yellowed paper, possibly pulled from the plate by Durer's own hands, has lost none of its fascination.

### And She Went Quickly.

"Mamma has just gone across the street, ma'am," said the demure little six-year-old to the caller.

"Did she say when she'd be back?" asked the lady.

"Yes'm"—as demurely as before—"just as soon as you had gone, ma'am."

### His Real Self.

"When did you first become acquainted with your husband?"

"The first time I asked him for money after we were married."

### Changed.

Nagsby—You're naturally pessimistic. I don't think I ever saw you look cheerful. Carsby—Ah, that's easily explained! Nagsby—How so? Carsby—You didn't know me before I was married!

### A Woman and \$10.

You give a woman \$10 and then borrow 72 cents from her and see what will happen. Two days later you casually inquire what has become of the \$10. She tells you she has not had \$10. You waive the question whether she ever had \$10 and ask her if she has \$10 now, and finally get a reluctant admission that she is penniless. Then you follow up the inquiry and discover that she has bought nothing. Then you are ready with the final charge, "What, then, did you do with the \$10?" and that blessed woman will come back at you like this, "You gave me \$10 and then borrowed it back." That is the way your 72 cents becomes a boomerang that smashes you and your \$10 to smithereens. And yet, in spite of all, that same woman will hang on to 99 cents and get more out of it and make it do more things and spread it round over more clothes and keep it simmering like a bubbling spring—in short, take her all in all, a woman is the master financier of the world.

### Chinese Dialects.

"It is absolutely impossible," writes a traveler recently returned from a tour of China, "to conceive of a nation speaking as many dialects as you will find in China. A foreigner's ability to speak Chinese is a practically worthless acquirement, as about every twenty-five miles the dialect changes to such an extent as to be practically another language, and even if you are speaking the best mandarin—the court language—you are quite apt to be told that your honorable foreign language is not understood. Even the governors of the provinces have to employ interpreters to communicate with the people they govern.

"It is a common joke among foreigners in China that the natives always indicate by signs what they intend to converse about before beginning to talk, and this is a joke with quite a grain of truth in it."

### English Settles.

The "genuine English settles" often offered in shops are viewed with discretion by travelers who have seen such belongings in old English farmhouses. On their native heath they are of solid oak, fully five feet high and running quite across the great kitchens. They are black with time and are apt to be well seasoned with ham fat. The duty of the settle is fourfold. It is the family seat, and, as the bench part can be raised, in the drawers beneath are kept the family rags for weaving. Above the seat is the family hat rack. The upright is double, and in the recess thus formed the family bacon is hung, doors opening from behind into this cupboard. The dainty affairs we know as English settles are toys compared to the actual thing.

### Destroying Money.

Paper money is nothing but a promise to pay so much coin. If you destroy a five dollar note, for instance, you simply release the government or the bank which issued the note from the payment of the \$5 in gold which the note called for. Of course, therefore, you are not punishable in any manner for destroying the note if it is your own. There is no penalty for mutilating gold or silver coin if you keep it in your own possession, but as you have thereby destroyed a consider-

## SUMMER FAG

Are you listless, fagged, and without energy?

Have you headache, back pains, or pains in the chest? Have you that "all-gone" feeling? If so, you need a stomach and liver stimulant, and the best is Bileans.

Mrs. R. Saville, of Oakwood, Ont., says:—"For 'Summer fag,' debility, indigestion and biliousness I tried many medicines, but I never met with anything to equal Bileans. They cured me."

Of all druggists at 50c. per box.

# Bileans FOR Biliousness

## ENGLISH ETCHINGS.

Contributors to the London Times are paid \$25 a column.

A record breaking plate glass mirror in the dining room of the Savoy hotel, London, is 158 inches square and half an inch thick.

Pupils in the English national schools are being taught the American custom of saluting the flag. But they do so on national anniversaries only.

For the best designs for the backs of playing cards, illustrating the visit of the Prince and Princess of Wales to India, the Company of Makers of Playing Cards, London, offers a prize of \$50.

A London dentist made a novel proposal of marriage. He fell in love with an elderly patient who ordered a set of false teeth from him. When the teeth were delivered the woman found a neat little proposal engraved on the plate which held the teeth.

## EDITORIAL FLINGS.

The meat packers are energetically remedying conditions that they say never existed.—Florida Times-Union.

Holders of public offices in Russia may seldom resign, but a good many of them die.—Chicago Record-Herald.

It is said that Goremykin walks for exercise. He will be fortunate if he doesn't have to run for safety.—Kansas City Journal.

The trusts must begin to suspect by this time that after all they are not the sole owners of this free country.—Philadelphia Press.

Somebody points with pride to the alleged fact that club women seldom get divorced. Of course not. The club woman needs a husband to buy new gowns and pay club dues.

## MACHINERY.

One man in a pottery does a thousand potters' work.

One man does today the work of fifty hand loom weavers.

You must look well after the condition of your liver and bowels. Unless there

# Cause of Headaches

You must look well after the condition of your liver and bowels. Unless there is daily action of the bowels, poisonous products are absorbed, causing headaches, biliousness, nausea, dyspepsia. Ayer's Pills are genuine liver pills. We have no secrets! We publish the formulas of all our medicines. J. C. Ayer & Co., Lowell, Mass.

GIVE THE  
BABY

Destroy Worms, Assimilate the Food, Regulate the Bowels, Sweeten the Stomach, give sound and Refreshing Sleep, Relieve Teething Troubles, Alleviate Feverishness, Cure Indigestion, Diarrhoea, Constipation, Colic, etc. **STOPS WALKING IN THE SLEEP, AND FRIGHTENED AWAKENING. CURES FITS.** Do not contain Morphine, Opium, or other narcotic.

**WHAT WE WILL DO**—Any person sending their address can have samples sent free. We want to give you the proper medicine for children. Have the genuine.

**DOUGLAS & CO.,**  
Napanea, Ont., Canada.

Saves Babies' Lives.

MENTION THIS PAPER

**CAUTION**—Do not allow Druggists to substitute these Tablets. If you cannot get Hennequin's send direct to us. Your only guarantee of the genuine Hennequin's is "you will find the letter "H" stamped on every Tablet."

**PRICE 25c. OR 5 PACKAGES FOR \$1.00.** Pro paid to any address. If after using one package you wish your dollar return us the remainder. We cannot be responsible for monies unless sent P. O. Order, Registered Letter, or stamps.

by your own. There is no penalty for mutilating gold or silver coin if you keep it in your own possession, but as you have thereby destroyed a considerable part of its value you must not try to pass it at par after the mutilation.

## Too Suggestive.

In a small town in California a hospital was erected on Salsipuedes street, and the board of directors, in lieu of something better, suggested that the hospital bear the name of the street. One more cautious than the rest suggested that it would be well to know the meaning of such a name before making indiscriminate use of it, and it is to this man that the success of the hospital is due, for on finding that Salsipuedes meant "get out if you can," the name was hastily changed to something less suggestive of "who enters here, leaves hope behind."—Argonaut.

## Altered In Repairing.

A man in Chicago, says a writer in Judge, found himself in the chair of a strange barber, to whom his features, although unfamiliar, seemed to carry some reminiscent suggestion.

"Have you been here before?" asked the hair cutter.

"Once," said the man.

"Strange I do not recognize your face."

"Not at all," said the man. "It changed a good deal as it healed."

## To See Plainly.

The more I think of it I find this conclusion more impressed upon me, that the greatest thing a human soul ever does in this world is to see something and tell what it saw in a plain way. Hundreds of people can talk for one who can think, but thousands can think for one who can see. To see clearly is poetry, prophecy and religion—all in one.—Ruskin.

## English Humor.

The English brand of humor is sedate and stately. It is not intended to be laughed at. The man who would laugh at Punch would go into hysterics at a funeral. Punch's notion of humor is altogether too sublime for any place outside of an English drawing room.—Bobcaygeon Independent, Ontario.

## Humorists.

Humorists frequently have sad faces, but humorists are not sad because they are humorists. They are humorists because they are sad. Humor is born of acute sympathy.—Kebble Howard in Sketch.

The trickster is always proud of his tact.

## Their Friendship Ceased.

"I have just discovered that Smithers is a relative of mine."  
"How strange?"  
"Yes, and I had always looked upon him as a friend."

One man in a pottery does a thousand potters' work.

One man does today the work of fifty hand loom weavers.

One man and two boys do the work of 1,100 hand spinners.

One man running a horseshoe machine does the work of 500 blacksmiths.

One man at a nail making machine does the work of a thousand old time nail makers.

## ORIGINAL NEW ENGLAND.

It Is Said That It Was Located on the Pacific Coast.

There is a common saying that if the pilgrim fathers had only landed on the Pacific coast a large portion of the Atlantic seaboard would never have been settled. Californians, Oregonians and Washingtonians believe this implicitly. In other words, the charms of the Pacific coast in the way of climate are so appreciated that, having once experienced them, men are unwilling to live elsewhere contentedly. Now, not one man in a thousand living on the Pacific coast knows that as a matter of fact the accents of our mother tongue were heard on the beach not far from San Francisco forty-one years before English was spoken on Plymouth rock.

More amusing still is the fact that the original New England was on the Pacific coast, for Sir Francis Drake in 1579, at the close of a month's stay, took possession of the country for his sovereign, Elizabeth, and named the new acquisition Nouva Albion (New England) because he thought the white cliff near what is now Point Reyes resembled the chalk cliffs near Dover.—Alexander McAdie in Outing Magazine.

## Glorious Work of the Modern Reaper a Fit Subject For Art.

Poetry and art have these many years pictured the labors of men and women in the harvest field. From Ruth, the gleaner, to Millet's "Reaper" we have read the long, melancholy story of the toilers gathering with crude, wasteful, inhuman hand tools the crops of the world that the nations might have bread. Rightly understood, these two women, living so far apart, are pathetic monuments to the astounding stupidity that could permit such things when, as we now see, by taking thought a machine can release humanity from such senseless labor. With a singular perversity artists have delighted to paint pictures of foolish toil. Even now the critics tell us that neither the mower, the reaper, the thrashing machine nor the sulky plow is a fit subject for a picture.

Never was there a greater blunder. The glory and majesty of our mighty harvests, won for the feeding of the world with so little labor that the vast wheatfields seem lonely, the smoking clouds of chaff and straw blown high in the air from whirling thrashers, the great companies of men and horses marching to the horizon as the plows turn side sweeps of sod to the sun, the gang drills sowing mile long lacelike threads over the brown earth where springs the growing crop—these and a hundred other scenes are fit themes for any poet. In our fields are no sad multitudes of ill paid, short lived peasants, crushed and bent by the iniquity of the sickle. Why sing the sad song of the reaper when a grand, inspiring epic of the harvesting machine awaits the poet and painter who can see and understand?—Charles Barnard in Reader.

**CASITORIA.**

## TOUGH PAPER.

Not an Easy feat to Twist a Bank Bill in Two.

"The paper that is used by the government in its currency is manufactured by a secret process and has characteristics with which the average man is not familiar," said a Minneapolis man.

"Recently I was in a small Minnesota town and witnessed an incident that demonstrates this. A well to do farmer living in the vicinity came into the bank to transact some business. In the course of the conversation the cashier began twisting a five dollar bill. The farmer watched him with interest and finally asked the man back of the counter if he wasn't afraid of tearing the bill.

"Here is an easy way for you to earn money," said the cashier. "Here is a thousand dollar bill and I will give it to you if you will twist the bill in two. You are simply to twist it and not tear it."

"The farmer seemed dumfounded at first. He seemed awed at the thought of mutilating a thousand dollar bill. Upon further assurance by the officer of the bank, he timidly took the money and started twisting it in the middle. He tugged away for some time without being able to twist the bill in two. Finally he gave up, and he was certainly a surprised farmer. It is impossible to twist a bill in two, so firm and elastic is the paper used."—Exchange.

## IMMUNE TO POISON.

Practical Methods of the Snake Charmers of the Orient.

For many years it was regarded as one of the East Indian miracles that the snake charmers of the orient could encounter the cobra in an arena, allow the serpent to bite them time and again and survive the deadly poison. This dangerous feat puzzled the doctors of the British army and was never quite understood by scientists generally until within recent years, when the secret of these jugglers with fate leaked out. The East Indian snake charmer begins at an early age to make himself immune from the venom of the cobra. He takes the infant serpent and allows it to bite him. This injects into his system a very mild dose of the poison. He repeats the operation many times, and then ventures to allow a cobra somewhat older to bite him. Gradually he permits himself to become inoculated with the venom of younger serpents until he has become so accustomed to the poison that his system is immune. By the time he grows up he has become so thoroughly accustomed to the spell that it has practically no effect upon him. It is like the drug habit—one can work oneself to a pitch of enduring a dose that would be sufficient to kill several persons unaccustomed to the influence of the drug. Thus the seemingly audacious trick was exposed as a very practical thing, after all.

## The Osprey.

In the highlands of Scotland at the present time the osprey usually makes its nest in the flat top of a pine tree, but formerly it just as frequently selected a battlement or a chimney of some ruin, generally on an island. The nest is a pile of sticks as much as four feet high and as many broad—the accumulation of many years—intermixed with turf and other vegetable matter, lined with finer twigs and finally with grass, much of it often green.—Glasgow Times.

## Easy.

"Did you sell horses to those two

## GREAT EARTHQUAKE IN CANADA.

The Jesuit Relation of 1662-63 was written by Jerome Lalemant and was dated "Kebec this 4th of September 1663." The following is an extract from the translation as given in Vol. 48 of the Jesuit Relations published by Burrows Brothers of Cleveland, beginning on page 37:

## THREE SUNS AND OTHER AERIAL PHENOMENA WHICH APPEARED IN NEW FRANCE.

Heaven and earth have spoken to us many times during the past year, and that in a language both kind and mysterious, which threw us at the same time into fear and admiration. The heavens began with phenomena of great beauty, and the earth followed with violent upheavals, which made it very evident to us that these mute and brilliant aerial voices were not, after all mere empty words, since they presaged convulsions that were to make us shudder while making the earth tremble.

As early as last autumn we saw fiery serpents, interlined in the form of the Caduceus, and flying through mid-air, borne on wings of flame. Over Quebec we beheld a great ball of fire, which illumined the night almost with the splendor of day—had not our pleasure in beholding it been mingled with fear, caused by its emission of sparks in all directions. This same meteor appeared over Montreal, but seemed to issue from the moon's bosom with a noise like that of a cannon or thunder; and after traveling three leagues in the air, it finally vanished behind the great mountain whose name that island bears.

But what seemed to us most extraordinary was the appearance of three suns. Toward 8 o'clock in the morning on a beautiful day last winter, a light and almost imperceptible mist arose from our great river, and when struck by the suns first rays, became transparent—retaining however, sufficient substance to bear the true images cast upon it by that luminary. These three suns were almost in a straight line, apparently several toises distant from one another, the real one in the middle, and the others, one on each side. All three were crowned by a rainbow, the colors of which were not definitely fixed; it now appeared iris hued, and now of a luminous white, as if an exceedingly strong light had been at a short distance underneath.

This spectacle was almost two hours duration upon its first appearance, on the 7th of January, 1663; while upon its second, on the 14th of the same month, it did not last so long, but only until, the rainbows gradually fading away, the two sons at the sides also vanished, leaving the central one, as it were, victorious.

We may here record the solar eclipse which occurred at Quebec on the first day of September, 1663, and which being ascertained to be quite eleven digits across in the observation, taken with great exactness, rendered our forecasts pale, somber and gloomy. It began at 24 minutes and 42 seconds past 1 in the afternoon, and ended at 52 minutes and 44 seconds past 3.—

## Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless this inflammation can be got out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular.

# CATARRH OF THE STOMACH THREATENED HIS LIFE.

Finds Prompt Relief In Pe-ru-na, the Reliable Catarrh Remedy.

PROF. ALBERT J. SMITH.

A PROMINENT PROFESSOR OF DANCING, WELL KNOWN IN AUSTRALIA, LONDON AND CANADA, RELATES HIS WONDERFUL EXPERIENCE WITH THE USE OF PERUNA.

Albert J. Smith, the well-known professor of dancing, formerly of Fern-ale Academy, Paddington, Sydney, after touring London and Canada, has now located in Carlton, Victoria, (Australia) at 455 Cardigan street.

He writes to the Peruna Drug Mfg. Co., Columbus, Ohio, (U. S. A.), regarding his use of Peruna, as follows:

"I was troubled with catarrh of the stomach for a number of years, which finally resulted seriously.

"It was when the disease was at its worst and I could not sleep, eat nor work that I began using Peruna and found that it was doing me good every day.

"My stomach began to feel much better, my appetite increased, and I did not feel so nauseated upon rising in the morning.

"My bowels were soon in better condition, my sleep undisturbed, and the catarrh gone.

"Peruna is a perfectly wonderful medicine and I certainly recommend it for catarrh."

Some years ago it was thought that catarrh was confined to the head and nose. However, all the respiratory and digestive organs are lined by mucous membranes, and catarrh will attack these membranes at any point.

The most reliable remedy for catarrh, no matter where located, is Peruna, an internal, systemic catarrh remedy. It has proven its efficacy by years of use in thousands of families.

## LOVE OF HOME.

An Instinct That Is Remarkably Strong In the Horse.

The strongest instinct in the horse is that of home—all his thoughts and interests lie there—and the most wearing pain he suffers is that of nostalgia—the longing for the familiar stall and the well loved surroundings. What wonder that our pets almost invariably return to us from such unhappy experiences mere shadows of their former selves and in such wretched bodily condition that it is months before they regain their usual health and spirits. We blame the man in charge, poor feed, bad stabling, insufficient pasturage, etc., and overlook entirely the fact that it is our own fault and the direct result of heart lunging which no grass, grain or roof-tree could entirely assuage. Of course the little used muscles have,

## CHEESE BOARD.

Board met in Council Chamber in the town hall on Friday last.

with near twigs and many with grass, much of it often green.—Glasgow Times.

#### Easy.

"Did you sell horses to those two customers yesterday?" we ask of our friend the horse dealer.

"Yes."

"Make anything?"

"Off of Jones—yes."

"Jones? Why, Jones was the one that said he knew all about horses."

"I know. He was easy. The other fellow didn't know a thing about them and brought around three or four experts before he would buy."

#### Sad.

"Poor Mrs. Wilkins! She is so young and her wedded life has been such a bitter disappointment!"

"In what way?"

"She married that wealthy old Wilkins under the impression that he had heart disease, and the doctor says he's perfectly well."

#### Contrary.

Hicks—But what makes you so sure that your boy will go to the gymnasium this afternoon? Wicks—Because I told him not to.

#### A Craze Defined.

"What do you mean by saying something is the latest craze?" asked the man from abroad who carries a notebook.

"A craze," answered Miss Cayenne, "is something that amuses other people, but in which you yourself do not happen to be interested."

#### Horticulture.

Knicker—Does your wife have you water the plants while she is away? Booker—Yes. I just put them under the place where the bathroom floor leaks.

The truly proud man knows neither superiors nor inferiors.—Hazzlitt.

#### "Red as a Sapphire."

To say that a young girl's eyes are as blue as sapphires is as absurd as it would be to say that her mouth is as red as velvet. Sapphires, no more than velvet, are exclusively one color. The sapphires of Ceylon run from a soft blue to a peacock blue, which last is practically a green. There is also a red sapphire, sometimes called a Ceylonese ruby, a stone as precious as a Burma ruby. Besides blue, green and red sapphires, many fine ones are yellow and white.

#### He Knew.

"Did you never," asked Miss Solefoot earnestly—"did you never meet a person whose very presence filled you with unutterable feelings—whose lightest touch seemed to thrill every fiber in your being?"

"Oh, yes," responded Mr. Oldbatch; "you mean the dentist."

#### A Bowling Acquaintance.

Two young men met a woman and one of them raised his hat immediately. "Who was that, Charlie?" asked one of them. "I don't know," was the reply. "Don't know! You must know, for you raised your hat to her." "Yes, but, you see, I'm wearing my brother's hat, and he knows her!"

#### Unmatched.

Brooks—My dear fellow, you need not thank me so profusely for a mere box of cigars. Rivers—Oh, but you gave me a box of matches with them, you remember, and they were the best matches I ever used.

Work is not hard; it is the eyes that are afraid of it.

the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

F. J. CHENEY & CO, Toledo, O.  
Sold by all Druggists, 75c.  
Take Hall's Family Pills for constipation.

#### NEWBURGH.

Pearl Nesbitt will preside at the organ in the Methodist church, during Miss Young's absence.

Mrs. William Eakins, Leamington, is visiting her mother, Mrs. Walter Briscoe.

Miss Pearl Patterson and Gertie Nesbitt, returned home on Monday, after a week's visit with friends in Deseronto.

Roy Farley was in Yarker and Enterprise on Wednesday, in the interest of the Epworth League excursion to the Thousand Islands on August 2nd.

Frederick Mears has been appointed principal of the public school at Orino near Newcastle.

Miss Metzler left this morning for her home in Rochester, N. Y. Miss Helen Finkle accompanied her.

Mr. and Mrs. Goodsell and children, Fort William, are visiting her sister, Mrs. J. J. Shorey.

Mrs. P. D. Shorey and children are visiting her father, J. B. Haight, Canifon.

James Grogan fell out of the mow at J. S. Yeoman's last week and sustained severe injuries.

Harry Wagar, Tamworth, and Frank Paul, Desmond, were in town on Sunday evening.

Rev. J. Gandier left last week for a visit to his daughter in Halifax. During his absence there will be no service in the Presbyterian church.

Charley Frye is on the sick list.

W. P. Deroche and Miss Deroche, of Napanee, were in the village on Thursday.

Harry Finkle, Providence, R.I., is visiting at C. F. Finkle's.

Miss Mary Baker is spending a few days in Bath.

Harold Ryan spent Sunday at Sydenham.

Mrs. Aylesworth underwent successfully an operation at Kingston this week. Her many friends hope for a speedy recovery.

Miss Williamson, Kingston, is visiting at F. A. Dunwoody's.

Mrs. Orr and children, Russell, are visiting her sister, Mrs. W. W. Adams.

#### MODES OF THE MOMENT.

Raised ribbon embroidery gives a touch of supreme elegance on silk or cloth Eton or empire jackets.

Gowns of silk gauze striped with satin are often accompanied by little embroidered boleros of taffeta the color of the satin stripe.

Innumerable princess or one piece frocks in figured organdie and other forms of muslin appear, lace trimmed and showing insertions.

Quite the newest thing in colored muslins is the gown of plain tint with a flowered border. Very quaint and charming effects may be produced in these softly colored fabrics.

Bright colored silk jackets are a strong fancy of the season, with white cotton or linen gowns. They are accompanied by hats, parasols, girdles or sashes and often shoes and stockings of the same order.

It looks now as if skirts might become as fussified as waists are at present before many months. Long lines have had a strenuous use, and the vogue of the tunic is increasing, not decreasing. Overskirt semblances are very plentiful among smart summer walking skirts.

bad stabling, insufficient pasturage, etc., and overlook entirely the fact that it is our own fault and the direct result of heart hunger which no grass, grain or roof-tree could entirely assuage. Of course the little used muscles have, from lack of exercise, shrunk and lost their firmness and plumpness; the crest has fallen from the same cause; "poverty lines" appear in the quarters and shoulders; the tail and mane are all out of shape or all worn away; the feet stubbed off; the coat dingy and sunburnt; the skin full of all manner of scabs, cuts and abrasions; all these are the effect, not the cause, of the lack of bodily condition which is two-things due sheerly and solely, in the high bred, nervous, sensitive horse, to simple homesickness.—Exchange.

#### POOR LITTLE PENGUINS.

Many Are Nursed to Death by the Adult Birds.

An antarctic explorer writes: "I think the penguin chicks hate their parents, and when one watches the proceedings in a rookery it strikes one as not surprising. In the first place, there is about one chick to ten or twelve adults, and each adult has an overpowering desire to sit on something. Both males and females want to nurse, and the result is that when a chicken finds himself alone there is a rush on the part of a dozen unemployed to seize him.

"Naturally he runs away and dodges here and there till a huge 'emperor' falls on him, and then begins a regular football scrimmage, in which each tries to hustle the other off, and the end is too often disastrous to the chick. Sometimes he falls in a crack in the ice and stays there, to be frozen, while the parents squabble at the top.

"Sometimes, rather than be nursed, I have seen him crawl in under an lee ledge and remain there, where the old ones could not reach him. I think it is not an exaggeration to say that of the 77 per cent that die no less than half are killed by kindness."

#### THE BAY LEAF.

Famous For More Than Its Use For Culinary Purposes.

"Two-thirds of modern recipes seem to call for 'a bay leaf,'" said a young housekeeper the other day, "and somehow it is always the one thing in the whole formula that a housekeeper will omit. One never has a bay leaf, probably for the reason that they are so elusive. Other necessities confront you on market stalls and shop counters, but the bay leaf rarely does.

"When I finally obtained mine (a small glass jar of them) a short time ago I had not the faintest idea of a connection between the little withered looking things in the glass and the laurel leaves of the poets. To my surprise I now find that they are one and the same. I believe most sister housekeepers would be amazed to find that when they send a bay leaf fluttering into the pot of soup or stew they are really consigning to it the historic 'bays' which wreath the brows of Homer and the bard of Avon. The scientific name is *Laurus nobilis*, and it belongs, according to my encyclopedia, to the laurel family, which includes the familiar sassafras. It is the 'green bay tree,' to which the wicked man is likened in the Scripture.

"My delvings into this subject have revealed amid much laurel lore the fact that Bacon and other celebrities appreciated (gastronomically) its spicy flavor."

#### "Let the GOLD DUST TWINS do your work"

#### The Dog and The Shadow

You remember the fable of the dog who dropped a real bone for its shadow which he saw in the water. "Bear in mind that all is not Gold Dust that glitters under the name of washing powder. Don't accept a shadowy substitute; get the real

GOLD DUST makes hard water soft

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXIII.—(Continued).

Now he came to that portion of his recital that was not so pleasant. They might guess why.

Larry jumped to conclusions. "Petoskey is in town, by Jove!" he said, as he nodded his head wisely.

"Then you have seen him?" exclaimed Lord Rackett, not a little startled at the exclamation.

But the little man shook his head vigorously, this time in the negative, while a cunning smile swept over his queer features.

"Not I—simply guessed it, you know. Perhaps you remember, my dear boy, that one of the waches in 'Macbeth,' referring to the approach of Scotland's murderous king, says: 'By the pricking of my thumbs, something wicked this way comes.' Well, I've had a little of that same pricking, and I thought of Petoskey."

"We met by chance, the usual way; that is, I accidentally ran across the beggar in the street, and he acted as if surprised to see me, though I'm secretly of the opinion he knew of our arrival all the time."

"He tried to be friendly and all that, but I froze on the spot. Then he changed his tactics and endeavored to tempt me into a deal; my blood fairly boiled, I was so deuced angry at his miserable audacity."

"When I flung back his base offer in his face, he was amazed at first, and then his temper got the better of his judgment, so that he began to revile me."

"Then you struck the beggar," said Larry, eagerly.

"How do you know that?" demanded the other, with a pleased smile.

"Oh, my dear boy, credit me with common sense, at least. I saw you caressing your right hand several times, and, unless I am mistaken, the skin is bruised on your knuckles. By Jove! you struck a blow for old England."

Plympton flushed, whether with pride or shame it might be hard to say. "Perhaps it is not a fact that would redound to a man's credit to be engaged in a street brawl, and ordinarily I have avoided such things to the best of my ability; but there may arise occasions when one is irresistibly thrown into such an ugly affair against his will."

"I quite agree with you, sir. Those are sentiments I have heard expressed by one in whose honor and manhood I had every reason to place the fullest confidence," said Avis, quickly.

Her answer pleased him.

"Thank you, most heartily. As Larry says, it was done in defense of old England, and I stand ready to take such chances every day in the week if a foul-mouthed braggart, I care not what nation he represents and disgraces, dares to defame a pure woman to my face."

Avis put out her hand impulsively, feeling that in some way it was because of her Lord Rackett had gotten into this trouble.

"Let us be thankful there are few like him abroad," she said.

"Why, of course, you understand that never for a minute do I intend to intimate that this rascally count represents the better class of Russian gentlemen. I have messed with the Czar's officers, and fought at their side in days

Larry had suffered somewhat on the rough voyage of the steamer, and was also on the point of heaving a retreat, when Lord Rackett laid a hand on his shoulder and, in a voice pregnant with mysterious meaning, said:

"Not yet, Larry, my boy; I have something else to tell you—something I did not wish Avis to hear, for reasons that will doubtless be plain enough to you—something that may give you an electric shock, I believe."

### CHAPTER XXIV.

When Larry Kennedy heard Plympton make this remark, he turned and looked the big man squarely in the face.

In a flash all signs of drowsiness had been effectually banished from his eyes, and it is extremely doubtful whether the little man ever looked more wide awake.

Of course, he jumped to the conclusion that the other had picked up some bad news that he did not wish to mention before Avis.

What on earth could it be?

Larry recalled the anxious expression upon the face of his comrade as he entered.

Then, after all, that had not been caused by his encounter with Petoskey; at least something else had combined to affect him.

Strange what ground the human mind may cover in a few seconds of time. Larry thought of the papers, and wondered if anything could have happened to them.

Such a misfortune would be little short of a disaster, and in spite of the fact of the British consulate in Shanghai, the foreign section of Canton, had been guarded by a force of blue-jackets. He could not rest until he knew the truth.

"Tell me—is it about the papers?" he gasped.

Then Plympton smiled.

He understood the nature of the little man's worry and seemed glad to reassure him.

"The papers are as safe as though they were in the Bank of England, depend on that."

Larry had exalted ideas about the security of that dingy stone building known as the Old Lady of Threadneedle street in London, as, indeed, all Englishmen and most travelled Americans have, and when assured in this happy vein he must believe.

He felt relieved.

Other troubles there might be, but with the papers secure, he could afford to take them as they came, philosophically.

So Larry threw himself back upon the bamboo settee, and prepared to listen again while the other unfolded a second installment of his experiences in Peking.

Truth to tell, Larry's curiosity was fully aroused, for he could not even guess at the nature of the disclosure Plympton was about to make.

Nor was there any need of guessing when the other seemed ready to speak.

"Go on with your shock, my dear fellow. I have braced myself to receive it, you see. Has the Emperor been changed in his palace? Has Li Hung Chang married the Dowager Empress? By Jove! I've known, I'm ready to believe almost anything in this beastly

"Richard is himself again. You will now find me as keen as a Damascus blade. From your manner, Plympton, I am led to judge that this is not mere speculation on your part—that you have more stable foundation than pure surmise."

His lordship looked a little surprised and amused at the grave manner in which Larry propounded this question, and which might have done justice to the most learned advocate at the Queen's Bench; but the matter was too serious to be treated in a frivolous way, so he smothered his inclination to laugh, and replied, soberly:

"You shall hear. The news I had from our friend, Foo Chong. I cannot even guess how he came by it, as he failed to volunteer any explanation. No doubt Kai Wang has means of knowing what is going on within the Purple City, where red tape and mystery abound. At least his agent seemed to be thoroughly conversant with the happenings there, and coolly informed me that a prisoner was secretly guarded in the Emperor's palace, watched night and day, and that it was believed he must be a foreigner. In my mind it was easy to put two and two together."

"With what result?" eagerly.

"I conjectured that it was Dr. Jack—that he was being held as a last resort. If Petoskey utterly failed to secure the papers of the great railway concession, the party of the Dowager Empress would offer to release Evans for the return of the documents bearing the sacred seal of the Emperor."

Larry followed each slowly-uttered word with the most eager attention, as though the fate of empires hung upon the result of their logic. To his devoted mind the existence of such a rare man as Jack Evans was of more consequence than the rise and fall of many an empire.

A new and almost overwhelming hope had been started into existence by the words which Lord Rackett had just let fall.

Larry could as yet hardly grasp their full significance, and still his heart was throbbing with eagerness to penetrate the veil of the future, so that their truth or error might be proved.

"God grant that it may be so, and that we may live to shake his fearless hand again."

"Amen," said Plympton.

Then Larry, remembering something, looked curiously in the face of his companion.

"Upon my soul, you seem almost as eager to find dear old Jack alive as myself," he cried.

"Which seems odd to you in the light of the fact that I once conspired to make his wife a widow in the hope of winning her. I was a fool, my boy, a cursed fool, and I've long since come to my right senses. That passion for Avis died a natural death when I came to know what manner of man her husband really was. I regard her now as a sister whom I have sworn to defend; and if, by the grace of Heaven, we are lucky enough to find the doctor still alive, and pluck him out of the clutches of his jailer, like a brand from the burning, there will no man rejoice more heartily at seeing him in his wife's arms than Plympton."

"Gad, you prove that by risking your neck to discover the truth. Indeed, I am proud to know you, sir; proud to shake you by the hand; proud of the privilege of calling you my friend."

"Hear, hear!" laughed Plympton, to hide his emotion, for he was really affected by his own feelings and the blunt commendation of his comrade.

Larry could not think of sleep now.

He sat there and plied the other with questions that would have taxed a Philadelphia lawyer to answer; but, after all, Lord Rackett was able to give him but scant additional information, since he had heard only the meagre facts from Foo Chong, who evidently knew nothing more.

This lack of conclusive intelligence did not prevent these two sanguine friends from constructing many theories and plans which were rosy-tinted and glowed with newly-awakened

### PRETTY NEARLY RUN DOWN.

The Tired Man About to Start on His Vacation, to Let Nature Wind Him Up.

"At this minute, as I think of it," said a tired man, "the phrase 'all run down' strikes me with a new significance."

"It has always heretofore seemed to me to indicate a condition of physical ill being, and that only, and that, in many cases, it may mean still; but just now, on the eve of vacation, run down comes to me with the sense simply of unwound."

"I find myself, for illustration, physically well and comfortable and yet without much power—in the condition of a clock whose works are all right and sound, but whose spring is nearly unwound and which now strikes slow and lagging. Nothing the matter with the clock, only it is almost run down and needs winding up."

"So with me. I've been working for a year now and striking all the time, and for that matter I can still strike, but really I need winding. I am not all run down in the common acceptance of that term but I need winding, and I am, happily, about to go away for that purpose."

"On our vacation, if we give ourselves a chance, we rewind automatically, with no effort whatever on our part, and still with a delightful, and cumulatively delightful, consciousness of the rewinding if we give ourselves a chance."

"There are men who take their business away with them or let it come to them—if not a fatal, a foolish mistake. Any touch of business stops the rewinding instantly and also retards it for some little time after before the winding sets in again, so that the man who does this comes back with his spring only half wound."

"I would not attempt to counsel all creation, for I am a modest man; but to those about to start on their vacation I would say: Sink the shop, and sink it entirely. Cut it out utterly and completely. Be wise and get the full benefit. Forget the desk the minute you turn your back on it. Take all the resisting tension off the spring."

"I am going myself to the mountains, to the shores of a lake, with forest clad mountains rising all around, where nature is at once restful and strong and potent, and I shall give myself all to nature, let nature wind me up."

### DISEASED KIDNEYS.

Made Sound and Strong Through Dr. Williams' Pink Pills.

"Two doctors told me that I was incurable, but thanks to Dr. Williams' Pink Pills I am a well woman to-day." This strong statement was made by Mrs. Ed. Rose, of St. Catharines, to a reporter, who hearing of her remarkable cure called to see her. "A few years ago while living in Hamilton," continued Mrs. Rose, "I was attacked with kidney trouble. The doctor lulled me into a state of false security, while the disease continued to make inroads. Finding that I was not getting better, I consulted a specialist, who told me that the trouble had developed into Bright's disease and that I was incurable. I had dwindled to a mere shadow, and suffered from pain in the back, and often a difficulty in breathing. Insomnia next came to add to my tortures and I passed dreary, sleepless nights, and felt that I had not long to live. In this despairing condition my husband urged me to try Dr. Williams' Pink Pills, and to please him I began to take them. After using several boxes I felt the pills were helping me and I continued taking them until I had used some twenty boxes, when I was again restored to perfect health, and every symptom of the trouble had disappeared. Dr. Williams' Pink Pills certainly brought me back from the shadow of the grave, and I have since enjoyed the best of health."

"Every drop of blood in the body is filtered by the kidneys. If the blood is weak or watery the kidneys have no strength for their work and leave the blood unfiltered and foul. Then the kidneys get clogged with painful, poisonous impurities, which brings aching

that never for a minute do I intend to intimate that this rascally count represents the better class of Russian gentlemen. I have messed with the Czar's officers, and fought at their side in days gone by, so that I have many warm friends among the soldiers of Nicholas. Petoskey is in a class by himself. You will find his like in Germany, France, America and even England. I am sorry to say men who, in their mad chase of the golden calf, will sacrifice everything that comes in their way, even human life."

"Well, when he insulted ladies, you drew the line. What did he say?" asked Larry, eager to get at the startling events.

"He swore at me in Russian as well as the circumstances would allow."

"Pray, what were those circumstances?" demanded the other.

"I think I saw him expect a couple of both, and there were other conditions that might be called antecedents," returned Plympton, gravely.

"You knocked him down, right?" asked Plympton, and in the street your fancies were engaged. That was a blow, not only for old England, but in memory of the English the first we have been able to deliver. Well, it's a good thing for the best of us not to know when he sneered at my fair country woman for I'm an actor of considerable name, you know. By the way, now he would hardly have come out of it with only the loss of two palms, front teeth, you know, and Larry clenched his fists and looked as before after twenty years.

"Some men are born lucky, and evidently Petoskey was one of that class. When a day that he might never know what he had done, and how he came within an ace of being murdered."

"On that day, having satisfied my conscience in the matter, I had no attention to his doings. But, catching the name of this fellow on my card, I looked it to him and walked away."

"How that man a dunder!" asked Larry, solemnly.

He shrugged his broad shoulders carelessly.

"That depends entirely upon your friend, the Russians, caprice. You may be sure, if challenged I will give him all the satisfaction he wants always providing I am in the land of the living to have immediate him."

"I hope nothing comes of it," breathed Avis.

"If Petoskey knows what is good for him, he will drop all these matters and devote his whole time and attention to seeing a dentist," remarked the oracle; and, indeed, could that same man, the Nova, have gazed upon the face of Larry while thus speaking, he would doubtless have hurried out of Peking and sought the protection of the heavy guns at Port Arthur without an hour's delay.

A warrior, not to be deterred by his stature or by his rushing country into being that adorns his life, there are brave souls cast not a less heroic mould, and Larry must have inherited the spirit of some mighty Saxon the storied deeds won him known and fame.

"At least I hope he will not be in a hurry, for I could not accommodate him until our little game is over," said Plympton.

Plympton, who to designate the desperate undertaking, they had in view, and yet he was as well adapted to appear as the perils attending such an enterprise as any man living.

He now endeavored to furnish all the details of the game, Petoskey, by detailing the arrangements into which he had entered with the delectable merchant Foo Chang, who had agreed to make a reliable guide in readiness to conduct them into the Forbidden Purple City on the following night.

Many matters were arranged, even to the disguises they were to assume, which of necessity must be the regulation Chinese costume.

Thus, time passed, and Avis, weary from her journey, finally legged them to excuse her.

you see? Has the Emperor been changed in his palace? Has Li Hung Chang married the Dowager Empress? Do Jove! d'ye know, I'm ready to believe almost anything in this beastly country where just the thing you never expect bobs up serenely."

"That's just it—the unexpected is constantly turning up in China," said Plympton, as he lighted a cigar in order to save himself from the vile odor of the paper cigarette Larry was getting in readiness to consume.

"Thanks—believe I will use a light. And now, proceed to relieve my dreadful suspense," drawled the dude, drawing his legs up under him on the settee.

Larry looked keenly at him, as though he would hazard a guess as to how the little man might take the news. "How are you, Larry?" he asked.

"Eh? By Jove! now, that's a queer remark."

"I mean your nerves—are they steady?"

"Aw—I see you wish to make sure I don't faint. Best easy, my dear man, is the heart."

"Well, steady yourself for stunning news."

"Good Heavens! you send a flutish down to my very toes. It's cruel to keep a chap in this condition. Speak out, man, has England made an alliance with the United States? Tell me what wonderful thing has happened."

"I have reason to believe you made a mistake."

Larry collapsed. "That is really cruel in you, Lord Backlet, seeing my condition. A joke is good enough in its way, but at such a time. Well I've made a dozen or so of mistakes in my day, but they were of the head and not of the heart."

"This is a mistake that may make some change in our plan of campaign," said Plympton, smiling.

There was that in his manner to arouse Larry's suspicions.

It was wonderful to see how like a flash he seemed to leap at conclusions. Inspiration gave him a clue, and the rest sprang from his heart.

"You almost terrified me," he said, in a voice that trembled with eagerness.

"Then you can guess?"

"Good God! is it about—him?"

The big Englishman nodded.

"Dr. Jack, I mean," pursued the trembling dude.

"He is the party I had in mind, Larry."

"You said I had made a mistake!"

"Well, it is not positive. Had I been sure, I could never have kept it from his wife, but I dared not arouse her hopes only to crush them later on, it might be."

Larry was apparently paralyzed; he sat there like a man of stone, only that his features were working spasmodically.

Still, he had fair control over his voice, if it did sound much like the squeak of a rat back of the wainscotting.

"Am I awake or dreaming? I heard the fierce cries of the Black Flags, and Kai Wang assured me this was their mode of victory when they slashed an enemy's head off with their unwieldy but keen swords. And yet you tell me you gave me hope to believe he yet lives?" was his refrain.

Plympton showed no signs of retreat. "I have been assured there is a desperate chance that such a thing is true."

"Heaven be praised! I would give all I have in this world, and all I ever expect to gain, if such blessed intelligence were true," and Larry uttered a heavy sigh; "but, alas, I fear it is only a chimera, what they call an ignis fatuus at sea, a dream that can never be realized."

"Come, arouse yourself. There is a chance, more than half a show, that it may be so. Let us work with that idea in view."

Larry found his lost energy, and as he sprang erect, no one could complain longer that he lacked in anything that went to give him the traits of manliness.

cently knew nothing more. This lack of conclusive intelligence did not prevent these two sanguine friends from constructing many theories and plans which were rosy-tinted and glowed with newly-awakened hope. If it came to the worst, they might surrender the papers in order to save the precious life of the mysterious prisoner of the Walled City, though they knew full well that Dr. Jack, should the captive prove to be Avis' lost husband, would utterly refuse his liberty at such a cost, were the matter ever placed before him, which they did not intend it should be.

At any rate, a new vigor had been given to their daring project; and while dreading lest it prove an illusive dream, both men secretly prayed that competent success might attend this secret invasion of the Forbidden City.

(To be continued).

## A WOMAN'S INVENTION.

How the Wife of an English Manufacturer Discovered Blue Paper.

"A woman," said a paper maker, "invented blue paper. It was by accident that she did it, though. Before her time all paper was white."

"She was the wife of William Eastes, one of the leading paper makers of England in the eighteenth century. In passing through the paper plant one day she dropped a big blue bag into a vat of pulp. Eastes was a stern chap, and so, since no one had seen the accident Mrs. Eastes decided to say nothing about it."

"The paper in the vat, which should have been white, came out blue. The workmen were mystified. Eastes, enraged, while Mrs. Eastes kept quiet. The upshot was that the paper was sent to London, marked "damaged," to be sold for whatever it would bring."

"The selling agent in London was shrewd. He saw that this blue tinted paper was attractive. He declared it to be a wonderful new invention, and he sold it off like hot cakes at double the white paper's price."

"Eastes soon received an order for more of the blue paper—an order that he and his men wasted several days in trying vainly to fill."

"Then Mrs. Eastes came forward and told the story of the blue cloth bag. There was no difficulty after that in making the blue paper. This paper's price remained very high, Eastes having a monopoly in making it."

## A HUNDRED TONS OF WATER.

Rainfall is a condition which has much to do with our health. A wet district with a good deal of subsoil water, making houses damp, is a locality in which rheumatism and consumption are likely to prevail. Over England and Wales the average yearly rainfall is about 34in. In Scotland it reaches 46in., and in Ireland about 38in. Possibly the wettest parts of Britain are in Cumberland, where the rainfall may attain 150in. per year. One inch of rain on one acre of ground means a hundred tons of water.

tered by the kidneys. If the blood is weak or watery the kidneys have no strength for their work and leave the blood unfiltered and foul. Then the kidneys get clogged with painful, poisonous impurities, which brings aching backs and deadly Bright's disease. The only hope is to strike without delay at the root of the trouble in the blood with Dr. Williams' Pink Pills. They make new blood. They flush the kidneys clean, heal their inflammation and give them strength for their work. Common kidney pills only touch the symptoms—Dr. Williams' Pink Pills cure the cause. That is why they cure for good, and at the same time improve the health in every other way. But you must get the genuine pills with the full name, Dr. Williams' Pink Pills for Pale People, on the wrapper around each box. Sold by all medicine dealers or direct from the Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box or six boxes for \$2.50.

## WOMAN BIGAMIST.

Had One Husband in England and One in the United States.

Mrs. Mary Ann Williams McClement-Tibbitts tried the novel idea of having a husband in the United States and another in England, but it did not work well, and all she has now is a divorce in England and a peculiar position in America.

Mary Ann Williams was a widow when William McClement, a Scotchman, married her in Manchester. She had a son who emigrated to America and settled in Kansas. A year or so after her second marriage she decided to go to Kansas and visit her son. There she met E. J. Tibbitts, a well-to-do Kansan, and became acquainted with him, posing as the widow of Williams. He proposed and she accepted. They were married and had a honeymoon which lasted some months.

Then, Mrs. Tibbitts, as she was, of course, known, said she would have to visit England on business, but would be back in six months or less. In England she returned to her home and husband, McClement. Thus her plan was worked out. Six months she would spend with him in England, and the same period with her other husband in Kansas. But the English husband found some letters and other things, and began an investigation. The result was the granting of a divorce here last week.

Mrs. "What-her-legal-name-may-be" is not being prosecuted for bigamy, for she is with Mr. Tibbitts in Kansas, but the English court has now given him a chance to really marry her.

## A MISERLY COUNTESS.

Personates Maid to Get Free Treatment in Public Hospital.

Two years ago the eccentric Countess Adele Bathany died in the Merchants' Hospital at Budapest, Austria.

She was one of the wealthiest and most highly connected women of the land but after her husband's death she became a miser and lived in complete retirement.

When she became ill she assumed the name of her own maid, and obtained admission to the hospital. It was only after her death that her identity was discovered, and that she had enfeebled over \$2,750,000 worth of property in her husband's family.

The validity of the will was attacked by her next-of-kin, Prince Odescatchi, Count O'Donnell and Gustav Tarnoczy, on the ground that a woman cannot set up an entail out of her own family. The Curia, the highest court of appeal in the country the other day set aside the will and ordered the estate to be divided among the three claimants.

## INVERTED.

"Did you notice that the dead man's physician was riding in the first carriage after the hearse?"

"Yes; it's the first time I ever saw the cause follow the effect."

that never for a minute do I intend to intimate that this rascally count represents the better class of Russian gentlemen. I have messed with the Czar's officers, and fought at their side in days gone by, so that I have many warm friends among the soldiers of Nicholas. Petoskey is in a class by himself. You will find his like in Germany, France, America and even England. I am sorry to say—men who, in their mad chase of the golden calf, will sacrifice everything that comes in their way, even human life."

"Well, when he insulted ladies, you drew the line. What did he say?" asked Larry, eager to get at the stirring events.

"He swore at me in Russian as well as the circumstances would allow."

"Pray, what were those circumstances?" demanded the other.

"I think I saw him eject a couple of teeth, and there were other conditions that might be called irritating," returned Plympton, grimly.

"You knocked him down, egad—knocked Petoskey flat in the street! Two teeth gone—no wonder your knuckles were bruised. That was a blow not only for old England, but in memory of Dr. Jags—the first we have been able to strike. Well, it's a good thing for the beast I was not present when he sneered at my fair country woman—for I'm an adonized Piccadilly man, you know. By Jove, now, he would hardly have come out of it with only the loss of two pearly front teeth, you know," and Larry clenched his fists and looked as fierce as a hyena.

Some men are born lucky, and evidently Petoskey was one of that class. What a pity that he might never know what he had missed, and how he came within an ace of being annihilated.

"Oh course, having satisfied my conscience in the matter, I paid no attention to his splutterings, but, scrubbing the name of this hotel on my card, I tossed it to him and walked away."

"Does that mean a duel?" asked Avis, soberly.

He shrugged his broad shoulders carelessly.

"That depends entirely upon" our friend, the Russian's caprice. You may be sure, if challenged I will give him all the satisfaction he wants—always providing I am in the land of the living to accommodate him."

"I hope nothing comes of it," breathed Avis.

"If Petoskey knows what is good for him, he will drop all these matters and devote his whole time and attention to seeing a dentist," remarked the oracle; and, indeed, could that same man from the Neva have gazed upon the fierce aspect of Larry while thus speaking, he would doubtless have hustled out of Peking and sought the protection of the heavy guns at Port Arthur without an hour's delay.

A warrior may not always be measured by his stature or the dashing military musketeer that adorns his lip. There are brave souls cast in a less heroic mould, and Larry must have inherited the spirit of some mighty Saxon ancestor whose deeds won him renown and fortune.

"At least I hope he will not be in a hurry, for I could not accommodate him until our little picnic is over," said Plympton.

It pleased him to so designate the desperate undertaking they had in view, and yet he was as well adapted to appreciate the perils attending such an enterprise as any man living.

He now endeavored to banish all thought of the ogre, Petoskey, by detailing the arrangements into which he had entered with the delectable merchant Foo Chong, who had agreed to have a reliable guide in readiness to conduct them into the Forbidden Purple City on the following night.

Many matters were arranged, even to the disguises they were to assume, which of necessity must be the regulation Chinese costume.

Thus time passed, and Avis, weary from her journey, finally begged them to excuse her.

you see. Has the Emperor been changed in his palace? Has Li Hung Chang married the Dowager Empress? By Jove! d'ye know, I'm ready to believe almost anything in this beastly country where just the thing you never expect bobs up serenely."

"That's just it—the unexpected is constantly turning up in China," said Plympton, as he lighted a cigar in order to save himself from the vile odor of the paper cigarette Larry was getting in readiness to consume.

"Thanks—believe I will use a light. And now, proceed to relieve my dreadful suspense," drawled the dude, drawing his legs up under him on the settee.

Lord Rackett looked keenly at him, as though he would hazard a guess as to how the little man might take the news.

"How are you, Larry?" he asked.

"Eh? By Jove! now, that's a queer remark."

"I mean your nerves—are they steady?"

"Aw—I see—you wish to make sure I don't faint. Rest easy, my dear man, it's the heart."

"Well, steady yourself for stunning news."

"Good Heavens! you send a flutah down to my very toes. It's cruel to keep a chap in this condition. Speak out, man—has England made an alliance with the United States? Tell me what wonderful thing has happened."

"I have reason to believe you made a mistake."

Larry collapsed.

"That is the basest cruelty in you, Lord Rackett, seeing my condition. A joke is good enough in its way, but at such a time—Well I've made a deuced pile of mistakes in my day, but they were of the head and not of the heart."

"This is a mistake that may make some change in our plan of campaign," said Plympton, smiling.

There was that in his manner to arouse Larry's suspicions.

It was wonderful to see how like a flash he seemed to leap at conclusions.

Inspiration gave him a clue, and the rest sprang from his heart.

"You almost terrified me!" he said, in a voice that trembled with eagerness.

"Then you can guess?"

"Good God! is it about—him?"

The big Englishman nodded.

"Dr. Jack, I mean," pursued the trembling dude.

"He is the party I had in mind, Larry."

"You said—I had made—a mistake!"

"Well, it is not positive. Had I been sure, I could never have kept it from his wife, but I dared not arouse her hopes only to crush them later on, it might be."

Larry was apparently paralyzed; he sat there like a man of stone, only that his features were working spasmodically.

Still, he had fair control over his voice, if it did sound much like the squeak of a rat back of the wainscoting.

"Am I awake or dreaming? I heard the fierce cries of the Black Flags, and Kai Wang assured me this was their note of victory when they slashed an enemy's head off with their unwieldy but keen swords. And yet you tell me—you give me hope to believe he yet lives?" was his refrain.

Plympton showed no signs of retreat.

"I have been assured there is a desperate chance that such a thing is true."

"Heaven be praised! I would give all I have in this world, and all I ever expect to gain, if such blessed intelligence were true," and Larry uttered a heavy sigh; "but, alas, I fear it is only a chimera, what they call an ignis fatuus at sea, a dream that can never be realized."

"Come, arouse yourself. There is a chance, more than half a show, that it may be so. Let us work with that idea in view!"

Larry found his lost energy, and as he sprang erect, no one could complain longer that he lacked in anything that went to give him the traits of manliness.

This lack of conclusive intelligence did not prevent these two sanguine friends from constructing many theories and plans which were rosy-tinted and glowed with newly-awakened hope. If it came to the worst, they might surrender the papers in order to save the precious life of the mysterious prisoner of the Walled City, though they knew full well that Dr. Jack, should the captive prove to be Avis' lost husband, would utterly refuse his liberty at such a cost, were the matter ever placed before him, which they did not intend it should be.

## SPELL OF MAGIC POWER

EXTRAORDINARY VISIONS IN RUINED ENGLISH ABBEY.

Phantom Bishop Heads Procession to Throne in Transept of Old Edifice.

Three friends staying at Whitby, England, have had an extraordinary experience. They saw in broad daylight a long procession of mediaeval monks and nuns, headed by a bishop in full canonicals, wind slowly through the ruins of Whitby Abbey.

One of the party recently received from India a packet of powder, said to have mysterious psychical powers. He experimented with it, and saw visions of the dead. The Whitby vision also followed after taking some of this powder.

The three friends each took some of it, and almost immediately one of them heard the words, "Go to the south transept," another receiving the instructions: "At the abbey to-morrow as soon as possible."

The following extract from a letter written by one of the experimenters to Light describes what they saw at the abbey:—

"We entered the abbey just at mid-day, and went into the ruined south transept and stood facing the east. One of my friends at once saw a long procession of brawn-clad and cowed monks, and smelt incense very distinctly.

### PHANTOM BISHOP.

"Following these monks I saw several white-robed priests, followed by the bishop in full canonicals and wearing his mitre. He was conducted to a sort of throne, placed for the time being with its back to the altar.

"When he was seated, several nuns in white habits appeared from the south transept, one of which was taken before the bishop, and knelt at his feet, when he laid his hands upon her head, and I heard the words, 'The consecration of the prioress at the midday mass.'

"During the ceremony there knelt in prayer an old lady, dressed in dull red-brown, and wearing a very peculiar white head-dress; her hands were crossed on her breast. I could not remember the date, but the word 'Agin-court,' was whispered to me from the unseen. I felt as if she had nothing to do with the ceremony, but was there merely to fix the approximate date—by her head-dress.

"As we left the abbey my other friend saw, dotted about in the grounds—where several very material cows were feeding—more monks in brown cowls and robes, who were wandering about, evidently engaged in contemplation or prayer.

"We, none of us, heard any names, but I should know that bishop again anywhere if he ever saw fit to reappear."

### TRANCE DREAMS.

Miss Annie Sansome, of Nottingham, England, a well-known psychic, had also experimented with the powder. In the following letter to Light she describes its effect on her:—

"I seemed to go into a dazed condition, and the room and articles around me went dim. Then I found myself in a large city, in a great crowd of people, and the thought came to me, 'This is

### "INHUMAN" SUNDAY.

London Vicar Sees Little Use in "Smart Set" Crusade.

The vicar of Holy Trinity, Sloane street, London, England, in a sermon recently, said he could not see much use in the denunciation of the "smart set." He could not accept the Puritan idea of Sunday, which was an idea of 200 years ago, and seemed almost inhuman. Nor was it the continental Sunday we had to dread, but the secular Sunday.

The type of character formed by the passion for the motor-car and the social excitements of the day was not, he said, so much the desperately wicked as the vapid, weak and fibreless. Social pleasures and conditions now-a-days tended to produce not so much the militant desperate wickedness for which perhaps some other times might have been noted, as the thoughtless, lazy and frivolous type of degenerate; people of no deep convictions, no earnestness or honesty of purpose.

Those who indulged the most in Sunday exercises and recreations were not always those who needed them the most. English people were often warned against the continental Sunday, but from his own observation that Sunday was not nearly so bad as some made it out to be; the element of reverence, of worship, was always present.

No loss could be greater to any people than the loss of the habit of public worship. The great mark of a nation's worth was the mark of worship. No man could give himself up to selfish, thoughtless, frivolous enjoyments without suffering terrible deterioration.

### NO DIFFERENCE.

Dr. Leonhardt's Hem-Roid cures any form of Piles. Internal, External, Bleeding, Blind, Itching, Suppurating, etc., are simply names of the stages through which every case will pass if it continues.

Piles are caused by congestion of blood in the lower bowel, and it takes an internal remedy to remove the cause.

Dr. Leonhardt's Hem-Roid is a tablet taken internally, and no case of Piles has ever been found it failed to cure. Money back if it does fail.

### TOYS TEACH MUSIC.

Novel Method of Teaching Music to Little Children.

Miss A. Seppings, L.R.A.M., gave an exhibition of her method of teaching music to little children at Cavendish Rooms, Mortimer street, London, England, recently. She instructs by means of cubes, on which the various short notes are inscribed.

Miss Seppings tells the children that the demi-semi-quaver has a head, one leg, and three feet, so that it can run very fast, and that the semi-quaver has only two feet, because it does not run as fast as the other. By shifting the cubes according to her direction the children see that it takes two demi-semi-quavers to equal one semi-quaver, and so on.

"All children love bricks," says Miss Seppings, "and it is therefore easy to interest them in music by this method. Children of four or five can learn to read, play, and transcribe little pieces in one term."

"You always appear to be worried about your housekeeping," remarked the sympathetic friend. "But, really," replied the housekeeper, "there are only two occasions when I am really worried. One is when I haven't a servant, and the other is when I have."

"Is this really a camel's hair brush mamma?" "Yes, dear." "Funny!" don't see how a camel can ever brush his hair with that thing."

make picnics more enjoyable by making the preparations easier.

Easier to carry; easier to serve; and just right for eating as they come from the can. Libby's cools have first pick of the best meats obtainable—and they know how to cook them, as well as pack them.

If you're not going to a picnic soon you can make one tomorrow at your own table by serving some sliced Luncheon Loaf. It is a revelation in the blending of good meat and good spices.

"I seemed to go into a dazed condition, and the room and articles around me went dim. Then I found myself in a large city, in a great crowd of people, and the thought came to me, 'This is London.' Then the vision changed, and I saw the spirit forms of a little boy and girl, urchins of the street, first in rags and tatters, then in beautiful spirit robes, showing that, though poor on the earth, they were rich in the spirit world; that was the impression I received.

"Then I saw my brother's wife, who had died some time ago, and heard her name, 'Lizzie,' breathed quite audibly. I got the picture of a coffin and of a death to occur in the future, particulars of which I shall send you later if it happens as I saw it in vision.

"My mother also tried the powder, but did not get any results. It only appears to act on those who feel some psychic development. I did not feel any injurious effects from it, but a nice, soothing feeling that feels very much like the trance state."

**FRENCH LABOR WAR.**

**Effects of Industrial Agitations Benefit Large Firms.**

The labor conflict in France still continues. The workmen declare that they are determined to struggle until the employers capitulate, while the employers apparently equally determined, declare they will not make any concessions. Some of the French industries are very much demoralized.

The labor agitations in recent years are said to have had an important effect in leading to a "concentration of industries." In 1896 there were 2,344,471 independent establishments in France; in 1901 the total number of such establishments was 2,253,556, a diminution in five years of nearly 100,000 establishments. The number now is said to be very much smaller. The small establishments are reported to have been the ones which have large y gone out of business. During the period of 1896 to 1901 no less than 102,155 small firms disappeared, while establishments employing from 21 to 100 workmen increased by 2,535, and the number of large firms, employing more than 100 workmen each, increased from 3,081 in 1896 to 4,628 in 1901. The present agitation with a demand for shorter hours and increased wages is said to have added greatly to this concentration of business in certain lines or the large firms.

**PHOTOGRAPHING A BULLET.**

Dr. Riegler, of Budapest, has made a very curious experiment in photography, and one that to many people will appear almost incredible. He photographed a bullet after it had been fired from a rifle, and while it was proceeding with a velocity of 440 metres—rather more than a quarter of a mile—a second. A regular infantry rifle was the weapon selected for the purpose of conducting the experiment, which was in every way successful, a perfect reproduction of the bullet being the result. A horse at full gallop, a swallow in its flight, and even a flash of lightning have succumbed to the photographer's art, but his last triumph is still more marvellous.

The Crick in the Back.—"One touch of nature makes the whole world kin," sings the poet. But what about the touch of rheumatism and lumbago which is so common now? There is no poetry in that touch, for it renders life miserable. Yet how delighted is the sense of relief when an application of Dr. Thomas' Electric Oil drives pain away. There is nothing equals it.

Fellow-Passenger: "Pardon me, your necktie has been sticking out for some time. I refrained from telling you sooner because those young ladies seemed so much amused." Farmer: "Thankee; an' the oil from that lamp has been droppin' on that light overcoat of yours for the last ten minutes, but everyone seemed so tickled that I hated to spoil the fun."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

He: "Before you married me you used to say there wasn't another man like me in the world." She: "Yes; and now I shouldn't like to think there was."

Much distress and sickness in children is caused by worms. Mother Graves' Worm Exterminator gives relief by removing the cause. Give it a trial and be convinced.

Miss Country Maid: "I understand that in some hotels one often sees palms about the dining-rooms. What kind of palm is the most prominent?"

Comfort by day and sound sleep by night follow the use of Weaver's Cerate, for skin troubles, no matter how tormenting they be. This ointment soothes and cleanses.

She: "What is meant by the pipe of peace?" He: "Can't imagine. Never yet smoked a pipe in the house but my wife made a fuss about it."

Biliousness Burdens Life.—The bilious man is never a companionable man because his ailment renders him morose and gloomy. The complaint is not so dangerous as it is disagreeable. Yet no one need suffer from it who can procure Parnee's Vegetable Pills. By regulating the liver and obviating the effects of the bile in the stomach they restore men to cheerfulness and full vigor of action.

**LOWEST BIRTH RATE.**

The lowest birth rate in any first quarter of a year since civil registration was established was recorded during the first three months of the present year, according to the quarterly return of marriages, births, and deaths in England and Wales. The actual number of births during this period was 237,396, in the proportion of 27.9 annually per 1,000 of the population. In the ten preceding first quarters the mean rate was 29.2. While the birth rate has fallen so heavily, it is a remarkable fact that, owing to an even greater decline in the death rate the natural increase of population in England and Wales during the quarter was 96,534, as compared with 96,934, as compared with 96,758, 87,166 and 89,740 in the first quarters of 1903, 1904, and 1905 respectively.

**VICTORIAS FIRST WHITE WOMAN.**

The Colony of Victoria, Australia, is still so youthful that the first white woman who set foot upon its soil, Mrs. Stephen George Henty, has only just died. She was born at Stokesby, Yorkshire, in 1816, and went with her mother to Western Australia, where at the age of twenty she married a Swan River pioneer, Mr. Henty. Soon afterwards they moved to Tasmania, and thence sailed in a small vessel which reached the bay at Portland one Sunday night in June, 1836. In the moonlight Mrs. Henty was carried ashore through the surf, and thus achieved the distinction of being Victoria's first white woman, as her son, born in August, 1837, was the first white male native of the Colony.

the sympathetic friend. "But, really," replied the housekeeper, "there are only two occasions when I am really worried. One is when I haven't a servant, and the other is when I have."

Holloway's Corn Cure destroys all kinds of corns and warts, root and branch. Who, then would endure them with such a cheap and effectual remedy within reach?

Mr. Dineout: "The waiter's."

Dibbs (facetiously): "This is a picture of my wife's first husband." Dobbs: "Great snakes! What a brainless-looking idiot! But I didn't know your wife was married before she met you?" Dibbs: "She wasn't. This is a picture of myself at the age of twenty."

Cholera and all summer complaints are so quick in their action that the cold hand of death is upon the victims before they are aware that danger is near. If attacked do not delay in getting the proper medicine. Try a dose of Dr. J. D. Kellogg's Dysentery Cordial and you will get immediate relief. It acts with wonderful rapidity and never fails to effect a cure.

Host (a trifle nervous about the effect of his guest's wooden leg upon the polished floor): "Hain't you better come on the rug, major?" You might slip there, you know." The Major: "Oh, don't be afraid, my boy; there's no danger. I have a nail in the end of it."

The Wretched Condition of thousands is due to the fact that they neglect the simplest care of their health. When in this condition "Ferrovin" will build you up and give you strength.

Gregson (in alarm): "Great Scott! I've left my purse under my pillow." Fisher: "Oh, well, your servant is honest, isn't she?" Gregson: "That's just it—she'll take it to my wife."

To Prevent is Better than to Repent.—A little medicine in the shape of the wonderful pellets which are known as Parnee's Vegetable Pills, administered at the proper time and with the directions adhered to often prevent a serious attack of sickness and save money which would go to the doctor. In all irregularities of the digestive organs they are an invaluable corrective and by cleansing the blood they clear the skin of imperfections.

A gentleman courted a lady for twenty-eight years, and then married her. She turned out to be a perfect virago, but died two years after the wedding. "ow," said our friend, in a self-congratulatory tone, "see what I escaped by a long courtship."

# GOVERNMENT MONEY STOLEN

## Revolutionists Killed Passengers and Stole About \$120,000

A despatch from Warsaw says: Two daring train robberies were committed in Russian Poland on Saturday, one of them resulting in a considerable loss of life. A train from the frontier station Herby bound for Czenstochowa, was carrying money received from the customs house to the branch of the Imperial Bank, under protection of seven frontier guardsmen. Gen. Zukat, chief of the frontier guards; General Weitenring, chief of the customs service of Warsaw, and Colonel Brzezicki and Captain Leguma were passengers. Fifteen persons boarded the train at a way station. They evidently had been waiting for it and made an attack on the guardsmen, who were reinforced by the officers named. A skirmish followed in which two Generals, two officials, five soldiers and one robber were killed and Colonel Brzezicki and one robber wounded. All the wounded and dead were taken to Czenstochowa. The robbers escaped, taking \$80,000 and the arms of those who had attempted to defend the train against robbery.

**THE SECOND ROBBERY.**

The second robbery was committed on Saturday night on the Warsaw-Vienna Railway, six miles from Warsaw. While the train was under way unknown persons pulled the danger signal, causing it to stop. Robbers, who were aboard, jumped out and seized the locomotive and detached the mail car from the train and ran it down the line. They secured \$37,500 of Government money. The robbers were fully informed that the train had the money on board. They carried red flags and are supposed to be members of the Polish Social party. The train was without a guard, and hence there was no fighting and no casualties. Efforts to capture the robbers failed. The robber who lies wounded at Czenstochowa is in a serious condition. He refused to give any information concerning his accomplices.

**PUBLIC DISORDER GROWS.**

Public disorder is growing daily throughout Russian Poland, and scarcely a day passes without some robbery or other crime being recorded. Saturday a panic occurred in a public park here. Many shots were fired and one person was killed and four were wounded. It is believed to have been an attempt by revolutionary agents to precipitate an outbreak.

**DOCUMENTS SEIZED.** ....

A despatch from St. Petersburg says: About thirty professional men, including eight ex-members of the Douma, assembled on Thursday, at the house of Prof. Borosdin to hear a communication regarding the events following the dissolution of the Douma. While the meeting was in progress the police entered and arrested them all, and seized a number of documents. An English correspondent, who was present, was also arrested, but released upon identification. He enquired later as to the fate of his companions, and was assured that nothing unpleasant would happen to them.

The Viborg manifest, prepared and issued by ex-members of the Douma, has now been signed by 217 of the ex-members. They all expect that Government prosecutions will be instituted against them, and that they will be disqualified from standing as candidates at the next election of deputies.

south of Russia, 40,000 workmen have armed themselves, and have organized a disciplined rifle legion of 1,000 members, under former army officers. The Russian troops are useless in the emergency, having fraternized with the strikers almost continuously. The workmen's demands amount practically to confiscation of the plants.

**FORCED TO PRINT APPEAL.**

A despatch from Yaroslav, European Russia, says: Twelve armed men entered a printing office here after midnight on Friday and compelled the compositors to set up and the printers to print 50,000 copies of the address to the country drawn up at Viborg by the members of the outlawed Parliament as made there July 23rd, as well as a number of its proclamations issued by the Socialists.

**MARTIAL LAW AT CRONSTADT.**

A despatch from Cronstadt says: In view of repeated attempts at demonstrations, the commandant of the fortress and the chief of police have issued proclamations, declaring the fortress under martial law, and announcing that meetings and demonstrations of all descriptions will be dispersed by armed force. The Semenovsky Regiment, which recently was brought here, has reinforced the disaffection, which is especially strong among the signal corps and other special service men. Forty members of the signal corps have been arrested.

**A NEW MINING INSPECTOR.**

**An Addition to the Staff in the Cobalt District.**

A despatch from Toronto says: It is understood that Prof. W. C. Baker of Queen's University has been appointed by the Ontario Government as assistant inspector of the Cobalt district for the season ending October 1. The Government decided to open a branch recording office at Cobalt. This step and the appointment of Prof. Baker are in accordance with the promise given to a recent deputation of mining men who waited on the Government. The office will be established immediately and Prof. Baker will also commence upon his work at once.

**SUFFERING FROM SHOCK.**

**Bomb Explosion Has Had Serious Effects on Queen Victoria.**

A despatch from Madrid says: The shock which she suffered from the explosion of a bomb on her wedding day is telling seriously upon Queen Victoria's health. Recently it was reported that she was suffering from a cold, but her illness is said to be really nervous prostration, which takes the form of hysteria and insomnia. She is an enthusiastic motorist, but for ten days her physician has forbidden her to indulge in the sport. The Queen has become a devout Catholic, and never misses daily mass. She has a tiny tablet, bearing the image of St. Christopher, the patron saint of motorists, on every one of her cars.

**FATAL SHOOTING AFFRAY.**

# LEADING MARKETS

**BREADSTUFFS.**

Toronto, July 31.—Flour—Ontario—Dull, exporters bid \$3 for 90 per cent. patents, buyers' bids, outside. Manitoba—\$4.40 to \$4.60 for first patents, \$4 to \$4.10 for second and \$3.90 to \$4 for bakers'.

Wheat—Ontario—Firm at 77½c to 78c outside for No. 2 red and white.

Wheat—Manitoba—Prices are higher at 84½c to 85c for No. 1 northern at lake ports; No. 2, 82½c to 83c.

Oats—Steadier, at 36½c to 37c outside for No. 2.

Rye—62c to 64c outside.

Barley—49c to 51c outside for No. 2.

Corn—American No. 2 yellow 59c Ontario points.

Peas—80c to 82c outside.

**COUNTRY PRODUCE.**

Butter—Receipts of mixed quality are fairly heavy.

Creamery prints ..... 20c to 21c  
do solids ..... 19c to 20c  
Dairy prints ..... 16c to 18½c  
do pails ..... 17c to 18c  
do tubs ..... 17c to 18c  
Bakers' ..... 16c to 17c  
Cheese—12½c to 12½c for lb. lots.  
Eggs—Quotations are unchanged at 18c to 19c.

Potatoes—Loads of new are quoted about steady at 75c to 80c per bushel.

Baled Hay—Old is steady at \$10 for car lots. No. 1 timothy, on track here; mixed \$7.50. Some new is offering at \$9.50 per ton for No. 1 timothy.

Baled Straw—Car lots on track here are unchanged at \$5.50 to \$6 per ton.

**MONTREAL MARKETS.**

Montreal, July 31.—Grain—There was no improvement in the demand for Manitoba wheat by the cables this morning and business was very quiet.

Oats—No. 2 white, 42½c; No. 3 white, 42c; No. 4 white, 41c.

Flour—Manitoba spring wheat, \$4.60 to \$4.70; strong bakers', \$4.10; winter wheat patents, \$4.30 to \$4.40; straight rollers, \$3.90 to \$4.10; do., in bags, \$1.85 to \$1.90; extras, \$1.40 to \$1.50.

Millfeed—Manitoba bran in bags, \$16 to \$17; shorts, \$20 to \$21 per ton; Ontario bran in bags \$15.50 to \$16; shorts \$20.50 to \$21; milled mouille, \$21 to \$25 per ton, and straight grain, \$28 to \$29.

Rolled Oats—\$2.25 per bag; cornmeal, \$1.40 to \$1.45 per bag.

Hay—No. 1, \$9.50 to \$10; No. 2, \$8.50 to \$9; clover, mixed, \$7.50 to \$3, and pure clover, \$6.50 to \$7 per ton, in car lots.

Eggs—The market is unchanged at 20c to 21c for selects and 17c to 18c for No. 1 candled.

**BUFFALO MARKET.**

Buffalo, July 31.—Flour—Quiet but firm. Wheat—Spring unsettled; No. 1 Northern, 82½c; Winter stronger; No. 2 red, 79c. Corn—Stronger; No. 2 yellow, 58c; No. 2 corn, 57½c. Oats—Firm; No. 2 white, 40c; No. 2 mixed, 38c. Rye—No. 1 new sold at 62½c through biller. Canada freights—Steady.

**NEW YORK WHEAT MARKET.**

New York, July 31.—Spot barley steady; No. 2 red, 82½c elevator; No. 2 red, 83½c f.o.b. afloat; No. 1 northern Duluth, 87½c f.o.b. afloat; No. 2 hard winter, 84½c f.o.b. afloat.

**CATTLE MARKET.**

Toronto, July 31.—Cattle of all classes excepting the best were down 10 to 15c to-day at the Western Cattle Market, owing to the large arrivals thereof, and the large proportion of inferior animals delivered.

No choice exporters were offered, the

# MILLIONS STOLEN FROM MINES.

**New South Wales Company Suffers Immense Loss.**

A despatch from Sydney, N. S. W., says: In consequence of a circumstance at statement that the Kalgoolie gold mines suffer a yearly loss of £1,000,000 worth of gold by theft the Minister of Mines employed a detective to investigate. He confirms the story of enormous stealing which amounts to some hundreds of thousands of ounces, but says the robberies are smaller than alleged. He adds that certain men who are generally regarded as upright and honorable, are living luxuriously wholly on the proceeds of stolen gold. They receive it from the actual stealers, who are mostly officials. A resident magistrate confirms the detective.

London officials of the Kalgoolie Companies say the estimate of the thefts is grossly exaggerated. The total value of the gold stolen does not exceed £70,000 yearly. The utmost vigilance fails to prevent the stealing.

**ATTEMPT TO HOLD UP MAIL.**

**Driver of Wagon at Windsor Foils Plan of Two Highwaymen.**

A despatch from Windsor says: An attempt to hold up a Royal mail wagon at the corner of Arthur and McDougall Streets about 11 o'clock on Thursday night was frustrated by the coolness of the driver, George Summers, who whipped up his horse and left the would-be robbers behind. All the mail had been distributed a few minutes before and the driver was returning to the barr when the attempted hold-up took place. As the wagon passed the corner, two men stepped from the shadow and one flourishing a revolver, called on Summers to halt. Instead of obeying the command, however, the whip was hastily applied to the horse, and the wagon rushed by within a few feet of the men.

**BRIDGE BUILDING DISCUSSED.**

**Report of Commissioner of Highway on That Subject.**

A despatch from Toronto says: Much information of value to Municipal Councils is contained in the third part of the report of the Commissioner of Highway of the province for 1905. The brochure deals with the important subject of bridge construction. The commission, Mr. A. W. Campbell, deals with the subject of highway bridges. He points out that the increasing cost of timber bringing into use the more permanent materials, steel and concrete, and give a description of various types of structures. The use of concrete for the construction of bridges, culverts, bridge floors and the abutments is discussed with care. Specifications are given for the erection of the various types of viaducts.

**TRANSVAAL UNREST.**

**Native Compounds Are Placed Under Guard.**

A despatch from Johannesburg says: The authorities now believe that a general rising is improbable, in view of the drastic measures taken to crush the native conspiracy. Every compound is guarded, and the natives are forced to retire indoors at nightfall. Mobil bodies of troops are concentrated at strategic points throughout the town, and Imperial troops are ready at Pretoria and Potchefstroom. Popular uneasiness has not abated, however. Instructions have been issued to the volunteer to concentrate at the Wanderer grounds in case of emergency, and their await orders. A detachment of 15 burghers has arrived from Krugersdorp and Potchefstroom to assist in patrolling the "outer zone" of Johannesburg.

and they will be disqualified from standing as candidates at the next election of deputies.

It is stated that Nicholas Ivoff, who represented Saratoff in the Douma, has been persuaded to accept the portfolio of Minister of Agriculture. M. Ivoff, who is a Liberal, declares that they will survive in the agrarian provinces this Autumn who shoot the straightest.

#### ALL MEETINGS BARRED.

The newspapers say that the Governors of the provinces have been ordered to prevent all meetings of Constitutional Democrats and Laborites, and have been told to use troops, if necessary, to prevent them.

Legal proceedings are being taken against M. Vinaver, a Jewish leader, member of the Douma and vice-president of the Constitutional Democratic party, for organizing a political meeting in the Tshusselberg district of St. Petersburg. One hundred Constitutional Democrats met on Wednesday in Terijoki, Finland, and resolved to carry out the plans of resistance to taxation and recruiting laid down in the manifesto adopted by the Douma at Viborg. Prof. Mikukoff presided.

Disorders are spreading in the Caucasus and artillery has been used against rioters at Shusha.

#### COL. SLAMATOFF STABBED.

A despatch from St. Petersburg says: The hand of the assassin is still at work in Russia. At Warsaw Col Slamatoft of the gendarmerie was stabbed to death on Tuesday and the assassin escaped. Col. Slamatoft, who was assistant to the chief of gendarmes of the Province of Warsaw, had been active in the repressive measures. He was walking in the street when he was attacked by two men who stabbed him several times, then walked quickly away in different directions, without interference from the spectators.

#### AN APPEAL TO FRANCE.

A despatch from Paris says: The International Israelite Alliance, whose headquarters are here, has addressed a letter to Foreign Minister Bourgeois, asking that French warships be sent to Odessa for the purpose of protecting the Jews against another massacre. The signatories of the letter include a number of members of the French Institute and of the French Academy. M. Bourgeois has not yet replied, but no ships can be sent, as the Dardanelles is closed by treaty to warships of foreign powers.

#### ARRESTS IN MOSCOW.

A despatch from Moscow says: Sixty-five members of two of the most important revolutionary committees were arrested here on Tuesday morning. Among them were the chief strike organizers.

#### ARTILLERYMEN MUTINY.

A despatch from St. Petersburg says: Seven hundred arrests were made at 3 o'clock on Wednesday morning at Brest-Litovsk, where three companies of artillery mutinied on Tuesday night, destroyed the officers' club and other buildings, and wounded Gen. Ivanoff and other officers. The disorders lasted five hours. Detachments of infantry and engineers finally rounded up the mutineers. The official report of the affair admits that the situation at Brest-Litovsk is serious.

#### AN ARMED UPRISING.

A despatch from Kharkov says: The revolutionists here are actively preparing for an armed uprising and a re-proclamation of the Republic of Kharkov in the Autumn.

The French Vice-Consul here has received disquieting news from French industrial establishments. At Yuzovka the principal smelting centre in the

#### FATAL SHOOTING AFFRAY.

##### Pistol Was Used With Dire Effect at Cazaville, Quebec.

A despatch from Huntingdon, Que., says: A fatal shooting affray took place on Saturday night at the little hamlet of Cazaville, 14 miles west of this village, in the parish of St. Anicet. Some thirty farmers and laborers, mostly young fellows, had gathered in and about the hotel. Among them was Ernest Lee, of Lee's Corners, and Jean B. Leroi, who had come home to stay over Sunday with his parents. These two young men with a number of others were on the gallery in front of the hotel, when a slight disturbance arose. Lee drew a revolver and, after firing two shots diagonally across the road, turned and deliberately leveled it at the breast of Leroi, who was within five feet of him, and fired, the bullet passing through the left side of Leroi's heart. The victim went into the hotel, falling on his face in the passage way, and died in three minutes afterwards. Lee then flourished his revolver, threatening to shoot anyone who dared to interfere with him, and made his escape. At daylight Sunday morning, he was found in bed asleep quite oblivious of the fact that any harm had been done, and was placed under arrest.

#### RAILWAY WRECK.

##### Many Passengers Killed on the New York Central.

A New York despatch says: The Pacific Express of the New York Central and Hudson River Railroad, which left here at 9.30 on Sunday night, ran into a landslide at Chelsea, 11 miles south of Poughkeepsie, at 11.21 o'clock and was derailed. The engine rolled down the embankment alongside of the Hudson River and the engineer, William Wells, and Fireman Frank Werner, were killed. All the doctors in Poughkeepsie, Fishkill Landing and Matteawan were hurried to the scene of the wreck on special trains. One report from Poughkeepsie stated that the engine and three cars had gone over the bank and that many of the passengers had been killed and injured. Word was received at the Mott Haven yards early Monday morning that five of the cars and the engine had left the track, and that the dead and injured were being taken out with difficulty, and several of the cars had toppled over. This report said that the body of the engineer had been found, and that the baggageman was also killed.

#### SHOT MOTHER, THEN HIMSELF.

##### Terrible Act of a Montreal Man While Insane.

A despatch from Montreal says: A double tragedy took place in the east end of the city early on Sunday morning, when Michael Gagnon shot his old mother dead with a revolver, and then killed himself with the same weapon. Gagnon has been of unsound mind for many years, but was regarded as harmless, and lived generally with his mother and two sisters at 227 Papineau Road. Lately he has been drinking, and on Saturday night went on a spree. Sunday morning he became violently insane and went amuck in the house. By some means he had procured a revolver and pointing it first at his sister he attempted to shoot her, but missed. He then rushed into his mother's room, where she was engaged in prayer, and shot her dead. He then turned the revolver on himself with fatal result.

The Dominion Government analysts reports that in only four samples of canned meat out of upwards of three hundred analyzed were evidences of decomposition found.

owing to the large arrivals thereof, and the large proportion of inferior animals delivered.

No choice exporters were offered, the limited arrivals comprised mostly medium and common cattle, and the top price recorded was \$4.90. Several lots brought \$4.80 to \$4.90 per cwt.

The drop butchers' cattle was from 10 to 20c per cwt. in all lines, excepting the best. Choice butchers' \$4.50 to \$4.75; medium, \$4 to \$4.40; cows, \$3.25 to \$3.50; bulls, \$3 to \$3.50; canners, \$1.50 per cwt up.

The market was quiet in feeders and stockers. Short keeps, \$4.50 to \$4.70; heavy feeders, \$4 to \$4.50; stockers, \$2.75 to \$3.50; stock bulls, \$2 to \$2.25 per cwt.

Export ewes and bucks were steady, while lambs showed a tendency to decline in price. Export ewes, 4½ to 4¾; culs and bucks, 3¾ to 3¾; lambs, 7½ to 8c. Calves were slow of sale at 3½ to 6c per lb.

Hogs were quoted at \$7.00 for selects, and at \$7.65 for lights and fats.

#### RADIAL ROAD COLLISION.

##### Fifteen Persons Injured on the Toronto and York Radial Railroad.

A Toronto despatch says: Through the alleged carelessness of a motorman in passing a switch, two cars of the Toronto & York Radial Railroad collided with such impact early Saturday morning that fifteen persons were injured, only one of whom, however, is thought to be seriously hurt. The accident occurred about a mile and a half east of Mimico Asylum. The collision was due to a big Port Credit car running past the Mimico switch, where it should have met one of the small local Mimico cars. At the place of the accident is a sharp curve and a grade. Consequently the cars approached hidden from one another at considerable speed. Roadmaster Deady says that Motorman Leslie of the Port Credit car should have remained at the switch until the smaller car had passed. The front of the smaller car was badly smashed, and it will not be put in service again this season. The damage to the rolling stock amounted to \$200, and an hour after the accident the tracks were cleared.

#### A M'DMAN'S ACT.

##### Slew Wife He Adored and Then Committed Suicide.

A Halifax, N.S., despatch says: Bear River is again the scene of murder and suicide. Ayard Morine, laborer, of Bear River, killed his wife at 5.30 o'clock on Saturday morning with a hatchet, and then, after vainly attempting to cut his own throat with a razor, rushed to the nearby river and threw himself in, drowning before a rescue could be effected. About a year ago Morine, who was 45 years of age, contracted typhoid fever, and since his recovery has been mentally unbalanced, and on many occasions caused the members of the family considerable apprehension.

#### THE HEALTH OF ONTARIO.

##### Marked Decrease in Deaths From Contagious Diseases.

A Toronto despatch says: The returns of 735 division registrars for June are among the most complete in the history of the Provincial Board of Health. Scarlet fever, diphtheria, measles, typhoid and consumption show a marked decrease, and caused 74 fewer deaths than in June of last year. Whooping cough has been more prevalent, and caused eighteen deaths, nearly as many as from diphtheria. The total deaths from all causes for the month were 1,958, from a population of 2,057,296, which makes a death rate of 11.4 in 1,000. For the same month last year 1,933 deaths were reported, a death rate of 11.2 per 1,000.

and Potchefstroom to assist in patrolling the "outer zone" of Johannesburg.

#### VEIN OF RICH SILVER.

##### Provincial Geologist Makes Valuable Find on Gillies Limit.

A despatch from Toronto says: A telegram received at the Bureau of Mines from Professor Miller, the Provincial Geologist, says that the vein recently discovered by his party on the Gillies limit, in the Cobalt mining region, has turned out to be very rich in silver. The upper part of the vein consists of Cobalt bloom, which is a mineral richer in cobalt than the smallite. The vein was covered by three or four feet of soil, and the work of stripping is progressing. The find is regarded as a most valuable one.

#### NORTHWEST CATTLE.

##### Shipments From Montreal This Season Larger Than Ever.

A Montreal despatch says: According to Chief Inspector Delorme, more cattle than usual from the Northwest are being exported this season, and in support of that the largest single shipment of Cattle from Montreal since the adoption of new space regulations in 1903 left on Thursday morning, when the Donaldson liner Athenia sailed for Liverpool with 1,042 head aboard. Of this number 700 were western cattle from the ranches of Alberta and British Columbia. Indications are that this will be a record season for western stock.

#### KILLED ON RIFLE RANGES.

##### Private of the Seventh Regiment Victim of Bursting Rifle.

A despatch from London, Ont., says: John Williamson, a member of the Seventh Regiment, was instantly killed at the Cove ranges on Saturday afternoon. A rifle in the hands of Pte Pickle, a fellow-rifleman, burst, and one of the pieces of flying metal struck Williamson in the forehead. A marksman lying between Pickle and Williamson escaped injury. The deceased was 31 years of age, came to this country from Dundee, Scotland, last Fall.

#### EXCELLENT FRUIT CROPS.

##### Encouraging Reports Received by the Minister of Agriculture.

A Toronto despatch says: Hon. Nelson Monteith, Minister of Agriculture has received reports from the fruit experimental stations of the Province to the effect that the fruit crops are excellent and high prices prevail. The latter is largely due to the numerous canning factories, which have to pay higher prices this season than ever before.

#### AND NOW THE HINDOOS.

##### British Columbia Employers Import Him En Masse.

A despatch from Vancouver says: The Hindoos who have been working here for the past year have taken advantage of the call for manual laborers for saw mill, railway and other work to send home the joyful tidings to India, with the result that it is announced that 2,000 will be here shortly. Dr. D. R. David Chand has a contract with a number of sawmills adjacent to Vancouver to furnish that number of Sikh and Hindoo laborers. He has already placed 300. Most of these men are British army reservists and they are found to be better for work in the mills than Chinese and Japanese.

George Geary was seriously stabbed by a fellow-boarder in a Hamilton boarding-house on Saturday.

Two rural guardsmen were shot and

## HEALTH

One of the joys of summer to those who live near the water is the bathing in the open air—and not a joy only, but a health-giving exercise of the highest value.

It combines three measures, each of them excellent in itself, namely, the cold bath, the air bath, and physical exercise, to which one may add a fourth—the friction of the skin produced in the rubbing-down and drying process. Reference has been made in this column to the necessity, in a hygienic sense, of the daily cold, or cool bath, but the air bath is of almost equal importance as a tonic to the skin and a means of increasing the power of resistance of the body to the effects of changes of temperature.

The air bath should be taken night and morning, all the clothing being removed from the upper part of the body while one washes the hands and face and cleans the teeth. This is done at first in a warm room, but gradually, as the skin becomes accustomed to the impact of the air, the room can be made cooler, until finally the hardy air bather can open the windows wide and let his body drink in the cool fresh air while he exercises moderately to prevent a chill.

In the open-air bathing of summer the perfection of the air bath is to be had combined with the water bath. At the same time the swimming, if one knows how to swim—and every child should be taught, for the knowledge may save his life and that of others in some emergency—or the paddling and splashing, if one cannot swim, will tone up the muscles of the arms and chest, which are usually underexercised as compared with those of the lower extremities.

Any body of water, even a shallow stream, will do for the open-air bath, but there is a special tonic virtue in sea-water. The salts exercise a stimulant effect upon the skin, and this stimulation is carried by the nerves to the internal organs, dispelling sluggishness and increasing functional activity. The appetite is increased, digestion is improved, and constipation is often relieved by a course of salt-water bathing.

There are some precautions to be observed in all outdoor bathing. One should never take a dip within a short time after a hearty meal, although, on the other hand, bathing on an entirely empty stomach is not well. If the bath be taken before breakfast it is well to eat a couple of crackers and drink a glass of milk beforehand. Another rule, and an important one, is to make the bath brief. Ten minutes should be the limit, and five minutes will be long enough if the water is cold. The rubbing down should be vigorously performed.

#### DON'T BE MOODY.

Moodiness is almost a form of disease, and certainly leaves its mark upon the face. It should be fought against until conquered by every woman who has any care for her beauty and attractiveness. Plenty of cheerful, pleasant occupation, which we can all find if we try, will keep this enemy at bay. Never be idle. Idleness produces unhappiness and discontent. Worry, too, will add years to a woman's looks. Cultivate a habit of looking on the bright side. Think good, sweet thoughts, and remember that our faces are the mirrors of our lives, whether we will or no.

#### EARLY RISING.

Scientists have discovered that there is real wisdom in the old-fashioned advice, "Early to bed and early to rise." They find that early rising and getting out of doors while the dew is on the

## THE WESTERN CROPS.

Another Estimate By the Ogilvie Milling Company.

A Winnipeg despatch says: The Ogilvie Company issued another crop estimate on Thursday, reaffirming their opinion that the yield of wheat will not exceed that of last year, notwithstanding the increased acreage. They have had samples of the growing grain examined by chemists, who, while failing to find trace of black rust, say red rust is dangerously prevalent. Reference is also made to damage by lodging and by hail, which may be material.

#### EXPERT GIVES OPINION.

A Chicago despatch says: Mr. B. W. Snow, the well-known crop expert, is in Manitoba inspecting wheat crop prospects there. In a telegram from him published here on Thursday he says:—

"Red rust very bad at many points in Manitoba and is spreading rapidly this week. Enough present to cause shrinkage in yield. Crop ten days earlier than last year. It is thick and headed well. Aside from rust, the prospect is for 80 per cent. more than last year in the condition northwest."

#### SOME FARMERS LOST ALL.

A Broadview, Sask., despatch says: Severe losses by hailstorm are reported from the Spring Lake district, about five miles southwest of here. The storm passed eastward with diminishing force, causing partial losses to several farmers south and east of the town as well. Some who have lost practically their entire crop are without insurance. Others have the benefit of Government insurance, worth up to \$4 per acre for a total loss.

## THE VEGETABLE CROPS.

Beans a Failure in Many Parts of the Province.

A Toronto despatch says: Mr. H. B. Cowan, Superintendent of Agricultural Societies, has received crop reports from the Ontario Vegetable Growers' Association. On the whole the crops are looking well in the Province of Ontario. Beans, however, will be a light crop throughout the Province, and in many sections a complete failure, owing to blight and anthracnose. Onions will be a fair crop, notwithstanding considerable damage done by maggots early in the season.

In the majority of sections celery will be a fair crop, and in some sections an exceptionally good crop. While potatoes will be a fairly large crop in many low lands, there has been a good deal of rot. If rain should fall in considerable quantities the potato crop would suffer seriously.

From Leamington comes word that the early cucumbers will be a lighter crop than usual, this being owing to the cool wet weather. Melons are doing well, but the crop will be late. Around Chatham the onions will be a fine big crop. At Scotland, Oxford County, the frost damaged the cucumbers. However, the second planting will yield a large crop. In the district of Niagara Falls the vegetables have matured more rapidly than usual, and early tomatoes will be an enormous crop.

Reports from the sections around Toronto and Kingston are to the effect that beans have been badly damaged. At Kingston the onions have been largely ruined by blight.

#### OPERATION ONLY CURE.

Relapse Likely to Follow Temporary Cure of Appendicitis.

A Berlin despatch says: The appendicitis Conference resumed its sessions on Thursday. The most eminent surgeons and gynaecologists concurred in stating that the only remedy is an operation.

## Fashion Hints.

### REIGN OF LINEN FROCKS.

If the linen suit was a favorite last season, it is doubly so this. Linen is a fabric so dear to every housewife's heart that it is no wonder it has attained such a vogue. But that it should become as conspicuous in summer fashions as broadcloth is in winter, is really a matter of surprise even to the shopkeepers and dressmakers.

This season shows favor divided between the fine handkerchief linens and the heavier sorts, the fine ones being naturally used for elaborate lingerie costumes. Close-woven handkerchief linens are smart for tailored shirt waists, and have splendid wearing and laundering qualities to recommend them. There is nothing so immaculately white as a shirt of good quality linen.

By one of those unwritten laws of fashions, we find that the elaborate lingerie waist of a dressy nature invariably accompanies a severely tailored coarse linen shirt, leaving the plain tailored linen shirt for the cloth suits.

One can classify the linen suits this season under two distinct heads—the severely tailored and the embroidered suit. Although we mention the severely tailored first, it really appeared last in the season's styles, and is a mid-summer product. Like most successful styles it had its origin in the preference of a few smart dressers who instructed the costume tailors to make them simple suits—kilted skirt and box or three-quarter effect coat suite of natural linen or crash or the unbleached white linens. The only trimmings on these suits are detachable velvet collar and cuff facings and huge pearl or more moderate size velvet buttons that have ornamental as well as utilitarian purpose. Prestige is added to the natural linens from the fact that their vogue has not yet reached

### THE READY-MADE SHOPS.

They certainly have a practical value inasmuch as they stand a goodly bit of wear without showing signs of soil, in addition to which fact they come through the laundry in perfect condition. By the way, it might be mentioned, that nowadays all linens are carefully steam shrunk, a fact which disposes of one of the chief objections to them, their tendency to shrink so that a coat or a skirt requires alteration every time it is laundered. The kilted skirts of these linen suits fall quite straight and are short, clearing the ground at least three inches and often more. Some of the one-half effect coats are full three quarters length, and have pockets placed quite low. All of the coats have pockets in generous allowance and of the patch variety. Natural linen suits are much favored for short journeys, and are seen in numbers in the favorite luncheon places where congregate women who are in from their summer homes for a day's shopping.

The second classification of linen suits is made from its trimming embroidery rather than from its design. The embroidered suit may be short or medium or long coated, as suits the taste of the wearer. The little etons, that fall free from the figure and come briefly below the bustline are still counted smart, in spite of their goodly run last year, and really they are quite the most sensible of all the linen suits, since they require far less pressing than do the linen coats which must have the help of a flatiron after every day's service if the wearer sits rather than walks.

Where a coat has a finishing touch of velvet, the skirt frequently has a corresponding touch in a binding of velvet that shows as a tiny cord at the bottom. Women have found that the

serve after hours.

## GREAT BRITAIN.

The fire at Leeds, England, on Thursday, caused a loss of \$750,000.

Two rural guardsmen were shot and killed in a crowded street in Dublin, on Thursday.

## UNITED STATES.

A terrific wind and rain storm swept St. Louis, on Thursday, doing much damage to property.

At Angelen, N.J., on Saturday, two youths capsized and eight lives were lost.

An electric car was run down by an express train near Los Angeles, on Saturday, killing one and injuring sixty persons.

At Kingston, Tenn., on Thursday, a negroess gave birth to six children, all of which are alive.

Fourteen brick plants in the western States have consolidated, with a capital of \$10,000,000.

For his services in concluding the Russian-Japanese war, President Roosevelt will receive the Nobel prize.

For the brutal murder of Mrs. L. A. Gentry at Chicago, F. J. Constantine has been arrested at Poughkeepsie, N. Y.

Five million dollars is the monetary loss by the destruction of the Russian city of Syzran, recently fired by the revolutionists.

Health officers of Fort Worth, Texas, on Thursday, stopped the importation from Mexico of a large shipment of human bones, to be used as fertilizer.

The Memphis, Tenn., election commissioners plan to have clergymen for officials at the county election, and to open the polls with prayer, as a means of securing a fair vote.

Charged with removing the body of his daughter from a coffin and attempting to throw it out of a window, Charles Anderson was called an "inhuman monster" by Magistrate Moss, of New York, and was sent to the workhouse.

It is claimed that the Indiana liquor interests are organizing for a hard fight in the next legislature. A determined effort will be made to repeal the present law which puts the "lid on" tight in the state every Sunday.

Because of the restraint upon dogs, due to the hydrophobia scare, cats have become an unmitigated nuisance in the residential parts of Springfield, Mass. Provisions left on back piazzas are no longer safe, and night is made hideous by the fence-top wailings. A city ordinance forbids shooting a cat.

The New York World says—"Every dollar of Russell Sage's great fortune is left to Mrs. Sage by a will, made in 1901, except an insignificant bequest made to Mrs. Fannie Chapin of Oneida, N.Y., an only sister, who died two years ago. The fortune of Mr. Sage amounts to only about \$60,000,000."

Prisoners at the Danbury, Conn., police station on Thursday made a funnel of a newspaper, held it up to the grating, and friends outside poured whiskey into it. Needless to say, each prisoner in turn held the small end of the tube to his mouth. Police Captain Bradley discovered the trick only when the prisoners became hilarious.

## BRITAIN'S NAVAL PROGRAMME.

Only Three Battleships Instead of Four to Be Built.

A London despatch says: The agitation for reduction of the naval construction programme has proved successful and Edmund Robertson, Parliamentary secretary of the Admiralty, announced in the House of Commons on Friday that only three new battleships of the Dreadnaught class would be laid down, instead of four as originally proposed. Two ocean-going torpedo-boat destroyers will be built instead of five, and eight submarine boats instead of twelve. The total of the expenditure involved by the new programme is \$21,000,000, instead of \$46,000,000.

## EARLY RISING.

Scientists have discovered that there is real wisdom in the old-fashioned advice, "Early to bed and early to rise." They find that early rising and getting out of doors while the dew is on the grass enables one's lungs and circulation to absorb health-giving elements which the atmosphere contains at no other period of the twenty-four hours. A single experiment will convince anyone who is not lazy or prejudiced that the air of the early morning is more bracing and invigorating than at any other time of day or night.

## PHYSICAL EXHAUSTION.

When tired physically stop work, if only for a few minutes, and throw yourself flat on your back on a couch, bed, or floor, if nothing else is handy, and rest so five or ten minutes, every muscle relaxed, the eyes lazily closed, and the mind resting dreamily with the body. Such a rest, if taken before you are completely exhausted by your work, will send you back with fresh vigor and renewed courage, as well as a rested and refreshed body and brain.

## HOLLOW TEETH.

A hollow tooth becomes a receptacle for fragments of food, and unless these are removed they undergo decomposition, making the breath very offensive. The use of a toothpick does not suffice. One must use a brush and some antiseptic powder or wash. A pinch of boric acid placed on the brush and applied to the hollow tooth is excellent. It will also tend to arrest the spread of the decay to other teeth.

## NOVEL SALT BATHS.

An article that is becoming more and more used is salt. With some, the coarsest salt possible to get—sea-salt preferably—is thrown into the bath-water and used as a sort of weak brine. Another form of use is to take large handfuls of moist salt and rub the whole body and limbs with this, following the "scour" with a rinsing-off in cool, clear water. This is found to be very strengthening.

## INDIGESTION.

People with poor digestion should drink no water with meals, but take a glassful half an hour before, and drink plentifully an hour or so after each meal.

## REMEDY FOR NOSE-BLEEDING.

If prolonged, a little powdered alum may be placed within the nostrils. As a rule nose-bleeding is a natural means for getting rid of excess of blood in the head. Between the thirteenth and sixteenth years children have the blood circulation undergoing certain changes. Nose-bleeding often prevents hysterical symptoms and bad headaches.

## LIQUOR DEALERS SENT TO JAIL.

Magistrate of Moncton Determined to Enforce the Scott Act.

A Moncton, N.B., despatch says: Consternation prevails amongst the liquor dealers here. Magistrate Kay on Friday afternoon sentenced three violators of the Scott act to jail for one month, without the option of a fine. Heretofore offenders were arraigned a few times a year, fined \$50 each, and went on selling. The force of enforcing the law has been blamed on the Magistrate, but Friday's action indicates that he proposes to enforce it hereafter.

Earl Grey's visit to Newfoundland is proving a great success.

A slight earthquake shock was felt at Colon on Saturday.

## Cure of Appendicitis.

A Berlin despatch says: The Appendicitis Conference resumed its sessions on Thursday. The most eminent surgeons and gynaecologists concurred in stating that the only remedy is an operation, and that it should be performed as soon as possible, that is, within 48 hours of the appearance of the disease. When temporarily cured without an operation a relapse is extremely probable.

## CRAZED DOUGS IN JAIL.

Peter Verigen Asked That They be Arrested.

A Regina despatch says: Sixteen crazed Doukhobors who have been on a fanatical pilgrimage to Yorkton, and who have been committed to jail for disturbing the peace, arrived here on Wednesday to enter on their term of incarceration. Warrants for their arrest were made at the request of Peter Verigen, their leader.

## DROWNED IN MUSKOKA.

Iranford Woman While Bathing Got Beyond Depth.

A despatch from Beaumaris says: A drowning accident occurred at Keeweenaw Island, Muskoka Lake, on Thursday afternoon. While bathing, Mrs. H. K. Smith, of Brantford, Ont., floated on a log a few feet over her depth, and, on trying to regain the shore, was drowned. The body was recovered. Mrs. Smith leaves a husband and five small children.

## PREFER MONEY TO LAND.

The Claims of Veterans of '66 Now Total \$10,000.

A Toronto despatch says: Since the passing of the Act last year by the Provincial Government giving veterans of '66 and '70 and the South African War their choice of 160 acres of land in New Ontario or \$50 in cash, the number of applicants proving their claims and asking for the money has now totalled the amount of the claims to over \$10,000. More veterans are anxious for the cold cash than they are for the land.

## A VAST ESTATE.

Woman Owns Over a Million Acres of Land.

A Kingsville, Texas, despatch says: Mrs. H. M. King has purchased the Laurelos ranch, embracing 170,000 acres, the consideration being \$1,000,000. The purchase of this ranch makes Mrs. King the owner of 1,250,000 acres, practically in one body. This cattle queen's domain is now nearly twice the area of Rhode Island and nearly as large as Delaware.

## PREPARE FOR HARVESTERS.

C.P.R. Making Arrangements to Handle Army Needed.

A despatch from Montreal says: Great preparations are being made by the Canadian Pacific Railway for the handling of an immense crowd of men and women who are wanted in the Canadian Northwest for work during the coming harvest days. It is estimated that at least 25,000 men and women will be wanted for the harvesting. That is the present estimate, but it is thought by many that it will be even greater.

## CONDUCTORS MEET DEATH.

Two Killed in Montreal While Collecting Fares.

A Montreal despatch says: A St. German and V. Hindan, two street car conductors, were killed on Sunday night. They were collecting fares on the cars in different parts of the city. One was killed by a pole, and the other fell off the car and was killed.

do the linen coats which must have the help of a flutiron after every day's service if the wearer sits rather than walks.

Where a coat has a finishing touch of velvet, the skirt frequently has a corresponding touch in a binding of velvet that shows as a tiny cord at the bottom. Women have found that the soil of these light linen suits is usually just at the bottom of the hem, and if they be properly protected, double service may be gotten from the suit without laundering. A specially prepared velvetene binding may be had for this purpose, its edges finished so that it may be whipped on like a braid. Where the collar and cuffs of the coat are of brown velvet, which, by the way, is the very smartest thing at the present moment, the skirt is finished with

## A BROWN BINDING.

The pony coat style holds favor in linens as elsewhere, and is really excellent in this fabric. Braiding, classed as embroidery, is sometimes made a feature of these pony coat suits, and is especially adapted to them since it gives to them a semi-military effect that is really a part and parcel of every true pony coat. Braiding or embroidery on the coat of a linen suit invariably calls for a corresponding trimming on the skirt, a rule quite different from that usually followed in cloth suits. Even where a very long coat is chosen, long enough almost to cover the skirt, we find the skirt elaborately embroidered. Eyelet work cannot claim quite so high a place as the season advances. In the best models, where we see it used, it is combined with over and over embroideries. Bowknots and empire wreaths and diamond-shape medallions are used to excellent effect on the white linens.

In the matter of colors, white leads this season, with the natural linens high style. A late comer in the field is a buff or heavier colored linen, these two shades not being at all alike in reality, and yet very closely allied in the shades the tailors are showing.

Linen suits may be happily worn with hats of almost any and every description. Some of the plainer tailored sorts are accompanied by plain, rough straw sailors, but the embroidered suits permit of chapeaus with fluffy plumes and flower gardens of decoration.

The lingerie parasol is appropriate with the linen suit, but here again we note a midseason departure, that is, the use of smart, plain silk parasols in a favored color as the finishing touch of the linen costume. Bright green, light brown, scarlet, deep lavender, a bright French blue are considered very smart. In every instance the color of the parasol must be repeated in some other note of the costume, in the hat trimming or in the belt, and in some instances, as in brown, in the shoes.

## SUBMARINE SOUNDER.

Sounds Distinguishable at a Distance of Seven Miles.

A despatch from Paris says: Experiments with the submarine sounder were tried on Wednesday for the first time in France by the tug Wilkommen, which went out to meet the steamship Kaiser Wilhelm II., which was also equipped with the sounding apparatus. This steamship distinguished the sound when seven miles distant from the Wilkommen. It is said that other vessels not specially equipped distinguished the sounds at a distance of from two to three miles.

## MELTED CHURCH BELLS.

Havoc by Lightning and Cloudburst in France.

A Chambéry, Department of Savoie, France, despatch says: A cloudburst, accompanied by lightning, on Wednesday, destroyed the Church of Les Chevalannes, about 35 miles from here, melting the church bells in to a solid mass, injuring a number of persons, and causing an enormous amount of damage along the Franco-Italian border. Railway traffic by way of Mont Cenis is interrupted.

## A NATIONAL NECESSITY.

The growing interdependence of the Province of this Dominion must be apparent to all. The product of one is a necessity for another. Not alone are the eyes of the Eastern Provinces, but those of every country in the world, directed to the almost phenomenal wheat producing qualities of Manitoba, Saskatchewan and Alberta. Every hamlet concession and side line in Ontario has contributed to the settlement of these fertile western Provinces. The crops, according to the Governmental reports for the season, if safely harvested and garnered, will far surpass previous years in quality and quantity.

It is estimated 20,000 farm laborers will be required from the older provinces in assisting in the harvest of their wealth. The sons of the West are now urgently appealing to the parental and patriotic instincts of the farmers of the East to send every strong, able-bodied man they can to aid them in this work of national importance.

The Canadian Pacific Railway has made the wonderful growth of the West possible. In the saving of the wheat and other crops, the interest of Canada and the Canadian Pacific are identical. The latter is Canada's National Highway. It has announced that on August 14th, 17th and 22nd, it will transport from different territories in the East farm laborers to the Canadian North-West at the nominally low rate of twelve dollars; in fact, this National Highway is offering an inducement to European farm laborers by making an exceptionally low rate over its Atlantic steamship service in connection with its railway lines. It now remains for the Ontario farmer to show his pride in the growth of his nation by co-operating with the Canadian Pacific in sending every available able-bodied man he can to the West.

### Royal Hotel Block.

F. S. Scott's shop strictly up-to-date in every respect. A call solicited.

### For Gasoline Stoves and Engines.

Use only the refined gasoline, kept free from coal oil, containing no sediment to clog the tubes, sold at The Medical Hall, FRED L. HOOPER.

### Clearing Sale.

In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves.

MADOLE & WILSON

The Presbyterian excursion on Napanee's Civic Holiday, Aug. 8th, gives Napanee people a nice opportunity to enjoy the fresh breezes of Lake Ontario. Or your choice to picnic for the day at Bogarts, Glen Island, Allison's or Cressy on the Bay. Ella Ross leaves at 8 o'clock, calling at above ports, and stopping for about four hours at Prinzyer's Grove on the lake. The round trip only costs 35c for adults, and 20c for children.

### THERE'S A DIFFERENCE IN SPICES.

Compare any of "Wallace's Good Spices" with the ordinary kinds sold, you can see a difference even before using them. The flavor of the pickles made with them is very tempting. We are agents for Whittfield's Cider Vinegar and Chemically Pure White Wine Vinegar. (The Kind that Keeps the Pickles.) at The Red Cross Drug Store.—T. B. WALLACE.

### AN ANCIENT TELEGRAPH.

Used by Grecian Generals in the Time of Aristotle.

Telegraphy as a means of conveying information to a distance by means of signals, etc., was used by the Grecian generals in the time of Aristotle. This early mode of telegraphing consisted of two or more earthen vessels, exactly similar in shape and size and filled with water. These vessels were each provided with faucets of exactly the same caliber, so that an equal

best feed mills known to the trade  
A full stock of the best ANTHRACITE  
COAL. Also in the market for the purchase  
of all kinds of Grain.  
Ask for prices at the big Mill before pur-  
chasing your Flour, Feed or Coal.  
NAPANEE,  
16th January, 1906.

CORDWOOD  
FOR SALE.**

Steam Coal and Blacksmith Coal also on  
hand.

**CHAS. STEVENS,**  
1st Office, West Side Market Square

## How Much for your Eyes?

Who would voluntarily part with  
their eyes, or even dispose of them at  
any price?

Very few enjoy perfect vision: with  
the majority one or both eyes are  
defective. Many eyes are ruined by  
inferior or misfitted glasses.

Be careful to whom you entrust  
your precious eyesight.

We give you the highest scientific  
test, and our lenses are the best science  
can produce.

**Smith's Jewellery Store**

**H. E. SMITH,**

agency in Napanee for "Huyler's Chocolate,"  
the finest in America.

The Steamer Varuna brought in an  
excursion from Trenton on Wednesday.

The Shire horses sent by the King  
and Lord Rothschild to the Toronto  
Exhibition arrived safely.

Fly Funn for spraying Cattle.  
Something that is good, small cost,  
only 15c. a quart, at

**BOYLE & SON.**

The moving of the boilers for the  
Electric Light Plant from the station  
to the Power-house this week occasioned  
considerable interest, a goodly  
number of people watching the pro-  
cedure.

E. LOYST has large stock of flour,  
Royal Household and all other grades,  
all kinds of feed, large quantities at  
the lowest prices. He wishes to sell  
out in the next month. Salt, Coal Oil  
Groceries. Highest price for eggs  
cash or trade. A call solicited.

The Street Committee seem to be  
favoring but one ward in the building  
of crossings. Six new cement crossings  
are being built in East Ward and one  
in Centre Ward, but West Ward  
people have to put up with culverts  
turned into crossings and worn out  
wood crossings.

Will put on sale Saturday morning  
August 11th, two cases containing six  
hundred pieces of China, all useful  
articles for household use in endless  
variety direct from the manufactories  
in Europe, and at prices never heard  
of here before for such goods. See  
show window.

**THE COXALL CO.**

Mr. Chas. O'Ray, of Richmond,  
while loading hay on Wednesday  
morning had his wrist badly gashed.  
The rope on the hay fork parted  
and in repairing it the splice was  
made too bulky to go through the  
block with the result that it parted  
again, and the fork in falling grazed  
Mr. O'Ray's forehead and inflicted a  
deep gash in his wrist, necessitating  
medical attendance.

On Friday evening the second of the  
series of Canoe Races was held on the  
river. In the doubles Messrs. Madill  
and Graham won first place, Messrs.  
Scott and Moore, second, and Messrs.  
Carson and Pollard third. In time 33  
minutes. The singles Mr. C. Madill  
won first place and Mr. Carson second  
time 31 minutes. In the tub race  
Stanley Lindsay won first prize, and  
Chas. Ford second prize. There were  
five entries in the tub race, but three  
failed to finish.

The Carbo Magnetic Razor is now in  
200 homes. 200 gentlemen now shave  
with Carbo Magnetic Razors, most  
perfect Razor made. Take one on  
trial.

**BOYLE & SON.**

ladies' Empress Shoes, value \$2.50, for  
best 5 lbs of butter in prints. Butter to  
become the property of the donor.

Special exhibit of vegetables, 2 of each  
kind, grain in straw, 12 heads in sheaf, and  
wild flowers, by boy or girl under 15 years  
old, \$2.50, 2.00, 1.50.

Crown Bank—Silver cup for best single  
turnout owned and driven by farmer in  
County Lennox and Addington.

**Both Parties Pleased.**

Not the political parties this time,  
but the one who makes the cake and  
the one who eats it, because, our Pure  
Extract of Vanilla (made from the  
Vanilla bean and not a chemical pro-  
duct) gives that perfect flavor. Try it.  
The Medical Hall—FRED L. HOOPER.

Kingston, Aug. 1—The twelve Ital-  
ians in jail awaiting trial for rioting  
at the G. T. R. junction on June 28th  
last, have grown tired of confinement  
and want trial at once. They think  
they are being unfairly treated. They  
will appear in the Police Court on Fri-  
day morning when the railway authori-  
ties will be ready to proceed with the  
case. "The charge has been laid against  
Donofrio, "that he did stab with in-  
tent to do bodily harm" and Vincenzo  
Delalla will be charged with shooting  
with intent to kill. The ten remain-  
ing Italians will simply answer the  
charge of rioting.

early mode of telegraphing consisted  
of two or more earthen vessels, ex-  
actly similar in shape and size and fill-  
ed with water. These vessels were  
each provided with faucets of exactly  
the same caliber, so that an equal  
amount of water could be discharged  
from each in a given time.

In these vessels several uprights  
were fixed, each with disks attached,  
on which were certain letters and sen-  
tences. When all was in readiness  
the party desiring to communicate  
with another started a signal, which  
was continued until it was answered  
by another which signified "go ahead."  
When that signal was given both turn-  
ed the faucets, and the water com-  
menced to escape. The water contin-  
ued to flow until the sender of the  
message relighted his torch, when the  
outlet to both was instantly stopped.  
The receiver then read the message on  
the disk which was standing level with  
the water, and if everything had been  
executed with exactness it correspond-  
ed with the message which the sender  
desired to convey, and which of course  
was the one also shown on the disk  
standing on a level with the water in  
his vessel.

**A Canstle Critic.**

A local paper in Hungary published  
an account of the rendering of "King  
Lear" on the stage of a very small  
theater in the town where the paper  
appears. The Hungarian critic began  
his article in this way: "The historians  
of literature are still at daggers drawn  
as to who wrote Shakespeare's pieces—  
Shakespeare or Bacon. After tonight's  
performance of 'King Lear' there can-  
not be a doubt on the matter if any one  
will take the trouble to look into the  
tombs of those two famous men. The  
one who still lies on his back has not  
written 'King Lear,' at any rate, for the  
true author during tonight's perfor-  
mance must certainly have turned in his  
grave."

**Studio.**

"Studio" is one of the many for-  
eign words that have acclimatized  
themselves in the English language.  
It is a recent import from Italy, un-  
known to Johnson's Dictionary and ap-  
parently not occurring before the nine-  
teenth century, but it has supplied a  
want. "Study," which is the real Eng-  
lish for "studio," suggests a room for  
reading and writing, and "workroom"  
lacks distinctiveness. The French get  
along with "atelier," which literally  
means a place in which small planks  
are prepared—in other words, a car-  
penter's workshop.

**The Poppy.**

The poppy throughout the east is an  
emblem of death. In many parts of  
India this flower is planted upon graves  
and in cemeteries. Whether or not the  
idea was suggested by the poisonous  
character of the juice is uncertain. It  
is believed that the poppy was known  
as a funeral plant to the ancient Egyp-  
tians, for upon the tombs opened by  
Belzoni there appeared representations  
of plants which were evidently intend-  
ed for poppies.

**Comforting.**

"Say, Elsie, look around the street  
corner again and see if August isn't  
coming yet."

"No, I don't see him. But don't be  
worried; the people are looking more  
and more like him every minute!"

**Scarcity.**

"One has very few friends in this  
life," said the misanthrope.

"Yes," answered Miss Cayenne. "I  
suppose that is one reason why a  
friend is so likely to be overworked."

**\$16.50**

and Niagara Falls with Miss C. E. Cartwright, who left on Monday to take up her Missionary work in Pakan, Alberta.

Mr. E. R. McBride, Belleville, was in town on Wednesday.

Mrs. Andrew Gould, formerly of this place died suddenly at her home in Michigan last week.

#### Hot Air Heating.

Are you thinking of putting in a furnace this fall. Let us give you prices and do your work now. Do not wait until you feel the pinch of cold and everything is hurry and rush. It will not cost you any more and you will not have to pay any sooner. Satisfaction guaranteed.

MADOLE & WILSON

#### WILTON

Rev. J. Teasdale has returned to London, owing to the illness of Mrs. Teasdale.

Francis Jackson went to Kingston on Tuesday to have an eye doctored, inflammation having set in from getting stone dust in the eye.

Harvey Timmerman is in Watertown, N. Y., undergoing osteopathic treatment for rheumatism.

Misses Nellie Mills and Leita Davy are visiting friends in Portland.

Miss Annie Forsythe is visiting in Enterprize.

Mr. and Mrs. B. B. Shibley, spent Sunday at Thousand Island Park.

Mr. Burdick, Chicago spent last week, at Bucklev Lake's, and Erwell Miller's.

Misses Hettie and Frankie Lake, Kingston, are visiting their many friends in Wilton.

Mr. and Mrs. John F. Fralick, Chicago, are spending a few days at Levi Perry's.

Rev. G. Milligan left Tuesday for a month's visit in his old home, St. John, N. B.

There will be no service in the Presbyterian church next Sunday evening, but the two following Sundays Rev. W. H. Cramm, Cobden, will occupy the pulpit.

Miss S. Parrott, Kingston, is visiting in Wilton.

#### LAPUM.

Our Sunlay school is doing nicely under the regular attendance of our superintendent, W. Love.

There will be service in the school every Wednesday evening.

Cyrus Bush and wife, Thompsonville are spending a week here with friends. Mr. Bush is in poor health: his many friends hope for a speedy recovery.

Mrs. Clara Lapum, and Mrs. B. Rosa were on Tuesday last, guests of Mrs. Stanley Brown.

Born to Mr. and Mrs. Robert Asseltine, a daughter, on July 14th.

Percy Lemmon, Camden East, is spending his holidays here with his uncle, J. Huff.

A number from here attended the baseball match on Saturday, at Yarker.

Mr. Allen our Yarker baker, passes through here twice a week.

Mrs. Jas. Huff, Miss Jessie Huff, and Master Clifford Huff, spent Sunday with Mrs. Lemmon, of Camden East.

Mrs. Levi Brown, and Mrs. Abraham Amey, Camden East, were recent visitors of Mrs. John Simpkins.

Mrs. Michael Love spent Thursday here with her sister, Mrs. J. Huff.

Mrs. F. E. Brown, accompanied by Mrs. Cyrus Bush, Thompsonville, paid a flying visit to Camden East on Monday afternoon.

Visitors: Mr. and Mrs. O. A. Snider, Switzerville, A. H. Bell and daughter Rev. Mrs. Milton Silver, Westbrook, and Mrs. B. Rose: Mrs. James Davison, Odessa, with Mrs. C. Lapum; Mr. and Mrs. Wilbur Love and daughter, Gwendoline and son Courtland, Mr. and Mrs. Pringle and daughter Gladys with Mr. and Mrs. Wm. Love.

Refrigerators and Hammocks

There is a lot of warm weather yet before us and it will pay you to improve this offer.

Agents in Napanee for Shamrock Table Linens.

36 in. Guaranteed Taffeta Silk \$1.00 a Yard.

### The Sunbird.

Very curious are the nests of the sunbird, scarcely larger than a butterfly. It chooses some exposed spot, probably close to the public road, and proceeds to build on an overhanging twig. The finishing touches being put to the small abode, it is left, according to one authority, severely alone until spiders have woven their webs over and around it. Another naturalist says that the birds themselves turn ragmen and, collecting any rubbish they can find in the way of moss, faded leaves, ends of cotton and other such trifles, stick them on the outside of the nest by means of pieces of purloined webs. In either case the result is the same, and they make their future home a thoroughly disreputable object. Then, and not till then, does the little hen sunbird lay her two greenish white eggs, which she hatches under the shelter of a small porch which has been constructed over the nest, shielding her from sun and rain.

### Banana Bread.

Bread made from banana flour is common enough in Europe and England. One pound is said to contain more nourishment and energy producing material than one pound of the finest beefsteak, is much more digestible and less than one-sixth the price. Sir Henry Stanley was a firm believer in the banana. He went so far as to advise that its consumption would cure rheumatism, gout and all liver affections. When lying at the point of death from gastritis a light gruel of banana flour mixed with milk was the only food he could retain and digest. The secret of the banana as a health and strength producing food lies in its high percentage of proteids and the great number of its calories, respectively 20 and 391.71. It is a perfectly balanced ration if sliced for breakfast and served with milk and sugar.

### The Nose.

The nose is intended for breathing, the mouth for speaking and eating. Who has ever seen a horse breathing otherwise than through his nostrils? Minute scientific investigation has revealed the fact that the number of people who breathe through their nostrils are becoming gradually but surely fewer in number. The consequence is that the nostrils decrease in size, while it has been found that the prevailing nose is quite an inferior organ to that of our forefathers. It is a well known physiological fact that unused muscles and bones gradually disappear. Fish who live in the dark, for instance, or the mole, who resides underground, become blind. Thus if we cease to use our noses for breathing they will cease to exist. They will become superfluous!

### Mozart's Quick Work.

On one occasion Mozart was making merry with his friends at midnight when not a single note was written of the overture to "Don Giovanni," which was to be produced on the following evening. When he had said goodby to his friends he calmly went to bed and

36 in. Guaranteed Taffeta Silk \$1.00 a Yard.

## Nick Nack Department

Where you get all kinds of Smallwears, no doubt you know of this Department. Tis here you come when you want something real swell in the way of Belts, Ribbons, Gloves, Hosiery, Collars, Ties, Laces, Embroideries, Pillow Tops and Cords. We also carry Wools, Collar Buttons, Needles, Pins, Buttons, Collar Forms, Etc., Etc. When you want something exclusive, Napanee's Exclusive Dry Goods and Furnishing House is the place to come.

PETER PAN COLLARS AND PINS.

## Housefurnishing Department.

PRINCIPAL DYER, D. D.  
Belleville, Ont.

The steamer Nipigon ran into the gates of Lock 16 in the Welland Canal, and as a result five gates were carried away. Repairs were quickly begun, and it was expected that locking would be resumed at midnight on Tuesday.

The Elite Enamelled Ware. Every piece perfect, will wear four times as long as ordinary Enamelled ware. Fruits done in Elite ware, saves better.

BOYLE & SON

The Third Annual Excursion of the Steamer Aletha to Montreal and Ottawa, affords opportunity to view the Rapids of the St. Lawrence; visit Montreal and Ottawa; and enjoy the beauties of the famed Rideau. All by daylight and within six days. For particulars see page 8.

A few good Hammocks left, at a bargain, don't wait.  
At BOYLE & SON,

ing merry with his friends at midnight when not a single note was written of the overture to "Don Giovanni," which was to be produced on the following evening. When he had said goodby to his friends he calmly went to bed and slept until 5 o'clock in the morning. Awaking refreshed, he set to work on the overture, dashing off sheet after sheet with incredible rapidity and dispatching them to the copyists. The opera was to begin at 7 in the evening, and a few minutes after that hour Mozart was in his place as conductor, baton in hand, while the parts with the ink still wet on some of them were being handed to the orchestra.

### A Wonderful Island of Chalk.

The English Island of Thanet, forming a part of the county of Kent, is almost wholly composed of chalk. The island is ten miles in length and about five in breadth and has more chalk exposed on its surface than has any other spot of equal area on the globe. British geologists say that there are not less than 42,000,000,000 tons of chalk "in sight" on Thanet and that it would take 10,000 men and 5,000 horses and carts 20,000 years to move it, providing it were dug up ready to be carted away.

### A Peculiar Tree.

A singular maple tree on the left bank of the Oder, in Germany, is at least a century old and has been twisted and cut into a kind of circular house of two stories. A firm, leafy floor has been formed by causing the branches to become gradually woven together. Above this is a smaller second floor, similarly formed, and the ends of the branches have been woven into solid walls, in which eight windows on each story have been cut.

### Catholic Priests and Marriage.

Marriage by the clergy was first positively forbidden in the year 1074 by Pope Gregory VII. The controversy, however, which had been going on for centuries on that subject was not altogether settled by Gregory's decree. The council of Trent in 1563 was the ecclesiastical body which formally prohibited priests from forming marriage alliances. That permanently settled the matter.

### The Strenuous Life.

There can be no question that the prevalence of certain diseases has increased during the last half century. Conspicuous among these are diabetes and insomnia, both of which are largely due to the mental stress of a harder struggle for existence.—Practitioner.

### Or Complete Lack of It.

Talesman—I wish to be excused from serving on this jury. Judge—What is your reason? Talesman—I'm very absentminded. Judge—Can't excuse you. Absence of mind is the best qualification for a jurymen.

Go on and make errors and fail and get up again. Only go on!—Brackett.

Good orchard, 4 million seedlings. Price below market.

of Canada will be very agreeably surprised when they learn that the dividend of the bank has been increased from 7 to 8 per cent, and that incidentally the payments will in future be made quarterly. The directors on Tuesday met at noon and decided upon the change, and the first dividend on the new basis will be paid for the quarter ending August 31. The banking business in Canada has been exceptionally prosperous of late and it is perhaps unnecessary to recall the fact that the annual statement issued by the Merchants Bank a few weeks ago was the best in the long history of that institution. Up to the year 1888 the Merchants was on an 8 per cent basis, but a drastic reorganization was undertaken, and in 1890 only 7 per cent was paid. The year following the dividend was made 7 per cent, and it has stood at that figure up to to-day, a period of 6 years. The bank in that time has earned from 9.17 to over 13 per cent on its capital stock. To-day's announcement is an important one, for the Merchants is the third largest bank in Canada, and the biggest bank that has so far made a change in its dividend rate.

## Oddfellows' Excursion to Ottawa

on Wednesday, Aug. 8th, Civic Holiday.  
Special train both ways. Fare \$2.00.  
Tickets good to return until following day, 9th.

### THE SCHOOL FOR THE BLIND AT BRANTFORD.

To the Editor of The Express.

Dear Sir:—I ask your assistance to enable me to get into communication with the parents or guardians of all the blind children in Ontario, under the age of twenty-one years. The Institution for the Education and Instruction of the Blind, maintained by the Ontario Legislature, admits as pupils "all blind youths, of both sexes, between the ages of seven and twenty-one, not being deficient in intellect, and free from disease or physical infirmity, being residents of the Province of Ontario. It is not necessary that the applicant shall be totally blind; the test is inability to "read ordinary type and attend a school for the seeing without serious injury to the sight." The initial difficulty is to locate the children who are eligible for admission and it will be helpful in the future if your readers will send me the names and addresses of blind children under seven as well as those between seven and twenty-one.

Should you favor me by the publication of this letter, I would ask your readers not to depend upon the parents of the children with defective sight to attend to this matter. If all could witness the gain in health, happiness, knowledge and self-reliance that comes to those who, deprived by their affliction of access to the public schools take advantage of the educational facilities afforded by this Institution, none would grudge the time and trouble required to widen the scope of the school's influence. Send me the names and addresses, and I will by correspondence or visitation do the best.

H. F. GARDINER,  
Principal O. I. B.

Brantford, July 20th, 1906.

Winnipeg, July 24. (Special).—Large deposits of paint have been discovered on the shores of Houghton Lake, near Vonda, Sask. The colors are yellow, vermilion and slate, and the supply is inexhaustible. Settlers are using it to paint buildings in the vicinity. Salt and mica deposits have also been located there.

To make a tough piece of steak tender, put three tablespoonfuls of salad oil and one tablespoonful of vinegar on a large flat dish. Lay the steak on the mixture, and let it rest in this way for half an hour. Then turn it over and let it rest another half hour in the same quantity of vinegar and oil. It is said that the toughest steak will yield to this treatment and be tender when served.

The Ogilvie Milling Company issue a statement, credited to one of their superintendents, that in some sections of Manitoba the wheat has been badly damaged by the excessively warm spell. Other sections suffered from excessive rain. They predict a smaller yield per acre than last year. There are also reports of rust in several sections.

### MARYSVILLE.

Miss Katie Currie accompanied by Mr. and Mrs. Burleigh and little daughter Nora, of Winnipeg, are spending a few weeks with Mrs. Currie, 2nd Concession.

Mr. and Mrs. Cummings and little Marie, Toronto spent part of last week visiting Edmund McNeill.

James O'Neill, Belleville, spent Sunday with his brother John Fahey.

Delbert Palmotzer of the O. B. C., Belleville, spent Sunday with Frank Meagher.

Miss Nora Shevlin, Peterboro, is visiting her grandmother, Mrs. Shevlin.

Misses Hene and Vera Slavin, Deseronto, are guests of Mrs. Alexander Anderson this week.

Miss Kate Shea is visiting her brother, Daniel Shea, who is on the sick list, at his home in Deseronto.

Hughson Ashley and Mrs. Bowen, Belleville, were quietly married in Belleville, last week.

Mr. and Mrs. James Buckley are rejoicing over the arrival of a son.

The world is full of people who are in constant misery from the racking pains of rheumatism, neuralgia, lumbago and kindred diseases. They would give any money to get relief, but having tried various remedies and been disappointed they have become discouraged and sceptical of all remedies. Does this describe your case? If it does, let us tell you that there is a cure for your trouble, a remedy that will not disappoint you. It is Tuck's Rheumatic Bone Oil. It never disappoints. As it's name implies it goes straight to the bone, or joint, the seat of the disease, scatters the poisonous acid, relaxes the stiffened joints, allays the inflammation and effects a sure and speedy cure. It gives comfort where there was misery, a fact for which we have hundreds of letters from those who have been sufferers. This oil is for external and internal use and while it is a great and never failing remedy for rheumatism, lumbago, etc., it is also good for other kinds of inflammation such as croup, bronchitis and quinsy. It is the most remarkable remedy of the age and should be in every home. Sold by all medicine dealers at 50c a bottle or sent by mail, prepaid by The Tuck Bone Oil Co., Limited, Smith's Falls. Money refunded if not satisfied.

"It's Good" if you get it at Wallace's—Napanee's Leading Drug Store.

E. F. HOOPER, General Manager.

### MCINTYRE'S CORNERS.

Berry picking is the order of the day.

Mr. Thomas Prest spent Saturday last at Harrowsmith.

Mrs. Wm. Smith has returned home after spending three weeks with relatives, at McLean, accompanied by her granddaughter Miss Frances Foster.

Mr. and Mrs. R. G. Miller are at his father's, Wm. Miller.

Mrs. Elmer Sharp and family and Miss Maggie Baker, Mill Haven, were at E. R. Sharp's last week.

Mr. and Mrs. Harry Rayworth, and Mr. and Mrs. Robert Grange are visiting at W. P. Sharpe's.

Mr. Madden and family spent Sunday last at David Aylesworth's. They came in their automobile.

Mr. A. Hagerman and family are at his brother's, Edward Hagerman, Fellows.

Miss Buck, of Sydenham is visiting friends here.

Miss Nancy Aylsworth has returned home after spending three months with Miss Lizzie Thomas.

Mr. and Mrs. Arthur Huffman and daughter Zelma, with her brother Harry Rayworth, on Sunday.

Mr. and Mrs. Edward Smith at S. Bond's, Odessa, on Sunday.

Miss Grace Sharp has returned home after visiting friends at Odessa, last week.

Mr. and Mrs. Elmer Sharp and son Arthur and daughter Laura, Mill Haven, at E. Snider's on Sunday.

Mr. John Dawson and sister Ella, spent Sunday with their parent's, Fellows.

Mr. Thomas Prest is on the sick list. Mr. John Lemmon is stopping with Miss Lizzie Thomas.

### 1000 Per Cent Interest.

Is nothing compared to the preservation of one's eyesight. If your vision is at all impaired, do not neglect it. It will cost you nothing to have your eyes tested in the most scientific manner by a fully qualified optician at The Medical Hall—FRED L. HOOPER.

**FINE FARM FOR SALE**—John M. Hawley offers for sale, his farm of 200 acres, situated at Hawley, 2nd concession, South Fredericksburgh. This is one of the very best farms in the county, well drained and fenced, and free from foul seed. 100 acres under good cultivation, 10 acres woodland, 30 acres new land ready to stump. Good orchard, 4 splendid wells. Fine brick residence, lawn and shade trees. 2 large barns, tenant house, new poultry house, hog house, etc. Very convenient to church, school, post office and blacksmith shop, 8 miles from Napanee, 4 miles from Bath, and 3 miles from station. For further particulars enquire of  
30-4m JOHN M. HAWLEY.

### FOR SALE.

That desirable farm known as the Blanchard Farm, situated about one mile south of Napanee containing 210 acres more or less. Will be sold as a whole or in two parts (1) The north part with the buildings containing 140 acres more or less, and (2) the south part containing 70 acres more or less, on which there is a good barn.  
For terms and further information apply to M. C. BOGAERT, Real Estate Agent, Napanee, Ont. 42-3-in

### HOUSE AND LOT FOR SALE.—House

and lot for sale on Centre Street in Napanee, opposite Mr. John Hamblin's. A good brick house with all the modern improvements. Fine bath room, electric light, a new furnace and a new verandah. On the property is a large building, built for a tea house, or store house, which cost \$600 to build. The owner, Mr. Hamblin, has decided to move to Providence, the reason for disposing of this property. On her return from Sharbot Lake about the 16th of July, she will be pleased to show the property to any intending purchaser, and will give possession on the 1st of September.

For further particulars apply to  
2nd H. WARNER,  
Napanee.

Napanee, June 29th, 1906.

**SEALED TENDERS** addressed to the undersigned, and endorsed "Tender for Supplying Coal for the Dominion Buildings," will be received at this office until Thursday, August 16, 1906, inclusively, for the supply of Coal for the Public Buildings throughout the Dominion. Combined specification and form of tender can be obtained on application at this office.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures. Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent of amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order  
FRED GELINAS, Secretary.

Department of Public Works,  
Ottawa, July 5, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

## THE CROWN BANK OF CANADA

Head Office, Toronto.

Authorized Capital \$2,000,000.

President, Edward Gurney; General Manager, G. de C. O'Grady.

To accommodate the people of Napanee and district, The Crown Bank of Canada will be open **SATURDAY EVENINGS** from 7 to 9.

# HOME.

## TESTED RECIPES.

**Bearnaise Sauce.**—Beat the yolks of two eggs very light, put into a round-bottomed saucepan, and set in one of boiling water; stir into it, a few drops at a time, three tablespoonfuls of salad oil, heating as you stir; then, as gradually, the same quantity of boiling water; next, one tablespoonful of lemon juice, a dash of cayenne and salt. It is served with all sorts of fish, also with chops, cutlets, and steaks.

**Molasses Vinegar.**—One pint of New Orleans molasses stirred into a quart of rain water. Tie mosquito netting over the open crock (earthenware) containing the mixture to exclude dust and set in a warm closet by night, in a sunny window by day. It should be sour in a fortnight. Strain and bottle.

**New Potatoes.**—If very young, rub the skin off with a rough towel. If almost ripe, scrape with a blunt knife. Lay in cold water an hour, cover with cold water slightly salted, boil half an hour. Drain, salt and dry for 2 or 3 minutes. Send to the table plain. Or you may crack each by pressing lightly upon it with the back of a wooden spoon; lay them in a deep dish and pour over them a cup of cream or new milk, heated to a boil, in which a great spoonful of butter has been dissolved.

**Old Colonial Mead.**—This delicious old-fashioned beverage has the advantage of many others in that it may be prepared in quantities and be always on hand. If you have not dried and prepared your own sassafras roots, they may be purchased from the druggist. Scrape and cover with 2 quarts of boiling water five bunches of the roots, adding a generous pinch of cinnamon and grated nutmeg. Cover closely and simmer or boil slowly for an hour. Strain through the cheese-cloth and stir in 3 pints of New Orleans molasses, 1½ pints of strained honey, and 6 whole cloves. Return to the fire and allow to simmer for 10 minutes, again strain, add one heaping teaspoonful of cream of tartar, and when cold seal in air-tight bottles. Serve in tall-stemmed glasses with one tablespoonful of shaved ice, a pinch of baking soda, and one teaspoonful of finely minced candied orange peel. Only fill the glasses two-thirds full, as when stirred the beverage will foam high. Keep the bottled mead in an ice-cold, dark place, so that when needed it may be used immediately without having to undergo a cooling process.

**Fruit Punch with Ginger.**—Mix together in a large bowl one pared and sliced cucumber, two oranges, and three lemons. Sprinkle with one cupful of sugar and half a cupful of the syrup from preserved ginger. Make a sugar and water syrup, boiling it down until quite thick, add one cupful of it to the mixture, and pour in two quarts of ginger ale. In the glass punch-bowl place a block of crystal-clear ice. Pour over it the effervescent punch and serve at once. On top of the punch in the bowl float thin slices of the preserved ginger and candied cherries cut in halves.

**Velvet Milk Sherbet.**—Scald one pint of milk, add one cupful of sugar, and stir until dissolved; set away to cool. Pack the freezer and pour the milk into the can and let stand until ice-cold—say 5 minutes—then add the strained juice of 3 lemons. Turn the handle until the sherbet is quite thick, then add the whites of two eggs whipped stiff and dry with a cupful of powdered sugar. Stir into the freezing mixture, repack, and set away for two hours to ripen. The sherbet is a delicious "coolness" to serve to callers on a warm afternoon with the accompaniment of a slice of angel cake, the top

adults we recommend the application of kerosene or ammonia just on the spot where the sting was sent in. Those in good health need never fear the sting of either wasps or bees, for the nasty sharp stab can be alleviated by either of these remedies in a short time.

**Remedy for Damp Walls.**—Dissolve six ounces of mottled soap in two quarts of water. Carefully lay this composition over the brick-work with a large flat brush. This must not lather on the surface. Leave for twenty-four hours to settle. Mix a quarter of a pound of alum with two gallons of water, allow it twenty-four hours to settle, then apply it in the same manner over the soap mixture. This process should be carried out in dry weather. Before applying the permanent wall-paper, cover the damp patch with some brown paper and let it dry for a couple of days.

## NOT TO BE TAKEN WITH SALT.

Salt used in sweeping carpets will keep out moths.

Added to a bucket of water salt aids as a fire extinguisher.

Salt and vinegar will remove stains from discolored tea-cups.

A teaspoonful of salt in the lamp causes kerosene oil to give a brighter light.

Salt in the oven under baking-tins will prevent their scorching on the bottom.

Salt thrown on soot which has fallen on the carpet will prevent it making a stain.

New calicoes soaked in a strong solution of salt and water for an hour will retain their colors better.

## PACKING DON'TS.

Don't pack clothes in a trunk which has not been used for some time without airing the latter; it may have been lying in a damp corner. Don't start packing before you have collected together all the things required, else you may, at the last moment, be obliged to squeeze some heavy article in the top of the trunk, and thus crush lighter articles. Don't forget that a dress bodice or blouse must have the sleeves stuffed with soft paper, and any crushable trimmings, such as lace or chiffon should be stuffed out with rolled-up tissue-paper; otherwise all the freshness will be gone when brought to light again.

## PERSONAL POINTERS.

### Interesting Gossip About Some Well-known People.

The Queen of Norway has a great fondness for the mandolin, which she plays exceedingly well.

La Belle Otero, the famous Continental dancer, who has several times delighted London audiences, takes no chances of loss through the twisting of an ankle as she executes her graceful but difficult pirouettes, each of her feet, it is said, being insured for \$10,000.

Lord Allerton is a vast employer of labor. He learned employment by first being an employe himself. Born at Otley, in Yorkshire, he left the nursery for his father's tannery in Leeds. Roused at 6 a.m. by the tannery bell, the boy went into the yard, worked up to half-past eight, then, after breakfast, walked some distance to school.

Mrs. Philip Snowden, wife and secretary of the Labor member for Blackburn, England, is almost as eloquent a speaker as her husband, whose passionate zeal for progressive democracy she fully shares. Mrs. Snowden is already a familiar figure in the Lobby, where day by day she may be seen in watchful attendance upon her husband. Mr. Snowden is badly crippled and is both nervously and physically delicate, and his wife seems to live to see that his fiery spirit does not wear out his frail body.

Miss Bertha Krupp daughter of the

# FOR GERMANY'S SAFETY

## HER DEPENDENCE ON IMPORTS DEMANDS POWER AT SEA.

### Success of Her Policy Dependent on Force, Which She Must Be Able to Apply.

An Englishman resident in Germany contributes to the Pall Mall Gazette an interesting exposition of the German weltpolitik by a Government official of high standing, who is a prominent figure in the Pan-Germanic propaganda and an ardent supporter of the Kaiser's naval scheme. He says:

"It is not the instinct of aggression, but stern necessity which is forcing us to become a sea power. More than a quarter of our people are already being fed on imported cereals. Quite one-third of our raw foodstuffs comes from abroad. About 75 per cent. of our foreign trade is borne on the sea. If our coast were blockaded we should, however powerful our army, be forced into submission because millions of our people could be driven to starvation. It is not too much to admit that in case of a stoppage of the Atlantic export trade in raw products from the United States German industries would fall to the ground like a house built of cards."

"It is our recognition of the utter dependence of German industry and even the vitality of the body politic upon the volume of our imports which has revolutionized the German policy and forced upon us the construction of a great navy, the second impulse being the

### ACQUIREMENT OF COLONIES.

and a desire to expand across the seas on economic and political lines. If Germany cannot obtain either by commercial treaty or political power some great territory in reserve for the growing population from which she can satisfy the need of products grown in temperate and tropical zones then she must artificially check the population and lower the standard of living or resume her former humble place in the concert of Powers. Can you believe this will content us Germans of the twentieth century?

"The future is brimful of danger to German progress. Stretching over the whole of northern Asia we see the great Russian Empire barring the entry of German goods, the self-sufficient American continent, with unlimited economic possibilities threatening the European market, and finally the confirmation of Chamberlainism in the self-contained British Empire in taxing all foreign trade and in effective occupation of one-fifth of the entire surface of the globe. So long as Germany can sell her industrial products to those States from which she receives such products in the raw she can thrive upon her rivals, but what is to become of her should Russian and American industry be directed to satisfy the home market entirely, while a British Imperial Customs Union shuts out her exports?"

"It is because she is ever looking ahead that Germany is directing her energies to develop her trade in those parts where the greatest increase of trade has been recently taking place, primarily

### CENTRAL AND SOUTH AMERICA

and such Asian and African empires as are still independent and the Balkans, and secondarily in the colonies of those Powers that have not shut us out by tariffs. All this demands maritime power, for if we are not strong enough at sea to keep open the corn trade routes, or even in certain circumstances to put pressure upon corn exporting countries, our national existence will be threatened.

"In spite of the radical Socialist fanatics the ultimate success of our commercial policy is dependent upon force and this force we mean to be in a position to exercise whenever our interests demand it. Our future welfare must depend on our ability to obtain a firm hold on additional territory or to prevent territory being appropriated by

# FAMOUS FOR WEDDINGS

## ROMANCES OF OLD ST. GEORGE'S IN LONDON.

### Notorious Lady Hamilton — Gladstone's Signature Frequent — Stories From the Records.

Many romantic stories centre around past ceremonies in the famous parish church of St. George's, Hanover Square, says the London Daily Mail.

The first wedding in the registers at St. George's is recorded simply, in brown ink, now barely decipherable: "April 30, 1725, David Williams and Sarah Thomas, both of this parish." Commoners led the way for peers and embryo Presidents, for Mr. Roosevelt went there to be married the second time in 1886. There, true enough, is his tilted, rough-looking signature, "Theodore Roosevelt," and below that of his wife, Edith Kermit Carow. He is described as a ranchman, of Brown's Hotel, and a widower. In all the many thousand entries it is the only one with the description "ranchman."

Back a century in the registers there is the record, on Sept. 6, 1791, of the marriage of Sir William Hamilton to the well known "Emma, Lady Hamilton," whom later Nelson loved so truly and Romney painted beautifully in a hundred poses. Disraeli married there the lady who proved such a practical helpmate. On April 18, 1839, is the marriage of the Marquis of Douro, son of the Duke of Wellington. The witnesses are the Duke and his two brothers. On March 8, 1869, appears the written evidence in her own hand of the bigamy of the Duchess of Kingston. Her husband was alive when she signed the register at St. George's as a spinster. Seven years after she was convicted.

On May 6, 1880, "George Eliot," the novelist, came to her wedding with John Walter Cross. "The plainest bride," says Mr. Maisey, who has seen 7,200 married during his 29 years at the church, "I ever saw." The signature of Mr. Gladstone is very frequent. The most memorable occasion was that of the marriage of Mr. Asquith and Miss Tennant, whom Lord Roseberry and Mr. Balfour signed, too. The names of three Premiers and one potential Premier in a space half an inch high!

### GRANDEST IN DECORATING.

This wedding was the grandest from the point of view of decoration of the church that the oldest parishioner remembers. It was only approached by that of Miss Evelyn Millard, the favorite actress, who walked up the aisle beneath a continuous arching bower of beautiful crimson ramblers. The most popular wedding was the one last month of Lady Mary Hamilton, when thousands of eager would-be guests took possession of the street, while within everything was in perfect order, and the service was listened to with hushed attention. King Edward was there and signed the register. The clerk treasures the pen he used. It is to be an heirloom. Last year Lord Graham's opponent, Mr. H. M. Pearson, stood at the same altar with Lady Beryl Spencer Churcill.

It must not be forgotten in this list of the famous and notable that Signor Marconi, the inventor of wireless telegraphy, and Lady Sarah Wilson, who was shut up in Mafeking, were both married at St. George's. While the only time that Princess Ena of Battenberg, now Queen of Spain, signed the register was on Dec. 7, 1905, at the marriage of Viscount Lewisham and Lady Ruperta Carrington.

The atmosphere of the St. George vestry is brimful of romantic and good stories. I am able to tell a few, but in many, for reasons that will be readily appreciated, the names will be omitted. It was at St. George's on April 30, 1904, that a lady of title married her coachman. After the wedding in the afternoon the verger went to the house with the marriage certificate. He asked for the bridegroom. "You'll find him round at the back," was the reply: The mystified messenger went to the mews

sugar. Stir into the freezing mixture, repack, and set away for two hours to ripen. The sherbet is a delicious "coolness" to serve to callers on a warm afternoon with the accompaniment of a piece of angel cake, the top frosted with a sprinkling of chopped nuts mixed in.

**Rice Soup.**—Put half a cup of rice over the fire with a quart or more of cold water; let heat quickly to the boiling point, then drain and rinse in cold water. Add the rice to two and one-half quarts of chicken or veal broth seasoned with an onion, a carrot, and a "soup bag." Let cook until the rice is tender, then pass the whole through a very fine sieve. Reheat, add one teaspoon of salt three dashes of pepper, a pint of hot milk (cream is better), and, little by little, stir in two tablespoons of butter. Take a small quantity of the cooked asparagus which is to be served in the vegetable course and add the tips to the soup. This quantity of soup will serve eight at dinner or luncheon, and is one of Mrs. Hill's fine recipes.

**New Beet and Bermuda Onion Salad.**—Slice, crosswise, two peeled Bermuda onions as thin as possible; sprinkle lightly with salt (a teaspoon of salt to two moderate-sized onions) and pour over a little vinegar. Let stand in a cold place about an hour. Cook three red beets until tender, plunge them in cold water to remove the skins (by rubbing the skins will slip off readily), then cut beets in thin slices and the slices in narrow strips. When cold put the beets into a bowl with the drained onions, sprinkle with a saltspoon of salt and three dashes of paprika, and pour over four or five teaspoons of oil. Toss and mix thoroughly, adding more oil if necessary to coat the whole. Then add about two tablespoons of vinegar, and mix again. Serve on a bed of lettuce leaves carefully washed and dried.

#### HINTS FOR THE HOME.

**For Soups.**—Cut cucumbers in thin slices, fry it, and add to the soup in the tureen.

When cooking a leg of mutton the introduction of a clove of garlic will be found a great improvement by those who like savoury dishes.

Meat that has begun to turn may be quite restored by washing it in water in which a teaspoonful of borax has been dissolved, having at first cut away every part the least bit tainted or discolored.

Carpets should be beaten on the wrong side first and afterwards more gently on the right. Never put down a carpet on a damp floor, for this often results in the carpet becoming moth-eaten.

Chowder is more easily digested when cooked that when eaten uncooked. If grated and added to melted butter it makes an excellent sauce to be served with macaroni, vegetables, or boiled fish.

To eradicate weeds of all sorts take of sulphur one pound, ditto of lime, and dissolve in two gallons of water. Pour this liquid on the weeds and it will destroy them.

**How to Color Lace Curtains.**—When the curtains are nicely washed, rinse in cold water and squeeze perfectly dry. Plunge into water that has been tinged with coffee. For this purpose the coffee must be strained through double muslin.

For split seams on mackintosh use this cement. Dissolve some fine shreds of pure indiarubber in naphtha or sulphide of carbon, to form a stiff paste. Apply a little of the cement to each edge that is to be joined, bring the edges together, and place a weight over them till they are hard.

**Wasp Stings.**—The ordinary old-fashioned remedy of the blue bag is not to be recommended, for the blue bag has probably been lying about in the dust and become microbe laden, etc. For tender skin we advise the use of a little carbonate of soda made into a paste with cold water and then the wound bound over with soft lint. For

snowden is badly crippled and is both nervously and physically delicate, and his wife seems to live to see that his fiery spirit does not wear out his frail body.

Miss Bertha Krupp daughter of the great gun-maker, is known as "Queen Krupp" all round Essen, where she lives. The title is not ill-bestowed, for in that town alone she has 40,000 workmen toiling for her. Besides this, she owns gasworks, railways, telegraphs, telephones, bakeries, and general stores. She has also specially selected men, 900 in number, who are as much a body of trained troops as any in Germany. All these are well armed, and in addition to the sentinels who march up and down the terrace of her castle, there are pickets throughout the grounds.

Mr. Edison is a lover of a good practical joke. When the phonograph was but newly invented the great scientist placed one in the bedroom of a guest. Just as his friend was unrobing a voice exclaimed, "Eleven o'clock—one hour more." Slumber did not descend upon the eyelids of the visitor during that hour. At midnight a second voice cried, "Twelve o'clock—prepare to die." This was too much for the astonished guest, who rushed from his room. Outside he met the inventor, who was convulsed with laughter. The mystery was soon explained, and peace restored.

Lord Rayleigh, who is Mr. Balfour's brother-in-law, is one of the most scientific peers of the day, was Senior Wrangler and Professor of Experimental Physics at Cambridge, is a Professor of Natural Philosophy, and has been for the past ten years scientific adviser to Trinity House, before which he was secretary to the Royal Society. He is also one of the little band of peers who have gone into trade and has practically converted his estate, Terling Place, near Witham, in Essex, into a huge dairy farm, from which he supplies the three shops which he runs in London, under the name of Lord Rayleigh's Dairies.

Lord Halsbury was not always the ready, confident speaker he is to-day. Just on thirty years ago he stood at the Bar of the House of Commons, the newly-elected member for Launceston, in a painful condition of nervous embarrassment. He had been sworn in, but he could not find the writ. Flushing redly, he feverishly ransacked pocket after pocket, turning out their contents on the table of the House, to the exquisite amusement of those within the arena. The exhibits included, according to contemporary stories, a crumpled ham sandwich, a boot-lace, two collar-studs, and a ten-bladed knife. Fortunately the last pocket disclosed the missing parchment, and the elect of Launceston passed hurriedly to his seat.

Sir William Bull one morning recently boarded a London tramway car, but when the conductor came for the fare he found he had no money. The conductor politely offered to pay it for him, and also said if Sir William wanted any more he would be pleased to lend him some. But Sir William only wanted his fare paid. Next morning the conductor was agreeably surprised to receive a silver match-box as a gift from Sir William, and his card with this inscription: "To a courteous gentleman, who not only lent Sir William Bull a penny, but offered to lend him as much more as he wanted." On the reverse side was: "A friend in need is a friend indeed. Receipt for one penny kindly lent without security."

#### MISSING LONDONERS.

No fewer than 20,000 persons are reported missing in London every year. Only about one-fifth of these missing persons are ever accounted for. The others disappear from friends for ever. Many of them are "wanted" by the police, which explains why they do not reappear. Numbers of them leave London.

and this force we mean to be in a position to exercise whenever our interests demand it. Our future welfare must depend on our ability to obtain a firm hold on additional territory or to prevent territory being appropriated by more powerful countries. It was on this basis that we acted in Morocco, but in the great settlement which is to come Germany can only act as a naval power.

In conclusion he affirmed that Germany's life enemies were Great Britain and the United States, Russia and Germany, he said, must be in a position to defy them. In order to do this she must besides procuring some temperate colonies and a navy to keep the trade route open, aim at the establishment of a central European customs union with the Rhine and the Adriatic under German protection.

#### CHAMPION BIGAMIST.

##### Albert Capper Sentenced to Ten Years' Penal Servitude.

England can boast of a bigamist who is the present day champion in the quick marriage line. Albert Capper is his name. He was born in the west of England, and left an orphan when a young child. He was sent to an orphanage, and from there drafted into the local workhouse, where he was taught bootmaking. But he hungered for the outside world and soon made his escape. He enlisted in the army and joined the Royal Welsh Fusiliers. His time was up in 1893 and he left the army unmarried, a good looking man of 25 and with a few pounds in his pocket. He immediately married a young Irish girl, a servant in an officer's house at Aldershot. He had spent all her savings in three months and two weeks of hunger and want satisfied his wife. So she ran away with a man better off in this world's goods.

Capper threatened to be revenged and began revenge on the whole sex. Before the year was out he had married another girl. He lived with her for a year and then disappeared and married another woman with a little money. For a considerable time Capper lived in idleness on his third wife's money, then in turn she was deserted and he married a fourth.

Then each year he kept on the merry marriage game until he had eight wives, all living and distributed all over England. A widow was his downfall. She was very religious, had a snug little home and was good looking. Capper boarded in her house, joined the church and also became very religious. Then the widow married him. He deserted her in five months. Soon after she engaged a new cook. This motherly woman recognized a photograph of Capper on her mistress' mantelpiece. It was the latest wedding group. She sent the photo to her daughter in London, and the daughter recognized Capper as the man she married in London in 1903. The police by circulation-photo system soon tracked the arch-bigamist to a town in North Wales and nabbed him on the eve of his ninth wedding.

When the story got out the deserted wives promptly turned up and were all in court when the Lord Chief Justice sentenced their husband to ten years' penal servitude.

#### AN OUTSIDE OPINION.

A man walked into a grocer's shop and handed to the assistant a paper containing some white powder.

"I say," he asked, "what do you think that is? Just taste it and tell me your opinion."

The grocer then smelled it, then touched it with his tongue.

"Well, I should say that was soda." "That's just what I say," was the triumphant reply. "But my wife said it was rat poison. You might try it again to make sure."

A man isn't necessarily athletic because he jumps at conclusions.

that a lady of title married her coachman. After the wedding in the afternoon the verger went to the house with the marriage certificate. He asked for the bridegroom. "You'll find him round at the back," was the reply: The mystified messenger went to the mews. There he found the unconcerned bridegroom, in livery, as usual, getting all ready to drive his bride out to make some afternoon calls.

Many men labor under an impression that certain ladies of their choice will choose them and be willing, but they do not go to the lengths that one went about fourteen years ago. His choice was Lady D—, the church, St. George's. He called, duly provided with a license, and everything was made ready. On the day he stood at the altar punctually. The organ played to time, too. But the lady did not arrive. Again, a few days later, the same solemn farce was enacted. A third time the wishful bridegroom wanted it to be gone through, but now the church officers were rightly suspicious, and he did not succeed. His license, no doubt, lapsed. There is quite a collection of "misfits"—lapsed licenses and banns completed that never made a marriage. The other day a license lapsed which bore the name of a well-known peer's son.

#### CONFIDENTIAL WEDDING.

There are many "confidential weddings," as they are called, when the ceremony is kept unusually quiet. But sometimes they are too confidential to please the relatives of the parents. The coercion of prospective brides under such circumstances is a proceeding well authenticated in fact and fiction. A kidnapped bridegroom, however, is unusual, though he happened at St. George's not long ago. He was a gentleman of position, and he wished to marry a lady who had nursed him through an illness. There was no cause or just impediment save social rank. The gentleman was determined, and the lady seconded his plans admirably. But the day and the details leaked out, and before the time fixed the bridegroom's male relatives deployed strategically through Maddox Street and surrounded the church. He drove up in aansom cab. With his eyes fixed on the expectant bride he prepared to alight. An athletic uncle and a brother sprang forward, thrust him back with a "Glad to meet you, old fellow," manner that deceived the cabman, who obeyed the quick direction he heard, and drove the three away. The lady with tears in her eyes, went into the vestry. "There will be no wedding," she said. "They've run away with him." And that was the last St. George's heard of them.

The most romantic story of all is that of Miss E. She loved Lord R., but they were parted. Time passed, but her love did not. She promised herself to another. All arrangements were made for the marriage, which was to be at St. Peter's, Eaton Square. Miss E. may have feared the moment, but she showed no sign. The day of the wedding was a Thursday. On Tuesday she met her old love at dinner. He, too, had not forgotten. A solicitor called at the St. George's vestry, and he and another were the sole witnesses at the wedding of the reunited lovers on Wednesday—the day before Miss E. was to have become the wife of the one to whom she had been engaged.

#### UNIFORM TOO TIGHT.

Among the innumerable misadventures with the ring at St. George's, that of a well known society Guardsman who was married in uniform was the most amusing. He had put the ring in his pocket. His uniform was so tight that he could not extract it. He tried till his struggles became too distressing for the nerves of the pew-opener. She disdained her womanly superstitions, slipped off her own ring, which she proffered, and found an acceptable substitute.

Then there was the experience of the bride who came in at the wrong door, the big oak one opposite the vestry, in a line with the altar. Instead of walking up the aisle, she just walked a few yards across the chancel. Never was such a mistake; it seemed such terrible ill-luck. There was no appeasing anyone. The party left blighted, in high

judgdon. The next day the bride's father appeared and demanded an explanation. The clerk had an inspiration. He remembered that the despised door was the Royal entrance. "Your daughter, sir," he said, "is the gainer by our error. She is the only bride who has entered St. George's by the King's door."

The table in the vestry at which many famous signatures are written is a magnificent piece of old oak, a veritable gate table of great size. Till a few years ago it was imperfect, one flap was missing, but this was found in the vaults and added. On it stands one of the finest pieces of inlaid satinwood in London, in the shape of a small Dutch cabinet given by a pious lady named Candine Belfrage in the year 1819, for reasons not stated on the inscribed tablet, and of which there is no hint or sidelight shown even in the marvelous registers.

## EXPLORERS HAVE TO BEG

EXPERIENCES SOME OF THEM HAVE IN RAISING MONEY.

The Task Is Oftentimes Harder Than Facing African Fever or Arctic Cold.

A man who knows many explorers was talking the other day about the discouraging experiences that most of them have in trying to raise funds for their work.

"At last," he said, "Captain Bernier has enough money to fit out his expedition and he has started for the Arctic on the vessel the Canadian Government has placed at his service.

"That man has lived with his Arctic project constantly in his mind for the last eight years. He has talked about it incessantly with any man, group of men or society that would listen to him. He was glad if anybody would promise to give him even \$5 as soon as the necessary sum was pledged.

"Two years ago the promised fund which was to come from hundreds of sources amounted to \$62,000. He needed at least \$13,000 more for a safe financial basis.

"You can't ask a man with any hope of success to put his hand into his pocket for you if you wear a desperate and lugubrious air. You must assume jollity and confidence.

THOUGH YOU HAVE THEM NOT.

"Bernier always laughed and joked with the men who told him he was a crank and a bore. He has a vein of humor that has doubtless helped to add thousands of dollars to his fund.

"A year ago last winter he kept a band of travellers roaring with the tale of his trials and tribulations, and they thought it the best joke of the evening when he told them with much solemnity how implicitly he relied upon them for the last few thousands he needed. It is Bernier's unflinching good humor as well as his enthusiasm and his complete confidence in himself and his plans that has helped him to surmount his financial difficulties.

"His expedition will undoubtedly represent an investment of at least \$125,000, counting in the fine ice ship which the Canadian Government has donated. She is now known as the Arctic, was formerly the Gauss, and was specially built to carry the German expedition to south polar waters.

"Those who saw Peary working almost night and day a year and a half ago to raise funds for his present enterprise realized more than ever before the uncommon stuff that is in the man. He had an assured reputation as one of the greatest of Arctic explorers, and yet the quest for money was about as hopeful as

HUNTING FOR HEN'S TEETH.

## CONSUMPTION IN FRANCE

APPALLING DEATH RATE IN THE CITIES AND TOWNS.

A Proportion of 39 Out of Every Ten Thousand — Laundry Workers and Bakers Suffer Most.

A report just received at the Department of Commerce and Labor from Consular Clerk Augustus E. Ingram, stationed at Paris, contains the statement that 150,000 persons die each year in France from tuberculosis. This represents 39 deaths out of every 10,000 inhabitants. This appalling death roll, it is reported by Mr. Ingram, has led to a critical examination of French vital statistics, and many interesting facts have been brought out showing the basis on which these statistics have been established.

Definite information was received from only 713 cities and towns having a population of more than 5,000 inhabitants, making a total of 12,000,000 inhabitants, among whom the mortality from tuberculosis amounted to 42,000 a year. This has served as a calculation for the rest of the country, and to it are added the deaths from

### CHRONIC BRONCHITIS

(approximately 50,000), making in this way a total of 150,000 deaths from tuberculosis.

Prof. Albert Robin has established from the statistics of 1901, 1902, and 1903 that tuberculosis increases in an almost regular proportion to the density of population. In Paris, for example, the percentage of deaths from tuberculosis is 45.2; in cities of 100,000 to 492,000 population, 34.4 per cent.; in cities of 20,000 to 30,000 inhabitants, 30.8 per cent.; in cities of 5,000 to 10,000, 23.4 per cent., and in cities of 1,000 to 5,000, 20.4 per cent.

The question of the effect of certain occupations on this disease has been carefully investigated in France. It was found that those trades that bring persons into contact with dust are especially dangerous. Enquiries among policemen, postal employees, and laundry workers revealed a disastrous condition of affairs. Among 257 workmen carefully kept under observation, consisting of carpenters, joiners, floor-layers, and packers, all living under practically the same conditions, the mortality from tuberculosis amounted to more than 30 per cent. Laundry workers, however, were found to be the most seriously affected. In some neighborhoods the mortality

### AMONG LAUNDRY WORKERS

from tuberculosis reached the total of 75 per cent. So deadly is the handling of indiscriminate soiled linen that young women succumb after an average of 15 years, while men last from 18 to 22 years.

The Paris bakers, a few years ago, formed an organization for the improvement of the unsanitary conditions under which they have to work. It is asserted authoritatively that despite the Government inspection of bakeries and the modern hygienic apparatus, 440,000 out of 400,000 bakers in Paris, France, suffer with tuberculosis.

The campaign against tuberculosis in France has assumed such national importance that the Academy of Medicine at Paris has during the past three months been discussing the necessity for the compulsory declaration of cases of tuberculosis by the doctors in attendance, but this has met with a storm of opposition, it being contended that thereby the large army of consumptives would be deprived of means of support, since no one would then knowingly employ them.

It has been suggested that school children suffering from this disease should carry a booklet reporting the progress of their physical condition, so that the teacher could separate the unhealthy

# THE SALVATION OF MEN

Let Religion Have Its Rightful Domain Through All the Being.

For now is our salvation nearer than when we believed.—Romans, xiii., 11.

Words are but symbols, and, like coins, if they become current, their sharp impressions are worn away. Theology constantly is in need of re-statement in new terms, suited to the current thought of the people. Its phraseology is apt to become separated from the living stream of language and to acquire stereotyped forms and arbitrary, often unnatural, meanings.

Salvation is a large sounding word; it has stood for a long time for the principal thing which it was supposed religion could give us. Men have listened to the specifications of this great boon as detailed by the authorized religious teachers and often determined they do not want it. You cannot blame a man for refusing something for which he has no possible use.

If salvation simply is an exalted emotional condition, it is a luxury that only poets and women who have a surplus of time and deficit of intelligence can afford. Men and women who face the fact of sin in themselves and sorrow in this world deeply feel that a mere spasm of feeling good will do nothing to make this world good in fact. When in the face of great necessities emotions become substitutes for endeavors, they become

### THE FOES OF MANKIND.

But, say some, salvation simply is a clear, logical, judicial decision, altogether apart from any feeling, by which you who are guilty are pronounced innocent. But it never yet has been shown that a court decree emptying the jails has improved public morals, nor that judicial imputations of rightness have solved the problem of wrongness in men.

Religion must strike deeper than this; man needs not plasters nor paint, nor certificates of health for his moral diseases. He simply needs the making whole and perfect his entire nature. It is the healing of that which is base, degrading, of all that which we hate when we are at our best and the leading of the life out into the fullness of all that which we admire and love when the soul's vision is clearest and noblest.

A man is not saved simply because he changes his opinions or his profession. Disease is not cured by buying a new doctor book. Life is not made healthy, sane, and perfect by the subscription of the name to any code, whether it be of morals or of manners. And the will that is twisted in moral judgments, the heart that is enslaved to a depraved appetite, cannot be made normal and healthy by any forms, ceremonies, or syllogisms.

Neither can the salvation of a man be a matter of local application alone. He is not healthy who boasts a clean, normal hand when all the other members are diseased. You cannot separate the soul from the man and save that while the rest of him takes its own course to destruction.

### LET RELIGION TEACH MEN

the salvation of the mind; it may be as sinful to think unscientifically as it is to speak impiously. If the mind be diseased, depraved; if its life blood be poisoned by evil imaginings, by base desires; if the will be weak, vacillating, tottering, it matters nothing how clean a bill of health the ecclesiastical authorities may give to the soul.

But the life we live and the world we live in demand the salvation of men. This is a world of men. If the soul means anything at all it is but the citadel of the life, the heart of the whole moral being. If it is saved the health, the right adjustments must be working through all. Let salvation mean the whole life; let religion have its rightful domain through all the being and work to set men right in body, to make them know and follow the laws of health, of right living.

Let religion assert its power over the will. Let it lead us the way into the larger life, the whole and perfect and the complete being. This is salvation that we shall overcome the beasts in our bosom, that we shall love and live toward the noblest and the best, that we shall overcome all that hinders man's perfection, that life shall be what its lord designed, the perfectly controlled powers realizing their largest possibilities and harmoniously fulfilling their divine purposes.

HENRI F. COPE.

## THE S. S. LESSON

INTERNATIONAL LESSON.

JULY 29.

Lesson V. Jesus Dines With a Pharisee.

Golden Text: Luke 14. 11.

THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Jesus versus Pharisaism.—In his journey southward toward Jerusalem Jesus was in almost constant conflict with the Pharisees who had long since taken a decidedly hostile attitude toward him and his work in public. Shortly before the events of to-day's lesson he had in strong and unmistakable language arraigned as hypocrites "full of extortion and wickedness" the whole class (compare Luke

act involved the breaking of many petty rules with which the Pharisees, in their interpretation of the law, had hedged about the commandment referring to the Sabbath. Thus rabbinical interpretation of the Sabbath law forbade the tying of a knot in a rope on that day.

6. Could not answer.—This phrase in the original is very strong, being equivalent to "had no power."

7. Apparently the healing of the dropsical man preceded the meal. This now begins, and as the guests settle around the tables Jesus notes a desire on the part of many of them to choose the best places. The words of the subsequent discourse were doubtless spoken as the meal proceeded.

A parable.—Not such in the strict sense, but rather an exhortation in narrative form.

Those that were bidden.—Other Pharisees and lawyers.

8. Marriage feast.—Cited by Jesus as a typical occasion on which the securing of the best and most honorable places would be highly desirable.

Sit not down.—Greek, recline not.

11. Jesus here states a rule, exemplified in everyday life even quite a sharp

get the quest for money was about as hopeful as

#### HUNTING FOR HEN'S TEETH.

"It is very difficult to convince the general public of the utility of polar exploration in spite of the millions of actual wealth that the Arctic has supplied to the world and the great gains that polar research has contributed to nearly every branch of science. Peary had to go ahead with his work, investing his money as fast as he could raise it in his outfit.

"It took indomitable courage and pluck to work all the harder when the financial prospects were blackest; and he way clear through his embarrassment really was not visible to the explorer till a few days before the time he had calmly announced for his sailing.

"Young Mikkelsen, who is now nearing the threshold of the unknown to the north of Behring Strait, is a remarkable example of pluck and unquenchable enthusiasm. He is still under 30, but has already had much Arctic experience.

"He supposed that the prominent men and the scientific society in England had pinned their faith to him had given him all the money he needed, when he landed in the United States last spring and found that the arrangements he had made for getting north were defeated by the imprisonment of the whaling fleet in the icy north of Alaska. It was positively necessary for him to buy a ship, and though a stranger in a strange land, he set about to raise the money.

"All who heard his little speech at the dinner to Nordenskjöld in New York will remember how smilingly and with what significance as

#### HE TOLD OF HIS PLANS.

he ended nearly every sentence with the words, 'That is, I shall try to do this when I get money to buy my hip.'

"Mikkelsen had the advantage of a good reputation, a praiseworthy plan and of pluck and enthusiasm that were really impressive. Some funds were sent from abroad, but four-fifths of the money he required was given to him by Americans. Mikkelsen bought his hip and went on his way rejoicing.

"Most explorers would much rather ace fever and savages in Africa or freezing in the Arctic than ask any man for a cent. But they have to do it, and the very qualities that make them successful beggars are among the actors that make them also men of high achievement in the field of exploration."

dren suffering from this disease should carry a booklet reporting the progress of their physical condition, so that the teacher could separate the unhealthy from the healthy.

#### PAPER HANDKERCHIEFS

have also been proposed for distribution, but their use, French physicians declare, would be undesirable, if not dangerous, unless the handkerchiefs were systematically collected and destroyed. The Minister of Education has recently issued an order that inasmuch as the permanent commission for protection against tuberculosis had learned that recent investigations had shown that in certain countries 60 to 80 per cent. of the cattle were affected with tuberculosis, all milk consumed in boarding schools should be pasteurized, boiled or sterilized.

The Tuberculosis Commission has been examining a cuspidor invented by M. Fournier. It is of cheap construction and needs no clearing or touching by hand. It consists of a cardboard cylinder rendered water-proof, containing some pulverized peat impregnated with some hygroscopic and antiseptic substances. This receptacle is provided with a lid, which rises on pressure of a small hand lever or foot pedal, and thus nothing objectionable is in sight, no dust can come from it and flies cannot enter it.

The French State Department of Public Charities, regarding this struggle against tuberculosis as a national and social duty, is considering the establishment of special hospitals for tuberculosis patients, both in Paris and throughout the country, where such patients can be properly treated and special treatment given them.

#### EULOGY OF GLUE.

What is it that will mend a dish?

Glue.

What is it that will choke a fish?

Glue.

What is it that would make no hit

With you should you sit down on it.

And might cause you to have a fit?

Glue.

What is it that we should not eat?

Glue.

Nor wear in shoes to ease the feet?

Glue.

What is it which, if we should chew,

Would very likely make us blue

And make our loose teeth all skidoo?

Glue.

Lesson he had in strong and unmistakable language arranged as hypocrites "full of extortion and wickedness" the whole class (compare Luke 11, 37-54).

Both the essence of Pharisaism and the attitude of Jesus toward the Pharisees as a class are indicated in his severe arraignment of them in the passage above referred to (compare also Matt. 23, 23, ff.). It was the self-righteousness and utter insincerity and hypocrisy of these men together with the fact that they were the accredited religious leaders of the people—"blind leaders of the blind"—that roused so strongly the indignation of Jesus whose character was the exact opposite of theirs in its every trait.

Verse 1. One of the rulers of the Pharisees—That is a distinguished member of the class, not a ruler in any official sense.

On a Sabbath to eat bread—Sabbath day feasting was common among the Jews. Such entertainments were even regarded as a religious duty. In order to avoid the breaking of the strict Sabbath commandment in connection with this feasting all food, however cooked, was prepared on the previous day, many dishes being ingeniously kept warm for many hours until the time when they were served.

2. There was before him—Probably placed there purposely by the Pharisees, as a thoughtful reading of the next verse suggests.

3. And Jesus answering spake—He recognized at once the trap that had been set for him in bringing this important man into his presence on the Sabbath day.

Is it lawful to heal on the Sabbath?—A technical lawyer's question, which those present would naturally answer in the negative. The emphasis of the sentence should be on the word "lawful."

4. Held their peace—They were not anxious to debate the question with Jesus.

Healed him—Jesus read the man's faith as he had read the hostility of the Pharisees.

5. An ass or an ox—Many ancient authorities read, a son or an ox.

A well—Unprotected cisterns and pits are numerous in Palestine. Of wells in our sense of the word there are very few.

Draw him up—Even the handling of ropes or poles necessary for this simple

or the best and most honorable places would be highly desirable.

Sit not down—Greek, recline not.

11. Jesus here states a rule, exemplified in everyday life even quite apart from things spiritual. As a rule, self-seeking ultimately brings shame, while humility with worth in the end brings honor.

12. Call not thy friend, nor thy brethren, nor thy kinsmen, nor rich neighbors—Of course the words of Jesus here are not to be interpreted as prohibiting under all conditions the exercise of hospitality toward friends and honored acquaintances. It is rather the forgetfulness toward the poor, the maimed, the lame, the blind against which Jesus is warning the hearers. All depends upon the spirit which prompts and guides in the extending of hospitality. An unselfish spirit will remember the unfortunate as well as the favored, the neglected as well as the friend.

14. For thou shalt be recompensed in the resurrection of the just—This recompense in eternity is not emphasized by Jesus merely as a motive for kindness done on earth. The thought is rather that such kindness should be shown without regard to compensation, leaving the question of such, if there be any, for the life after this. Perhaps the specific reference to the "resurrection of the just" may be taken to imply a two-fold resurrection, that of the just preceding that of the unjust. (Comp. 1 Tim. 6, 17-19; 1 Cor. 15, 23; and other passages).

#### TREASURES LOST TO GERMANY

London Dealers Buy One of the Most Famous Collections.

There is something akin to consternation in Berlin art circles at a piece of news that has leaked out, though nothing has as yet appeared about it in the press.

Messrs Duveen Brothers, the London art dealers, have within the last few days bought the entire collection of works of art formed by the late Herr Oscar Hainauer, a collection which is generally considered to be the finest of its kind in Germany. Herr Hainauer was not only himself a great connoisseur in all the varied manifestations of Renaissance art, but was helped by the advice of Dr. Wilhelm Bode, who is considered the greatest authority on art in Germany, and, perhaps, on the entire Continent.

When Herr Hainauer died in 1894 he left some few exceedingly valuable pieces to the Berlin Museum, though the bulk of the collection passed into the possession of his widow. Dr. Bode cherished the hope that the whole collection would eventually pass to the State, or be presented by some wealthy enthusiast, but apparently nobody felt inclined to pay the \$1,250,000 at which it was appraised by its owner, and for which it has now passed into the hands of Messrs. Duveen, of London.

Paintings and sculpture in marble, bronze, terra cotta, wood and ivory, tapestries, and embroideries, furniture and stained glass, clocks, enamels, illuminated manuscripts, fayence pottery, medals, and church plate figure in the catalogue of the collection, which is to be shipped forthwith to England, and will probably be placed on exhibition at the Duveen Galleries.

Among the pictures are a portrait by Botticelli, a Madonna by Lippo Lippi, and paintings by P. Pollajuolo, Patinir, Mostaert, De Bles, Vasari, Gianach, Cima da Conegliano, F. Boli, and many by many unknown masters. But the finest section is the sculpture, which includes many pieces of inestimable value by Antonio Rossellino, Mino da Fiesole, Andrea della Robbia, Luca della Robbia, Antonio Pollajuolo, P. Vischer, Andrea Riccio, Gian Bologna, and others of equal note.

This is the second important collection in Germany that has within the last few months been sold to foreign countries, and art lovers are getting seriously alarmed at this exodus of art treasures that can never again be replaced.

#### COMPRESSED AIR ON RAILWAYS.

A novel use of compressed air is made by railway companies in the southern States. When the loads of cotton are being taken to the coast here is always danger of their becoming damaged through sparks from the locomotives. To prevent this the locomotive boilers are filled with compressed air. A trainload of several thousand bales of cotton can be hauled by these locomotives at a rate of twelve miles an hour, although no fire whatever is used in working them.

#### THE INNOCENT OFFICE BOY.

Charles Philpotts is a member of a firm of London solicitors. His partners always call him Charlie, and the clerks, in his absence, call him Charlie, too.

A new office boy had noticed this familiar use of Mr. Philpotts' name.

One day one of the partners said to the boy:

"Telephone to the theatre for two seats for 'Charley's Aunt,' please."

The boy hesitated. He blushed. The partner asked nervously:

"Hadden't I better say 'Mr. Philpotts' aunt,' sir?"

#### ON THE R. R.

Conductor—We're due at Midleport at four o'clock.  
Mrs. O'Toole—An phwat toime do yez get there?

## SOME LUCKLESS CRAFT

MANY VESSELS ARE PURSUED BY MISFORTUNE.

One Ship in Ten Collisions — Another Sunk and Raised Six Times.

Sold last year on the Clyde, for breaking up purposes, was a ship that spent thirty years in running into danger, in collision twice, had the life boat put out for her four years running, remained the perpetual joy of insurance companies, and yet nothing could kill her. In all these disasters she scarcely did herself any damage, and she is known far and wide as a ship with a charmed life.

Her name was the Hardacre, an iron steamer, built in the late seventies, and on her first voyage she distinguished herself by running amuck through the Channel Fleet at night, with both her side-lights out, for they would not burn. She met nineteen steel warships, including destroyers, travelling at full speed in close formation, and was so closely shaved that one chipped her trawler.

She sank one torpedo-boat, caused two others to collide, and came out of the encounter having done \$25,000 worth of damage, but having barely \$25 herself. Three months later she went ashore on Dungeness in a storm, but was towed off unhurt. A German barque ran into her and sunk itself the year following, without doing much damage to the Hardacre, which became known as

### THE "HARD-TO-KILL."

After driving ashore near Yarmouth in a fog, and sinking a vessel fishing on the Newfoundland Banks not long afterwards, she broke down in the Channel, and was driven on to the French coast in a gale, her crew being taken off by the rocket apparatus. Though posted at first as a total wreck, she was towed off, patched up, and sent on a voyage to the Argentine, where her pilot "piled her up" on a dangerous reef in bad weather. Still she refused to die for she was refloated and docked, sent to sea once more, and was run into by a cattle boat on the way home, but by amazing good luck, was not sunk. Her repairs, from beginning to end, cost \$11,000— or rather more than twice her value. She continued unkillable until she wore out with old age, and was condemned by the Board of Trade.

One of the most astonishing records held by any ship was that of the British barque Emerald, which becoming unmanageable off Cape Horn, was driven by wind and tide through the terrible Magellan Straits, and came out unscathed at the other end though she made a good part of the voyage sideways, or stern first, between the terrible walls of rock and tide-races, only the finest full-powered steamers under thorough control attempt to face.

Her performance is unique, and not likely ever to be beaten, for the odds against her were about the same as one would give a runaway four-in-hand coach galloping from end to end of London.

### WITHOUT COMING TO GRIEF.

Her rival in that performance, strangely enough, was a ship that had a record of escapades hardly short of the miraculous. This was the Diomedea, a small cargo-steamer, that was sunk no less than six times in twelve years and raised each time, which constitutes a record among all the ships of the world. She was sunk first in the year she was built by striking some floating wreckage in the Downs, and "total loss" was paid over her. A salvage company bought the wreck cheap from the underwriters, and raised her at no great cost. In her third year she was sunk again, in the Hudson River, and raised, and it was on the voyage following this that she was wrecked on Sable Island

## IN HISTORIC GLENCOE

THE HOME OF LORD STRATHCONA IN SCOTLAND.

Description of the Canadian High Commissioner's Magnificent Property.

Kinlochbeg, which includes Blackcorries, in the parish of Lismore and Appin and county of Argyll, has an area of about 40,000 acres. The small shieling known as Mealanruach (Meall nan Ruidhag), of triangular shape, which lies in the middle of the forest, forms part of Ballachulish estate, but is rented by Lord Strathcona and Mount Royal, the proprietor of Kinlochbeg.

### TWENTY MERK LAND.

Lord Strathcona's estate forms the bulk of what was in the seventeenth century known as the Twenty Merk land of Glencoe, in the old Lordship of Lorn, which formed the subject of a grant by James Earl of Perth to John Stewart of Ardsheal in 1685, and was then held in feu of the Earl of Argyll. In 1685 Stewart of Ardsheal subfeued part of it to Macdonald of Achtriachan, and in 1693 another part to Macdonald of Glencoe, and he also seems to have feued other parts. In 1701 he sold the remainder to Robert Stewart of Appin. Subsequently the bulk of the property feued to Macdonald of Achtriachan was acquired by the proprietor of the estate of Appin, and the proprietor of that estate also acquired from the Duke of Argyll the superiority of the old Twenty Merk land.

### TWENTY MILES.

Lord Strathcona acquired the lands which were feued out in 1693 to Macdonald of Glencoe and also parts of the Twenty Merk land of Glencoe which formed part of the Appin estate, including the superiority, so that Lord Strathcona holds the whole property of the Crown. His territory stretches twenty miles from east to west; from north to south the breadth varies from two to six miles. The large mansion erected by Lord Strathcona was designed by Sir Rowand Anderson, and is understood to have cost nearly \$50,000, including the laying out of the grounds. It is lighted by electricity and built on the old and historical property of Glencoe, overlooking Loch Leven, with Loch Linne in the distance, and the Morven and Kingairloch hills in the background.

### MADE THREE LAKES.

Lord Strathcona formed three lakes near the house, and has made a special feature of autumn flowering shrubs and plants, as well as autumn flowers, vegetables and fruit. There is also a nursery of trees from which extensive planting is made every year. The landing pier for yachts is within a few hundred yards of the house. There are two shooting boxes, one at the Coalisacoan further up Loch Leven, and another in the middle of the Blackcorries was afforested early in last century, but Kinlochbeg, Coalisacoan and Strone were cleared comparatively recently, and only after it was found absolutely unprofitable to graze sheep.

### LAND LIES HIGH.

The ground is high lying, Glencoe being one of the most mountainous districts in the west. On the south side Bidean nam Bian (3,756 feet) is the highest; on the north Anach Eagach (3,168 feet), both favorite ascents among mountaineers. An outstanding member of the western group is Sgor an Ciche, the Pap of Glencoe, which lies behind Glencoe house and from the top of which there is a most wonderful view. Glencoe is entered from the west at Bridge of coe, the village of Carnoch on the left bank of the river was the chief clachan of the Macdonalds. The massacre took place on the 13th of February, 1692. "The Devil's Staircase" is a rough track across the forest from the Coe At

## FORECAST THE WEATHER

HOW EVERY MAN MAY BE HIS OWN PROPHET.

Clouds Tell You More About the Weather Than You Can Learn From Any Other Signs.

Why is it that shepherds can, as a rule, forecast the weather as successfully as the Meteorological Office itself? Not one in ten has a barometer or thermometer, or any other instrument of the kind.

It is simply because they watch the sky, and notice the shapes and colors of the clouds and the pace at which they travel. But the worst of it is that those who live in towns cannot see much of the clouds, and residents in the country rarely take the trouble to study them.

To one uneducated in sky signs appearances are most deceptive, for what seems at first sight a very fine-looking sky is often a sure indication to the initiated of bad weather, while sometimes a dull-looking sky is a prophecy of a dry spell.

You can tell more from the clouds at sunrise and sunset than at any other hours. If you see small, light clouds high above the rising sun you may be practically certain that the day is going to be fine. On the other hand, the sky at sunrise may be absolutely cloudless, yet, if the tint along the eastern horizon is red, orange, or yellow, it is more than probable that there will be rain before night. The harder the color the more likelihood there is of a storm.

### THE WORST SIGN.

A green sky is a still worse sign, and a greenish cloud in the south-east is the most ominous sign of all. It means wind as well as rain.

After a wet day watch the clouds at sunset. If they break at all and begin to travel more slowly the weather will probably moderate. If their edges turn red or golden you may be almost certain that you are in for a couple of days, at least, of fine warm weather.

Sometimes, after a perfect day, the blue sky suddenly becomes speckled over with little, curly, pale-colored clouds which grow in number and size, and eventually cover the sky. These indicate a change of weather, and you can tell how soon it will come by the height of these clouds, and at the length of time they take to form. The longer they take the longer, as a rule, will be the interval before the weather changes.

One more certain sign of bad weather is leaden-hued clouds moving out of the northwest.

There are four common forms of clouds, which are known as cirrus, stratus, cumulus, and nimbus. Cirrus is what we usually call mare's tails. It lies higher than any other form of cloud, rising sometimes to ten miles above the earth's surface. It tells you a great deal about wind.

### WATCH CUMULUS.

At great heights the air currents are different from those near the surface, but the wind above will more often than not eventually descend. So if a storm from the west has been blowing, and clears sufficiently for you to see cirrus cloud, you can tell what is going to happen. If the ends of the wind clouds are curled back from the east fine weather is coming. If not, a second storm is approaching. When cirrus lies in long, straight wisps from west to east, be sure that rain is coming.

Cumulus is the cloud you see lying in heavy, conical heaps. It is more common in summer than in winter. Watch it in the evening. If the heaps decrease fine weather is coming; if they harden or increase, and their bases are flat, look out for rain and possibly thunder.

Stratus is the flat bands of cloud which forms at sunset on a fine day. It rises from the earth, and is distinctly a fine weather cloud. It is also the fog cloud. As for nimbus, that is a mixture of

## SOME CURIOUS LEGACIES

A TOWN IN SWITZERLAND WHICH REFUSED \$150,000.

Against the Law to Burn Bank Notes— A Difficult Legacy to Win.

One hundred and fifty thousand dollars is a nice lump sum, but not long ago the town council of Thun, in Switzerland, unhesitatingly refused that amount of money. It was left to his native place by a wealthy brewer named Feller, with the stipulation that one man whom he had always disliked should be deprived of his office as town clerk, and that another object of his aversion should never again be re-elected to the school board. The town took the will into court, but could not alter it, so the money went to the Swiss Government.

The wills of men who attempt after their death to wreak their hate upon the living always cause trouble. Mr. Harvey Scott, who died in Canada, hated his heirs, so directed his executors to burn \$25,000 in bank-notes. But the law says that a man who burns bank-notes is guilty of arson. The executors refused to comply with the condition, and so render themselves liable to prosecution, and all sorts of legal complications are the result.

A year or so ago the sum of \$325,000 was left, by an uncle who resided in Germany, to a young Edinburgh man, but the conditions make the legacy a difficult one to win. The legatee must travel round the world, visiting fourteen different countries specified, and after two years return home and write a book upon what he has seen. This book is to be submitted to certain authorities specified by name, and these are to give their opinion upon it. If this is favorable, well and good;

### THE MONEY WILL BE PAID OVER.

If not, the unfortunate legatee must again start off on his travels, and make a second attempt to attain the necessary standard of excellence.

Wills which forbid heirs to marry certain people or to marry at all before a certain age are productive of endless trouble. And those which make a particular marriage the condition of a legacy are still worse. Nearly fifteen years ago a Manchester banker died, leaving all his fortune to his adopted son on condition that the latter, found and married the banker's granddaughter.

This lady was the daughter of the dead man's eldest son, with whom he had quarrelled many years before, and who had emigrated to New South Wales. The heir obediently set off for Australia, and succeeded after great difficulty in finding the granddaughter, only to discover that, as the result of an accident, she was a hopeless paralytic. Of course, marriage was out of the question, but he promptly offered to share the money with her, half and half. Her mother, however, who was still alive, refused his compromise, and declared that her daughter was rightful heir to the whole amount. The case went into court, and after two years' litigation, during which nearly half the entire fortune was spent in costs, the

### GRANDDAUGHTER WON THE SUIT.

The unfortunate adopted son, after wasting three years of his life, was left penniless.

Of the \$3,000,000 left by the late Mr. Nicholas Keene, of London and San Francisco, not one penny has been left to his heirs at law. The whole of this great fortune has been left in trust for a little girl named Dorothy Barford who is no relation to the deceased. But the legacy has a cruel condition. The will reads: "If she lead a proper and

cost. In her third year she was sunk again, in the Hudson River, and raised, and it was on the voyage following this that she was wrecked on Sable Island but saved from total loss. She finally enjoyed the distinction of having been sunk in every one of the five oceans of the world, except the Antarctic, but always in water just shallow enough to allow her to be raised. At last she was condemned as too old and unfit for sea, and is now a quarantine hulk in the West Indies.

It would hardly seem worth even a "wrecker's" while to have tried to sink the tramp-steamer Vandal, which till lately held a world's record for having been in ten collisions at sea in seven years. Unlike the last-mentioned vessel, she has never been sunk at all, though she sank six out of the ten ships she collided with.

#### THE STILL MORE CURIOUS FACT

Is that only one of these ten collisions was she in the wrong, and in the other nine cases the owners of the vessels that collided with her had to pay for her damages as well as their own—the former amounting in all to over \$6,100. It was often marvellous how she escaped sinking, as all the collisions but one took place on the high seas, and she had the luck never to be struck in the vital spot. Apart from her own little bill for repairs, she did \$43,000 worth of damage by her "little affairs," and yet she never came to grief by any hazard of the seas, being at present a store ship of the Spanish Navy.

The magnificent liner Paris, well known by all who cross to the United States, holds one record which, if she had no other, would prove her to be a charmed life up to date. She is the only vessel of any size that ever escaped with her life from the terrible Manacles Rocks, off the Cornish coast. It is several years ago now since she struck upon that dreaded reef, but many people may remember the stir it caused, and the agitation for a lighthouse on the Manacles that followed.

She had ten hundred and fifteen passengers aboard, besides her crew, but did not lose one of them, all being landed safely. A large part of her underbody was torn clean away, and it was thought unlikely that she would ever float again. In spite of that, she was eventually rescued from the rocks by clever engineering, at a cost of \$14,000 and towed into Falmouth. The weather luckily held fine during the operations.

#### ONE OF THE LUCKIEST.

and at the same time unluckiest, vessels that ever floated, is a humble Thames coasting-barge called the Ada, which has survived the seas for fifty-three years, and has been sunk, cut down, blown up (by a practice torpedo-bomb), cast adrift in the Channel in a gale, driven over the top of the Goodwin Sands at high water unharmed, sunk two yachts, and yet has never caused the loss of a life, either of her own crew, or any other vessels. This passing programme was achieved at various times, of course, not all at once.

The strange part of it is that such a comparatively inexpensive craft should be worth saving and patching up so often; yet she has carried in her time half a million-ton of merchandise about our coasts, weathered some of the worst storms that blew, and her hull remains so sound that she now fulfils the role of store-hulk to a floating small-pox hospital.

As an example of the strangely different luck which two similar vessels may have, a pair of sister-ships—the Cambria and the Celt—both steamers, and built in the same yard, were launched on two succeeding days. One of them was run down in the Channel and badly damaged on her maiden voyage, causing the loss of three lives; she has since been three times on fire, once sunk and raised again, once in collision, twice ashore, and finally sailed from Rio two years ago, and has never been heard of since. The other has never had the smallest mishap. An odd fact is that the former unlucky vessel was launched on a Friday, a deed which many sailors still regard as deliberately flying in the face of Providence.

left bank of the river was the chief chieftan of the Macdonalds. The massacre took place on the 13th of February, 1692. "The Devil's Staircase" is a rough track across the forest from the Coe At Alltnafadhi to the head of Loch Leven. The Coe is the Cona of Ossian, on whose banks, according to tradition, the poet was born. Ossian's Cave is on the south side of the glen on a spur of Bidean nam Bian.

#### SILK FROM GUNCOTTON.

Frenchmen Threaten to Put the Silk-worm Out of Business.

Science threatens to put the silkworm out of business. French chemists have discovered at least three distinct methods of competing with the old reliable but extremely deliberate silkworm.

Perhaps the most interesting of these is the manufacture of silk from guncotton, which also serves as a base for the most powerful of modern explosives.

The viscous fluid from which the silk worm spins his thread is chemically duplicated by a process described in the Technical World. The fabric thus produced is inflammable, and in order to remedy this defect it is treated with an alkali sulphide solution.

The founders of the new industry have kept in view not so much the exact reproduction of natural silk as the production of a substance which embraces its valuable properties.

Natural silk possesses to a large degree qualities of brilliancy, elasticity, strength, affinity for coloring and bleaching materials, and when handled a peculiar rustling sound, known as serrop. Perhaps the brilliancy and serrop of silk are the best known of its qualities, and it is in these two respects that artificial silk most closely resembles natural, its brilliancy being greater and its serrop slightly less.

#### TO TEST DIAMONDS.

Some Simple Tests by Water, Taste and Ink Spot.

The expert of diamonds can detect an imitation as a rule at a glance, but not so the ordinary individual. An imitation diamond is never so brilliant as a genuine stone, and a very simple test is to place it under water. The imitation stone is practically extinguished, while a genuine diamond will continue to sparkle. When possible a genuine stone should be placed beside the imitation one under water, and the contrast will at once be apparent.

Another very simple and efficient test is to place a drop of water on the stone and carefully observe the result. The stone should first be very carefully cleaned. On an imitation diamond the drop, however small, will deliquesce, but on a true stone the drop will retain its original shape.

Perhaps the simplest method of all, however, is to examine an ink-spot on a sheet of white paper through a diamond by holding the under surface against the eye. If the stone be counterfeit the black spot will appear greatly magnified, or at least doubled. The outline will, moreover, appear blurred and indistinct. By using a magnifying glass the test can readily be made absolute.

If a real diamond be put in the mouth its icy coldness will be noticeable at once; not so that of an imitation gem.

#### AND THE TAX WAS RAISED.

"Nice hotel you've got here," said the affable stranger.

"I'm glad you like it, sir," said the landlord.

"Do a good business?"

"Oh, splendid."

"Make a large profit?"

"Immense profit."

"I am glad to hear it," said the stranger, pleasantly.

A little later the landlord asked another of his guests, a commercial traveller, if he knew who the gentleman was.

"Oh," replied the traveller, "he's the new income-tax assessor."

Stratus is the flat bands of cloud which forms at sunset on a fine day. It rises from the earth, and is distinctly a fine weather cloud. It is also the fog cloud.

As for nimbus, that is a mixture of all the other three, and is purely and simply a rain cloud. It forms the grey mass with which we are unhappily too familiar in our moist, sea-grit island. The more rapidly nimbus forms the sooner, as a rule, will the rain be over.

#### WHY IS A NEGRO BLACK?

The Sun's Rays of One Particular Latitude is the Cause of It.

The origin of color in anything has always provided scientists with an interesting study—the origin of color in human skin in particular.

There are between the cuticles of the skin certain pigments which, when acted upon by light rays, produce different tints. What those tints will be depends upon the angle at which the rays of the sun fall upon the pigments. At the equator the rays are about vertical; at the poles they slant at an angle unknown in the tropics, and the chemical effects of the different kinds of rays upon the pigments of the skin vary considerably. Thus we get a large number of tints of the skin, from the white to the yellow, yellow to red, and red to black, many intermediate shades being peculiar to certain latitudes.

The pigments themselves change through generations of exposure to the sun-rays of one particular latitude, so that the skin of a child assumes the color, slightly modified of its ancestors, even when the child has been borne and reared in a strange part of the world. Thus, if a colony of negroes and negroes settled in Britain, their descendants would become paler with each generation, until eventually there would be no trace whatever of the original color. Whites settling in the tropics would be affected in a similar way, the color gradually deepening with each generation.

#### GOOD NEWS FOR JACK TARS.

Do British warships breed consumption? The popular delusion is that the sailor, spending his life just where the air is purest, is the last person in the world to develop lung trouble. Strange to say, the average warship is one of the deadliest of places to live in, for the air between the decks quickly becomes foul, and remains so. The newest naval ship-building plans show, however, that Jack's health is in the future to have more consideration. Electrically-driven fans and other contrivances are to be fitted to new vessels to ensure a proper circulation of air through even the most remote of alley-ways. Another boon to the Jack Tars is the adoption on board ship of approved appliances for cooking and baking, so that the men in the new vessels will be able to get fresh bread as regularly as the German and French naval crews already get it. In short, the Admiralty is at last waking up to the reasonable requests for reforms made for years past by the British Jack Tar.

#### KITE-FLYER TO THE KING.

General Baden-Powell's faith in kite-flying for military purposes seems at last to have infected the British War Office, which has shown its appreciation of the possibilities of the kite on a battlefield by deciding to create a new post in the Army—namely, the position of "Instructor in Kite-flying for Man-lifting purposes." The salary attached to the appointment is \$3,000. The new development embraces extended facilities for military ballooning. The War Department is at present constructing a new type of airship, the details of which are being rigidly kept secret. Colonel Templer is in charge of the "cruiser," which he hopes to have ready for practical manoeuvring experiments in the coming autumn. \$50,000 has been set aside for this year's ballooning equipment.

to his heirs at law. The whole of this great fortune has been left in trust for a little girl named Dorothy Barford, who is no relation to the deceased. But the legacy has a cruel condition. The codicil reads, "If she lead a proper and perfect life." That is to say, the poor child has to be something nearly approaching a prodigy if she is to win this money. She is now but ten years old, and the life of her mother is made a misery by the spying of jealous relatives of the dead man; and more than once she has said that the money is not worth the constant worry it has brought into her life.

Almost equally miserable is the case of the heir of a well-known vegetarian lecturer. He left some \$3,000 a year to a nephew on condition that the latter never touched meat, that he wrote and had published at least three articles a year, and gave six lectures on

#### THE VEGETARIAN CAUSE.

His heir prefers a cut of roast beef and a pint of bitter to any vegetables, however perfectly cooked, and finds himself condemned to a diet which he dislikes and which does not suit him. The articles and lectures are also trying to a man who cares nothing for literary work and has no gift for public speaking.

The most dreadful legacy of recent times was received by the uncle of a German soldier named Van Lindo, who was hung last year for a brutal murder. The condemned man left an order with a photographer to make a photograph of his body as it swung from the gallows, and send it to the uncle who had brought him up. The request was complied with, and the shock to the uncle was so terrible that it completely unhinged his mind, and a few weeks later he died.

#### GREAT BRITAIN SECURE.

Paris Newspapers Give High Praise to Her Naval Manoeuvres.

The Paris Temps declares that the first half of the British naval manoeuvres, which it describes as "the greatest test of efficiency ever applied to a fleet in peace time," has been entirely successful.

Great Britain has proved that she can concentrate "in an incredibly short space of time" 400 warships splendidly manned, in home waters and that her ports are secure against surprise.

The Admiralty are praised for admirable distribution of the fleet, and the perfect order with which the mobilization was carried out.

The Temps thinks that the promise of the Admiralty to give full publicity to the results of the second phase of the manoeuvres—the attack on Britain's sea-borne trade—is made either because the navy is confident of the result or because it is desired to show the danger of a reduction of armaments.

#### WHERE THE BEST HAIR COMES FROM

Although China is the chief market for false hair, the finest-tresses come from South Europe. Southern France, Italy, and Italian Switzerland are the quarry of the hair agent, the convents of Spain and Italy providing a large amount of the long coils and tresses which find their way into British markets. When a girl takes the veil she parts with all her hair at once, a considerable income being frequently assured in this way to the convent authorities. In the South hair grows fast, and many peasant women make quite a solid addition to their yearly earnings by disposing of it at intervals, parting, perhaps, with all but one long piece, which, coiled round the head, disguises the fact that they are denuded of their long tresses. It is in arranging and straightening the tresses that the chief difficulties are encountered, each hair having to be severally fastened by its root end to a band of silk or cord, the ends being allowed to hang loosely in order to preserve the natural wave and curl.

# SOME REGAL ETIQUETTE MESSAGES TO THE POINT

**ROYALTY IS BOUND BY VERY STRICT RULES.**

**The President of the United States is Also Governed by Strict Etiquette.**

A curious curtailment of the Royal prerogative is effected by an Act of Parliament passed in the reign of George III. which deals with Sabbath-breaking. In this Act it is distinctly stated that the monarch shall not have the power to pardon any persons convicted of a certain form of Sabbath-breaking. Yet His Majesty can, of course, pardon ninety-nine out of every hundred prisoners in the land.

A number of years ago it was perfectly permissible, and, in fact, a matter of strict etiquette, for a visitor who should obtain an audience with the Sultan of Turkey to bow and kiss the hand of that Oriental potentate. Anarchists, however, took advantage of the privilege, and on one memorable occasion a treacherous emissary drove a dagger into the heart of his Sovereign, and from that time forth the

**THE PRIVILEGE HAS BEEN DISALLOWED.**

Notwithstanding the democratic institutions of the United States, the social relations of President Roosevelt with the outside world are governed by strict etiquette. An invitation to dinner at the President's official residence—the White House—is a command just as much as a Royal invitation would be. Many a dinner-party amongst the Senators and Government officials has had to be cancelled because of the President's habit of inviting the leading members of the Senate to dine with him simply to discuss political affairs.

In passing into the grand State room to dinner the President's wife always has to walk last—the President himself taking in the wife of the doyen or head of the diplomatic corps.

Another very curious etiquette law is that which prevents the President from ever accepting an invitation from the Ambassador of a foreign country. The reason for this is that the President is supposed never to leave his country, and, as every embassy is regarded as the territory of the particular country it represents, the President would be deemed to have left his own country by stepping over the

**THRESHOLD OF ANY EMBASSY.**

When the youthful King of Spain was twelve years of age he one day had the misfortune to slip and fall down a flight of the palace steps. The fall would very probably have been attended, with fatal results had it not been for a servant who extended a kindly hand and saved his young master, by breaking the fall. But, by a stringent rule of Spanish etiquette no servant may dare touch the sacred person of the King, and for this very "grave" offence the servant was at once dismissed from his position.

By a remarkable law of Royal etiquette, which was existed for a number of years past at the Court of Siam, no person is permitted to sleep in an apartment situated above that occupied by the King. A deliberate breach of this rule has on more than one occasion been punished by death. Recently, when the King of Siam paid a visit to Paris, a number of bedrooms were reserved directly above that in which the King was to have slept, for the dusky followers of the Royal visitors. The blunder caused great consternation among

**THE FEARFUL COURTIER.**

until the matter was explained to the management and duly rectified.

It is a traditional etiquette custom

**"FIND LIVINGSTONE" THE BRIEFEST EVER WRITTEN.**

**Sir Harry Johnston's Message of Eight Words — The Cleverest Despatch.**

Surely no more laconic order could be given for any matter of world-wide magnitude than that which was given to Stanley when Mr. Gordon-Bennett, of the "New York Herald," despatched him on his famous quest with the simple words, "Find Livingstone!" There was really no more to be said by the master to his servant, when the two so thoroughly understood each other. The questions of money, equipment, preparation, time, etc., were all left without discussion. Stanley's orders were clear. "Find Livingstone!" He set out, and he returned not until he had found the celebrated explorer who had been lost to civilization for so long.

Some of us remember the despatch of Sir Harry Johnston—who is happily still with us—which he forwarded to Lord Salisbury. This is certainly the record one of our own times in such matters.

**JOHNSTON'S MESSAGE**

of his suppression of slavery was in eight words, as follows: "Advanced against Tmose, defeated, captured, hanged him.—Johnston." It will take a great deal to beat this. But then, Johnston was always one of those men who did the work first, and then said as little as possible about it afterwards.

It has often been said that Sir Charles Napier, after the capture of Scinde, wrote one of the most laconic and most delightful despatches that the world has known, when he telegraphed home to the Government the simple Latin word, "Peccavi!"—i.e., "I have sinned (Scinde!)" But here gossip has placed the foundation of the laconic remark on the wrong person, for, as a matter of fact, it was not Sir Charles Napier who composed that famous despatch, but Mr. "Punch," who wrote as a jest. Nevertheless, it remains as an extremely clever and telling piece of work of the kind we are dealing with.

In this category, too, we must include Thomas Carlyle's notable reply to a devoted admirer, who wrote asking if

**THE SAGE OF CHELSEA**

had any objection to sending on his autograph as a present to the said admirer. Carlyle was equal to the occasion. He just wrote down on a sheet of notepaper the words, "Yes! Yours truly, T. Carlyle." It was left for the admirer to decipher the meaning at his will, but doubtless he was satisfied when he saw the signature, whatever the writer meant him to understand.

To describe a great naval battle in about a score of words is surely given to few famous combatants. Yet this is what Captain Walton did when he had scattered the Spanish fleet near the Straits of Messina. His despatch to the British Government was as follows: "Have taken or destroyed all Spanish vessels which were upon the coast; number and description as per margin.—G. Walton."

There is a whole page of naval warfare sometimes in a daily newspaper, after a battle such as that which Togo recently fought, which, notwithstanding, does not tell one-half so much of what was the actual result of the fight as this laconic statement of Captain Walton's does about the battle off Messina.

**DR. ABERNETHY.**

was another famous man who never wasted words. A woman of title once came to see him, who prided herself upon her blunt speech to so deemed inferiors. She regarded the doctor with some hauteur because he did not rise and make a great fuss of her when she entered his surgery. She was so disgusted that she just held out her scalded hand, and said, "Burnt it!" The great surgeon was quite equal to the occasion.

**Your Money Returned** by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

**Sunlight Soap is better than other soaps, but is best when used in the Sunlight way.**

**\$5,000** reward will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

**Equally good with hard or soft water.**

**Lever Brothers Limited, Toronto**

## CRIME WE CAN'T CONQUER CAN YOU INVENT THIS?

**INSIDE THE PRISON WALLS IS NO PREVENTIVE.**

**Some of the Most Daring Crimes Are Planned and Hatched There.**

If, armed with an order from the Home Office, you walk as a writer did recently, through the workshops of a great convict prison, you notice with surprise that in a large room, such, for instance, as the tailors' shop, there are only two or three warders to look after some fifty or sixty convicts, says London Answers.

Now, as all are aware, the rule of a convict prison is absolute silence. The men may, on occasion, speak to the warders, and they may chat with the chaplains, but among themselves they must not converse. One warder, however, watchful as he may be, cannot possibly keep his eye upon twenty or thirty men at once, and the result is that the lull of silence is more honored in the breach than the observance.

Besides, old "lags" invariably have learnt how to talk without moving their lips, and consequently they constantly converse among themselves without fear. It is a fact, as any old convict will tell you if you gain his confidence that some of

**THE MOST DARING CRIMES**

are planned and hatched in prison. To give one instance in point. The murder of a notorious "fence" in White-chapel by the burglar Seaman, who was hanged for the crime, was planned by that man in the Southern convict establishment in which he served five years.

Quite recently, no longer ago than November last, a case came to light of a robbery planned in prison. Upon a man charged at the Mansion House with stealing watches in Fenchurch Street was found a letter written by a "pal" doing time in Pentonville, and smuggled out by one of the discharges. In it occurred the following significant passage: "What price —'s window in Fen Court, City, the jeweller's? It would not be a bad night's job for two amateurs. Have a peep round—"

**GOLDEN OPPORTUNITIES FOR FOR TUNE-HUNTERS.**

**The Dreams of To-Day are the Realities of To-morrow — Big Fortunes Are Waiting.**

Why can't a balloon, properly filled, stay up forever? Because it leaks. The only known material through which gas cannot percolate is gold-beater's skin, and this is a great deal too expensive for common use. Invent a perfect varnish for making silk or other material gas-tight, and the problem is solved. It has not been done yet.

There is nothing like leather for shoes and boots. The brown-paper and leather scrap which are used to fill the soles of cheap foot-wear are nothing more or less than sponges to suck up water and give the wearers pneumonia. The clever inventor may yet find a cheap and efficient substitute for leather. Why not try?

We have got smokeless powder, but, thanks to the Italian general Galati's acoustic telemeter, the location of guns firing smokeless powder can be accurately determined by the opposing force. What we want is

**A SOUNDLESS POWDER.**

Such an invention is not out of the regions of the possible, and would go far towards making war absolutely impossible. Its inventor would confer a big benefit upon humanity at large.

Pearls are bringing fabulous prices. Why? Not because there are not as good pearls in the sea as ever came out of it. No; the only reason is, says Mr. Streeter, the well-known expert, that even in the best diving dresses men cannot descend to much greater depths than fifteen fathoms (ninety feet). The pressure is too great, and even from that depth they come up bleeding at nose and mouth. The pearl oyster beds at this depth have been pretty well worked out, but there are plenty more at greater depths. Devise some means by which the pearl fisherman can descend thirty or forty fathoms under water, and there would be a colossal fortune in it. The submarine boat won't work for

blunder caused great consternation among

### THE FEARFUL COURTIER.

until the matter was explained to the management and duly rectified.

It is a traditional etiquette custom in the Marlborough family for each Duke to present a Blenheim spaniel to the Duchess when she enters Blenheim Palace for the first time as its mistress. The story from which this custom has its origin is that during the Battle of Blenheim a spaniel followed at the heels of the great Duke throughout the day, never leaving him until victory was assured.

When the Emperor or Empress of China appears in public, no other person is allowed to occupy a higher place than they do. Therefore, on such occasions the shutters of all buildings are drawn, and the upper parts of the houses past which the Royal procession is expected to move are deserted, the inhabitants swarming to the ground floors in order to show due deference to their rulers.

### SPOILED THE STORY.

#### The Man Who Would Not Allow the Prisoner to Escape.

A good listener never interrupts, except to applaud, but a poor listener is preferable to the one who spoils a good story by discovering its flaws, which a great many good stories have. There was a social party gathered in a pleasant country house, and one of the gentlemen had just told the story of the criminal condemned to death by some ancient ruler. He was to be beheaded, and as the executioner stood beside him with drawn sword, the culprit was given a goblet of wine to drink. He turned to the King and asked, as a last favor, that the executioner be directed to hold his hand until the goblet of wine had been drained. "You have my Royal word," said the King. "You shall not die until you have drained the cup."

Thereupon the ingenious criminal dashed the goblet to the stone floor, spilling its contents, and thus deferring his death sentence indefinitely. The story happened to be new to some of the party and was greeted with so much favor that another gentleman endeavored to cap it.

"An ancient Persian King," said he, "had brought before him a traitor to the throne, who, after a brief hearing, was condemned to be strangled."

"Mercy, O King!" cried the unhappy man.

"No," responded the King sternly. "You have conspired against me, and you must pay the penalty with your life. The clock is now trembling on the stroke of twelve; when it sounds the hour, you must bid farewell to earth."

"Quick as thought the prisoner turned to the clock, which stood by the throne, and with a mighty push, threw it from its pedestal, and it fell with a crash to the floor."

"I bow to your will, O King!" he said, calmly. "When this clock strikes I will die, and not before."

"As a tribute to his presence of mind the King spared the prisoner's life, and, after a brief imprisonment, gave him his liberty."

"Quite as interesting as the other," exclaimed a lady, when the narrator had finished.

"Shows that there is nothing new under the sun," chimed in another.

"Humph—yes," said a small, quiet man in the corner, after the comments had run their course; "very good story, and I hate to spoil it, but I must do it."

"What?" exclaimed the story-teller.

"Yes; must do it. There were no clocks in ancient Persia, so the prisoner could not have smashed one."

"I think that friend of yours is pretty forward on such short acquaintance," complained Mrs. Nagget. "I overheard him remark that I was 'no chicken.'"

"Well," replied Mr. Nagget, "you can't blame him. He couldn't be expected to know you cackle at times."

ferious. She regarded the doctor with some hauteur because he did not rise and make a great fuss of her when she entered his surgery. She was so disgusted that she just held out her scalded hand, and said, "Burnt it!" The great surgeon was quite equal to the occasion. He looked her in the face and answered "Poitlice it!"—then at once resumed his writing.

One of the cleverest of all such replies made laconically, however, was that of the celebrated Talleyrand, who was asked, as he left a certain French Council, from which much had been expected, but which had spent most of its time in talk, what had passed during its sitting. His quiet smile and his hopeless tone were as significant as his two words. "Three hours!" said he.—London Answers.

### HEROES OF THE BATTLEFIELD.

#### Men Who Suffered From Painful Disease Did Their Best Work.

For the last twenty years of Professor Finsen's life he suffered from painful diseases, against which, however, he heroically struggled until he discovered the precious light cure for lupus. Professor R. Green, the English historian who wrote the famous "Short History of the English People," was on his deathbed before he started the book. His doctors told him that he could not hope to live more than six months, but he set to work upon his cherished history, and penned every line of it in ceaseless pain. General Grant, once President of the United States, was made bankrupt through the failure of a bank. Fearful of dying and leaving his widow penniless, he at once began the writing of the story of his own stirring career. While doing this he was stricken with a further misfortune—a cancer formed at the root of his tongue. Day after day, however, the gallant general stuck to his task, and completed the book within a year. He died almost immediately afterwards, but his widow was not left destitute. Her husband's book realized \$500,000. Much of the best work of Sir Walter Scott, R. L. Stevenson, Edna Lyall, Clark Russell, and Sir Arthur Sullivan was also produced during days of agony of body or of mind.

### WHY HE WAS INSOLENT.

#### Reason a Footman Could Address His Master in an Angry Tone.

The desirability of ascertaining every detail before imitating the practices even of intimate friends is well illustrated by the following story, which used to be told with much enjoyment by a well-known nobleman.

A footman went on a visit to a fellow-servant in the country, and while the two were at lunch the master—a septuagenarian squire—rang impatiently.

"Confound him," said the major-domo, "how troublesome he is; he wants his luncheon, I suppose. Come upstairs and you'll see what a lesson I'll give him."

The visitor accompanied his friend to the ante-room of the squire's bedchamber, and heard him address his master in an angry tone. "What the deuce do you mean by disturbing me at my meal? I tell you flatly I'm not going to stand that sort of thing, and if it goes on you and I will part. I have brought you something to eat, which is more than you deserve."

The old gentleman did not reply, and the visitor thought it a marvellous example of discipline, so when he returned home he tried similar treatment with his old master, who, however, instead of meekly submitting, stared at the man in amazement for some minutes and then rang the bell.

"Let this fellow," he said to the servant who answered the summons, "be stripped of my livery and kicked out of the house; he shall have no character from me unless I write one on his back with a horsewhip."

The dismissed valet rushed to his friend and complained that his experiment had not worked satisfactorily.

"Ah," said the successful disciplinarian, "perhaps I forgot to mention to you that my master is stone-deaf."

doing time in Pentonville, and smuggled out by one of the discharges. In it occurs the following significant passage: "What price —'s window in Fen Court, City, the Jeweller's? It would not be a bad night's job for two amateurs. Have a peep round—"

### THIEVES "HONOR."

For cool impudence the following account of a prison crime will take a good deal of beating. Under the guise of a solicitor's clerk, a criminal, who had served many sentences, but was temporarily at liberty, obtained admission to Holloway Gaol to see a prisoner accused of luggage stealing. The too trustful thief told the sham clerk where the plunder was hidden, whereupon the latter went off, and at once laid hands on and disposed of the stolen goods, leaving his victim to regret his confidence at leisure.

Later on, when arrested, the swindler was found to have done the same trick many times before. But he put his nose into the lions' den once too often, and received a long and well-merited sentence of hard labor.

Prison crime has even its amusing side. Ten men confined in the local gaol at Neudorf in Hungary were found by their gaoler one morning all the worse for liquor; but how they got it no one could tell. Next day the case was the same, but it was not for a week that it was discovered that they had made a hole in the flooring of their prison, and tunneled into an adjoining wine-merchant's cellar, where they had consumed more than

### ONE HUNDRED GALLONS OF WINE.

Still more comic was an occurrence at Bathurst, New Brunswick. A youth named Thibodeau was convicted of several burglaries and confined in the local gaol. But the burglaries still continued, and the whole town was aroused. Every possible means was used to discover the culprit, but in vain. At last one man bought a bloodhound, and after watching for several nights succeeded in getting on the track of the marauder. Imagine his amazement when the fugitive made straight for the gaol, and was caught getting into it over a wall! It was Thibodeau himself! This enterprising follower of Jack Sheppard had discovered a means of getting out, and had been making raids nightly. His plunder was found carefully hidden under the floor of his cell.

### TAKING HER PHOTO.

"I have come to get my wife photographed," said the determined-looking man on entering a photographer's studio, followed by a meek-looking woman.

"You can make anyone look handsome, can't you?"

"Certainly, sir," replied the photographer, "that is part of the business, you know."

"Well, my wife here fell out of the window last year and broke her nose. You can straighten it out in the photograph, I suppose?"

"Certainly, sir."

"And you can push back her ears, so that she won't look so much like a rabbit?"

"Oh, I think so!"

"And what about the cast in her left eye?"

"Oh, I can touch it up with India ink!"

"And the freckles?"

"They won't appear in the picture at all."

"And will the hair be red?"

"Oh, no!"

"Well, you may proceed. Sit down there, Maria, and try to look pleasant."

"May I ask what is going on in the village?" inquired the observant stranger. "We're celebrating the birthday of the oldest inhabitant, sir," replied the native. "She's 101 to-day, sir." "And tell me, pray, who is that little man with the dreadfully sad countenance who walks by the old lady's side?" "That's her son-in-law, sir. He's been keeping up her life insurance for the last thirty years."

this depth are better than pretty well worked out, but there are plenty more at greater depths. Devise some means by which the pearl fisherman can descend thirty or forty fathoms under water and there would be a colossal fortune in it. The submarine boat won't work for this purpose, for pearl oysters cannot be grappled for. They must be

### GATHERED BY HAND.

Smoky chimneys are an intolerable nuisance, and there are plenty of specimens which no known form of cow will cure. Won't someone invent a good smoke-preventing device? There would be money in it.

It is said that an American, Dr. Herbert Franklin by name, actually succeeded in producing colored photographs and submitted them to a leading American scientific association, with the result that he received great encouragement. But he died suddenly, without revealing his secret. In spite of many attempts by other inventors, the secret is a secret still.

Bullet-proof garments have been announced by the dozen, but the inventor has yet to be found who will attire himself in his invention, and stand up at point-blank range before a modern high velocity, small-bore rifle. There would be a big sale for a really bullet-proof waist-coat if another was started.

Think what malleable glass would mean to the whole world! With a glass-hammer you could pound a glass nail

### INTO A GLASS BOARD.

You could cut a hole in a pane of glass and patch it with another piece. Our houses would be built of daintily tinted glass bricks, and we should walk on tough and unbreakable pavements of crystal. Truly, it would be one of the biggest industrial revolutions ever seen, and the lucky inventor would reap an enormous reward. Remember, it is not impossible, for the art was once known in old Venice.

But the list of badly needed inventions is almost endless. There is no machine for papering walls; an envelope which cannot be opened without detection is greatly wanted; an oil-can which won't explode would save many lives; there is no good device for turning music, and the man who could produce a perfect substitute for Para rubber would rapidly acquire a colossal fortune.

### FOR BACHELORS ONLY.

The man who avoids matrimony on account of the cares of wedded life rivals the wisacre who secured himself against corns by having his legs amputated. It is in life as it is with a kite; it will not fly very high unless it has a string tying it down. And so the man who is tied down by half a dozen responsibilities and their mother will make a higher and stronger flight than the bachelor who, having nothing to keep him steady, is always floundering in the mud. Many men think themselves self-made who are really marriage-made. Napoleon won his great victories while Josephine was his wife, and while he loved her. Bismarck and Disraeli, who for thirty years were the controlling powers in European politics both owned that they owed their success to their wives. Don't marry for beauty alone. Socrates called beauty "a short-lived tyranny," and Theophrastus pronounced it "a silent cheat." The man who marries for beauty alone is as silly as the man who would buy a house because it had fine flowers in the front garden.

### MOST-SPOKEN LANGUAGES.

The most-spoken language is Chinese; but as there are so many dialects in the language, and as these differ so greatly in the confines of Mongolia and Tibet from those around Peking, it is scarcely correct to say that the 382,000,000 Celestials all speak one language. Putting, therefore, China aside, the Most-spoken languages in the world are as follows, in millions: English, 120; German, 70; Russian, 68; Spanish, 44; Portuguese, 32. If we were to measure these in ratio on a two-foot rule, we should get the following results: Portuguese, 4in.; Spanish, 5in.; Russian, 5in.; German, 8in.; English, 1ft. 3in.

## For that Dandruff

There is one thing that will cure it—Ayer's Hair Vigor. It is a regular scalp-medicine. It quickly destroys the germs which cause this disease. The unhealthy scalp becomes healthy. The dandruff disappears, had to disappear. A healthy scalp means a great deal to you—healthy hair, no dandruff, no pimples, no eruptions.

The best kind of a testimonial—

THE PELHAM NURSERY CO.,

34 Toronto Ont

SEASON OF 1906.

## THE VERDICT.

AN INQUISITION, taken for our Sovereign Lord the King at the Town Hall situate in the Town of Napanee in the County of Lennox and Addington on the Thirteenth day of July in the Sixth year of the Reign of our Sovereign Lord the King.

BEFORE George Hoyle Cowan, Esquire, one of the Coroners of our said Lord the King for the said County on view of the body of Dora Morden then and there lying dead, upon the oath of M. S. Madole; F. W. Van Dusen; Frank Perry; B. B. Van Slyck; Nathan Fellows; Stephen Madden; James Daly; W. C. Jenkins; W. T. Waller; E. Ming; Alexander T. Ross and M. T. Van Slyck good and lawful men of the said County, duly chosen and who, being then and there duly sworn and charged to inquire for our said Lord the King, when, where, how and by what means the said Dora Morden came to her death, do upon their oaths say,—

THAT after carefully considering all the evidence submitted in this Inquisition we, your jurors, are unanimous of the opinion that Dora Morden came to her death by being struck by the Tender of a G. T. R. Engine No. "980" while backing across the Highway running North from Napanee and known as "Selby Road."

It appears from the evidence that the deceased, a girl about the age of fifteen years, had dismounted from her bicycle and was standing on the north track waiting for a Ballast train to pass east: after the train passed she had remounted her bicycle and was passing over the eastbound track when the Engine No. "980," after leaving its freight train on top of the grade on the West side of said Highway and crossed East over the yard to take water, was in the act of backing up—tender first—struck her. The Engineer and Fireman both swear that they did not and could not see the girl on account of the tender.

We, the undersigned Coroner and Jurors, after considering some of the difficulties peculiar to this Station and in consideration of the great number of accidents that have occurred here recently, feel it our duty to offer a word of warning to all persons to be careful in making this crossing in particular.

We exceedingly regret that we are compelled to believe that the Grand Trunk Railway have been largely responsible for many of the accidents in not having suitable protection at this crossing, for the want of which Dora Morden's life was sacrificed. We, therefore, strongly recommend that bars be placed on either side of the Grand Trunk Railway tracks crossing the Selby road at once that persons using this crossing may receive the protection that we have good reason to believe they are entitled to.

As residents of Napanee we would further recommend that a subway be placed under the Grand Trunk Railway track crossing Thomas Street in this town for the protection of the children going to and from the East Ward School.

IN WITNESS WHEREOF, as well the said Coroner as the said Jurors have here unto set and subscribed their hands and seals the day and year first above written.

American and Canadian Coal Oil and Gasoline. MADOLE & WILSON.

### WHAT OTHER PAPERS SAY

now limited to one pass a year. The object of this enlightened regulation is to provide them with more time to stay at home and run the railway.

Peterboro Examiner.

A new class is to be added to the programme of fall fairs. Special judges will have to be appointed to judge the speeding contests and to decide what is racing and what is mere speeding in the ring.

Belleville Ontario.

Whitney holds it to be very wicked and demoralizing to appoint members of the Legislature to offices—that is, Grit members. Mr. Little of Cardwell is the third member that he has shelved in a fat office in his brief period of power.

Brantford Expositor.

Bastedo must go, but Webster will still continue to draw his salary. The next thing we shall hear of will be his promotion. It begins to look as if the Toronto News was right when it intimated that the government dared not discharge him.

Kingston Freeman.

Hon. Geo. W. Ross has returned from Mount Clemens, Mich., feeling better than he has been for years, and ready to give his opponents "tit for tat" on the hustings and in the Assembly. The next elections will find the people who put him out of power eager to put him back again.

Hanover Post.

Canada has long held a deserved reputation for having volunteers who know how to "shoot straight." It is a nice reputation to have in these days when nations are boasting about their armaments, and people are counting their soldiers. A hundred sharpshooters are better than a thousand men trained to go through drill with a weapon that they could not hit a barn-door with at twenty paces.

Becton World.

So far we have not heard of any member of Parliament since the adjournment of the session granting a portion of his sessional indemnity to charitable institutions as last year. They appear to be all united now in their graft, and are willing to sink the extra thousand deep in their jeans for fear some other fellow may want their job at the next general election.

Toronto Globe

It is not often that the Conservative newspapers of this Province give away the Whitney Government's tactics so candidly as The Kingston News has done with regard to the location of the eastern normal school. The news is frankly and audaciously of the opinion that the disappointment inflicted on Kingston was by way of punishment for its choice of a Liberal member, not merely at the general election, but at the subsequent bye-election. Of course Kingston will now "sit up and be good," and the rest of the Province will look on in admiration.

Weather conditions in the west continue most favorable. The crop will be a week or ten days earlier than last year and cutting will commence in about four weeks. Everything points to a magnificent yield.

Mrs. Nance, who has been the guest of Mr. and Mrs. Stephen Gibson, leaves this week to join her husband in the west.

Hammocks a fine assortment,  
**MADOLE & WILSON.**

It is easy to expect others to set good examples.

When opportunity knocks it doesn't use a hammer.

Despair is the undertaker that carts off our dead hopes.

Occasionally a man rises from nothing to something worse.

Prodigals have always exceeded the supply of fatted calves.

It doesn't require much practice to acquire the art of being lazy.

Many a man who takes himself seriously is looked upon as a joke by others.

Imagination is responsible for half of our troubles, and our fool actions are responsible for the other half.

When a wise man bestows a favor he immediately forgets it. When a fool receives a favor he does likewise.

### Don't Cross Your Legs.

"The prevalence of appendicitis is an admitted fact," said a surgeon. "I have myself operated on 719 persons for the disease. Crossing the legs is responsible for a good deal of this trouble. That sounds strange, doesn't it? Nevertheless it is a theory advocated by more than one great surgeon. Indeed I know some men who say that if people never crossed their legs appendicitis would quite disappear. You see, crossing the leg squeezes and cramps the delicate vermiform appendix. Squeezed and cramped, the appendix becomes irritated. Inflammation sets in. Intense pain comes. Then—presto—you are on your back, the sweet and heavy fumes of chloroform are choking you, and the appendicitis specialist bends over you with a sharp knife."

### What They Meant.

A Scotch clergyman named Fraser claimed the title and estates of Lord Lovat. He tried on the trial of the case to establish his pedigree by producing an ancestral watch on which were engraved the letters S. F. The claimant alleged that these letters were the initials of his ancestor, the notorious Simon Fraser, Lord Lovat, beheaded in 1747 for supporting the young pretender. The letters, engraved under the regulator, were shown to stand for "Slow, Fast," and the case was laughed out of court.

### Unrecorded Dreams.

The subject of dreams is one of the most intricate and perplexing in the entire field of mental philosophy, and it has not yet met with that amount of attention which its importance would seem to demand. Sir William Hamilton, the great metaphysician, held that "whether we recollect our dreams or not, we always dream." To have no recollection of our dreams does not prove that we have not dreamed, for it can often be shown that we have dreamed, though the dream has left no trace upon our memory.

### Tit For Tat.

He rejoiced in the not very humorous name of Wood, and he prided himself on his jokes and smart repartee. Few of his friends had escaped the lash of his tongue, and he had victimized many by his practical jokes—in fact, he never lost an opportunity of being funny. One day he met a friend whose name was Stone, and naturally a name like that was too good a chance to miss.

"Good morning, Mr. Stone," he said gaily; "and how is Mrs. Stone and all the little pebbles?"

"Oh, quite well, Mr. Wood," was the withering reply. "How's Mrs. Wood and all the little splinters?"

### Milk In the Sickroom.

Milk is the chief article of food and nourishment in every sickroom and hospital, and every physician and nurse should know the source of supply, its purity, before ordering it in any form for invalids and convalescents. It is not enough that it comes as "country milk." There must be integrity and experience back of it. It has been scientifically demonstrated and proved that pure milk products are the most nutritious, economical and easily digested foods when the milk is obtained in all its purity and kept so from pasture to consumer.—Charles Elvey Hall in Leslie's Weekly.

### The Diver Bird.

A Dantzic correspondent writes: While swimming on a lake with her brood of five a diver bird was shot and, although mortally wounded, collected her young ones and dived for their safety. When her dead body floated to the surface the five little birds were still clinging with their beaks to her wings, but all had been suffocated by remaining too long under the water.—

## A Heavy Load to Carry.

Along with dyspepsia comes nervousness and general ill-health. Why? Because a disordered stomach does not permit the food to be properly digested, and its products assimilated by the system. The blood is charged with poisons which come from this disordered digestion, and in turn the nerves are not fed on good, red blood, and we see symptoms of nervousness, sleeplessness and general breakdown. It is not head work, nor over physical exertion that does it, but poor stomach work. With poor, thin blood, the body is not protected against the attack of germs of grip, bronchitis and consumption. Fortify the body at once with Dr. Pierce's Golden Medical Discovery—a rare combination of native medicinal roots without a particle of alcohol or dangerous habit-forming drugs.

A little book of extracts, from prominent medical authorities extolling every ingredient contained in Dr. Pierce's Golden Medical Discovery will be mailed free to any address on request by postal card or letter. Address Dr. R. V. Pierce, Buffalo, N. Y.

Many years of active practice convinced Dr. Pierce of the value of many native roots as medicinal agents and he went to great expense, both in time and in money, to perfect his own peculiar processes for rendering them both efficient and safe for tonic, alterative and rebuilding agents.

The enormous popularity of "Golden Medical Discovery" is due both to its scientific compounding and to the actual medicinal value of its ingredients. The publication of the names of the ingredients on the wrapper of every bottle sold, gives full assurance of its non-alcoholic character and removes all objection to the use of an unknown or secret remedy. It is not a patent medicine nor a secret one either. This fact puts it in a class all by itself, bearing as it does upon every bottle wrapper The Badge of Honesty, in the full list of its ingredients.

The "Golden Medical Discovery" cures, weak stomach, indigestion, or dyspepsia, torpid liver and biliousness, ulceration of stomach and bowels and all catarrhal affections no matter what parts or organs may be affected with it. Dr. Pierce's Pleasant Pellets are the original little liver pills, first put up 40 years ago. They regulate and invigorate, stomach, liver and bowels. Much imitated but never equalled. Sugar-coated and easy to take as candy. One to three a dose.

## FINEST BANK NOTE PAPER.

Where the Material For Our Green-backs Is Made.

The national flag flies over the "government mill," owned by the Crane family at Dalton, Mass., because all the paper for the United States green-backs is made there. It is one of a group of mills in which the Cranes have made paper for more than a century. The founder was Zenas Crane. Before he could get the first mill started he had to have a large quantity of rags. But rags were scarcer in those days than now. The Italian had not then arrived, the junk shop was unknown, and, although the rag buyer passed through the streets of Boston once a week, he had not yet appeared in the western part of the state. This resulted in an appeal to the people, based on high economic and patriotic grounds. Handbills appeared with the headlines in large type: "Americans, encourage your own manufactures, and they will improve! Ladies, save your rags!"

They were carried to all the homes and shops in Berkshire and adjoining counties, urging "every woman who has the good of her country and the interests of her family at heart" to save her rags and send them to the new factory or to the nearest store-keeper, "and a generous price will be paid." When the mill was ready the rags were there in abundance, and operations at once commenced. The working force consisted of four men, two girls and a small boy, with Zenas Crane as superintendent and chief proprietor. The paper was made in hand molds, and the output was 100 pounds a day. Today the output is many tons of the finest bank note paper.—World's Work.

## THE WIND BELL.

How It Is Constructed In Japan, Its Original Home.

The wind bell, as its name implies, is made to ring by the action of the wind—in fact, the wind bell is not a bell at all, strictly speaking, but a contrivance composed of a number of pendants suspended in a circle from a ring and hung close together so that they will come into contact and produce sounds when swayed by the winds.

Some wind bells produce sounds that are pleasing and musical. Some are made with glass pendants, some with pendants of metal; some are very small and simple in construction, others are large and massive and elaborate.

The original home of the wind bell is Japan. In its simplest form it is composed of a number of narrow strips of glass, perhaps six inches in length, suspended lengthwise from a wire ring about two inches in diameter. Within the circle formed by the strips thus suspended is hung by one corner a little square piece of glass halfway down the length of the long strips, the strips and the square piece ornamented with various Japanese characters and designs. This wind bell may be hung up wherever a breeze will strike it and blow the strips into contact with one another and with the square suspended among them.

## Artificial Birds.

In very early times men began to experiment with a view to making artificial birds and animals that would imitate the motions of living creatures, and if we are to believe the records, some of the artists in that line were remarkably successful.

Archytas of Tarentum, who lived

ment or Jan. 1, 1901, the day preceding the twenty-first anniversary of his birthday.

"This rule is a part of what is known as the common law and is applied in this country in all states where the common law of England has been adopted and remains unchanged by statute. A man may vote or make a valid will on the day preceding the twenty-first anniversary of his birthday, although the right in the one case and the capacity in the other are given only to persons who have reached the age of twenty-one years."

## Undertaker For Pet Birds.

An old branch of business conducted by a New York establishment devoted to supplying and boarding feathered pets is that of bird funerals. Children who have lost their canaries or other songsters through disease or accident bring the little cadavers there to be laid out in becoming style.

Tiny coffins just large enough for a bird are kept in stock; also quantities of pale pink and blue cotton. The latter is used for filling the bird coffin, and on it the bird is laid. The effect when birdie's remains are "decently" composed upon the pink and blue is excellent, sufficiently so to console the little mourning master or mistress. The children then convey their coffin away for interment. Funeral expenses are light.

## Perfumes.

Perfumes have been used from the earliest times. The burning of perfumed incense was one of the rites of the Hebrew and pagan religions, and perfumes of various sorts were used by nearly all the nations of antiquity. Both the Romans and the Greeks were skilled in making perfumery. It was from the Arabs, who possessed the art of preparing perfumed waters, that the use of perfumes was introduced into mediaeval Europe.

## "Journal" and "Journey."

Strictly speaking a "journal" should be a daily publication, although the word no longer has that limited use. The case of "journey" is exactly comparable. Even to Chaucer it still meant a day's progress, and in the fourteenth century it was possible to speak of one country as being "fifty-two journeyes" distant from another, a "journey" being reckoned usually as twenty miles. But "journey" calls up no suggestion whatever of a day now.

## Guilty Stains.

"What are you doing, Willie?" asks the little sister, noticing Willie washing jam from his hands and face.

"S-sh!" Willie replies, industriously scrubbing. "I got into the pantry while mamma was out, and now I'm taking an immunity bath."

## The Wood Pile.

Proofreader—You speak here of Nutrit's house as "a magnificent marble pile." Editor—Well? Proofreader—Well, it isn't marble at all. It's a frame building. Editor—That so? Then just substitute "wood" for "marble."

Though I am poor, send me to carry some gift to those who are poorer, some cheer to those who are lonelier.—Van Dyke.

## MIND AND MUSCLE.

Influence of Former Upon the Latter Plainly to Be Seen.

In all feats of skill the influence of the mind is most important. To perform in thoroughly good style any difficult feat of skill it is absolutely neces-

## Dr. Von Stan's Pine-apple Tablets

Doesn't it stand to reason that nature herself has in herself a cure for our ills—and doesn't it stand to reason that nature rebels at many of the nauseous so called remedies, that pass as cures for stomach ailments?—

Dr. Von Stan's Pine-apple Tablets are nature's cure in very deed, because they're purely vegetable and are extracted from one of the most luscious fruits that grows—and what a boon they have proved themselves to be, is best expressed in the hundreds of unsolicited testimonials that could be printed here—and which will be produced if you're a bit credulous.

How is your stomach affected?—Do you have sour stomach—distress after eating—weight on the stomach—wind on the stomach—Loss of appetite—dizziness—nausea—stomach headache and other uncomfortable derangements?—the first tablet will give you relief and persistence will cure—and there's no case of stomach trouble so stubborn as to battle Dr. Von Stan's Pine-apple Tablets

some of the artists in that line were remarkably successful.

Archytas of Tarentum, who lived in the year 400 B. C., constructed an artificial pigeon that could fly, but which was not able to resume its flight after once alighting.

John Muller, a German of great mechanical skill, constructed an artificial eagle, which on the entry of Emperor Maximilian into Nuremberg flew out to meet him, and, returning, alighted on the city gate to await his approach.

## WHEN IS A MAN 21?

**Think a Moment Before You Attempt to Answer the Question.**

"It is often said that law is applied common sense," said a professor of the Yale Law school the other day. "While it is true that law principles originated in common sense, the law itself is the combined experience of many men, for no two men uneducated in law will agree as to what is applied common sense."

"Then there are many rules of law which undoubtedly have a common sense origin, but, conditions having changed, history fails to disclose this origin. Yet these very rules must be retained in order not to shake personal and property rights. Therefore no man can depend on his own uneducated common sense to know the law."

"To drive this statement home I have frequently put to an incoming law class the question, 'When does an infant become of age?' The answer is always unanimous, 'When he is twenty-one years old.'"

"The next question appears ridiculous to some and makes them laugh, while others set their alleged common sense at work and never with correct result. 'When is a man twenty-one years old?'"

"One student says, 'On his twenty-first birthday,' but of course he does not mean it, for he is about a year out of the way. Another ventures, 'On the twenty-first anniversary of his birthday.' This sounds better, but even if correct is not specific enough. 'When he has completed his twenty-first anniversary,' 'At the beginning of that day' and 'On his twenty-first anniversary, at the precise hour of his birth,' are other answers."

"And then I surprise the guessers by saying that they are all wrong."

"In computing time it is a general rule that the law disregards part of a day. In applying this rule, suppose a man was born just one minute before midnight on Jan. 2, 1880."

"At midnight he had lived but one minute, yet the day on which he was born was ended and the law considered him one day old. So in computing the twenty-one years which a man must live in order to reach his majority we do not begin with the moment of birth, but with the commencement of the day of his birth."

"Now, since we must start with the first moment of Jan. 2, 1880, it is perhaps natural to say that this man did not become twenty-one years old until the close of Jan. 1, 1901. Mathematically speaking, this is true."

"Twenty-one years in that sense requires that the last moment of Jan. 1, 1901, should have arrived in order to make the man of age, and obviously he was of age at that point of time. But here again the rule is applied."

"As the man was of age on the last moment of Jan. 1, the law disregards the entire part of the day intervening between the first moment and the last, and consequently he became in law twenty-one years old on the first mo-

ment of the artists in that line were remarkably successful. The mind is most important. To perform in thoroughly good style any difficult feat of skill it is absolutely necessary that the mind must be free from fear, anxiety or nervousness. I knew once, years ago, a man who had been a bullfighter in Spain. During one of his glowing accounts of the sport I expressed my surprise that he should have left the life. His reply was: "One day I was about to enter the ring and I had a little creepy feeling of fear. Then I stopped for good. The man who feels fear is sure to be killed."

And it is equally true that the man who fears is heavily handicapped, no matter what the contest may be. Anxiety and nervousness are closely akin to fear, and both are so powerful in their effect as to render it almost impossible for one to perform perfectly any difficult or delicate feat of skill. The man who is afraid or anxious or nervous is almost sure to fail.

All emotions when intense have a powerful effect on the muscles. This is plainly seen in the tension of the muscles, clenching of hands and arms, as well as of the face, in anger, in the spasmodic breathing of excitement, in the muscular weakness and trembling of fear, and in many other conditions that might be mentioned. Now, in feats of skill of whatever nature, whether balancing, juggling, marksmanship, tumbling or shot putting, it is necessary that just the right muscles must be used at just the right instant and to just the right degree. When, however, the muscles are disturbed by emotional excitement, such delicate adjustment is impossible and the probable result is failure.

The mental state most conducive to success in games of skill is confident calmness. And by practice this state of mind may be made a habit—a habit most valuable in all games of skill, even in that game of skill called life.—Dr. W. R. C. Latson in *Outing*.

## LIVING ON STILTS.

**A Strange Sight in the French Turpentine Growing Country.**

People live on sixteen foot stilts in the remarkable turpentine growing country of France. They don these stilts after breakfast and do not remove them again till it is time for bed.

There are two reasons for the wearing of stilts in the turpentine country. One is the turpentine gathering. The other is the herding of the great flocks.

The turpentine comes from the maritime pine. This tree is tapped, a shingle is inserted, and from the shingle is hung a tiny bucket into which the turpentine drips. The tapping process is like that used on the American sugar maple.

Young pine trees are tapped low, but with each year's passage the incision is made higher, so that it is not long before most of the trees are tapped twenty or thirty feet from the ground.

Hence the huge stilts of the workmen. On these stilts they traverse the flat country, covering five or six yards with each stride, and quickly and easily they collect the turpentine that overflows the little buckets hanging high up in the trees.

It is for herding also that the stilts are useful. The country is very flat, and the herdsman unless he continually climbed a tree would be unable to keep all the members of his huge flock in sight. But striding about on his stilts he commands a wide prospect. He is always, as it were, upon a hill.

The stilt wearers carry a fifteen foot staff with a round, flat top like a dinner plate. When it is lunchtime or when they are tired they plant upright under them the staff and sit down on its round, flat top. Then in comfort, seated so dizzily high, they eat and rest and chatter—a strange sight to behold.

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

## Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent Lottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance!

Respectfully yours,

NATHANIEL W. REID.

The Kind You Have Always Bought

## One of Three Things Always Cause

# RHEUMATISM

Do you know the system rids itself of waste matter through bowels and kidneys? Yes, but by the skin as well.

As a matter of fact, the skin rids the system of more urea than the kidneys do.

If the skin, or bowels, or kidneys are unhealthy—they won't throw off enough urea. This urea is changed into uric acid—carried by the blood to joints and nerves—causing Rheumatism.

One never inherits Rheumatism. One does inherit weak kidneys, irregular bowels and bad skin action.

## Fruit-a-tives

OR "FRUIT LIVER TABLETS"

will positively cure Rheumatism because they increase the eliminating action of skin, kidneys and bowels—and make these three organs so vigorous and healthy that there can be no urea or waste retained in the system to poison the blood and irritate the nerves.

FRUIT-A-TIVES are fruit juices, combined with tonics—the whole forming the most effective cure for Rheumatism.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA.

"The female sex," said M. Calino tely, "is the most illogical in the world."

"What new proof have you of the ant of devotion of women to the nouns of logic?" he was asked.

"Why, take my wife," answered M. alino. "I had all the trouble in the world to get her to enter her thirties, and now, a dozen years later, I can't get her out of them."

### False Pretense.

"No, madam," said Bridget, "I'll not live widout two weeks' notice. That as the contrhact an' I'll howld yez 'it."

"But," replied Mrs. Hiram Offen, you broke the contract in the first place by representing yourself as a jok."

### Put Her Foot Down.

Naggin—But why don't you argue the matter out with your wife? Meekton —Hush! My wife has very positive leas on that subject. The moment I pened my mouth my wife would put er foot down, and— Naggin—The lea! I should think you'd choke to eath.

### He Knew.

Teacher—Now, Robert, do you know that an isosceles triangle is? Boy—'es'm. Teacher—Well, what is it? boy—It's one uv dem t'ings I gits lick'd fer not knowin' wot it is.—Judge.

There are some minds like either convex or concave mirrors, which represent objects such as they receive them, but they never receive them as they are.—Joubert.

## ABYSSINIAN APES.

They Have Chiefs, Guards and Sentinels When on the March.

Very similar reports are made from different parts of north Africa in regard to the monkey tribes that occupy that continent from Morocco to Abyssinia. Just how far tribal relations may have tended to vary the species is a question quite as important as that of language. Some points of interest are found in an English book, "A Visit to Abyssinia." Says our author:

"I have mentioned that large numbers of monkeys frequent these hills. They move about in organized bands, and their proceedings are arranged in the most orderly and tactical manner. They are difficult to approach unless it is gradually and cautiously done, but mounted on a camel I have succeeded in getting within a few yards of them when they were crossing the path ahead of me, about fifty in single file following their leader and looking with their manes like small lions.

"Their movements are full of interest and well repaid observation. They have chiefs, sentries and advanced and rear guards on the march. The mothers carry their children on their backs exactly like the larger human creatures in these countries. They talk and chatter, the females being especially loquacious, quarrelsome and combative. These are clearly under the command of the elder males, whose gesture alone is sufficient to reduce them to obedience. They live in small caverns among the hills, but will most certainly avoid a direct return to their haunts if followed.

"They are less timid of men when these are mounted on camels than when on foot, experience having doubtless taught them that the former is usually traveling to a destination and that his steady, jogging pace is rarely interrupted by his curiosity. On one occasion, seeing a whole family tribe on the road home after a foraging excursion, I successfully tempted some of the younger ones to leave their ranks by quietly rolling pieces of bread and sugar at them, but the older members were above such weakness and went on in a stately way up the hill, disappearing over the ledge and reproving the youngsters as they retired."

### The Very Thing.

"Yes, ma'am," said the salesman, "an establishment like ours has its own literary staff. Here, for example, is an 'Ode to Our Furniture Polish,' written by our own poet and set to music by our own musician."

"An ode to furniture polish?" exclaimed Miss Peekay-Boob. "Why, that would be just the thing to take home, and try on the piano!"

### Immense.

"What's the difference between vision and sight?"

"See those two girls across the street?"

"Yes."

"Well, the pretty one I would call a vision of loveliness, but the other one—she's a sight."

### The Dim Past.

Professor (lecturing)—Oxygen, gentlemen, is essential to all animal existence. There could be no life without it. Strange to say, it was not discovered until a century ago, when— Student—What did they do before it was discovered, professor?

## The True Test of Oysters.

"The best oyster experts that I know of," said the captain of an oyster boat, "judge an oyster by the smell instead of by the taste. There is something about the smell of any oyster that indicates its condition to me much plainer than does the taste. People buy them and eat them probably on account of their taste. So also do they buy tea, coffee and the various grades of whisky and brandy for their taste, but all experts on those things pass upon them entirely by their smell. The professional taste taster or whisky taster, so called, never tastes them, but simply arrives at their taste by their peculiarities of flavor or, to speak plainly, smell. I can tell what price a load of oysters will be rated at when they arrive at the wharf here by opening up the hold of the boat and smelling. In eight cases out of ten I am right. It strikes oystermen as strange when they see persons going about from boat to boat, as they lie at the wharf, tasting oysters before they conclude to buy. Taste is all right, but if they don't smell right they will never taste right."

## American Tourists and Their Ways.

English people, as a rule, try to enter a hotel drawing room or any other public place as quietly as possible and endeavor not to interfere with the other occupants of the room more than they can help. A party of French or Germans will never dream of stopping to consider whether their piercing voices are deafening their neighbors, while Americans have a particularly maddening habit of reading their correspondence aloud in public without the slightest regard to other people who are reading or conversing in the same room. It is no doubt part of the same lack of breeding which leads them to hold conversations at the top of their very penetrating voices not only in public picture galleries, but also in continental churches, without paying any attention to the fact that a solemn service may be going on within a few yards of them.—London Modern Society.

## A Curious Coincidence.

The story of a queer coincidence is told by Sir Arthur Conan Doyle. While traveling upon the continent he visited a certain mountain inn, which was in winter, he learned, occupied only by two men. These men, imprisoned in a waste of snow and ice, had for all that period no communication with the world below. Here was a situation for a novelist! And the novelist accordingly began to let his imagination play about the possibilities of tragedy surrounding the two men on their mountain height. But the story was never written, for, happening to come upon a volume of Guy de Maupassant, which was new to him, he found therein, under the title of "L'Auberge," the very story he had meant to write.

## Sixty Thousand Seeds to the Plant.

The common purslane is one of the wonders of botany as far as seeds are concerned. A single seed of this plant will produce about twenty seed pods in a season. The average number of seeds in each of these, by actual count, is 6,000, making 60,000 in all. As far as we have been able to learn there is no instance of similar fruitfulness in any plant found growing in this country. A single plant of either the Jamestown weed ("Jimson"), the butterweed, the ragweed and some of the vervines produce an enormous number of seeds, but it is doubtful if any one of them produces one-fourth as many in a year

## HEALTH AND HABITS.

Tissue Income and Expenditure Must Be Made to Balance.

The day must come at some future period of sociological development when the instinct of self preservation will overrule the pernicious habits and customs of the present day fashions and necessity. Men will come to learn that tissue income and expenditure must be adjusted to a better balance if the human machine is to be kept in smoothly working order; that excess of either is a physiological sin which nature will surely avenge either on the individual or on his descendants; that sustained work of the best quality can only be performed when effort is kept well within the margin of accomplishment; that luxurious idleness and artificial excitement, when carried beyond the limits of a healthy counterpoise to the daily routine of active duty, bring about their neurasthenic nemesis as surely as over strenuous endeavor, and that the coming generation can be fitted to battle with the increasing complexities of life only if endowed with bodies that are structurally perfect and with nervous centers capable of producing throughout an average duration of life sufficient energy to enable the machine to perform satisfactorily the work whereto it has been set.

A more vigorous public sentiment, fostered by an example of greater self denial and more rigid adherence to simplicity of life on the part of those who set the pace and lead the fashions of the day, would do much to arrest the downhill rush of the multitude; pronounced social disapproval of the immoderate use of alcohol and tobacco and the stern forbidding of both under the age of puberty would shield the nervous centers from two of their most deadly enemies, and, though it might at first grate against popular feeling, the introduction by the legislature of an enactment whereby some form of compulsory military service was exacted from every healthy young man would materially contribute to the preservation of active minds in vigorous bodies to those who are destined to make or mar the future history of their fatherland.—Guthrie Rankin, M. D., in Detroit News-Tribune.

## CHILDREN'S GAMES.

The game of hare and hounds originated in England about 1640.

Leapfrog is mentioned in the works of both Shakespeare and Johnson.

The game of hide and seek came from Europe about the beginning of the seventeenth century.

Blind man's buff found its origin with the Greeks, among whom it was often indulged in by adults.

Skipping rope is a childish pastime of ancient origin. In place of rope a vine stripped of leaves was originally used.

The spinning of tops came from the Greeks. Records show that this kind of fun was in vogue at the time of Virgil.

Kite flying is about two centuries old in Europe. Probably it originated in China, where the practice of flying kites is very ancient.

The game of seeing who can hop the longest on one foot came from the ancient Greeks, among whom it was practiced by the youths for wagers.

## How to Learn a Foreign Language.

One may begin the attempts of free expression, and thus an independent

# The Best Hair Tonic

Hall's Vegetable Sicilian Hair Renewer. It tones up, invigorates, strengthens the hair-bulbs. The hair grows faster, thicker; stops falling out; does not split at the ends. Tested and tried for half a century. For the whiskers and moustache we make BUCKINGHAM'S DYE. It colors a rich brown or a soft black. R. P. HALL & CO., Nashua, N.H.

produces one-fourth as many in a year as the purlane does.

**A Human Nose Two Feet In Length.**  
Elephantiasis is a peculiar form of leprosy in which the limbs and features swell to horrible proportions and out of all semblance to the legs, arms and faces of human beings. Cases are known where the legs have become so swollen that they measured 4½ feet in circumference. The ears of the same victim, Walter Brisbane, an English sailor, were eighteen inches in length, and his nose elongated to upward of two feet when in the last stages of the horrible malady.—London Telegraph.

**Ancestral Memory.**  
As I walk along a dark, lonely road my ears are on the alert. I glance to right and left. I look over my shoulder. Where did I learn this habit? May it not be the memory disk giving off its record? My savage ancestor learned by long years of experience to be specially on his guard in a lonely place and in the dark. When my indignation is thoroughly roused I find my hands clench, there is a tightening of the lips, the teeth are more plainly visible, and the whole attitude is suggestive of making a spring. Here is a trait of early man, who gathered himself together and sprang upon his enemy to rend him with tooth and claw. I have often noticed that when people use the word "offensive" it is accompanied by a quiver of the nostrils and an involuntary movement of the nose. The imagination is still haunted by that piece of very offensive carrion which my primitive ancestor with a prejudice for raw meat found too strong for him, so strong that his nose rejected it at once.—Nineteenth Century.

**Why the Dollar of 1804 Is Rare.**  
There are two stories regarding the rarity of the silver dollar of 1804, the most generally accepted one being the one which accounts for the scarcity by saying that they were sent to Africa to pay the soldiers engaged in war between this country and Tripoli. There were only 19,570 of them coined. Another version of the story which accounts for their rarity is that a vessel bound to China with almost the entire mintage of that year was lost. The former story appears to be the most likely explanation.

**Cruelty.**  
"See here," grumbled the inmate of murderers' row, "ain't there a law against cruel and unusual punishment?"  
"Yes," answered the warden.  
"An' ain't I ter be hanged next week?"  
"I'm afraid you are."  
"Then what d'yer mean by sendin' me a bunch of story papers to read that ain't got nothin' but continued stories in 'em?"

**FITS CURED**

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you

**LEIBIG'S FIT CURE**

expression, and thus an independent use of the language, with a comparatively small vocabulary. Conscientious reading and well conducted conversations will then quickly enlarge the vocabulary and develop the facility of expression. But I cannot lay too much stress upon the fact that the free and exact rendering of one's own thought in writing is the most efficient exercise in acquiring a language. In mere conversation we are apt to slip over difficulties by permitting ourselves vagueness and inaccuracies of expression which would sternly demand correction—and correction, too, easily kept in mind—when the written words look us in the face. To quicken the efficacy of this exercise requires, of course, a teacher able not only to pound grammatical rules into the head of the pupil, but also to stir up in the study of the language a mentally active interest in the subjects spoken or written about.—Carl Schurz's Reminiscences in McClure's.

**Sailors on Strike.**  
That English soldiers or sailors should strike for more pay in a way such as we are accustomed to in trades sounds impossible, but such things have occurred, the last time being in April, 1797, when the sailors demanded higher wages and literally struck, otherwise mutinying. The admiralty agreed to meet their demands, but, not doing so at once, the sailors aboard the London struck or mutinied again, and for ordering the marines to fire, thereby killing some men, Admiral Colpoys and his captain were made prisoners by the sailors. On May 10 a special act was passed granting the increased pay, and the king pardoned the mutineers.—London Telegraph.

**Natural Spectacles.**  
Many birds are provided with natural spectacles, a transparent membrane called the third eyelid. This third eyelid when not in use lies folded in the inner corner of the eye. Two muscles work it, spreading it over the cornea or folding it up again much more cleverly than a man can put on or take off his spectacles. But for its third eyelid the eagle could not look at the sun. The spectacled bear belongs to Chile. Its Latin name is Ursus ornatus. It is black, and around its eyes pale rings are drawn which have exactly the appearance of a pair of goggles.

**Wind Velocity.**  
The average velocity of the wind is low, in most places between five and ten miles an hour, corresponding respectively to wind pressure of from two ounces to eight ounces a square foot. During portions of nearly every day, however, somewhat higher velocities are recorded, since the averages contain considerable periods of very light breezes occurring often within a few hours before and after sunrise and sunset. There are few days without periods of brisk breezes of from fifteen to twenty miles an hour.

**Rather Caustic.**  
"Did you tell your father I was a humorist?" asked the tall young man with long hair.  
"I did," replied the pretty girl, "and he laughed."  
"Laughed? Why, I thought he used to say writing jokes was hard on the brain."  
"So he did; but he says he never heard of your writing any jokes."

NEW ENGLAND TAVERNS.

**Rough and Ready Liquor Laws of the Early Days.**

In the early settlement of New England taverns were found to be a necessity, and hence were established by law. They were usually under the sanction and surveillance of the town officials, says Mr. Hudson in "The History of Concord, Mass.," and these officials had to grant, limit or revoke an innholder's license, either as a victualler or a seller of liquors.

The keeper of the ordinary might be a deacon, a military officer, a civil official or a deputy to the general court. His house was a convenient place for convocations, important or unimportant, and there might be held in it a parish meeting, a military election, a council of clergymen or an assessors' talk.

So important was the ordinary that its affairs, such as the establishment of prices, the limitation of patronage and the quality and quantity of goods to be sold, were regulated by colonial law.

In order to discourage the use of strong drink at these places it was enacted about 1634 by the colonial court that not over a penny a quart should be charged for all purchased out of meal-times. It was also ordered that not more than a penny a drink should be charged for any beverage. This was done to make the business of dram-selling unprofitable. At another time it was enacted by law that every innkeeper should sell good beer, "lest a traveler for want of it might purchase wine."

A law was passed at an early date by which a person appointed for the purpose could join a drinking company at a tavern and countermand any order made by any member of it for a drink in case he believed the member was drinking too much, and he could also direct how much liquor could be drunk.

At one time no tavern keeper was allowed to permit guests to remain at his house "tippling in an idle way." In 1664 a penalty was enacted for rude singing at inns, and the court also undertook at one time to determine how much a man might drink without being considered drunk.

POETRY IN MACHINERY.

**Glorious Work of the Modern Reaper a Fit Subject For Art.**

Poetry and art have these many years pictured the labors of men and women in the harvest field. From Ruth, the gleaner, to Millet's "Reaper" we have read the long, melancholy story of the toilers gathering with crude, wasteful, inhuman hand tools the crops of the world that the nations might have bread. Rightly understood, these two women, living so far apart, are pathetic monuments to the astounding stupidity that could permit such things when, as we now see, by taking thought a machine can release humanity from such senseless labor. With a singular perversity artists have delighted to paint pictures of foolish toil. Even now the critics tell us that neither the mower, the reaper, the thrashing machine nor the sulky plow is a fit subject for a picture.

Never was there a greater blunder. The glory and majesty of our mighty harvests, won for the feeding of the world with so little labor that the vast wheatfields seem lonely, the smoking clouds of chaff and straw blown high in the air from whirling thrashers, the great companies of men and horses marching to the horizon as the plows turn side sweeps of sod to the sun, the gang drills sowing mile long lucelike threads over the brown earth where

GLEN ISLAND

This popular resort is now running to capacity, every Cottage, holding its quota of pleasure or rest seekers. This week promises to be a very strenuous one, with the advent of the various Yachts Clubs for the Regatta which takes place on Thursday and many handsome yachts and motor boats are now at anchor in the harbor and every day adds to their number. They are certainly a delight to the spectator, skimming over the sun lit waters, with their gleaming white sails, and graceful contours, and it is not to be wondered at, that Glen Island attracts so many visitors and sight-seers from among our local townspeople. Napanee has contributed various parties, coming in by Steamer or launches this season. Among our most frequent and welcome visitors being the parties brought to Glen Island by Mr. John Walsh, on his commodious yacht the "Jessie Forward." These week-end parties given by Mr. Walsh are evidently very happy and popular affairs among his friends.

On Friday last Mrs. Arthur Beresford, of Chicago, a visitor to the Island caught a German carp, near Young's wharf, weighing 12½ pounds, the only one ever caught near the Island.

MADOLE & WILSON.

TAMWORTH.

Maribank played baseball with Tamworth at the fair grounds on Saturday last; game stood 16 to 20 in favor of Maribank.

Sidney Rose, Boston, is home for holidays.

Misses Jessie and Mary Simonds, Chester, Pa., are visiting at D. B. Floyd's.

William Penny, Nanaimo, B. C., is visiting friends in town.

July 12th was celebrated in fine style; about 4,000 people in attendance. The procession was lengthy, reaching around the block, both ends meeting. Miss Vrooman, Napanee, at T. M. Barrain's.

The Methodist gave a dinner on the 12th for the Orangemen; proceeds \$600.

Garrett Nealey was here last week buying horses for the western market.

(Rev. Harry Strike, and party, of Deseronto, passed through here Tuesday en route to Arden to attend the Alexander wedding on Wednesday.

Miss Howlistin, Detroit, is visiting at C. H. Rose's.

Wednesday afternoon's half holiday was enjoyed. Several families went to the lake for the afternoon. The baseball team played ball with the married men.

Alfred Belt, the South African financier is dead.

The steamer Arctic, under command of Capt. Bernier, sailed from Sorel, Que., on Saturday.

The Czar is believed to be on the eve of granting a Cabinet to the constitutional Democrats.

Twenty Nestorian families from near Tiflis will emigrate to the colony near Battleford, Canada.

Miss Alice Purdy, of Belleville, fell into a hoghead of water and narrowly escaped drowning.

The by-law to exempt the Central Foundry Company from taxation was carried at Port Hope, only two votes being polled against it.

The Hydro-Electric Power Commission will ask the companies developing power at Niagara Falls and Hamilton for the price of a minimum of 10,000

DESERONTO ROAD.

Mr. Robert Bowen has greatly added to the appearance of his house and drive house by a new coat of paint.

A new wire fence has been constructed across the front of Gilbert McGreer's east hundred acres along the road which is a great improvement on the old board fence recently removed.

The "Strawberry crop on this road was good this year and prices equally as good, Mr. Alex. Thompson is now known as the Strawberry King.

Mr. Levi Sagar has just completed his new brick hog pen on the farm now occupied by Reed brothers putting in cement floor and troughs.

Mr. Herchimer Aylsworth has been repainting his house this spring also has removed the doorway fence which adds much to the looks of the premises.

Wm Joyce wholives on Mr. Madole's farm is cutting part of Ed McCann's crop of hay on shares, also Robert Allen Sager of Deseronto.

Mr. and Mrs. Sills, of Toronto, have been spending a few days visiting Mr. and Mrs. Frank H. VanVlack.

Peter McTaggart, Esq., Postmaster at Albert, visited his son-in-law Mr. Frank Reid last Monday.

Our butcher, Fred Wilson, of Sand Hill, made a shipment of Cattle to Toronto last week, he is also running Mrs. Congers farm this season.

Mrs. Phoebe Campbell, of Caldwell Mills, back of Kingston who has been visiting her parents Mr. and Mrs. Samuel Sagar returned home accompanied by her sister Miss Hattie Sagar.

ODESSA.

Died at his home here on Friday, July 13th, John McCormac, aged sixty-eight years. The funeral was held at Railton on Sunday morning, and was largely attended. The remains will be brought from Railton vault for interment at Odessa cemetery, on Monday, July 23rd. Mr. McCormac is survived by a widow and six children Mrs. James Koen, Sharpston, Mrs. Cecil Woodruff, Colebrook, John, of Syracuse N. Y., William, Frank and Miss Jennie at home.

William V. Smith left on Monday night for Cobourg to attend the funeral of his brother-in-law, William Prescott.

John Cooke is visiting friends at Cobourg.

Mrs. Geo. Watts left on Tuesday for Oxbow, Assa. She was accompanied by Mrs. Joseph Sproule and Mrs. A. Baker, to Deloraine, Man.

R. H. Peters, general merchant, has sold his business to Ramon Bros., of Toronto, who are now taking stock.

A. C. Scott, late of Yarker, has opened up a bakery in Bond's old stand.

Workmen are rebuilding the Roman Catholic Church.

Miss Mamie Gardiner, New York, is visiting her brother, John Gardiner, at Broadview Farm.

Rev. D. W. Aylesworth and daughter, of New York, are visiting the old homestead, and their many friends here.

Judge Madden held revision of assessment court in the town hall on the 16th inst., when the following appeals were disposed of: C. H. Finkle, business tax, thrown off; E. O. Clark business tax, reduced to \$100; N. Sharp, assessment stands; Bell Telephone company business tax, reduced by \$1,000.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O. We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

MRS. LOUIS LACOMB.

SUFFERED FOR MONTHS.

Operation Advocated—Saved By Pe-ru-na.

Mrs. Louis Lacombe, Hayward, Wis., writes:

"I have followed your treatment as closely as I could and am now entirely well.

"We had two doctors and one said that I would have to have an operation performed before I could regain my health.

"We then decided to write you as to my condition, as I had been suffering nearly a year with severe pains and headaches at times so that I could scarcely stand up.

"Now I feel so well after a short treatment with your remedy, and am so grateful that I do not know how to express my thanks.

"I thank you many times for the kind advice I have had from you."

Write to Dr. S. B. Hartman, President of the Hartman Sanitarium, Columbus, Ohio, for free medical advice.

Weeds For Weeds.

Fred—So you are really going to marry that young widow, eh? Joe—Yes. Fred—She tells me you have promised to give up smoking. Joe—Yes, sort of mutual sacrifice, as it were. She agreed to give up her weeds if I would give up mine.

Athenian and Barbarian.

A westerner once wrote a letter to the late Mayor Prince stating that he was about to visit Boston and asking the mayor to tell him a good place to stop at. The mayor replied, "Just before the 'at'."

Concili.

Hicks—Your wife is a mighty sensible woman, isn't she?

Wicks—Sure! She married me.—Somerville Journal.

Philosophy.

A Kansas philosopher warns the mer against the girl who takes time to consider a proposal of marriage. He intimates that she is hopeful that something better will turn up. Still, the man she finally accepts can console himself with the reflection that she has discovered it wasn't possible for any.

great companies of men and horses marching to the horizon as the plows turn side sweeps of soil to the sun, the gang drills sowing mile long lacelike threads over the brown earth where springs the growing crop—these and a hundred other scenes are fit themes for any poet. In our fields are no sad multitudes of ill paid, short lived peasants, rushed and bent by the iniquity of the sickle. Why sing the sad song of the reaper when a grand, inspiring epic of the harvesting machine awaits the poet and painter who can see and understand?—Charles Barnard in Reader.

**"Where the Treasure Is," Etc.**  
 "Harold," said the heiress, "I have been thinking."  
 "Thinking of me, precious?" asked Harold.  
 "Indirectly, yes. I have been thinking that were you to marry me everybody would say you only did so in order to get my money."  
 "What care I for the unthinking world?"  
 "But, oh, Harold, I will marry you!"  
 "My own dar"—  
 "And I will not have people say unkind things about you, so I have arranged to give all my fortune to the missionaries. Why, Harold, where are you going?"  
 Harold paused long enough on his way to the door to look back and mutter, "I'm going to be a missionary!"—Judge.

**Star Rays.**  
 What causes the rays or pencils of light that seem to be thrown out by every star when seen by the naked eye? A German scientist finds that all stars show precisely the same rays, but that in the case of the brighter stars the rays are plainer and somewhat longer. It is further remarked that the rays seen by the left and right eyes differ, and that if the head be rotated the rays are rotated in a corresponding manner. It is thus concluded that the source of the rays is not in the stars, but in the eye itself, the middle of the retina being not perfectly homogeneous in its sensitiveness.

**How a Horse Sleeps.**  
 Horses always point one ear forward when they sleep. Exactly why it is lone no human being can tell, but the probability is that the practice is a relic of the time when they were wild and obliged to be on their guard even when asleep. Cattle, on the other hand, are apparently indifferent as to be position of their ears while sleeping, but no odds what position they lie in both are always pointed alike. Ask some observing horseman if it is not a fact that a horse always throws one ear forward when he sleeps.

**Commerce and Literature.**  
 "Do you think that a commercial career is to be compared to a literary career?" asked the high browed and melancholy youth.  
 "My boy," said Mr. Cumrox, "in business you can write your name on a piece of paper no bigger than a postal card and make it worth thousands of dollars. In literature you can write up reams of paper without making it worth 50 cents."

**A Man of Affairs.**  
 Collector (angrily)—Your master seems never to be at home. Faithful Retainer—He's a busy man, sor. He's that busy Ol'm thinkin' he'd find it hard to spare toime to attind his own funeral, sor—unliss, to be sure, they putt it off till he wor dead, sor.

Wyandotte Dairyman's Cleaner and Bleanser, MADOLE & WILSON.

being ponied against it.  
 The Hydro-Electric Power Commission will ask the companies developing power at Niagara Falls and Hamilton for the price of a minimum of 10,000 horse power for long-distance transmission.

**CHEESE BOARD.**  
 Board met in Council Chamber in the town hall on Friday last.

VanLoven Bros., Moscow, have come to Napanee cheese board as buyers of cheese.

**Recalling a Mailed Letter.**  
 Many times people would like to recall a letter after it has been mailed. This can be done even if the letter has reached the postoffice of its destination. At every postoffice there are what are called "withdrawal blanks." On application they will be furnished, and when a deposit is made to cover the expense the postmaster will telegraph to the postmaster at the letter's destination asking that it be promptly returned. The applicant first signs this agreement: "It is hereby agreed that, if the letter is returned to me, I will protect you from any and all claims made against you for such return and will fully indemnify you for any loss you may sustain by reason of such action. And I herewith deposit \$— to cover all expenses incurred and will deliver to you the envelope of the letter returned." In many cases persons have made remittances to fraudulent parties or irresponsible firms, not learning their true character until after the letter had gone, and have succeeded in recalling them.

**A Quick Start.**  
 O. W. Nickerson and J. S. Baker were residents of Harwick. Captain Nickerson, as he was called, was a man of means and very shrewd. Joe was less fortunate. One day the captain met Joe and said, "Come over tonight." Joe did so, and as soon as he entered the captain's home the captain took him into a distant room, closed all the windows and doors securely and said: "Now, Joe, I will tell you the secret of getting rich and you can pay me \$25. Be saving, of course, and when you do make a bargain with any one be sure that no one hears you, and then if you get the worst of it or want to back out you can. Now hand me the \$25."  
 Joe thought a second and then said, "Did any one hear us make this bargain, captain?"  
 "Not a soul," replied the captain.  
 "Well, then," Joe said, "I guess I'll begin on you."

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXII.

There was to be little delay. Avis would not hear of it, nor were either of her associates in this hazard anxious to prolong the intense strain that hung about their necks.

The condemned prisoner counts the minutes, but only because he still persists in clinging to the ever-present hope of executive clemency.

Effectually banish this dream from his mind, and time no longer serves as a factor in the game; since his doom is inevitable, the sooner the fatal hour arrives the better, to end the agony.

Which is not saying that Plympton believed they would assuredly meet their fate beyond the hanging gardens of the inclosed city, but he knew how they tempted the fates in undertaking so much, and, once having embarked in the enterprise, what was the use of delay?

Other things doubtless urged him on. There was a certain romantic interest in the fact, that he, of all men, should be concerned in a venture looking to the discovery of the fate of Dr. Jack Evans.

Lord Rackett could not forget the past, and his present enterprise seemed the antipodes of what he had allowed to govern his actions on that former occasion, when his hot desire looked toward making an end of this same American.

Well, China is a country where many things are done just the opposite way from which we are accustomed, and Plympton was satisfied to believe he must have become infected with the common retrograde movement most prevalent there.

Another coincidence that struck him as rather peculiar was the fact that while his previous adventures in connection with Dr. Jack had occurred in the South American Republic of Chili, his present scheme embraced a career of danger in the Chinese province of Chihli.

Larry was struck dumb with wonder when this singular fact was mentioned to him, but he found himself unable to decide whether such a coincidence would redound to their credit or not, as there had been a new alignment of forces since that long-past engagement during the time of the Badumore affair.

They had secured comfortable quarters—that is, they were as good as might be expected, considering the conditions surrounding them.

Plympton knew the Chinese were not fools, and that there was a secret system of espionage in vogue at Peking by means of which every newcomer was placed under surveillance until his actual business became known.

Of course, this secret spy system was not to be compared with that of France or even Russia; but Li Hung Chang had not attended the coronation of the Czar and girdled the globe without picking up many valuable points by means of which his country might profit.

When they awaken to the condition that confronts them, and that the dreamy existence of the past centuries can no longer remain their heritage, there will be no nation on earth, save Japan, that might equal the rapidity with which the ready Chinese will seize upon the methods in vogue

Hence, it was of importance to deceive them as to the expected assistance they aimed to secure.

Lord Rackett soon evolved a plan.

He waited until later in the day, then changed his apparel and disguised himself as well as the conditions allowed, after which he cautiously left the hotel.

It was just evening, and the falling shadows offered every opportunity possible for success.

Plympton congratulated himself that he had done a neat job, and thrown off his guard the almond-eyed heathen Chinese who probably watched for him at the door of the hotel.

Perhaps he had reason for self-congratulation, but one can never be sure in dealing with these yellow "sons of Satan," as Plympton was wont to unjustly call them en masse; they have a way of getting in the last word or blow that is peculiarly aggravating to those who are accustomed to considering them an inferior race.

Meanwhile Larry and his cousin sat in the private parlor, which money had obtained, and conversed seriously.

Naturally, their talk was wholly of the matters in which they were so deeply concerned, and Larry was compelled to answer a score of very pertinent questions relating to his experience in the Royal Purple City, as the forbidden tract is known to the natives of Peking.

It was a subject that was not very pleasant to Larry, and under ordinary conditions he would have preferred to have dropped it like a hot coal; but since they were destined to make the dangerous trip under the mighty walls again, it seemed only right that they should take advantage of the mistakes attending his first venture.

So they talked and waited, and indulged in many hopes, even while battling with fear.

The windows were wide open, for the season was still mild for this northern climate.

Thus they could hear the strange jargon of sounds that would be apt to ascend from a great Chinese city after nightfall.

An inspired pen would be required to describe the scene in a manner to do justice to its many odd and remarkable characteristics—the gay shops, the streaming banners, the colored lanterns, the surging crowds of quaintly-dressed people, the cries of mendicants, vendors of everything under heaven, it seemed; the eternal snapping and crackling of countless firecrackers to frighten away evil spirits, or celebrate some anniversary mayhap; the shrill clatter of passers-by, or the twang of an abominable sam-sau; these things, taken collectively, made it pretty interesting for any one who cared to thrust a head outside the hotel window and listen.

Perhaps a fire in some bamboo section would start up for the special detection of the visitor; the alarm would be given by a fire watchman ensconced in his elevated tower at the top of tall bamboo poles, gongs would crash and intense excitement attend the run of the antiquated hand-engine brigade to the scene of the conflagration, a scramble in which half the city's population seemed to take part.

The thought of a fire among such in-

strain that seems a part of a Celestial's education.

Satisfactory arrangements were concluded.

The agent expressed no surprise whatever at the intelligence he had received.

Indeed, so far as his manner indicated the state of his feelings, one might suppose it was an everyday occurrence for a foreign lady to attempt an entrance into the prohibited section of Peking in order to look upon the sacred spot where one dear to her had yielded up his life blood.

This fact served to increase Plympton's suspicion that he knew all about their affairs; still, it might simply be the peculiar reserve of the man, a faculty possessed by all his countrymen, and which characteristic trait should make the Chinese unequalled as diplomatic agents.

So far all was well.

Plympton had made definite and permanent arrangements with the agreeable Foo Chong, of which he would presently speak; and, in case all went well, by another night they would be given the opportunity desired to attempt the dangerous task upon which Avis had so resolutely set her mind.

(To be continued.)

### STORIES OF "K. OF K."

#### Lord Kitchener of Khartum Generally Has His Own Way.

A few months ago "K. of K."—as the British have nicknamed Lord Kitchener of Khartum—found himself engaged in a prolonged discussion with the commandant of a native corps in India who had applied for funds to fit his men out with brand new uniforms.

The application was refused, only to be put forward again more urgently than ever. After this had happened several times, says the Grand Magazine, "K."s patience became exhausted, and he sent word to say that he would come and inspect the corps himself.

The colonel rubbed his hands with delight, and on the appointed day carefully instructed his dusky warriors to don their oldest and most ragged garments, in order to furnish a practical demonstration of their sartorial requirements. The commandant was reckoning without his host, however, for Lord Kitchener had no sooner run his critical eye down the ranks than he saw through the other's little device. A grim smile played about the corners of his mouth.

"Ah, Colonel Jones," he exclaimed heartily, "I congratulate you on the appearance of your men. They're in the pink of condition—positively bursting through their uniforms!"

When Lord Kitchener once makes up his mind about anything it requires a very determined will indeed to turn him from his purpose. On one occasion a difference of opinion had arisen as to the amount of money he might expend on the conveyance of stores to the front. He wanted a couple of thousand pounds for the purpose, but a niggardly pay department at home protested that the estimate was much too high.

"Can't do it for less," was the laconic response telegraphed to Pall Mall.

This, however, only evoked a reply that he would not be allowed more than a quarter of the sum asked for. To everybody's intense surprise "K." wired back, "All right!" and proceeded to carry out the work he was engaged on.

When the expedition was over, however, the Treasury officials were electrified to receive from its organizer a bill reading as follows:

"1. To conveyance of military stores, as per estimate, £500.

"2. To supplementary expenses, £1,500."

### MAKING SPECTACLE LENSES.

Process Through Which the Glass Is

## INTERCHANGE SCHOLARS

### UNIQUE SCHEME OF MR. W. BLAKISTON, OF YORKSHIRE.

Proposes That 120 British Lads Should Be Sent to the Colonies and Replaced by Our Boys.

Mr. W. Blakiston, of Darlington, Yorkshire, England, is the originator of a scheme for an interchange of visits between schoolboys from the Mother Country to the colonies, and from the colonies to England. The proposal has been submitted to Lord Meath, the leading figure in the Empire Day movement, who has expressed cordial approval of the scheme.

Mr. Blakiston said his idea was to endeavor to produce a conception in the collective mind of young Britain of the extent and magnitude of the Empire. He believes that will be best brought about by taking, in the first instance, boys from England and Wales on a visit to the various colonies. There they should be encouraged to make friendships with the colonial youths, who should also be prepared to meet them in a fraternal spirit. The bond of friendship would perhaps be best cemented by jointly partaking in physical sports and manly games. But in all that was done sight should never be lost of the importance of imparting a knowledge of the Empire to all the boys. On leaving the Mother Country, the greatest freedom compatible with disciplinary control should be permitted the boys—that is, the restriction by the teachers who would accompany them should be of the smallest. In fact, the boys should be encouraged to regard themselves as delegates.

The real desire at the back of the proposal was to bring about a reciprocity between the youth of the Mother Country and the colonies, to cause them mutually to wish to participate in the unification of the Empire, believing that such unification would be for the common moral, social, and political good. In the first instance, he would try the boys of England and Wales, and as the plan developed it would naturally embrace both Scotland and Ireland.

### NOT OBJECTS OF CHARITY.

Asked how he would propose that it should be set on foot, he said he thought it might be taken up by the Empire League, and then submitted, with the authority of the league behind it, to the various county councils. It should not have the faintest tinge of charity about it, but should be a national movement for the ultimate good of the nation, as the boys—selected with the greatest care—would be practically serving an apprenticeship to enable them to become most valuable members of the Empire. Of course, his idea was merely a suggestion; he would leave the details to be carried out by Lord Strathcona and others.

The cost would, Mr. Blakiston thought, be inconsiderable. To send out 120 boys of the age of 13 or 14 years—two from each county, four from London, and two each from six of the largest cities in England—need not cost much more than £2,500 a year. The selection would, in the first place, be made from the elementary schools, by the education committees of the respective county councils. Each boy should be of the average height of English boys of his age, in robust health, should pass a medical examination, and should be able to play football, cricket, and go through physical drill. He should have the full approval of his parents, and should pass a definite examination in history, geography, and the commercial products of the respective colonies. The boys should be accompanied by four teachers, from 30 to 35 years of age, of robust health, medically fit and fond of physical exercise. The education should be continued on

dreamy existence of the past centuries can no longer remain their heritage, there will be no nation on earth, save Japan, that might equal the rapidly with which the ready Chinese will seize upon the methods in vogue among Western people, and beat them at their own game.

As imitators they stand in a class by themselves. And when that day comes, Yankees and all other traders will have to compete with the shrewdest and keenest merchants upon the face of the earth, though their honesty is a strong point in their favor.

Larry had himself expressed surprise that no enterprising American midget had entered the field with a cheap, machine-made household idol; but it was probably the low price of labor in China that had prevented such an expansion of trade; most certainly there were many who would have felt no scruples about the matter had the investment appeared inviting.

To deceive any prying official who might take it upon himself to feel an interest in their welfare, and seek to discover the why and wherefore of Lord Rackett's return, accompanied by friends, the head of the enterprise scattered it far and wide that he was in Peking to consult with Sir Claude MacDonald, the British Ambassador, regarding the now famous New Thwang railway concession.

As for Larry, he was very careful about venturing any distance into the city alone, and kept a wary eye about him for enemies.

The thug is a native growth of India, but they have the same sort of a venomous loped in the land of the dragon, ready with cord and kniss to carry out his master's will.

It was all very exciting, but Larry did not thrive upon such a diet, and for one would be most devoutly thankful when the case was closed, especially should they come out with honors.

Ah, the little man certainly never once dreamed of the wonderful revelation awaiting them across the "dead line," and what a glorious ending this unequalled enterprise might attain.

Could he have furiously raised the curtain and obtained one fleeting glimpse of what the future held in store for them, perhaps his doubts would have instantly taken flight before the electrifying knowledge.

But, alas! it is not for human intelligence to thus look beyond the present, else would the labor of man go for naught, since all power must be given into the hands of the pitiful few.

More than once they were made aware of the fact that their presence in Peking was of deep interest to some party or parties, and that they were being closely watched.

This annoyed Plympton, and he set his wits to work, asking that a remedy might be found.

It was desired that they should have a speedy interview with the citizen of Peking to whom their letter was addressed.

Already had they driven past his place of business, seated in a wonderful vehicle that had been imported from the other side of the world, and had possibly once done royal duty as a Hyde Park Victoria.

Yes, there was the well-known name of Kai Wang beside the shop door, and a delectable specimen of Chinese beauty in the shape of a double-headed idol monstrously, with six arms, grained enigmatically in the window.

Foo Chong was the agent; and the maker of wonderful goods had evidently been paying a visit to his branch store, to settle accounts for the year, when fortune threw him in the way of Dr. Jack and Larry.

It was Lord Rackett's desire to secure a private interview with this agent, without the knowledge of these meddling spies.

Whether the industrious chaps were satellites of the Russian court, or served the Imperial Cabinet, it was all the same, since they were in a condition to bring ill-luck upon his head, and baffle all his plans if put into possession of a few points in the game.

crash and intense excitement attend the run of the antiquated hand-engine brigade to the scene of the conflagration, a scramble in which half the city's population seemed to take part.

The thought of a fire among such inflammable buildings, and during a high wind, would strike a stranger with horror until he discovered that these Chinamen are smarter than he has given them credit for, since a heavy fire wall divides the city into sections, and no blaze may ever get beyond the limit of its demarcation.

Perhaps a few mushroom cities built by the superior race of Caucasians might do well to profit by this plan of the Chinese.

Time passed tediously to those who waited.

A dozen times Larry leaped from the window to watch for Lord Rackett below, and doubts began to assail them concerning his safety.

Avis had many times turned her eyes upon the lights in the Palace of Heavenly Purity, rising high above the angular walls, and yearned to know the truth of what had happened in its shadow.

At length the door opened to admit some one. It was Plympton, who threw aside the long coat he had worn, and Plympton, whose serious face told that he had news of some sort to bring them.

## CHAPTER XXIII.

The first feeling that came over Larry upon sighting Plympton was satisfaction over his safe return.

There were more than ordinary perils hovering over his head while in Peking. True, he had no hand in the former invasion of the imperial palace, when the Emperor was induced to sign and seal the precious documents that made the great Anglo-American railway concession a fact beyond all question, but he had more recently shown his decided sympathy with one who had been there, and the Russian schemer was not apt to forget this.

Then Larry noticed that his big friend looked worried, and he began to speculate at once as to the manner of ill fortune that was about to descend upon them.

At least Lord Rackett had not found his path strewn with roses.

When he found the others awaiting him, he grew more cheerful, which proved that anxiety concerning their welfare had something to do with the strain upon his mind.

Avis had turned her eyes upon him, and though she asked no questions, there was a mute entreaty in her glance.

Who could blame the dear girl for being anxious under such peculiar conditions as surrounded them?

Everything that had to do with the man she loved, and who for years had been her very life, was of intense interest in her eyes.

Lord Rackett knew how eager his friends must be to hear the result of his little pilgrimage; he had gone through just such a siege himself many a time, and could sympathize with any one who suffered the tortures of suspense.

Hence he wasted no time with preliminaries, but plunged down to bare facts.

Such prompt action was what might have been expected of a blunt customer, and Plympton knew this was really no time to exercise what diplomatic courtesy he had acquired while in the consular service of his country.

Being quite at home in Peking, he had experienced no trouble in finding the region in which Foo Chong had his agency.

The redoubtable Chinaman was glad to see him, and Plympton guessed that in some way he must have received word of his intended visit.

He read the letter of Kai Wang gravely, and then announced himself as ready to carry out the wishes of the English milord to the letter; he had but to express a desire, and it would be done if Foo Chong could accomplish it; and much more in the same effusive

## MAKING SPECTACLE LENSES.

### Process Through Which the Glass Is Prepared for the Frames.

In the manufacture of spectacle lenses the bit of glass to be formed into a lens is fastened by means of pitch to a small block of hard rubber, so that it may be held. It is ground by being pressed against a rapidly-revolving cast-iron disc on a verticle spindle, and with curvature equal and opposite to that desired in the lens.

This is the "rough tool," and is kept moistened with emery and water. Several grades of emery are used in succession, changing from coarse to fine as the grinding proceeds.

The glass is then transferred to the "fine tool," made of brass, and compared from time to time to a standard curve in order to insure accuracy. In this second grinding the abrading material is rough.

Finally, the lens is polished by being pressed against a piece of cloth powdered with rouge and fastened to the rotating tool. The glass is now loosened from its block, turned over, and the reverse side of the lens ground. When this has been accomplished the lens is placed on a leather cushion, and held firmly in position by a rubber-tipped arm, while a diamond glass-cutter passing round an oval guide traces a similar oval on the glass below. The superfluous glass is removed by steel pincers, and the rough edges are ground smooth on Scotch wheels.

## BUTTERFLIES FOR WATER.

Real butterflies spread their lovely wings in the clear wavelets of the blue Mediterranean. Their scientific name is Pteropoda, or wing-footed. The commonest is perhaps the "boat butterfly." His body seems formed round a tiny brownish kernel, the size of a grain of wheat, and is covered with a shell soft as gristle and almost transparent; his wings are large, round, and clear as glass—so clear that before they can be examined they must be put in a saucer of water against a black ground. The shell is so loose that a mere touch separates it from the body. All the sea butterflies have on their tongues rows of strong-pointed hooks. They are all flesh eaters. It is wonderful to watch through the transparent shell and almost equally transparent body the motions of the heart. These butterflies lay eggs, just like the land ones, and, like the land ones, are fond of warmth and light.

## THOUGHTFUL.

Father of Large Family: "My dear, isn't it about time you were thinking of getting married?"

Elderly Daughter: "Goodness! I haven't thought of anything else for years."

## NEATLY TURNED.

Miss Prim: "In Siberia do they have reindeer?" Mr. Nerve: "Yes, but often they have snow, darling."

live colonies. The boys should be accompanied by four teachers, from 30 to 35 years of age, of robust health, medically fit and fond of physical exercise. The education should be continued on shipboard, so that the trip would be both educational and recreative, and should, in his opinion, extend over several years.

## HOT WEATHER AILMENTS.

At the first sign of illness during the hot weather, give the little ones Baby's Own Tablets or in a few hours the trouble may be beyond cure. Baby's Own Tablets is the best medicine in the world to prevent summer complaints if given occasionally to well children. The prudent mother will not wait till trouble comes—she will keep her children well through an occasional dose of this medicine. Mrs. Edward Clark, McGregor, Ont., says: "My little girl suffered from colic and bowel troubles but Baby's Own Tablets speedily cured her." And the mother has the guarantee of a government analyst that these Tablets contain no opiate or harmful drug. Sold by all medicine dealers or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brockville, Ont. Keep the tablets in the house.

## EXTRAORDINARY CASE.

### Englishman Whose Appearance Changed to Oriental.

The extraordinary case of an Englishman whose appearance changed to that of an Oriental is described by Dr. H. Wark Dodd, an ophthalmic surgeon in The London Lancet.

The change has occurred during the last seven years. No one has discovered the cause, although the man has been examined repeatedly and most thoroughly by Dr. Dodd and his colleagues.

Dr. Dodd in giving particulars of the case says:—

"The man came to the Royal Westminster Ophthalmic Hospital to see me in June, 1899. He was in the hospital for three weeks and nothing abnormal was detected in any organ or system.

"It was after this illness that the changes of appearance began to take place, and these have continued until now he has practically changed his identity, for from being a finely developed erect man of 5 feet 10½ inches in height and sixteen stone four pounds in weight, vigorous, athletic, with plenty of hair of a light brown color, a long blonde moustache and altogether fair in appearance, he has become in a few years smaller, stooping, 5 feet 8 inches in height, weighing 11 stone 11 pounds.

"He is weak, his hair is changed to mouse color, his moustache cannot grow a hair longer than a quarter of an inch and both are soft and sparse. His chin never needs a razor, his complexion is sallow, and his whole aspect is darker than before.

"His fellow-workers have christened him 'the Japanese,' though I fancy the late war may have influenced them in the choice of this name, for his type is not quite Japanese. Formerly he was a cheerful, capable, quick-moving intelligent man, with something of a sailor's readiness to lend a hand to anything that came along. Now, when not occupied, he is somewhat apathetic, a condition which adds something to his eastern bearing."

Dr. Dodd mentions another case of a similar type, and says he remembers other patients who should be included in the same category. It would seem, therefore, that there is some obscure disease, at present unknown to the medical profession, which has the effect of changing Europeans to an eastern appearance.

## TOO MUCH MARGIN.

"I am thirty-five years old," announced a woman of fifty-six at a tea last week. "And I am twenty-six," said the woman of forty-five. Then turning to a girl of seventeen, who stood nearby, she asked: "How old are you, Ethel?" "Oh," replied Ethel, "according to present reckoning, I'm not born yet."

# Sunlight Soap

## CHAINED IN PIGSTY.

Young Man Confined for Six Months With No Light.

A terrible case of barbarity of parents toward their son has been brought to light at Nantes, France.

Some six months ago a young man of weak intellect disappeared from the neighborhood. His father is a well-to-do farmer, and the neighbors were told that the youth had been sent away for the benefit of his health. The truth of the statement was doubted, and the other day the gendarmes paid a domiciliary visit to the farm. The missing youth was found chained up in a filthy pigsty, where he had been confined for six months, with no light and little air. The food supplied him was of the coarsest description. At night by way of exercise he was led about the farm attached to a stout chain. The unnatural parents, who plead in justification that their son was a lunatic, are to be prosecuted for their inhuman cruelty.

## AN IDEAL SUMMER HOME.

Nearly everyone who goes away in the summer has heard of "Minnicogashene" on the world-famous Georgian Bay. It has a very interesting history and the Indians have woven some weird legends around the place. It was formerly the summer home of a wealthy American, and on his death was bought by Colonel Cautley, a retired English army officer, who has made it an ideal summer home for many fortunate guests. There has always been an air of refinement and good taste about "Minnicog" which is to be found in very few Canadian summer resorts. For this reason the place has attracted from the beginning the very best class of people; not necessarily people of wealth, however, as the prices have always been exceedingly moderate considering the excellent accommodation and table.

In the fall the Georgian Bay is peculiarly beautiful, and at that season of the year Minnicog is delightful. The island is wonderfully endowed by nature, and when the leaves have changed color and in the cool clear atmosphere of fall, the place is at its best. It has grown so popular during the past few years that the summer months always find every room booked far in advance despite the numerous new cottages owned by the same management and the additions made to the imposing old house which was originally on the island. The summer guests have plenty of gaiety and amusement with fishing, boating, bathing and dancing in the pretty octagonal music room, which is a separate and distinct building, away from the main house or cottages.

For those, however, who prefer a very quiet holiday and the most peaceful enjoyment of the natural beauties of this lovely spot, the fall months at Minnicog will afford the greatest pleasure. It has often been said that this hotel is transformed in the fall with the smaller number of very congenial guests into a real country house party, and one's comfort and enjoyment are so carefully looked after as to leave nothing to be desired. Very good partridge shooting may be had close at hand and the fishing is even better at this season than in the summer. In fact, anyone contemplating a holiday could not do better than to include in their plans a visit to this delightful place in the fall.

WIRELESS IS TEN YEARS OLD.

## THE POVERTY-STRICKEN KAISER.

Cannot Keep Out of Debt on \$5,000,000 a Year.

Recent press despatches have announced that the kaiser has been forced to appeal to private bankers for a loan. Altogether his income reaches a total of \$5,000,000, the civil list proper being \$3,852,770 (which is paid the emperor as ruler of Prussia, the position of German emperor being without salary). The emperor has to depend on the five millions of his civil list, a sum which is entirely insufficient for his most necessary expenses, and this though he is not extravagant personally. In only one particular, that of keeping up his court with imperial magnificence, on a scale never before attempted by any king of Prussia, the kaiser goes to the extreme point. The support of his relatives is a heavy charge on his civil list, and upon his shoulders falls the burden of caring for his six sons and one daughter. Many of his relatives have separate courts, and the court of the crown prince, recently married, is very elaborate, the whole affair costing the emperor no less than \$250,000 per year. The imperial court of the emperor is extremely costly. If he wishes to travel he is surrounded by the same splendor as during the ordinary life of the court. He is always accompanied by an army of officials, chamberlains, and so forth; he carries his own horses, carriages, cooks, and other attendants.

"During the recent Mediterranean trip the kaiser gave away 800 diamond rings, 150 diamond pins, 33 necklaces, 30 gold watches, 100 gold snuff-boxes, and other articles, the cost of which was not less than \$300,000. And during his trip to Palestine, six years ago, he gave away presents valued at \$500,000. Apart, however, from the money he spends on royal and imperial luxuries, the kaiser devotes large sums to the arts and to the drama. He is constantly building statues at his expense and purchasing pictures to present to public galleries. He supports with his private purse the Royal Opera House and the Royal Theatre of Berlin, and the Royal Theatre of Weisbaden. The returns from these enterprises are trifling."—Public Opinion.

Something More Than a Purgative.—To purge is the only effect of many pills now on the market. Parmelee's Vegetable Pills are more than a purgative. They strengthen the stomach, where other pills weaken it. They cleanse the blood by regulating the liver and kidneys, and they stimulate where other pill compounds depress. Nothing of an injurious nature, used for merely purgative powers, enters into their composition.

## THE REAL CAUSE.

Teacher: Why did the ancients believe the world to be flat?

Bright Boy: "Because they didn't have no school globes to prove it was round."

Like little volcanoes of disease, the eruptions of eczema pour out discharges. Bad blood causes the trouble. The local remedy is Weaver's Cerate, and Weaver's Syrup will drive the poison from the blood.

Customer: "I want a piece of meat without fat, bone or gristle." Butcher (after having carefully examined his stock): "You'd better have an egg, ma'am!"

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

He: "Isn't dinner ready yet?" She: "No, dear, I got it according to the time you set the clock when you came in last night, and dinner will be ready in four hours!"

A Tonic for the Debilitated.—Parmelee's Vegetable Pills by acting mildly but thoroughly on the secretions of the body are a valuable tonic, stimulating the lagging organs to healthful action and restoring them to full vigor. They can be taken in graduated doses and so

R. PARSONS, 61 Wellesley Street, Toronto, Canada.

## CANADIAN HEN, BRACE UP!

You Are Not Laying All the Eggs That You Should Do.

Edward Brown, F.L.S., assistant Director Agricultural Department, University College, Reading, England, is at present in Canada studying our agricultural resources, giving special attention to the possibilities of Canada as a source of supply for dressed poultry and eggs of first quality for the British market. The British farmers are doing their best to meet the needs of their own markets, but it is an impossible task. The main source of supply for poultry and eggs is northern and eastern Europe. Great Britain paid Russia alone nearly \$15,000,000 last year for poultry products. The best eggs that are received come from Denmark, but, on the whole, the quality of the products received from foreign sources is not good.

Prof. Brown believes that Canada can supply a better quality of eggs and a finer type of dressed poultry than any of her competitors. Unfortunately the farmers in this country are at present unable to meet even the home demand, and consequently the exports of these products to Great Britain have been materially reduced. The markets are there, and why cannot the Canadian people supply them? asks Mr. Brown.

## AN ANGLER'S ELYSIUM.

According to advertisements all summer resorts are alike. They are the best ever—but if fishing is better anywhere else than it is in "Georgian Bay" we do not know where it is. There is a greater variety of fish in this water than anywhere else, and they are always hungry. No one ever counted the fish in the Georgian Bay, but those that have been caught there have been counted and eaten, and if you read the Government reports on fisheries, you know that Georgian Bay supplies more fish than any other equal body of water in the world. The only place you can afford to fish is where the fish are numerous, big and delicious in flavor, and that place is Georgian Bay—so the fishermen say. Suppose you send for booklet, issued by Grand Trunk Railway System free, telling about the home of the bass, pickerel, pike and the noble trout family. Address J. D. McDonald, Union Station, Toronto, Ont.

About the last thing on earth a man wants to think of is his finish.

## Wilson's FLY

could not do better than to include in their plans a visit to this delightful place in the fall.

## WIRELESS IS TEN YEARS OLD.

### Great Strides Made in a Single Decade of Experiment.

Wireless telegraphy is now ten years old. On June 2, 1896, there was filed in the British patent office a provisional specification "for improvements in transmitting electrical impulses and signals and in apparatus therefor," by one Guglielmo Marconi, residing at 71 Hereford road, Bayswater, England.

At the time this patent was applied for, says the Scientific American, the art of transmitting messages without wires was wholly unknown, in so far as its practice and utilization were concerned.

Marconi was perhaps the most persistent experimenter in the bridging of greater distances, while very early in the development of the new telegraphy Lodge turned his attention to the production of a selective system by means of electrical resonance.

The former succeeded so well in his task that from three miles in 1897 he was enabled to send and receive signals 3,000 miles in 1904, while the latter, although he failed to evolve a commercially selective apparatus, led the way for the timing of the sending and receiving circuits individually, and synchronizing them collectively.

Another important feature of recent date is the utilization of auto-detectors in connection with telephone receivers as receptors for the translation of incoming electric waves into the alphabetic code of dots and dashes.

De Forest was probably the first in the commercial field to use the auto-detector and telephone receiver, while Fessenden has conferred a lasting benefit upon science and humanity by his ingenious detector, the liquid barometer, an instrument that in its sensibility, its ruggedness and its simplicity is second only to the telephone receiver of Bell.

With these improvements, chiefly made within the past five years, wireless telegraphy is all that the most exacting critic could hope for, if we except selectivity, and in this especial branch of the work there is yet unlimited opportunity for the wireless inventor to exercise his ingenuity.

## A VISION OF DEATH.

### Woman Learned of Mother's Decease While in Hysterical Trance.

A well authenticated case of "second sight" is narrated by Mr. Theodore P. Brocklehurst in a letter to the London Spectator. It occurred in Yorkshire, and concerned a woman employed as cook in the house of a neighbor who was away holiday-making with his family.

The cook had violent hysterics one evening, declaring to another servant who was keeping house with her that she had seen her mother, who lived in Durham, and that somebody was trying to smother her. Next morning the cook received a telegram informing her of her mother's death.

Subsequent investigation proved that the woman's mother accidentally set fire to herself and was burned to death at exactly the hour when the cook had the alarming vision.

**A Tonic for the Debilitated.**—Purmarlee's Vegetable Pills by acting mildly but thoroughly on the secretions of the body are a valuable tonic, stimulating the lagging organs to healthful action and restoring them to full vigor. They can be taken in graduated doses and so used that they can be discontinued at any time without return to the ailments which they were used to allay.

Little Clarence: "Pa, what is an optimist?" Mr. Callipers: "An optimist, my son, is a person who doesn't care what happens if it doesn't happen to him."

**A Flatter of Importance to all those who are run down and debilitated is the fact that "Ferrovin" is the best tonic ever compounded. It gives strength and builds up the system.**

Mother: "Johnny, stop asking your father so many questions! Don't you see it annoys him?" Johnny: "Why, mother, it's not the questions that make him angry; it's because he can't answer them!"

Only those who have had experience can tell the torture corns cause. Pain with your boots on, pain with them off—pain night and day; but relief is sure to those who use Holloway's Corn Cure.

"That's arrant nonsense," said Mr. Henpeck, "about there always being room at the top." "Oh," his wife sarcastically replied, "when were you up to see?"

"Tis well to know a good thing," said Mrs. Surface to Mrs. Knowwell, when they met in the street. "Why, where have you been for a week back?" "Oh, just down to the store for a bottle of Dr. Thomas' Electric Oil," and Mrs. Surface, who hates puns, walked on. But she remembered, and when she contracted a weak back there was another customer for Electric Oil.

## UNFORTUNATE.

I bought a mine,  
The mine is mine no more;  
I struck a sharp,  
And he, not I, struck ore!

I bought some stock,  
Dame Fortune tried to woo;  
The market changed;  
It broke—and I broke too!

I loved a girl,  
So dear to me, I vow;  
I wedded her,  
And she is dearer now!

Some men have luck,  
Of me that can't be said;  
If luck struck me  
I'm sure 'twould strike me dead!

## THE END.

"Doctor," said the patient upon whom the hospital surgeon had just operated for appendicitis. "You're the same surgeon that amputated the first finger of my right hand when I had it crushed in a railroad accident a few months ago, ain't you?"

"Yes," answered the surgeon.  
"Well, you got my index then, and now you've got my appendix. I hope you are satisfied."

## BEYOND THE PALE.

(The French League for the Defence of Animals has produced a parasol for horses.)

"Dear me, I really can't afford to recognize Mrs. Smiler in that old-fashioned sun-bonnet."

farmers in this country are at present unable to meet even the home demand, and consequently the exports of these products to Great Britain have been materially reduced. The markets are there, and why cannot the Canadian people supply them? asks Mr. Brown. The fact is that at present the United States are developing their trade in dressed poultry with Great Britain in a marvellous manner. Up to the end of April this year they had supplied fully half of the total dressed poultry consumed in Great Britain, and the quality was very good. Prof. Brown before returning to England will visit the sources of supply of this product.

In discussing the methods adopted in shipping Canadian eggs to Great Britain, Prof. Brown expressed a preference for lined eggs over those shipped in cold-storage, as the latter had to be consumed immediately after being taken out, for they rapidly deteriorated in quality; but lined eggs were fairly safe as a market commodity. He also expressed some wholesome views upon the subject of fattening chickens for export, but was complimentary to Canadian feeders in as much as they were following the same methods which had been approved for many years in the Old World. Good breeding and correct conformation in chickens intended for fattening purposes cannot be too strongly emphasized, he said.

Prof. Brown said that he was especially delighted with the facilities for education and experimental work in agricultural science provided in Canada. He thought the Macdonald Agricultural College at Ste. Anne de Bellevue, Quebec, was destined to be the greatest institution of its kind in the world, while the Ontario Agricultural College at Guelph was worthy of all praise.

First Lazy Man: "After all, a clay pipe has an advantage over all others."  
Second Lazy Man: "How's that?"  
First Lazy Man: "Well, if you let it fall on the pavement you needn't trouble about picking it up!"

Cholera morbus, cramps and kindred complaints annually make their appearance at the same time as the hot weather, green fruit, cucumbers, melons, etc., and many persons are debarred from eating these tempting things, but they need not abstain if they have Dr. J. D. Kellogg's Dysentery Cordial and take a few drops in water. It cures the cramps and cholera in a remarkable manner and is sure to check every disturbance of the bowels.

"I saw a queer thing the other day," said the story-teller; "it was a duck swimming across a pond and a cat sitting on its tail." "Oh, nonsense!" cried the audience, incredulously. "How could a duck swim across a pond and a cat on its tail?" "Nevertheless," said the story-teller, "it's perfectly true. I should explain, however, that the cat was sitting on its tail on a wall."

# RUSSIAN CRISIS REACHED

## Equivalent of Martial Law Declared in Second Ukase.

A despatch from St. Petersburg says: By Imperial ukase, dissolving the Duma, the Czar on Saturday night expressed his displeasure at the action of the first Russian Parliament. Its successor is to be convoked on March 5, 1907, but the date of the elections is not yet fixed. A second ukase declares the capital and the surrounding provinces to be in a state of extraordinary security, which is only infinitesimally different from full martial law. This measure of safety is to provide for the outbursts which undoubtedly will be provoked by this daring measure.

Yet a third ukase relieves M. Goremykin of the Premiership, and appoints M. Stolypin Premier. He also retains his present post of Minister of the Interior.

### TEXT OF THE UKASES.

The text of the ukases, dissolving the Duma and declaring the capital and surrounding provinces in a "state of extraordinary security," are as follows:

"According to paragraph 105 of the fundamental laws, we order the Imperial Parliament dissolved, and fix the time for the convocation of the newly-elected Parliament for March 5, 1907.

"Regarding the time for the new elections to the Imperial Parliament we will later issue special indications.

"The ruling Senate will not fail to take proper measures to place this into effect.

(Signed) "NICHOLAS.  
"Peterhof, July 21."

The text of the second ukase follows: "In consideration of a report of the Council of Ministers presented to us regarding the necessity in the future for the preservation of order and public safety in the City and Province of St. Petersburg, we consider it necessary in the future for the preservation of order and public safety in the city and province of St. Petersburg, we consider it necessary to declare in the above city and province, instead of the State, of reinforced security which now prevails there, a state of extraordinary security. The prefect of the city and the governor of the province are entrusted with the rights thereto appertaining.

"The ruling Senate will not fail to take proper measures to place this into effect.

(Signed) "NICHOLAS.  
"Peterhof, July 21."

The Czar's decision to autocratically dissolve the Duma finally brings the regime, and 30,000,000 stalwart suffragists, headed by the bulk of the popular Assembly into an open conflict, besides demonstrating the terrible truth that the bayonet-supported reactionaries are still confident of the issue of the impending bloody conflict. Thirty thousand guards have arrived here, swelling the forces guarding the capital, which is under martial law, to five army corps. All now depends on the army's loyalty. The task, however, is stupendous. The outlook is very black.

### EPIDEMIC OF ASSASSINATION.

A despatch from St. Petersburg says: The political barometer is again falling. The confusion which seems to have taken possession of the upper spheres since the efforts to form a coalition Ministry failed, coupled with the alarming reports from the interior and the attitude of Parliament, make almost anything possible. There has been a marked renewal of apprehension that the crisis may end in a coup d'etat against Parliament. The assassinations of Vice Admiral Chouknin and General Kozloff, the discovery that behind the murder of the General was a big plot to kill not only General Trepoff, but Prince Putiatin and other members of the imperial family, and the general anti-parliamentary feeling, have all contributed to the present state of affairs.

### PEASANT DEPREDATIONS.

A despatch from Moscow says: A landlord, fleeing from Bobrov, in the Province of Voronezh, where a peasant uprising has taken place, has arrived here, and gives a frightful picture of the devastation. He describes the losses in the province as colossal. The troops are powerless to cope with the peasants who are marching in large bands, destroying practically everything. Not more than one-tenth of the estate are spared. The movement was started by the refusal of the landlords in the northern part of the Bobrov district to agree to an advance of wages to the farm women.

### ESTATES SACKED DAILY.

A despatch from St. Petersburg says: The peasant war, which began in the Province of Voronezh, is spreading over the central provinces. Fifteen estates near the City of Voronezh have been burned by the peasant mobs since Sunday.

A strike of hired laborers a week ago was brutally suppressed by the Government forces. Enormous masses of peasantry then congregated and marched in a great column several miles in length to sack all the estates in the neighborhood. Troops arrived and tried to disperse the mob with volleys of musketry. Many hundreds of the peasants were killed and wounded, but the horde stubbornly refused to retreat. The approach of masses of peasants by other roads made the position of the troops untenable, and they retreated, leaving the estates defenceless. The Government has sent artillery to the scene.

The railway stations are packed with fugitives, and landlords and their families are camping by the roadsides.

A large landed proprietor named Drozolsky and his family wandered for days across the fields before they reached Voronezh.

### TOWN A SEA OF FIRE.

A despatch from St. Petersburg says: Refugees from the Town of Syzran, which was burned on Thursday, describe the town as a sea of fire when they last saw it. The population of 33,000 fled to the fields. "It was useless to think of attempting to extinguish the flames. It is known that many lives have been lost. Anonymous letters, in which the fire was threatened, declare that a holocaust would be better than the misery of the present despotism. The bulk of the population is in the surrounding fields, without food or shelter, many being violently insane. The loss of life in the catastrophe, which exceeded one hundred, was largely that of children.

### MASSACRE OF JEWS.

A despatch to the London Tribune from St. Petersburg says that the Jews at Syzran are being massacred.

The Town of Syzran is still burning. The deaths are calculated at hundreds. There are immense fires also at Alathyn and Atkarsk. Hundreds of houses in each town have been destroyed. Thousands of persons are camping out. It is believed that all the fires are of incendiary origin.

### SEVEN DROWNED IN COLLISION.

Fast Ferry Cuts Steamer in Two Near Vancouver.

A despatch from Vancouver, B.C., says: Shortly after 2 o'clock on Saturday afternoon the Union steamship "Columbia" was cut in two by the

## THE LORDS DAY ACT

### THE LIMITATIONS FOR SUNDAY'S ACTIVITIES.

The Act Respecting the Lord's Day as It Was Finally Passed by Parliament.

The Act respecting the Lord's Day is in the following terms:

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada enacts as follows:

(1) In this Act, unless the context otherwise requires (a) "Lord's Day" means the period of time which begins at 12 o'clock on Saturday afternoon and ends at 12 o'clock on the following afternoon. (b) "person" has the meaning which it has in the Criminal Code, 1892. (c) "vessel" includes any kind of vessel or boat used for conveying passengers or freight by water. (d) "railway" includes steam railway, electric street railway, and tramway. (e) "performance" includes any game, march, sport, contest, exhibition, or entertainment. (f) "employer" includes every person to whose orders or directions any other person is by his employment bound to conform. (g) "Provincial Act" means the charter of any municipality or any public Act of any Province, whether passed before or since Confederation.

### THE EXCEPTIONS.

(2) It shall not be lawful for any person on the Lord's Day, except as provided herein or in any Provincial Act or law, now or hereinafter in force, to sell or offer for sale or purchase any goods, chattels, or other personal property, or any real estate, or to carry on or transact any business of his ordinary calling, or in connection with his calling, or for gain to do, or employ any other person to do, on that day any work, business or labor.

(3) Notwithstanding anything herein contained, any person may on the Lord's Day do any work of necessity and mercy and for greater certainty, but not so as to restrict the ordinary meaning of the expression, "work of necessity or mercy," it is hereby declared that it shall be deemed to include the following classes of work:

(a) Any necessary or customary work in connection with divine worship.

(b) Work for the relief of sickness and suffering, including the sale of drugs, medicines, and surgical appliances by retail.

(c) Receiving, transmitting, or delivering telegraph or telephone messages.

(d) Starting or maintaining fires, making repairs to furnaces and repairs in cases of emergency, and doing any other work, when such fires, repairs, or work are essential to any industry or industrial process of such a continuous nature that it cannot be stopped without serious injury to such industry, or its product, or the plant, or property used in such process.

(e) Starting or maintaining and ventilating, pumping out and inspecting mines, when any such work is essential to the protection of property, life, or health.

(f) Any work without the doing of which on the Lord's Day, electric current, light, heat, cool air, water, or gas cannot be continuously supplied for lawful purposes.

### CONVEYING OF TRAVELERS.

(g) The conveying of travelers and work incidental thereto.

(h) The continuance to their destination of trains and vessels in transit when the Lord's Day begins and work incidental thereto.

(i) Loading and unloading merchandise at intermediate points on or from passenger boats or passenger trains.

(j) Keeping railway tracks clear of snow or ice; making repairs in cases of emergency, or doing any other work of a like incidental character necessary to keep the lines and tracks open on

prize, or reward, or to be present thereat, or to provide, engage in, or be present at any performance or public meeting elsewhere than in a church at which fee is charged directly or indirectly, either for admission to such performance or meeting, or to any place within which the same is provided or for any service or privilege thereat.

(2) When any performance at which an admission fee or any other fee is charged is provided in any building or space to which persons are conveyed for hire by the proprietors or managers of such performance or by anyone acting as their agent, or under their control the charge for such conveyance shall be deemed an indirect payment of such fee within the meaning of this section.

6. It shall not be lawful for any person on the Lord's Day, except as provided in any Provincial law now or hereafter in force, to run, conduct, or convey by any mode of conveyance any excursion on which passengers are conveyed for hire, and having for its principal or only object the carriage on that day of such passengers for amusement or pleasure, and passengers so conveyed shall not be deemed to be travelers within the meaning of this Act.

7. It shall not be lawful for any person to advertise in any manner whatsoever any performance or other thing prohibited by this Act.

(2) It shall not be lawful for any person to advertise in Canada in any manner whatsoever any performance or other thing which if given or done in Canada would be a violation of this Act.

8. It shall not be lawful for any person on the Lord's Day to shoot with any gun or rifle or other similar engine either for gain or in such a manner or in such places as to disturb other persons in attendance at public worship or in the observance of that day.

### NO SUNDAY PAPERS.

9. It shall not be lawful for any person to bring into Canada for sale or distribution or to sell or distribute within Canada on the Lord's Day any foreign newspaper or publication classified as a newspaper.

10. Every person who violates any of the provisions of this Act shall for each offence be liable on summary conviction to a fine not less than \$1 and not exceeding \$40, together with the cost of prosecution.

11. Every employer who authorizes or directs anything to be done in violation of any provision of the Act shall for each offence be liable on summary conviction to a fine not exceeding \$100 and not less than \$20, in addition to any other penalty prescribed by law for the same offence.

### EMPLOYERS' PENALTIES.

12. Every corporation which authorizes, directs, or permits its employees to carry on any part of the business of such corporation in violation of any of the provisions of this Act, shall be liable on summary conviction before two Justices of the Peace, for the first offence to a penalty not exceeding \$250, and not less than \$50, and for each subsequent offence to a penalty not exceeding \$500, and not less than \$100, in addition to any other penalty prescribed by law for the same offence.

### THE ATTORNEY-GENERAL'S CONSENT

13. Nothing herein shall prevent the operation on the Lord's Day for passenger traffic of any railway subject to the legislative authority of any Province unless such railway is prohibited by Provincial authority from so operating.

14. Nothing herein shall prevent the operation on the Lord's Day for passenger traffic by any railway company incorporated or subject to the legislative authority of the Parliament of Canada, of its railway where such operation is not otherwise prohibited. Nothing herein shall be construed to repeal or in any way affect any provision or any Act relating in any way to the observance of the Lord's Day in force in any Province of Canada when this Act comes into force, and where any person violates any of the provisions of this Act, and such offence is also a violation of any other Act, the offender may be proceeded against either under the provisions of this Act or under the provisions of

**THE ASSASSINATION OF VICE ADMIRAL CHOUKIN AND GENERAL KOZLOFF.** The discovery that behind the murder of the General was a big plot to kill not only General Trepoff, but Prince Putiatin and other courtiers, and the general epidemic of assassination, which has terrorized not only the local authorities, but even the police, together with the wild destruction of property by the peasants, in half a dozen provinces during the last few days, have again strengthened the small part of the court which believes in restoring to "extreme measures." The adoption by the lower House of Parliament of an address to the country will, it is feared, place in the hands of the reactionists the needed lever to move his Majesty. M. Petraitiski vainly warned the lower House on Tuesday of the seriousness of the proposed step, but the majority of the Constitutional Democrats, of which party he is a prominent member, seem to be convinced that they must hold the peasants at all hazards. The members of the extreme left seemed to court a fight, preaching open revolution from the rostrum. The Novoe Vremya, which often reflects the views of the court, says that the adoption by the lower House of an address to the country would go beyond the jurisdiction of Parliament, and virtually constitute an appeal from the Government to the people. The paper adds: "With its adoption Parliament would cross the Rubicon, abandon its professed policy of trying to restrain the country, and instead of pacifying it, deliberately pour oil on the flames."

#### BAD NEWS FROM INTERIOR.

Despatches from the interior continue to tell without interruption stories of the burning of manor houses, robberies, murders, collisions between peasants and rural guards, and the hurried despatch of troops here and there. The centre of the peasants' uprising is Voronezh Province, where the peasants in their mania for the destruction of property do not discriminate between friends and enemies, as evidenced by the complete devastation of the estate of M. Kokoshkine, one of the most prominent Constitutional Democrats in the lower House. Wednesday's reports describe the situation in that province as "hopeless," from the standpoint of the landlords. The situation is almost as bad in Poltava and Smolensk Provinces. In Tambov Province eighty peasants are reported to have been killed or wounded by dragoons.

#### THREATENED COL. MINN.

A despatch from St. Petersburg says: It is reported that some of the soldiers of the Semenovskiy guard regiment have served notice on their commander, Colonel Minn, that they intend to kill him at the first opportunity for forcing them to murder their fellow-citizens during the Moscow revolt, and that Minn, in fear of his life, fled from the camp at Krushnoyesslo.

#### KOZLOFF'S ASSASSIN.

A despatch from St. Petersburg says: The assassin of General Kozloff of the headquarters staff, who was murdered in the English Park at Peterhof on Saturday last, has been identified as one Lett, belonging to an organization the members of which have sworn to kill General Trepoff, General Prince Putiatin and 13 other persons intimately connected with the court. The assassin was chosen by lot.

#### GRAND DUKE VLADIMIR.

A despatch from Hamburg, Germany, says: Toward the end of last week Grand Duke Vladimir received an urgent, unsigned letter telling him to beware of travelling along the Treves route on Sunday. This communication was placed in the hands of detectives and he Grand Duke decided to postpone his journey. It was also handed to the railroad officials, who secured the line with the result that a dynamite cartridge with a fuse attached to the line was found on the Coblenz-Treves section of the road. The indignation felt here is unbounded, as Grand Duke Vladimir is immensely popular, owing to his genial manner and cheerful ways with all he meets.

#### Vancouver.

A despatch from Vancouver, B.C., says: Shortly after 2 o'clock on Saturday afternoon the Union steamship tug Chelialis was cut in two by the steamer Princess Victoria, the fast ferry that runs daily between Vancouver, Victoria, and Seattle. Of fourteen souls on board, seven were drowned. The latter include Dr. W. A. B. Hutton, late registrar of Manitoba Medical College, recently surgeon on board the Anglican mission boat Columbia, plying up the northern coast; Mrs. Boyce, wife of the purser of the steamer Cassiar; P. J. Chuck, formerly purser, recently retired; Chas. Benwell, son of J. J. O. Benwell, of Vancouver; Crawford A. White, deckhand, and two Japanese firemen. The tug, which was passing through the Narrows with a party interested in oyster beds at that point, was struck six feet from the stern, and sunk immediately. Survivors say the steamer veered suddenly from her course, as there was plenty of sea room. An order for the arrest of Capt. Griffiths, of the Princess Victoria, has been issued.

#### CAR PLUNGED INTO CANYON.

**Four Killed and Seven Injured in British Columbia.**

A Nelson, B. C., despatch says: One of the most fearful disasters that has occurred in years in British Columbia happened on Saturday night, when the passenger train from Spokane to Nelson was derailed in Beaver Canyon, a narrow pass near the boundary. The buffet car was derailed on a trestle and hurled down the precipice, killing four men and injuring seven. The killed are: Judge W. B. Townsend, formerly of Rossland; Phoebe Smith, bartender on the steamship Kaslo; M. D. McKinnon, purser of the steamship Kaslo. Unidentified man. The injured are: Mrs. W. B. Poel, Nelson, passenger; Miss Wragge, of Cranbrook, passenger; Elou is Bergeron, of Stillwater, Minn., passenger; Charles Summers, colored porter on buffet car; Edward Jones, colored cook on buffet car; Conductor Ingham, Brakesman Paden.

#### RUSSELL SAGE DEAD.

**Famous Financial Economist Passes Peacefully Away.**

A New York despatch says: Russell Sage, the famous old man of Wall Street, died on Sunday afternoon at 5 o'clock at his summer house, at Lawrence, Long Island. The end was a very peaceful one. Mr. Sage had been failing steadily for several months and for the past few weeks had been practically confined to his home. For three hours previous to the end Mr. Sage was unconscious. He had been very weak during the day and fell into a sleep from which he never awakened.

#### ENGLISHMEN ARE THRIFTY.

**Over \$760,500.000 Now Deposited In Post-office Savings Bank.**

A despatch from London says: The large class of investors of small savings in Great Britain deposited in the post-office savings bank in the year 1905 the sum of £42,300,616. When it is remembered that not more than £50 will be received from any depositor in the course of a year, it will be seen that the amount indicates widespread thrift. The balance due on Dec. 31, 1905, to all depositors was £152,111,139, an increase of £3,771,786 over the preceding year.

#### 20,000 EMIGRANTS.

**Church Army Launches Propaganda to Raise \$500,000.**

A London despatch says: Prebendary Carlyle, founder of the Church Army at Ramsgate, has launched a propaganda to raise \$100,000 to send 20,000 emigrants to Canada next year.

(j) Keeping railway tracks clear of snow or ice; making repairs in cases of emergency, or doing any other work of a like incidental character necessary to keep the lines and tracks open on Sunday.

(k) Work before six o'clock in the forenoon and after eight o'clock in the afternoon of yard crews in handling cars in railway yards.

(l) Loading, unloading, and operating any ocean-going vessel which otherwise would be unduly delayed after her scheduled time of sailing, or any vessel which otherwise would be in imminent danger of being stopped by the closing of navigation; or loading or unloading before seven o'clock in the morning or after eight o'clock in the afternoon and grain, coal, or ore-carrying vessel after the 15th of September.

(m) The carrying of milk, cheese, and live animals, and the unloading of and carrying of perishable products and live animals arriving at any point on the Lord's Day.

(n) The operation of any toll or draw-bridge or of any ferry or boat authorized by competent authority to carry passengers on the Lord's Day.

(o) The hiring of horses and carriages or small boats for the personal use of the hirer or his family for any purpose not prohibited by this Act.

#### PREPARATION FOR MONDAY.

(p) Any unavoidable work after six o'clock in the afternoon of the Lord's Day, in the preparation of the regular Monday morning edition of a daily newspaper.

(q) The conveying his Majesty's mail and work incidental thereto.

(r) The delivery of milk for domestic use and the work of domestic servants and of watchmen.

(s) The operation by any Canadian electric street railway company whose line is interprovincial or international, of its cars, for passenger traffic, on the Lord's Day, in any line or branch now regularly operated.

(t) Work done by any person in the public service of his Majesty while acting therein under any regulation or direction of any department thereof.

(u) Any unavoidable work by fishermen after six o'clock in the afternoon of the Lord's Day in the taking of fish.

(v) All operations connected with the making of maple sugar and maple syrup in the maple grove.

#### TO PROTECT PROPERTY.

(w) Any unavoidable work on the Lord's Day to save property in cases of emergency or where such property is in imminent danger of destruction or serious injury.

(x) Any work which the Board of Railway Commissioners for Canada, having regard to the object of this Act and with the object of preventing any undue delays, deem necessary to permit in connection with the freight traffic of any railway. The costs of all applications to be paid under this paragraph shall be borne by the applicant, and, if more than one, in such proportions as the Board determines. Notice of application, in which the reasons to be relied on shall be fully set out, shall be given to the Department of Railways and Canals. In other respects the procedure under the Railway Act, 1903, shall, so far as applicable, apply.

#### CANNOT REQUIRE WORK.

4. Except in cases of emergency, it shall not be lawful for any person to require any employee, engaged in any work described in paragraph (c) of section of this Act, or in the work of any industry, process, or in connection with transportation, to do on the Lord's Day the usual work of his calling unless such employee is allowed during the next six days of such week 24 consecutive hours without labor.

(2) This section shall not apply to any employee engaged in the work of any industrial process in which the regular day's labor of such employee is not of more than 8 hours' duration.

#### SUNDAY GAMES.

5. It shall not be lawful for any person on the Lord's Day, except as provided in any Provincial Act or law or hereafter in force, to engage in any public game or contest for gain, for any

force, and where any person violates any of the provisions of this Act, and such offence is also a violation of any other Act, the offender may be proceeded against either under the provisions of this Act or under the provisions of any other Act, applicable to the offence charged.

15. No action or prosecution for a violation of this Act shall be commenced without the leave of the Attorney-General for the Province in which the offence is alleged to have been committed after the expiration of 60 days from the time of the commission of the alleged offence.

16. This Act shall come into force on the first day of March, one thousand nine hundred and seven.

#### NATAL OPERATIONS.

**Three Thousand Killed; Two Thousand Prisoners.**

A London despatch says: Under Colonial Secretary Churchill imparted to the House of Commons on Wednesday afternoon the official reply to the Government's inquiries in the alleged atrocities perpetrated on the wounded ulus in Natal during the operations against the rebel chief Bambata. According to a telegram from the Governor of Natal, 3,000 natives were killed throughout the operations and 2,000 were made prisoners, including the wounded. The Natal Government had no information about wounded natives being killed by the native levies. The telegram confirmed the official version of Bambata's head being cut off for identification, owing to the decomposition of the rest of the body and of its being subsequently buried with the latter.

#### CHILD KICKED TO DEATH.

**Revolting Case of Cruelty Revealed at a Coroner's Inquest.**

A Montreal despatch says: The Coroner's jury which investigated the death of the two-and-a-half-year-old child of John Dobuck, a Polish family residing at Point St. Charles, has rendered a verdict of murder, and the step-mother is accused of the crime. The medical testimony was to the effect that the child had been kicked to death, seven of its ribs having been fractured. The step-mother, who disappeared before the crime was discovered, is still at liberty, although the police have been looking for her for a couple of days.

#### BRITISH BOY SMOKER.

**The Committee Thinks He Should Be Suppressed.**

A London despatch says: The House of Lords Committee, which has been considering the case of the British boy smoker, is of the opinion that he should be suppressed. The manhood of Great Britain is gravely menaced by him, the committee say. It is recommended that nobody under sixteen shall be allowed to smoke. The committee wants those selling tobacco to boys punished and wants all the boys punished who are caught smoking or having cigarettes in their possession. It would have policemen, park keepers, schoolmasters and certain other public functionaries charged with the duty of enforcing this proposed law. The enactment of this law may be a long way off.

#### COLD STORAGE FOR FRUIT.

**Department of Agriculture to Extend the Present System.**

A despatch from Ottawa says: The Department of Agriculture proposes to extend its cold storage car service from dairy products to fruit. Several years ago the Government undertook to pay five dollars toward the cost of icing each car and to carry butter or cheese. This produced a demand for cold storage cars. Last summer an average of a hundred a day were used from July 1st to Sept. 15. It is expected the fruit men will find the cool cars an advantage in marketing their goods.

# LEADING MARKETS

## BREADSTUFFS.

Toronto, July 24.—The first of Ontario flour from the new crop for August delivery, was at \$3 for export. Wheat prices are firmer, following Chicago.

Flour—Ontario—90 per cent. patents, old crop are quoted at \$3.05 to \$3.10, buyers' bags, for export. Manitoba—Unchanged; \$4.40 to \$4.60 for first patents, \$4 to \$4.10 for seconds, and \$3.90 to \$4 for bakers'.

Bran—Ontario—Very dull at \$15 to \$16.50 in bulk, outside; short, scarce at \$17.50 to \$18.

Wheat—Ontario—78c to 79c for No. 2 red and white, outside; spring, 74c to 75c; goose, 73c to 74c.

Wheat—Manitoba—Quotations for delivery at lake ports are firmer at 85½c for No. 1 northern; No. 2 northern, 83½c.

Oats—88c to 89½c outside for No. 2. Rye—62c to 64c outside.

Barley—49c to 51c outside for No. 2. Peas—80c to 82c outside.

Corn—American No. 2 yellow, 59½c to 60c, Ontario points.

## COUNTRY PRODUCE.

Butter—Inferior grades of butter continue to come forward freely, while prices are about steady, with a firm tone for the better grades.

Creamery prints ..... 20c to 21c do solids ..... 19c to 20c

Dairy prints ..... 16c to 18½c do pails ..... 17c to 18c

do tubs ..... 17c to 18c Bakers' ..... 16c to 17c

Cheese—At 12½c to 12½c for job lots here.

Potatoes—Prices are unchanged at \$1 for Ontario and \$1 to \$1.10 for Quebec.

Baled Hay—Quotations unchanged at \$10 per ton for No. 1 timothy in car lots on track here. Mixed, \$7.50.

Baled Straw—At \$5.50 to \$6 per ton for car lots on track here.

## MONTREAL MARKETS.

Montreal, July 24.—Grain—Prices for oats show no change. Car lots of No. 2 white were quoted at 43c, No. 3 at 42½c, and No. 4 at 41½c per bushel, ex-store.

Flour—Manitoba spring wheat, \$4.60 to \$4.70; strong bakers', \$4.10 to \$4.20; winter wheat patents, \$4.30 to \$4.40; straight rollers, \$3.90 to \$4.10; do in bags, \$1.85 to \$1.90; extras, \$1.40 to \$1.50.

Millfeed—Manitoba bran, in bags, \$16 to \$17; shorts, \$20 to \$21 per ton; Ontario bran in bags, \$15.50 to \$16; shorts, \$20.50 to \$21; milled mouille, \$21 to \$25 per ton, and straight grain, \$23 to \$29.

Rolled Oats—Prices unchanged at \$2.25 per bag; cornmeal is slow of sale at \$1.40 to \$1.45 per bag.

Hay—No. 1, \$9.50; No. 2, \$8 to \$8.50; clover, mixed, \$7 to \$7.50, and pure clover, \$6 to \$6.50 per ton in car lots.

Provisions—Barrels short cut mess, \$24; half barrels do., \$12.50, clear fat back, \$23.50; long cut heavy mess, \$21.50; half barrels do., \$11.25; dry salt, long clear bacon, 12½c to 12½c; barrels plate beef at \$13.50; half barrels do., \$7.25; barrels heavy mess beef, \$11.50; half barrels do., \$6.25; compound lard, 7½c to 9½c; pure lard, 12c to 12½c; kettle rendered, 12½c to 14c; hams, 14½c to 16c, according to size; breakfast bacon, 16½c to 17c; Windsor bacon, 16½c; fresh killed abattoir dressed hogs, \$11; alive, \$8 per cwt.

Eggs—Prices firm, being 17c and perhaps more for straight gathered stock when fine, and about the same for No. 1 candled. Selects are selling around 20c. Poor quality of straight gathered are not wanted, and some are offering at 16c and even less.

## BUFFALO MARKET.

Buffalo, July 24.—Flour—Dull. Wheat—Spring dull; No. 1 Northern, 83½c. Corn—Stronger; No. 2 yellow, 58c; No. 2 corn, 56½c. Oats—Dull; No. 2 white, 42c; No. 2 mixed, 39½c. Canal freights—Steady.

## MR. BEIT'S MILLIONS.

Various Estimates on the Size of His Fortune.

A London despatch says: Those who are really in a position to give authoritative information regarding the amount of the fortune of the late Alfred Beit, the South African financier, and the terms of his will, have not yet given it to the newspapers. Estimates from \$125,000,000 to \$25,000,000 have been published, but it will probably be found when the terms of the will are given out that Mr. Beit's fortune was somewhat below \$50,000,000. About one-third of this amount, it is expected, will be bequeathed to national purposes in Great Britain and South Africa, mainly of an educational character. Mr. Beit had several married sisters in Germany and Austria, and presumably they, as well as his mother and brother, will inherit considerable amounts.

## BORACIC ACID IN MEAT.

Contractor for Supplies to British Army Fined.

A despatch from London says: Messrs. Dickerson and Co., contractors for supplies to the British army, and a dealer named Mileson were in the Brentford Police Court on Thursday, charged with selling potted meats containing 74 per cent. of boracic acid. In another case the meat contained ½ per cent., and in a third 38.8 per cent. of the acid. The samples of their goods were colored with oxide of iron and pink coal tar dye. The tins were sold at a penny each. They contained ham, tongue and chicken. The Dickersons prepared their own goods. The Dickersons were fined \$25 and costs of court, the magistrate expressed the opinion that the boracic acid in the meat might possibly be injurious to persons who were not in good health.

## BEST CROPS YET.

Encouraging Telegram From West to Agriculture Department.

An Ottawa despatch says: Dr. Wm. Saunders, who is now on a tour of the West, telegraphs the Department of Agriculture as follows from Indian Head, Sask.:—

"I have seen crops in Manitoba and Saskatchewan to this point. Grain of all sorts, well headed, and generally very promising. Very fine fields of wheat seen throughout Manitoba. At the Experimental Farm, Brandon, the crops are all heavy, found some rust there. I found some rust on leaves, but none on stalks; no rust on oats or barley. Nearly all the grain crops seen in Saskatchewan are good, many of them, excellent. Wheat, oats, barley and peas on the Experimental Farm are very heavy; I think they are as good as have ever been seen here. No rust has been found on any of the cereals. A large excursion here on Friday of farmers from all points between here and Prince Albert and west to Moosejaw, all agree that crops of all sorts this year promise to be the best they have ever had."

## ANOTHER BIG CAR ORDER.

C. P. R. Arranges for Sixty From Shops in Montreal.

A despatch from Montreal says: The remarkable list of orders by Canadian railways for rolling stock during the present year was added to on Friday by the Canadian Pacific Railway, which handed out instructions to the Angus shops to turn out at once 60 cars, aggregating in value \$400,000. They are divided as follows: Five dining cars, twenty first-class, ten baggage and express, and twenty-five baggage cars for immigrant use in particular. Work was commenced to-day by the Angus shops on a C. P. R. order for two thousand freight cars, the order for which was

HAPPENINGS FROM ALL OVER THE GLOBE.

Telegraphic Briefs From Our Own and Other Countries of Recent Occurrence.

## CANADA.

The new C. P. R. hotel at Winnipeg was formally opened on Friday.

Montreal's population, according to the new city directory, is 405,000.

Toronto carpenters are asking an increase of three cents an hour in wages. Didsbury, Alta., will instal a municipal telephone system at a cost of \$2,200.

William Leinster dropped dead at the Waterloo engine works, Brantford, on Friday.

A labor bureau in Great Britain is to be opened by the Canadian Manufacturers' Association.

At the next session of the Dominion Parliament a department of mines will be created.

James Call and Mrs. Annie Beach lost their lives in a fire that broke out in the room they occupied at Hamilton, on Sunday morning.

Two brothers named Gauthier were drowned at Montreal on Friday. They were painting the sides of the steamer Gaspeian, and the scaffold gave way. The Moral Reform Association of Vancouver, complain of the music played at English Bay and of the one-piece bathing suits worn.

Mr. J. G. McCrae, a well-known business man at Sarnia, died suddenly of heart disease on Friday.

W. J. Wilkinson, of Sounding Lake, Alta., shipped from Vegreville 440 head of range steers, which were driven 80 miles north to the railway.

Fifteen cases of smallpox are reported from Esterhazy, Sask., and the seriousness of the outbreak is ascribed to lax quarantine regulations.

Thomas Scarf fell over the cliff at Niagara Falls, on Sunday, a clear drop of 90 feet, but escaped with a broken shoulder and a bad scalp wound.

The G. T. R. have let contracts for a ten-storey office building on the site of their present offices on McGill street, Montreal. The building will cost \$300,000.

John McQuarrie, an elderly man, from New Glasgow, N.S., employed on a farm in Thorold township, fell out of a barn window and broke his neck on Friday.

Winnipeg has a scandal over the order refunding a circus license fee. It is said the names of the Civic License Committee were forged in the document, which was afterwards stolen from the Mayor's desk.

## GREAT BRITAIN.

The late Alfred Beit willed \$10,000,000 for public purposes.

The jury at Salisbury found that the recent wreck was due to the high speed at which the train was running.

Alfred Beit, the dead South African financier, for some reason, never married Elizabeth Bennett, an estimable lady to whom he had been engaged.

## UNITED STATES.

Four persons were drowned in the surf at Atlantic City on Sunday.

The spectacle of a cinnamon bear going over the big falls of the Yellowstone, Montana, was afforded a party of tourists yesterday. The animal plunged into the river, was caught by the swift current and swept over the falls, tumbling 400 feet to the pool below. The body was not seen again.

With only a couple more months to serve, Ernest Hoffman, sentenced to the reformatory at Elmira, N.Y., for burglary, walked out of the superintendent's residence, where he was em-

# HEALTH

## THE BABY'S THREE NEEDS.

When it is considered that the whole after-life of a human being can be tempered for good or ill by the management of the first year of existence, it seems impossible to repeal too often the few fundamental rules that should govern all those who have the care of infants.

One might sum up the needs of babies in three words—fresh air, regularity, quiet. Babies are but little animals, it is true; but after all they are little animals with a great deal to do for themselves, and they should receive all the assistance possible from those in charge of them, to enable them to perform this work properly.

In the first year of life great changes are going on in the body, and the baby needs all the help possible to meet the demands made upon its tiny system in the way of tissue formation. A baby cannot speak up and tell us that its meals do not seem to set well, or that a dissipated evening gives it a disturbed night, so there is nothing for parents to do but watch carefully for the small but unmistakable signs that things are not going well.

Fresh air comes first in the list of requirements, because it is probable that very few babies indeed get all of it that they are entitled to. It has been noted by a wise physician that babies with pneumonia do best if they are kept in the open air as far as possible, and he even tells of nurses clad in fur-lined gloves and coats because the sick-room is kept so cold. But the sick child who would die in a warm, close room recovers under these conditions.

As to well babies, never mind what month they are born in, wrap them up warmly, shield them from direct draft, but let them breathe outside air day and night. If the weather is really too terrible to face, then wrap them up in a south room and open all the windows.

Whatever the baby's diet may be, natural or artificial, it should be administered with unwavering regularity. The tiniest specimen of humanity is an incarnation of artful cunning where its appetite is concerned, and if it finds that bawling results in feeding, it will bawl, and small blame to it. But the envious child is the one whose mother is not disturbed by this fact, and who rigidly adheres to times and seasons.

Babies should never be excited by too much play, and especially is this true of the evening hours. There is nothing more entrancing than a gasping, gurgling, hysterical baby; but it is a cruel entertainment, for which the frail, tiny, nervous system must pay the price.

## FOR A TWITCHING HAND.

Hand trembling, an affliction akin to "writers' cramp," is apt to result from the long continued exercise of certain muscles and the neglect of others.

The worst feature of the trouble, according to Health-Culture, is its trick of coming on at the very time when steadiness of hand would be most desirable. The twitch of a map finisher's muscles may throw a national frontier 100 miles out of treaty lines; type words may get glued together like the nouns of the Volapuk craze.

Hot baths afford only temporary relief; drugs might as well be prescribed to a stutterer; but there is one never-failing mechanical specific—the grapple swing cure.

Procure a couple of iron rings—say, five inches in diameter—and fasten them high enough to keep an experimenter's feet off the ground when he attempts to dangle by one hand for a second or two. Practice will raise the score to half a minute, and by that

—Spring dull; No. 1 Northern, 83½c. Corn—Stronger; No. 2 yellow, 58c; No. 2 corn, 56½c. Oats—Dull; No. 2 white, 42c; No. 2 mixed, 39½c. Canal freights—Steady.

## NEW YORK WHEAT MARKET.

New York, July 24. — Spot firm; No. 2 red, 83½c elevator; No. 2 red, 84c f. c. b. afloat; No. 1 Northern Duluth, 88½c f.o.b. afloat; No. 2 hard winter, 83½c f.o.b. afloat.

## LIVE STOCK MARKETS.

Toronto, July 24.—There was a moderately fair run to-day, and trade was comparatively brisk at steady prices.

Stockers and feeders—The common rough Eastern stockers are simply a drag on the market, as they do not seem to be wanted at all.

Lambs are firmer, and sheep about steady at recent quotations.

Hogs—The scarcity of hogs is still holding the market very firm.

Export—Extra choice, \$4.75 to \$5.10; medium export, \$4.60 to \$4.65.

Good short-keep feeders, \$4.50 to \$4.60.

Heavy Feeders—Good and heavy feeders at \$4.25 to \$4.50.

Butchers—Choice picked butcher cattle, \$4.50 to \$4.70; medium heavy butchers at \$4 to \$4.35; mixed lots and cows at \$1.75 to \$3.50; fat cows, \$3.50 to \$3.60.

Light Stockers—\$2.25 to \$2.25.

Sheep and Lambs—Steady at \$4 to \$4.25.

Spring Lambs—6 to 7½c per lb.

Calves—Prices range from \$3.50 to \$5.50 each.

Hogs—Selects, \$7.70; lights and fats, \$7.45.

Milch Cows—Choice, \$30 to \$40 each; common, \$17 to \$20.

## EARTHQUAKES DO DAMAGE.

The Population Desert Socorro, New Mexico.

A despatch from Albuquerque, N.M., says: Refugees in large numbers are arriving here from Socorro, N.M., where great damage has been wrought by a succession of earthquakes since July 2. In that time not an hour has passed without one or more quakes. The centre of the disturbance is a zone 30 miles long by about 10 miles wide, running from the Ladrone Mountains southeast through Socorro, San Antonio and San Marcia. "The noise and the quakes are frightful," said Mrs. J. J. Leeson, a refugee from Socorro. "I have experienced earthquakes at Los Angeles and San Francisco, but never anything so sickening as these prolonged rockings and jerkings of the earth at Socorro. Water placed in a bowl will show continuous vibrations between the greater shocks, showing that the earth is never still. Not a house in town is safe to enter and chimneys and walls topple with each recurrent tremor."

## GIRLS WHO GO ASTRAY.

The Majority of Them Have Poor Homes and No Mother.

"In almost every instance where young people fall into evil and criminal ways," says Mr. S. J. Kelso, "it will be found that the home conditions were largely to blame. In a recent letter particulars are given of two young girls committed to the Mercer Reformatory for immoral conduct. In one case the girl's mother was dead, the father had married again and the second wife could not tolerate her round the place; in the other the father had left his family and gone to live with another woman and the girl had for years been growing up in the midst of wretchedness and depravity. A year or two ago the two girls tried to improve their conditions by running away, but they were arrested by the police and forcibly returned and compelled to remain under the above unhappy conditions. Little wonder that they are in the Mercer Reformatory now!"

twenty first-class, ten baggage and express, and twenty-five baggage cars for immigrant use in particular. Work was commenced to-day by the Angus shops on a C. P. R. order for two thousand freight cars, the order for which was given a few weeks ago. They are worth about \$800 each, making a total of \$1,600,000, or a grand total in the last two orders of \$2,000,000.

## BLACK SMALLPOX CASE.

Dr. Hodgetts Receives Disquieting Report From Powassan.

A despatch from Toronto says: A report to the effect that a case of what is termed "black" smallpox occurred last week at Powassan has been received by Dr. Chas. E. Hodgetts, secretary of the Provincial Board of Health. It resulted fatally within three days, although every known remedy was used to save the victim's life. The case was immediately isolated by Dr. Porter and everyone exposed promptly quarantined. The patient was a traveler, and it is thought contracted the disease from someone who had only a mild attack. "It is often the case," said Dr. Hodgetts, "that what may be a slight attack on one constitution proves fatal to another."

## GUELPH COLLEGE GROWING.

Government Will Erect Additional Buildings.

A Toronto despatch says: In connection with the granting of the contract for the extension of the Chemical Building at Guelph Agricultural College to Mr. S. F. Whittham, of Brantford, it is announced that the Government will build three or four more additional buildings to the college. These are erected in order to facilitate the work of this growing institution. The addition mentioned above will cost \$10,700.

## FOR SUCCESSION DUTY.

Government Receives Cheque From Mrs. Cox's Executors.

A Toronto despatch says: The Provincial Treasury Department received on Friday a cheque for \$29,500 from the executors of the estate of the late Mrs. Margaret Cox, wife of Senator Cox, the amount representing succession duties on the property left by Mrs. Cox.

## STABBER SENTENCED.

Charge Against Galt Man Reduced to Felonious Wounding.

A Galt despatch says: The charge of attempt to murder was on Thursday reduced to one of felonious wounding, at the instance of the Crown Attorney, in the case of John Joseph Groves, who stabbed William West, hostler at the new Royal Hotel, on the 10th inst., in the course of an altercation. It was shown in evidence that West had provoked Groves by calling him names, and had also attacked him. The latter, who had a jackknife in his hand, retaliated, plunging the weapon eight times into West's body. He was convicted and sentenced to 18 months in the Central Prison by Judge Blake.

## MOOSE ARE PLENTIFUL.

Deputy Minister of Lands and Forests Receives a Report.

A Toronto despatch says: In the Thunder Bay districts reports are current that moose are becoming more plentiful than ever, and that the enforcement of the regular game laws are having a good effect. An evidence of the large number roaming about is the receiving of a letter by Mr. Aubrey White from Fire Ranger Murray, who states that during one of the latter's trips through the territory south and east of the Mattawan and south of the base line of Strange and Marquis Townships, 101 moose and 17 moose calves were sighted.

low. The body was not seen again.

With only a couple more months to serve, Ernest Hoffman, sentenced to the reformatory at Elmira, N.Y., for burglary, walked out of the superintendent's residence, where he was employed in the kitchen, with a diamond stud belonging to the superintendent, a sum of money from a woman in charge of the kitchen, a good watch and a revolver.

## GENERAL.

Sarah Bernhardt has been decorated with the Cross of the Legion of Honor at Paris.

Lieut.-Gen. Stoessel, who surrendered Port Arthur, has been recommended for the death sentence.

Twenty Nestorian families from near Tiflis will emigrate to the colony near Battleford, Canada.

With fitting ceremony Major Alfred Dreyfus was decorated with the Cross of the Legion of Honor, on Saturday.

India may become a competitor in the iron and steel markets of the world. The Tata Iron and Steel Company is being organized in London, and the plant is to be established at Suni Junction, India.

## BARLEY CUTTING BEGINS.

The Weather Continues Right for the Wheat.

A Winnipeg despatch says: The weekly crop report of the C. P. R. was issued on Wednesday, and is more comprehensive even than usual, as the company require accurate information on which to base preparations for handling the crop promptly. According to this report, the growth is good, the weather fine and warm, the wheat is all headed out and the prospect for a much better than average yield continues unimpaired.

Barley cutting began on Portage Plains on Thursday. The crop in eastern Manitoba is slightly further advanced than in the far west. No indications of rust are reported, but at Duck Lake blight has been noticed in a few cases.

In southwestern Manitoba the harvest is expected to begin during the first week in August, but there has been some damage by hail out there; around Pierson 700 acres were destroyed.

## TICKET THIRTY YEARS OLD.

Honored by Steamship Company—Possessor to Cross Atlantic.

A despatch from Montreal says: It is seldom that a steamship company honors a ticket issued more than 30 years ago, and yet a case of this kind has just occurred. In May, 1875, when the Montreal Ocean Steamship Company, from which the Allan Line was evolved, held sway, a Miss Robertson, of Glasgow, purchased a ticket from Glasgow to Quebec, with the intention of crossing the Atlantic. Circumstances arose, however, which prevented her coming, but she retained the ticket. Some weeks ago she conceived the idea of taking the trip, and, having the ticket in her possession, she had it forwarded to the Messrs. Allan, by whom it has been honored, and who have issued another ticket in its stead. The old ticket is regarded as a great curiosity.

## MUST HANG FOR MURDER.

Cabinet Declines to Commute Sentence in Nova Scotia Case.

A despatch from Ottawa says: The Cabinet has declined to interfere in the case of George Stanley, who is under sentence to be hanged in Hants County, Nova Scotia, for the murder of a farmer named Freman Harvey. The evidence, though circumstantial, was quite convincing. The execution will take place on August 1. Harvey is supposed to have been killed for his money. Stanley is a young Englishman, who has not been long in this country.

five inches in diameter—and lasten them high enough to keep an experimenter's feet off the ground when he attempts to dangle by one hand for a second or two. Practice will raise the score to half a minute, and by that time the tremors will have vanished for the next half year.

## KING MAY YET VISIT DOMINION.

Times Does Not Think the Obstacles are Insurmountable.

A despatch from London says: Commenting on the genuine regret occasioned by the King's decision not to visit Canada, the Times says that the answer being in the negative is in no sense due to a lack of interest on the part of the Sovereign in the welfare of the great Dominion, which has made such marvellous strides since the days when he visited as Prince of Wales, nor from any want of appreciation of the spirit of affectionate loyalty in which the invitation was conveyed. The obstacles to the Canadian visit, indeed, are of so purely practical a nature that one may venture to express the hope that the obstacles which have proved too serious on this occasion may yet at some future date be surmounted.

## HOT SCOTCH.

Over One Million Gallons Destroyed in Dundee Fire.

A Dundee, Scotland, despatch says: One of the most destructive fires that ever occurred in Scotland started in this city on Thursday night in the bonded warehouse of James Watson and Co. It is estimated that damage to the amount of \$1,500,000 has been done. The fire is still raging and other properties are burning, including the premises of Robertson and Co., distillers. Five acres of buildings are on fire, and over 1,000,000 gallons of whiskey have been destroyed.

## TUNNEL UNDER THE ST. CLAIR.

Toronto Man Said to Have Secured a Big Contract.

A despatch from Montreal says: M. J. Haney, of Toronto, it is reported, has secured a contract to build a tunnel under the St. Clair River for the Michigan Central Railway. The tunnel with approaches is to be about two miles long and to be built of piles laid in concrete.

## LADY CURZON DEAD.

Heart Failure the Cause—Effect of Former Serious Illness.

A London despatch says: Lady Curzon, wife of the former Viceroy of India, who had been ill for some days, died at 5.40 on Wednesday evening. It was announced at the Curzon residence that the final cause of Lady Curzon's death was heart failure, but she had been suffering from complications which were the sequel of her terrible illness of two years ago. She was formerly Miss Mary Leiter, daughter of the late Levi Z. Leiter, of Chicago.

## FROM THE LIQUOR MEN.

The License Fees Will Greatly Exceed the Estimates.

A Toronto despatch says: About \$500,000 will be received by the Government in liquor license fees for this year. This will be almost \$200,000 more than under the old act last year, and something over \$40,000 more than the estimate made when the amended act of last session was introduced. The increased fees have had no effect in regard to applications for new licenses or renewals. In fact there were many more such applications to the various local Boards of Commissioners than were granted.

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

## J. L. BOYES.

Gas and Gasoline Stoves, motor and stove Gasoline for sale.

### MADOLE & WILSON.

Mrs. C. H. Lamphier, of Richmond, had Martin Luther Clark, of Richmond summoned to the Police Court, on July 17th, for shooting her dog. After hearing the evidence Magistrate Rankin found the defendant guilty, and on July 21st, fined him \$5.00 and costs, amounting in all to \$16.04.

On Tuesday morning while Mr. Andrew Kelly was rendering tallow for Mr. J. F. Smith at Madden Bros slaughter house on the Deseronto road, the building caught fire and the slaughter house, rendering house, pig pens &c were completely destroyed together with the tools, a quantity of tallow and four hogs. The loss is about \$1200 with no insurance.

Rodger Richardson, a former employee of the G. T. Ry at Napanee, and well known to a host of people in Napanee and vicinity, passed away on Monday, after a long illness, aged fifty-six years, eleven months. Deceased was working in Hamilton when taken ill and came home to Napanee for a rest and an attempt to recover his health. The change however proved of no avail, and despite the best of care and attention he gradually faded away. The funeral took place from the residence of his sister, Mrs. Samuel Hayes, on Tuesday afternoon, services being conducted in the Western Methodist church, after which the remains were taken to the Eastern Cemetery, where his brother Odd-fellows conducted their service at the grave side.

### COUNTY COUNCIL.

A special session of the County Council was called on Thursday afternoon. The principal item of business brought before the meeting was the complaint of Col. Clyde that the county road machinery had been delivered to him in a very bad condition by Mr. Creighton, who had charge of the machinery in South Fredericksburgh. Mr. Martin read the report of the engineer engaged to supersede the engineer appointed by Mr. Creighton, which showed that the roller engine was in a very bad condition and in need of costly repairs, after but twenty days use, and that the condition of the engine showed gross incompetence or carelessness in the care of this costly machine. Mr. T. V. Anderson explained some damages to the crusher caused by Mr. Creighton putting stones into the machine that the machine was not intended to crush, thereby damaging the machine. Mr. Creighton was not present to answer to these charges and the matter will probably be ventilated to-day. It is high time a strict enquiry was made into the operation of this machinery, procured at such large cost by the county council, and some system should be at once adopted that will insure the machinery being properly looked after, and the road work properly done.

### Royal Hotel Block.

F. S. Scott's shop strictly up-to-date in every respect. A call solicited.

### For Gasoline Stoves and Engines.

Use only the refined gasoline, kept free from coal oil, containing no sediment to clog the tubes, sold at The Medical Hall, FRED L. HOOPER.

stock and all kinds of garden and field  
seeds. I buy clean Timothy Seed,  
Vetches for sale.

The body of the man found at Big  
Creek last week, has been identified  
as that of Wm. Mooney, of Killurine,  
Tullamore, Kings County, Ireland, an  
emigrant who came to this country,  
per str. City of Bombay, on June 9th,  
1906, and was employed by Mr. R. A.  
Sloan, Ernestown Station.

Mr. George Pierson, one of the ma-  
sons employed on the new E. M. church  
met with an accident on Tuesday. He  
was pointing the wall when a small  
block of wood fell off the roof striking  
him on the head inflicting a gash  
which required several stitches to  
close. He will be alright again in a  
few days.

A pretty wedding was celebrated in  
the Methodist church, Arden, on  
Wednesday, of last week, when Miss  
Mary Euphemia, eldest daughter of  
Samuel Alexander, was united in  
marriage with E. A. Fitchett, son of  
of the late Tobias Fitchett, of South  
Fredericksburgh. Rev. A. J. Harvey  
Strike, pastor of the Methodist church  
Deseronto, officiated.—Deseronto Tri-  
bune.

The cheese factory at Moscow was  
totally destroyed by fire, on Friday  
night. The building was old, but was  
remodelled only a few years ago, and  
was in good shape for cheese making.  
The cause of the fire is supposed to be  
lightning. It was owned by Vanluven  
Bros., and was partly covered by in-  
surance. There were ninety-five  
cheese in the car at the station, taken  
from the factory on Friday, for ship-  
ment. It looked at one time as though  
the whole village was doomed, but for-  
tunately the rain came just in time.  
The house of Mark Burgess, two  
miles south of the village, was struck  
by lightning in the same storm, but  
little damage was done. Reports from  
a mile or two around us state that the  
shower was light, in some places  
scarcely laying the dust.

Camp Life made Easy.

Stoves, Wood Alcohol, Sunburn lotion,  
Sponges, Caplles, Montserrat Lime  
Juice &c., at The Medical Hall—FRED  
L. HOOPER.

### Music

Owing to several cases of misappre-  
hension being recently brought before  
Miss McHenry's notice, she wishes to  
state that the opinion, which seems to  
be maintained, that she receives for  
instruction ONLY ADVANCED pupils, is  
erroneous. She will discontinue teach-  
ing through July and August, resum-  
ing it September first. Residence,  
Centre St.

### Drug Store.

#### Slaughter Sale of Men's Boots.

For the rest of the month of June,  
Men's \$4.00 Chocolate Boots for \$3.00;  
also Men's Tan Boots, Genuine Oak  
Sole, \$4.50 for \$3.00. Come and see  
before you buy, at H. W. KELLY'S,  
Campbell House Corner.

#### Selby Sabbath School Excursion.

Will be run from Napanee, per str.  
Ella Ross, on Tuesday, July 31st.  
Steamer leaves her dock at 8 a. m. call-  
ing at Deseronto, Massassaga Park,  
Belleville and Trenton, returning at  
6 p. m.

#### Gentlemen, If You Are Bald,

See Prof. Dorenwend's Art Coverings  
in Wigs and Toupees, worn on thou-  
sands of heads. They are a protection  
against Colds, Catarrh, etc., and give  
a most natural and younger appearance  
to the face. Trying on and demon-  
strating the superiority of these goods  
free of charge. He will be at Paisley  
House, Napanee, on Monday, July 30.  
One day only, be early.

#### The Canoe Races.

On Friday evening last the first of  
the series of canoe races to be held by  
the Napanee Yacht Club was held.  
The course was from the swing bridge  
to a buoy below Light's dock and re-  
turn. In the double paddle race there  
were four entries. Messrs Joyce and  
Graham coming in first, Messrs Scott  
and Moore second, Messrs Carson and  
Pollard third, and Messrs Madill and  
Dulmage fourth. In the excitement  
of trying to get away with a good start  
Messrs Madill and Dulmage had an up-  
set but pluckily again got into their  
canoe and continued the race. In the  
single paddle event there were three  
entries. Mr. C. Madill winning first  
place, Mr. Joyce, second, and Mr. F.H.  
Carson third. The second race in the  
series will be held this evening and in  
addition to the canoe races, a swim-  
ming race and a tub race will be held.  
The swimming race will be open to  
Club members and the tub race open  
to all comers. A large crowd was in  
attendance along the docks on Friday  
last and a lively interest evidenced in  
the races.

#### Melotte Cream Separator.

Easiest running, easiest washed, a  
close skimmer. Give the Melotte a  
trial before you buy. Agents

The Presbyterian Church was the scene  
of a very pretty wedding, on Thursday  
morning, the 26th of July, when Miss  
Margaret A. Templeton, was married to  
Mr. John McDonald McIntosh, Manager  
of the Dominion Bank, Winnipeg. In  
honor of the occasion the friends of the  
bride had decorated the church hand-  
somerly with flowers and evergreens, the  
bride and groom standing under a chime of  
bells of pink and white flowers. The  
ceremony was performed at 10.30 a.m., by  
the Rev. J. R. Conn, M.A., in the presence  
of a number of invited guests. During the  
arrival of the guests, Mrs. F. Cairus  
Smith, presiding at the organ, played  
sweetly a number of appropriate selections,  
and rendered Lohengren's wedding march  
as the bride, attired in a white lace robe  
over taffeta, and wearing the usual veil  
and orange blossoms, with a shower  
bouquet of white roses, entered the church  
escorted by her father. The bridesmaid,  
Miss Pearl Perry, cousin of the bride, was  
gowned in pale blue taffeta with valenciennes  
trimmings, and wore a white tulle  
picture hat with blue plumes. She car-  
ried a bouquet of pink roses. The groom  
was supported by Mr. G. M. Murray, B.A.  
of Toronto, Mr. Frank Boyts, Napanee,  
and Mr. Gordon Campbell, of Toronto,  
acted as the ushers.

After the ceremony a reception was held  
at the home of the bride's father, where the  
bridal couple received the good wishes of  
their many friends. The drawing room  
was decorated with yellow and white  
flowers, and Mr. and Mrs. McIntosh stood  
under a true lover's knot of white flowers  
during the offering of congratulations. The  
reception was followed by a dainty  
luncheon served in the sitting-room,  
handsomely decorated with green and  
white flowers. Mr. and Mrs. McIntosh  
were recipients of many handsome presents  
from their friends. These were displayed  
in the dining-room.

The groom's gift to the bride was a  
magnificent diamond and ruby ring, to the  
bridesmaid, a gold bracelet, to the organist  
a pearl pin, and to the ushers, pearl tie  
pins.

Among the guests present from a dis-  
tance were Miss Christine McIntosh, Lon-  
don; Mr. Robert Templeton, Belleville;  
Mrs. Cull and Miss Cull, Mitchell; Mr.  
and Mrs. A. E. Webb, Toronto; Mr. and  
Mrs. J. F. Van Every, Owen Sound. Mr.  
and Mrs. McIntosh left on the 1.08 p.m.  
train for Toronto, Chicago and other points  
west en route for Regina, the bride travel-  
ling in a navy blue tailor-made costume  
with white embroidered silk blouse and  
white hat with blue ribbon and peacock  
feathers. At the station were gathered  
many of their friends who in no uncertain  
manner showed their appreciation of the  
happy couple, bidding them a final fare-  
well to their home in the west.

#### Both Parties Pleased.

Not the political parties this time,  
but the one who makes the cake and  
the one who eats it, because, our Pure  
Extract of Vanilla (made from the  
Vanilla bean and not a chemical pro-  
duct) gives that perfect flavor. Try it.  
The Medical Hall—FRED L. HOOPER.

## Talk is Cheap, But Facts are Stubborn Things

It's easy to say things in print—to assert that your prices are lower than others, to endeavor to create a belief on the part of a reader that yours is "the only store," so far as values are concerned. All this may be done and probably is done by others—BUT IT IS NOT OUR WAY. We recognize the fact that there are others in the field. We expect energetic competition, and we meet it in the right way,—by selling reliable goods ONLY, for as low a margin of profit as we can sell them for and remain in business.

Our advertising announcements are plain, HONEST, simple statement of facts. We cordially invite any inspection and comparison of our goods and prices with those of other Houses, and believe that a great many people will find it profitable to do so. Put us to the test.

We Close at 12.30 To-day, Friday, Shop Early.

## NEW YORK STYLES.

Our Mr. J. S. Madill having just returned from a business trip to the Metropolis reports favourably on his success in regard to novelties for early fall, having secured many fascinating and exclusive lines. Watch this space later for full details.

HIGH GRADE LINENS, THE SHAMROCK BRAND.

## LONG GLOVES.

Scarce goods, having been fortunate in securing a limited quantity of plain and net Lisle and Silk Gloves in black, cream, and white. Almost all sizes are now being shown at the Smallwear Department. As it is almost impossible to repeat on these lines, we say, come to-day. (Also long Glacé Kid Gloves in black and white.)

DRESS MUSLINS, GINGHAMS, CHAMBRAYS, ETC.

## DRESS GOODS.

Early fall arrivals are coming to hand daily. Being agents for the famous Priestley Dress Fabrics places us far in advance in regard to richness of texture, the latest colorings and designs. Having made ample preparations for the fall trade, we call your attention to our Dress Goods Department, each and every design being exclusive.

### WOMEN CHESS PLAYERS.

Why None of Them Is Mentioned in the Annals of the Game.

Ladies' chess clubs are being established in various parts of the country; special inducements are held out for their patronage by the promoters of national and international tournaments, and articles on the game appear regularly in journals which cater specially to them. Women have always played and taken part in the game, though probably never to the same extent as now. It is, therefore, remarkable that in the whole of its enormous literature there does not appear the name of any woman among the stars of the first, second or third magnitude. One may go through volume after volume containing thousands of games and not find a single one played by women which any editor thought worthy of a permanent record.

When the question has been raised before, it has been involved with that of the intellectual superiority of one sex over the other. Today the answer to this would be totally inadequate and inconsequential. There are men in the front rank of players at the present moment who by no stretch of the imagination or the term can be said to occupy their position on account of exceptionally intellectual endowments. While the game always appeals to intellectual men and women, intellect is not the only factor which makes the great player.

A careful examination of the games of players whom the world recognizes as great reveals the fact that the faculties and qualities of concentration, comprehensiveness, impartiality and, above all, a spark of originality, are to be found in combination and in varying degrees. The absence of these qualities in woman explains why no member of the feminine sex has occupied any high position as a chess player.

There are many women who are earnest students of chess whose knowledge of the theory, principles and all the accoutrements of the game is phenomenal. But mere knowledge can make nobody great. Taking results, good judgment is much superior to knowledge imperfectly applied.—London Saturday Review.

### A WONDERFUL CALENDAR.

The Four Ages From the Theosophical Point of View.

There is nothing more wonderful in the chronological and time keeping line than the "Theosophical Calendar. According to the Secret Doctrine." From the theosophical point of view the four ages are as follows: Sata yuga (golden age), 1,728,000 years; treta yuga (silver age), 1,296,000 years; dwapara yuga (copper age), 864,000 years; kali yuga (iron age), 432,000 years. The total of these four ages makes one maha yuga, or great age, of 4,320,000

LEAVE YOUR ORDER FOR THE DESIGNER, ONLY 50c. A YEAR.

# Fall Carpets, Linoleums, and Oil Cloths.

Never were we placed in a better position to supply your wants in regard to floor coverings for fall. It may seem early to talk fall, but an early selection gives you preference of the newest and latest designs not gained later. You may want a new Parlor Carpet, a new Bed Room or Dining Room Carpet, or perhaps Linoleums for the Dining Room or Kitchen. Drop in to-day and see our MR. E. W. SCOTT about it.

SEE THE NEW RANGE OF OF COLLARS, BELTS, ETC.

## Ready-to-Wears.

The Styles of the Garments we Carry Make Sales Easy.

No matter what other qualifications a garment may possess, its the style that first attracts, "on that one point the garments we carry are right." After a woman buys the quality of these garments which is made manifest by the continued good wear, perfect fit and hang, convinces her that a garment purchased at Madill's is perfect.

BOYLE & SON

Five Japanese raiders on the Aleutian Island rookeries were shot by United States authorities. A delicate though not necessarily dangerous international situation is thus created.

A few good Hammocks left, at a bargain, don't wait.  
At BOYLE & SON.

yuga (copper age), 864,000 years; kali yuga (iron age), 432,000 years. The total of these four ages makes one mahā yuga, or great age, of 4,320,000 years. One thousand mahā yugas make one kalpa, or day of Brahma, equal to 1,000 times 4,320,000 years. After the expiration of that unthinkable period of time the night of Brahma, equal in duration to the length of the day, comes on, and the earth vanishes from the plane of existence. Three hundred and sixty days and nights of Brahma make one year of Brahma, and 100 years of Brahma make the great kalpa, a period of 311,040,000,000,000 years, after which the sun and the entire solar system plunge into impenetrable night and everything on the "objective plane" is destroyed. Then comes the period known as the great night, which is equal in length to the great kalpa. After the great night has lifted its sable mantle a new solar system is formed and evolution begins anew.

According to the doctrine of the theosophists, we are now living in the kali yuga, the last of the four ages, and it began nearly 5,000 years ago, with the death of Krishna, who died 3,102 years before our era began. The first minor cycle of kali yuga ended in the years 1897-98, but we still have something like 427,000 before we arrive at the end of the present age.

Kali yuga is also known to the theosophists as the black age. It is an age of spiritual darkness, in which the human race pays for the misdeeds which are recorded against them in the previous ages.

### The Hardest Blow.

An artist who has attained fame and an income was telling some friends of his early struggles. "I had spent eight weeks on the picture," he said, "and had put my very soul into it, and we were penniless. My wife was hungry and in rags, the baby was sickly and I was discouraged. I hawked that picture about town desperately, only to bring it home that night. No one would have it."

"I suppose that was the hardest blow of your life," suggested a sympathetic friend.

"Oh, no, it wasn't, either. I could stand that. I knew I was right. But next day I went out to answer every promising advertisement. The last on the list read, 'Dishwasher wanted.'"

"I felt secure of that, so saved it for the last. But when I applied the greasy proprietor of the restaurant looked me over with a critical eye.

"Ah, yes," he said, "and what experience as a dishwasher have you had?"

"Of course I hadn't any, and would not take me. I've never forgone him for that awful jolt to my pride."

### The Reform Fell Through.

The Man-Now, look here, Helen, we're going to run this household on a more methodical system. Everything in its place, so that we will know where everything is kept.

His Wife—Oh, how nice! Now, let's begin with your late hours, dear. I should dearly like to know where they are kept.—Lippincott's Magazine.

## TOWN COUNCIL.

Council met in regular session Monday evening Mayor Lowry presiding: Councillors present, Simpson, Williams, Graham, Kimmerly. The minutes of the last regular session were read and confirmed.

## COMMUNICATIONS

From Mr. Geo. McGuire, Toronto, representative of the Pittsburgh Coal Co., states that his company would furnish coal for the Electric Light plant at a cost of \$2.57 per ton nett f. o. b. on boat Sodus. The communication also stated that the duty on said coal would be 53 cents per ton. Laid on the table until late in the evening.

From R. S. Kelsch stating that his travelling expenses to date amounted to \$167.39. Laid on the table until later in the evening.

From Crown Attorney enclosing a copy of the coronor verdict in reference to the recent death of Dora Morden. On motion laid on the table until later in the evening. From G. N. W. Tel. Co. stating that their men would be in town and would remove the wires of the old Electric Light Co. from their poles, after which said poles would be at the disposal of the town. Filed.

From Geo. W. Wheeler applying for a position as fireman at the electric light plant. Refund to Fire Water and Light Committee to report.

Messrs F. W. Smith, M. S. Madole, T. B. Wallace and D. B. Wilson, appeared before the council asking that their crossing on Dundas street at the corner of John street be raised, as at present they are far too low.

Mr. W. T. Waller addressed the council, and asked that the council bear the expense of transportation of two cannons for decoration purposes at the Harvey Warner Park. The town Property Committee were given full power to act in the matter. Dr. Stratton, chairman of Board of Health, addressed the council in reference to drain crossing Dundas street, near his home. He stated the present condition of this drain was certainly a menace to the health of those living in that vicinity, and he asked that it be attended to at once. Refund the Street Committee to investigate and report.

Messrs W. Exley and J. Jennings petitioned the council to have the granolithic walk on the market extended in front of their premises. Laid on the table until later in the evening.

C. L. Shannon and others petitioned the council for a sidewalk on Hill street from Donald to Ragnal street. Referred to Street Committee to report.

The Finance Committee reported as follows in reference to the matter concerning T. F. Rutan, late tax collector; "That \$100 be sued in the Division Court in the names of the treasurer and of the municipality." Town committee recommend that the council instruct the solicitor to sue for \$100 as advised. Report adopted.

The Fire Water and Light Committee reported recommending the payment of the firemen's account, also the account of the Dominion Rock Drill Co. less \$1. Report adopted.

The Clerk was instructed to notify Mr. Close, of Deseronto, the engineer

If you are troubled with rheumatism and never have been, be thankful and take good care of yourself. If you are a victim of its torturing

**Have You** pains do not be discouraged. You are not

**Rheumatism** doomed to go on suffering forever, because

?? ? there is a sure and speedy cure for you in Tuck's Rheumatic Bone Oil. Perhaps you have tried a lot of patent medicines and now have no confidence in any. Do not condemn this until you have tried it. We have such confidence in it that if you try it and it does not cure you we will refund your money. It is a powerful penetrating oil that acts directly on the bone—the seat of the disease—and has brought deliverance to so many that we have no hesitation in saying it will deliver you. Here is one case:—

Dear Sirs—I am free from rheumatism today because I used Tuck's Bone Oil. I had rheumatism in my hands and feet and thought at one time that my life was going to be ruined by it. I consulted a doctor and tried various remedies, but while some of them that I took internally made me feel better for a time none of them took the pain away. After I had suffered for six months or more doctoring all the time I was advised to try Tuck's Rheumatic Bone Oil. I did and I never can be thankful enough to the man who told me to get it. I had not used a bottle until I was better and before the second one was done my joints were loosened up, the pain was gone and I was well. Tuck's Bone Oil did it. That was six years ago and I have not been bothered since.

H. S. Brown, Merrickville. For rheumatism, lame back, neuralgia, sprains, coughs, colds, quinsy or bronchitis, in short for any and all kinds of inflammation there is nothing to equal Tuck's Rheumatic Bone Oil. A bottle should be on the shelf in every home. For sale by all medicine dealers at 50c a bottle or sent prepaid by the Tuck Bone Oil Co., Limited, Smith's Falls, Ontario.

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXV.

The hour was indeed late when Larry and Lord Rackett finally separated for the night.

They had much to talk over in the new light that had come to them; various projects were constantly offering a field for discussion, and ideas were advanced on the spur of the moment, only to be as hastily set aside.

Larry was transfigured, so to speak. He seemed to have received new life, his eyes glowed and his white form was imbued with an electric zeal that told of newly-aroused hope.

Up to this hour he had never dared indulge in the faintest expectation that Dr. Jack could have survived the horrors of that night; he had, much against his will, felt compelled to believe the gallant American as lost beyond recall.

The more he considered Plympton's theory on the subject, the stronger grew his hopes.

It was withal so reasonable.

Petoskey and his Chinese allies high in authority, knew a trick or two, and Dr. Jack alive would be worth ten times as much to their interests as the same individual dead, since he could be made the medium for the transfer of the contract—signed and sealed by the ill-fated Emperor during that raid on the Sacred Palace within the Purple City—utterly regardless of the Tsung-Li-Yamen or Chinese foreign office.

It could be readily guessed that sleep did not visit the nervous little man in any large doses during this night, and that upon his cot he restlessly continued the game of scheming and planning that occupied his working hours.

What Plympton had suggested enlarged the scope of their adventure.

It was no longer a mere sentimental journey, whereby Avis might satisfy a strange desire to look upon the fatal spot where the life blood of her dearly beloved Jack had stained the marble of the imperial palace court or the pave without.

Perhaps their mission would lead to a much more desperate game, entailing a bold rescue.

The very thought thrilled Larry every time it flashed through his brain.

He was glad when morning came, since the time of probation had been shortened.

Another day.

Larry, knowing that he was virtually a proscribed personage in Peking circles, understood that wisdom would dictate a course of seclusion on his part, or at least that he be very coy about venturing beyond the European section of the bustling Chinese capital.

This had no bearing on Lord Rackett, and to him was given the task of arranging such matters as would be necessary after their raid.

It was indeed unfortunate that Peking was not situated like Shanghai, on the sea, or like Canton, on a great river.

Had this been the case, the flight could easily have been arranged by so astute a diplomat as Lord Rackett.

Indeed it might have been accomplished much in the same way as marked the flight of Dr. Jack and his party from the Golden Horn when they had effected the rescue of Aleck—that brother of Avis who had been shut up in the dungeon under the palace of a

There was no use of appealing to the American minister, after what he had heard.

He fully believed that the first diplomatic move made would be the signal for Dr. Jack's death, in case he was a prisoner in the palace dungeons.

That was Chinese treachery. Upon the successful issue of their little project his life really depended.

Should they ignominiously fail, there remained one dernier ressort.

The papers!

These might be surrendered in exchange for the prisoner, yet a man of Lord Rackett's nature hated to come to such a conclusion but needs must when the devil drives; and after a man has thoroughly exhausted all his resources, it sometimes becomes absolutely necessary for him to bow down before circumstances and let them ride over him roughshod as it were.

How he put in that day, Plympton might have found it difficult to tell later.

He was something every minute of time, so it seemed.

Besides, he knew his actions were being spied upon more or less, and he took it upon himself to undertake some extravagant things that were apt not only to puzzle those who watched, but make their eyes fairly stare with amazement.

Plympton had a vein of humor under the grim exterior that marked his usual manner, and he made up his mind that since these worthies were seeking to discover a mare's nest, he might as well arrange something to astonish them.

It would serve a useful purpose also, since in doing this he would be apt to distract their attention from the real issue.

No one could play the game to better advantage than this exile from London.

He had seen pearl divers, menaced by a shark above, stir up the sand violently with the stick they carried, and while the water filled with sediment concealed their movements from the watchful enemy, change their position and rise in safety to the boats.

More than once Plympton thought the whole affair would serve as a popular attraction if served up with the proper sauce at the Globe, the Drury Lane or the Criterion theatres, in the world's metropolis, and the reflection broug a smile upon his stern countenance.

Still he was glad to see old Phoebus' smiling face drop near the western horizon, and night draw near.

True, it meant that the time for planning was at an end, and action must take its place.

It has always been observed that when a brave man has figured out a dangerous campaign, whereby he places his own life in jeopardy, an eager anxiety takes possession of him to plunge into the whirlpool.

He naturally desires to know the worst, to face the music and either win out, or by losing, end all.

At least the suspense, which hourly grew more and more unbearable, would be ended.

So Lord Rackett saw the golden sun set, bathed in a crimson field, with a sensation of relief; he felt very much as might the warrior when, all preliminaries having been satisfactorily settled, he grasps his trusty sword.

Larry actually smiled, he felt so rejoiced to know the game was open.

"It is killing me, comrade," he said, aside, to Plympton, and the latter could not but notice how haggard the little man had become, though somewhat in doubt as to whether his state of mind were caused by anxiety over the uncertainty of Dr. Jack's fate, or his wretched condition as custodian of a grave secret.

Mercifully, Lord Rackett concluded the former was the case.

"A few hours will relieve you, old man. Cheer up, and hope for at least a modicum of that luck which you have told me was almost invariably Evans' portion in the past."

And Larry, realizing that much might depend upon him in the matter, resolutely threw aside this feeling, and became his old self.

That meant a sagacious little man, ready to meet any question, however puzzling, in the true spirit of the tournament.

Under Lord Rackett's guidance they quitted the hotel.

He knew where he was taking them, and how to avoid the espionage of those cunning native spies who had been deputed to hover upon their track while they were in Peking.

Arrangements had been made with Foo Chong, the agent of the Canton food-maker, to have his reliable guide at a certain place, where disguises and all necessary adjuncts to the desperate venture might be found.

One thing bothered them.

Would their presence in Peking cause the authorities to redouble their vigilance in connection with the walled-in city?

It did not seem possible that they could have guessed in any measure what the real object of our friends coming to the Chinese capital might be.

And yet, if it were true that the mysterious prisoner of the palace could be Dr. Jack, they might take the alarm, fearing lest he had been able in some strange way of telegraphy without wires to communicate with his friends, and thus the guards of the Purple City would be strengthened, besides being warned to keep on the watch for strangers.

And then there was another thing that gave Lord Rackett uneasiness.

He believed there might be some measure of truth in the floating rumor that reached him while in Canton that the Emperor of China was about to be secretly deposed by the Dowager Empress and another puppet placed in his stead.

How unfortunate it would be, he thought, if this strange change were destined to be made on the very night they had selected as the one on which their venture might be put to the test.

Well, the three sisters of Fate have considerable to do with all events in this world—chance seems to enter into every game of our life from birth to marriage and to the grave; and wise people simply do their duty and leave the rest in the hands beyond their ken.

Plympton guided them safely enough to the appointed rendezvous.

Here they were met by a Chinaman who gravely informed them that he had been deputed by Foo Chong to serve them in the matter.

Lord Rackett entered into a little conversation with him, and seemed quite satisfied.

Larry, however, eyed the native with not a little suspicion.

(To be continued).

### CHILDHOOD DANGERS.

Diarrhoea, dysentery, cholera infantum and stomach troubles are alarmingly frequent during the hot weather months. Too often these troubles become acute and a precious little life is lost after only a few hours illness. During the hot weather season every wise mother should keep a box of Baby's Own Tablets in the house to check these ills if they come suddenly. Better still, an occasional dose of this medicine will keep the stomach and bowels clean and

#### Occurrences in the Land That Reigns Supreme in the Commercial World.

A rope used by Berry, the hangman, during excursions has been sold for 5s.

The leading London hotels are full of American millionaires and multi-millionaires.

No man who refuses to be vaccinated or re-vaccinated can enlist in the British army.

The state apartments at Windsor Castle are now closed to the public until further orders.

The London Corporation has voted £105 to the Lord Mayor's fund for a gift to Queen Maud of Norway.

A serious fire occurred on the 16th ult., at the extensive wire factory of W. B. Brown & Co., Banknall, Liverpool.

According to a return presented to the London County Council, there is one public for every 68 residents in that city.

A well-known Essex Landmark—Rayleigh Windmill—is about to be torn down. It was built in the reign of George II.

The Annual Movable Council of the Manchester Unity of Oddfellows at Barrow last month, voted £1,000 to lodge in San Francisco.

The late Sir Wilfrid Lawson rejoiced over the fact that 150 of the new members of the House of Commons are total abstainers.

Mr. Robert Haddon, for many years a proprietor of the Liverpool Courier, died on the 16th ult., at his residence, Waterloo, near Liverpool.

Mr. J. Every, a driver on the Brighton Railway, who is retiring on a pension at the age of 67 years, was the driver of the Royal trains to Epsom for twenty years. In all that time there has never been the slightest suspicion of an accident.

Mr. Henry Overton Wills, of the tobacco firm, Lord Winterstroke and Mr. J. Storrs Fry have each promised contributions of £10,000 towards the formation of a university at Bristol, and Sir Frederick Wills and Mr. Francis J. Fry £5,000 each.

Mr. William Ankers, chief engineer of the London and North-western Company's fleet of steamships, is about to retire after fifty years' service. He had crossed the Irish Sea 13,000 times, and has travelled about seven hundred and sixty thousand miles.

Rev. S. Baring Gould, the English writer, is by no means the first man in England to read his own obituary. When G. B. Burgin had a similar experience, two years ago, he could not resist the temptation to follow Mark Twain's famous example by declaring that "the rumor of my death is greatly exaggerated."

Harcourt House, originally known as Portland House, and immortalized by Thackeray in "Vanity Fair," as the home of the Marquis of Steyne, and the scene of many of Becky Sharp's intrigues, is now to be pulled down to make room for a block of high-class flats. Its last occupant was the Marquis of Breadalbane.

Making a mistake between two packages, a sweep's wife at Burton made a beverage from tobacco instead of tea, and gave it to Arthur Wood, a carter, of Foston, who was taken ill.

### MORE ABOUT APPENDICITIS.

#### What British Surgeons Think of French Theory.

The important thesis advanced by Professor Blanchard, of Paris, that appendicitis is caused by intestinal worms—does not commend itself to distinguished British authorities on the dis-

astute a diplomat as Lord Rackett. Indeed it might have been accomplished much in the same way as marked the flight of Dr. Jack and his party from the Golden Horn when they had effected the rescue of Aleck—that brother of Avis who had been shut up in the dungeon under the palace of a Constantinople pasha—by means of a speedy steam yacht.

Such an element being entirely out of the question in the present instance, they were compelled to accept just what the gods deigned to allow.

There is always one element of strength in a case where a British subject finds difficulties crowding him on a foreign strand.

This is the British ambassador or minister; and should there be none handy, then the consul, with his sacred flag, will do as well.

No one knew this better than Lord Rackett, and his first move in the morning was to seek an audience with Sir Claude MacDonald.

To his dismay he found the minister was temporarily absent, looking up some matters that were in dispute with the Russian representative, M. Pavloff.

Of course he was represented, and full authority remained to carry out in his absence all he might have ventured if at home.

Lord Rackett made a clean breast of the matter, in order to get advice.

The story excited much interest, but hardly awakened enthusiasm.

The diplomatic gentleman seemed to know just where to draw the line between his sympathy for man for man, and the caution that must mark his action as a representative of a great, but at present isolated nation, in a state to be easily pushed into a war with Russia.

As a man he could sympathize with Plympton and wish him God-speed in his venture.

When his advice was asked concerning the matter as a representative of England's ambassador, he became as mute as a clam in some respects.

True, it appeared an outrage that a gentleman should be set upon, and other murdered or thrown into a dungeon, because, forthwith, he had outwitted the Russian and Chinese plotters who conspired to overwhelm an Anglo-American combination for the building of Chinese railroads and the working of mines through a royal concession.

Then came the ugly part of it.

The unfortunate gentleman had gone where it was well known that foreigners were debuffed; if venturesome men will take their lives thus recklessly in their hands they must not complain if trouble ensues.

He was particularly sorry, because he planned to have known Evans personally and had a very high opinion of him.

Besides, as Dr. Jack was an American, it would be the duty of his own minister to take up the case and endeavor to effect his release, though the chances were, such a demand would fall flat upon the ears of the Chinese officials, who would deny most vehemently that they had ever held a prisoner in the confines of the Sacred City, and meanwhile secretly make way with him.

"The only thing I can promise, Lord Rackett, is this," said the official gentleman, in conclusion; "should you be so fortunate as to rescue your friend and reach this office, rest assured that the moment Dr. Jack steps under the folds of that flag over our door, all the power of Russia and China combined may not lay hands on him again. And I will promise you a safe conduct on board a British war vessel in the harbor."

"Enough. A thousand thanks!" cried Plympton, shaking hands in his usual vigorous fashion and then rushing away.

He believed his work was cut out for him, and something within told that it was to be the greatest event in his already checkered career.

grew more and more unbearable, would be ended.

So Lord Rackett saw the golden sun set, bathed in a crimson field, with a sensation of relief; he felt very much as might the warrior when, all preliminaries having been satisfactorily settled, he grasps his trusty sword, swings himself into the saddle and starts to meet the foe.

If Plympton's feelings were thus reckoned intense what could be said of poor Larry?

He had spent an awfully wretched day, and secretly avowed that he had aged ten years since their arrival in Peking.

Much of his time was passed in the society of Avis, and he was compelled to be constantly on his guard for fear of dropping some hints concerning the matter which, it had been agreed between Lord Rackett and himself, should be kept secret.

A number of times he started to say something, and would then let his voice die away in a mumble or end in a strange laugh.

Avis thought in her heart his recent experiences had touched poor Larry's brain, and she felt sorry to see such a thing.

He must be taken away from these scenes as soon as possible, so that amid new surroundings he might forget the events of that terrible night that had deprived him of a friend and made her a widow.

So these two, each concerned for the other, carried on a double part during the whole day, and both were glad when darkness began to once more settle over noisy Peking.

Ere another day dawned, please Heaven, they would have made the hazard and either won or lost all.

#### CHAPTER XXVI.

The time for action had arrived.

Lord Rackett announced this when he came in after the others had waited anxiously hours for him in the little private parlor. Avis seated by the window where her straining eyes could catch glimpses of the shining roof of the mystic palace over the walls of the Forbidden City, and Larry tramping back and forward with the restless movements of a caged tiger.

They rejoiced to know the agony of waiting was now to be relegated to the past.

Everything was ready.

Plympton had done his duty well, and neglected nothing that would serve to enhance the chances of success of which he and Larry dreamed.

The two men indulged in a conversation aside, during which Plympton told what he had done, and was assured on the part of the little man that he had been careful not to betray the facts to Avis.

Perhaps it would have been the part of wisdom to have taken her into their confidence, for Avis was a remarkable woman, and could have controlled herself as well as Larry himself.

They thought otherwise, and yet her comfort was the sole motive that influenced them—it would be such a terrible disappointment if there should be no prisoner, or in case, after effecting his rescue, he turned out to be some one else besides her husband, Dr. Jack.

These motives had kept their lips sealed thus far, and they continued to influence them.

Should great good fortune await them in their daring venture, they felt assured it would be just as joyful an event for Avis as though she had anticipated such a thing, and wrestled desperately with alternate hopes and fears.

Nor did they anticipate any evil result.

Both believed in the maxim that joy never kills, as might the shock of sudden grief.

Lord Rackett looked at his watch.

It was the fourth time he had consulted his timepiece since entering.

"We must be moving," he said.

and a precious little life is lost after only a few hours illness. During the hot weather season every wise mother should keep a box of Baby's Own Tablets in the house to check these ills if they come suddenly. Better still, an occasional dose of this medicine will keep the stomach and bowels clean and prevent these dangerous ailments coming. Mrs. John Lancaster, North Portal, Sask., says: "My baby was attacked with diarrhoea and severe vomiting. I at once gave Baby's Own Tablets and next day she was as well as ever. I find the Tablets are the only medicine a little one needs." Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### INDIAN TREASURE TROVE.

##### Ancient Silver Coins Found by Children While at Play.

The small village of Jogaltembi, in the Bombay district, is likely to earn transient fame among numismatists and archaeologists by reason of the accidental discovery within its limits of a great hoard of very ancient coins. The place of concealment of the coins was found by children while at play, says the Times of India.

Excavation disclosed an earthen pot firmly imbedded in the hillside and filled to overflowing with silver coin, much of which the villagers proceeded in the true commercial spirit to melt down. But the story of the find spread further than the limits of Jogaltembi; and within a short time the balance of the treasure, about 100,000 coins, had rightly found a resting place in the local treasure under the treasure trove act.

The coins are all silver, of approximately the same size and type. On the obverse appears the head of the king who struck them—a fine face, despite the defects of the die, marked by a broad nose, a splendid aquiline nose, and a firm chin, with just a suspicion of thickness about the lips.

Around the head runs a legend in debased Greek characters, which Prof. Rapson, but lately appointed to the vacant chair of Sanskrit at Cambridge, and the late Pandit Bhagwanlal Indraji declare to be a transliteration of a bilingual legend on the reverse of the coin. The coins are those of Nahapana, the founder of the dynasty of the Western Kshatrapas, which ruled over a considerable portion of western India from A. D. 119 to A. D. 388.

Although several specimens of coins struck by Nahapana's successors (e. g., Chastana and Rudradaman) have been found, only a few of Nahapana have hitherto come to light at Nasik, Junagadh and Mahendragiri; and those were by no means such good specimens as these of Jogaltembi, which, safely preserved within their earthen casket, have defied the adverse influence of nineteen centuries.

"I think," said the prison visitor, "it would be helpful to you if you would take some good motto, and try to live up to it." "Yes," said the convict. Now, I'd like to select, for instance, "We are here to-day and gone to-morrow."

#### What British Surgeons Think of French Theory.

The important thesis advanced by Professor Blanchard, of Paris, that appendicitis is caused by intestinal worms—does not commend itself to distinguished British authorities on the disease.

One of the foremost English physicians, in an interview with a representative of the London Daily Mail, said that worms were rarely found in appendicitis cases, and the theory that they were a frequent cause of the disease was mere conjecture, and had in no way been demonstrated.

When Professor Metchnikoff was in London recently to deliver his Harben lecture he dealt with the causes of appendicitis, but made no such statement then.

It is true that the eggs of the thread-worm are sometimes found on vegetables manured by sewage, and these eggs may be developed if taken into the body, but those found on cabbages and turnips would be destroyed when the vegetables were boiled. The most dangerous vegetable from this point of view is watercress, which is often grown in water which is contaminated with sewage.

"It is a gross exaggeration to say that a surgical operation is absolutely unnecessary, and should never be performed unless some hard substance has been swallowed."

Another famous London surgeon said:—"I totally disagree with the professor about the operations. When the appendix has shown signs of getting into a bad condition, it is essential for future safety that it should be removed. The notion of appendicitis being always caused by the swallowing of some hard irritant, such as a cherry stone, is wrong. Not more than 5 per cent. of cases arise from this cause. I think the article in the Daily Mail will serve a useful purpose in calling attention to the danger of the use of sewage-contaminated vegetables."

#### CHIVALRY TO WOMAN.

##### Catholics of Australia Start Organization With Splendid Programme.

The Roman Catholics in Australia are always fertile in picturesque notions for binding their people in societies, guilds and orders. The latest device is the establishment of a new order of knighthood by Archbishop Carr, to be entitled "The Order of the Knights of Our Lady of the Southern Cross."

It is to appeal to the imagination of young Australian Romanists and to have for its objects: (1) To advance the honor due to women; (2) to promote the faithful fulfillment of the Christian duties of marriage; (3) to shield and preserve as far as might lie in their power female innocence; (4) to suppress indecency in words and actions; (5) to advance the cause of Christian chivalry by preserving women from being treated with open disrespect.

The entire scheme is warmly regarded by the Roman Catholic laity all over the Commonwealth.

#### CURIOUS COSSACK CUSTOMS.

Many queer customs and usages are prevalent among the Cossacks of the Don. No man changes his clothing on a Monday. If he did it is believed that he would suffer from a severe skin disease. On Thursday no fat or flesh must be pickled or corned. If anyone neglects this the meat would be full of worms in a fortnight. Wool is not spun on a holiday, else the cattle will sicken and die. A hen is always given an uneven number of eggs to hatch, never an even number. Bones left from a dinner at a funeral are thrown into the river, else the dead will appear to the living in fearful shape; and at the same meal no one dare cut bread—it must always be broken.

Sunlight Soap is better than other Soaps but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions

# Sunlight Soap

ONLY RICHEST OF RICH

WILL BE ABLE TO WEAR A DIAMOND NECKLACE.

In Twenty-five Years Stones Will Command Fabulous Prices—Mines Less Productive.

It is no exaggeration to say that in twenty-five years there will be as much locked-up capital in a diamond necklace as there is in the average industrial concern of to-day, and these stones will be at such a fabulous price as to be beyond the reach of any but the richest of the rich, says the London Daily Mail.

During the past two years the price of diamonds has jumped up 25 per cent.; during the past six months the price has risen 10 per cent., and in another two years diamonds will be

ANOTHER 20 PER CENT. DEARER.

Two years ago 2-grain ( $\frac{1}{8}$ -carat) stones could be purchased for £15 a carat. Now they are £22 10s, while 4-carat stones have gone up from \$21 a carat to £32 of £33.

Several of the largest firms, with sufficient foresight and capital, have for the last two years been steadily buying as many diamonds as they could get to safeguard themselves against this rise.

"Our stock of diamonds is worth now between £350,000 and £400,000," said Mr. H. Smith of the Association of Diamond Merchants, Jewellers and Silversmiths, Limited, to a Daily Mail representative, "and we are still buying."

But it is exceedingly difficult to buy diamonds at all. First of all, an introduction has to be got to the syndicate that controls the South African diamond market, and when this difficult matter is arranged the buyer awaits his turn—generally he has to wait

ABOUT SIX MONTHS.

On the appointed day he goes to the offices of the syndicate and is shown a parcel of diamonds. There is no bargaining; the buyer can either take the diamonds or leave them. One buyer asked for half an hour to consult his partner before taking a lot worth £100,000. When he came back they had been sold.

Men have been offered £1,000 for their "turn," and have refused it. The reason for the rise in the price of diamonds is that the mines are becoming less productive, although producing finer stones—whiter and more brilliant. Emeralds have gone up 50 per cent., and there has also been a big increase in the price of pearls and rubies.

AN INTERESTING BOOK BY A CANADIAN.

On Common Ground by Sydney H. Preston is a book of which one can speak with unstinted praise. It is not often that one finds oneself longing to get back any book, but one has this sensation with regard to this volume. It is a book difficult to drop from the first moment it is taken in hand and one to which the reader returns with real delight. It is partly, one must admit, because there is much fascination in the subject, but it is also because the narrative is so simple, lucid, satisfying. The book is full of pure, spontaneous,

## CAUSES OF INSOMNIA.

King's Physician Says Terror and Nervousness Are Responsible.

King Edward's Physician-in-Ordinary, Sir William Broadbent, explains in a medical magazine the causes of insomnia. As Sir William is quite an authority on nervous affections, and as insomnia is a common distress, his opinions are of value.

There are, says Sir William, good sleepers and bad sleepers; light sleepers, disturbed by the least light or sound; heavy sleepers, who rest calmly through a thunderstorm. Some fortunate persons fall asleep almost as soon as the head rests on the pillow every night; others less fortunate must patiently woo sleep.

The quality of sleep also varies. The neurasthenic wakes tired after a long night's rest, the after-dinner sleep of undue repletion is unrefreshing and sometimes stupefying. On the other hand, a brief nap may dismiss at once the fatigue and languor of a busy man.

The greatest foe of sleep is, perhaps, terror; suspension and anxiety come next.

When cold feet interfere with sleep, it is not merely through the feeling of cold as such, but by the influence on the general and cerebral circulation. Coldness of the feet, indeed, is often a concomitant of sleeplessness rather than its cause.

When the feet are cold after hard brain work the blood seems to be positively shut off from the feet. A hot bottle is then often of no use, and the best way of warming the feet with a view to procuring sleep is to stand in cold water and then rub the feet dry with a rough towel.

## COBALT WILL LAST.

The following is part of an article written by Alexander Dallos in "Business and Finance," a most reliable New York financial journal. It gives some idea of what the people of the United States think of the Canadian Cobalt country.

"The ores of Cobalt are justly claimed to be the richest in the world and consists mainly of Silver and Cobalt, with arsenic, nickel and, occasionally, gold. Think of shipping 100 car loads of ore averaging over \$300,000 per car, and all this ore taken from a depth of not over 50 feet! Selected car lots have gone as high as \$60,000 to \$129,000 per car and the average ore runs from \$1,000 to \$8,000 per ton. Geologists, experts and mining men generally were loath to accept Cobalt as a permanency, but to-day no class of men are more enthusiastic, for it is now proven that the deeper the shafts are sunk, the richer the ore becomes."

Captain Harris, a man of world wide experience as a mining engineer, says: "If you had asked me what I thought of Cobalt a year ago, I would have told you that it was altogether beyond precedent that such enormously rich values as we find here at Cobalt could last to any depth. To-day every indication from the entire section points to the strong probability of generally increasing values in depth throughout the field. I came here very much of a pessimist, but to-day I am an optimist—made so by close observation of actual conditions. Cobalt will last for years and make many fortunes."

Up to the present time, all the proven properties are located in Coleman Township, and, though the work has been carried on in the crudest way, many millions of ore have already been shipped and large dividends have been paid, in some cases as high as 200 per cent. To the investor, the Cobalt Mining Camp should prove particularly interesting for, so far, no mine has been sunk to a depth of 30 feet without finding shipping ore, and the Mining Laws of Ontario are so strict that no "wildcat" schemes can flourish there.

Jones: "I've stopped my wife going through my pockets when I'm asleep."

# "SALADA"

## Ceylon GREEN Tea

Is preferred by former Japan tea drinkers because of its greater purity.

Lead Packets only. 40s, 50s and 60s per lb. At all Grocers. HIGHEST AWARD ST. LOUIS, 1904.

## "OSHAWA" Steel Shingles.

Wind,  
Water,  
Storm  
and  
Fire  
Proof

Locked  
on  
All  
Four  
Sides

Made from Painted or Galvanized Steel, at prices varying from \$2.85 to \$5.10 per hundred square feet covering measure. This is the most durable covering on the market, and is an ideal covering for Houses, Barns, Stores, Elevators, Churches, etc. Any handy man can lay the "OSHAWA" shingles. A hammer and snips are the only tools required.

**FIRE, WATER AND LIGHTNING-PROOF.**

We are the largest and oldest company of the kind under the British flag, and have covered thousands of the best buildings throughout Canada, making them

We also manufacture Corrugated Iron in long sheets, Conductor Pipe and EAVESTROUGH, Etc.

METAL SIDING, in imitation of brick or stone.

METAL CEILING, in 2,000 designs.

Write for Catalogue No. 14R and free samples of "OSHAWA" Shingles.

# LANDS In Western Canada

Two cornering sections, selected lands in Saskatchewan, only 8 miles from two railways, C.P.R. & G.T.P. Strong soil, 90 per cent. plough land, spring creek, no sloughs. About 40 miles N.E. of Indian Head. Price \$10.50 per acre. Write for map and full particulars.

R. PARSONS, 91 Wellesley Street, Toronto, Canada.

## A BAD PLACE FOR DOGS.

Dresden Eats 2,500 of Them in Three Months.

The official statistics concerning the consumption of dog flesh at Dresden, Germany, have just been issued. They show that over 2,500 dogs have been eaten during the first three months of the year. The large amount of dog flesh consumed is believed to be due to the increased price of beef and mutton.

It is now proposed to turn the flesh of healthy dogs which are taken to the pound to account, and use them as food in the almshouses and such institutions, instead of destroying the carcasses, as is done at present.

## SILENT CRITICISM.

A young minister who did not scruple to fish for compliments was once invited to take dinner with a reticent old elder.

Manipulate the conversation as he would, the young man could not get his host to say "sermon," and at last he boldly introduced the important subject by remarking directly:

"That was a fine text I had to-day." But the elder knew his man. "Ou, ay," he replied, cautiously, "there was naething wrang wi' the text!"

## ROYAL MUSKOKA HOTEL.

This new, modern, up-to-date hotel was opened for the reception of guests in 1901. It is situated in the centre of the finest summer resort region in America, known as the Muskoka Lakes, within easy reach of the principal points in Canada and the United States. The interior of the hotel is planned to the best advantage for comfort, and convenience, special attention being given to ventilation and sanitary arrangements. Its spacious suites, with handsome bathrooms attached, are especially adapted to either large or small families. Cuisine and service are the best. Open for guests about middle of June. For further particulars, descriptive matter and all information write J. D. McDonald, Union Station, Toronto, Ont.

Mrs. Subbubs—"Never mind; it's her day out, anyhow!"

Thos. Sabin of Eglinton, says: "I have removed ten corns from my feet with Holloway's Corn Cure." Reader, go thou and do likewise.

**ONTARIO LADIES' COLLEGE**

—AND—  
Ontario Conservatory of Music.  
WHITBY, ONT., CANADA.

Palatial buildings, beautiful grounds, helpful social and religious influences, and the best facilities for the study of

one to which the reader returns with real delight. It is partly, one must admit, because there is much fascination in the subject, but it is also because the narrative is so simple, lucid, satisfying. The book is full of pure, spontaneous, hearty humor, with no trace of coarseness or boisterousness. Every page is unpretentious, lively, racy. It is the most pleasant book of its kind we have seen for many a day.

Mr. Preston is a Canadian, almost a Torontonian, living as he does near Oakville. "On Common Ground" is his second lengthy work. His first book, "The Abandoned Farmer," received high praise from all sources. Canadians should be proud of this successful Canadian author. Both these books are published by the Copp, Clarke Company, Toronto.

## GETTING RID OF PIRATES.

### How a Band Was Quickly Disposed of in South China.

A reader who arrived at Hongkong from Wuchow informs us that on Sunday, when he left Wuchow, there was a great clanging of gongs and blowing of whistles. The people were in a most excited state of mind and crowded the streets and housetops, says the South China Post.

Inquiry as to this unusual state of affairs elicited the information that seventeen of the most notorious robbers of the district, men who had kept the inhabitants in terror for a long time past, had paid the penalty of their misdeeds. It being impossible for the authorities to effect their arrest in the ordinary way, the taotai of the district enticed the robbers to his yamen by making an offer of a free pardon and other inducements to abandon their nefarious practices.

No fewer than seventeen of the ruffians swallowed the bait. Sixteen entered the yamen and were promptly surrounded by troops and made prisoners. One man escaped from the compound into the street, and ran for dear life. Another—the seventeenth man—suspected a trap and took to his heels without entering the official residence. Meanwhile the troops were not handling the fifteen captives very gently. They were promptly disarmed and without much ado were stripped and cut into a thousand pieces.

The enraged populace were not long in securing the two runaways and they met their end in the same manner in the streets. There was great rejoicing afterward and it is hoped that this lesson will have a deterrent effect on others whose haunts may be in the neighborhood.

## A HEAVY RESPONSIBILITY.

"Ain't you rather young to be left in charge of a drug store?"

"Perhaps so, ma'am. What can I do for you?"

"Do your employers know that it is dangerous to leave a mere boy like you in charge of such a place?"

"I am competent to serve you, ma'am, if you will state your wants."

"I think that I had better go to the store down the street."

"I can serve you just as well as they can and as cheaply."

"Well, you may give me a two-cent stamp, but it don't look right."

## Hump Back

SCOTT'S EMULSION won't make a hump back straight, neither will it make a short leg long, but it feeds soft bone and heals diseased bone and is among the few genuine means of recovery in rickets and bone consumption.

Send for free sample.  
SCOTT & BOWNE, Chemists,  
Toronto, Ont.  
Sole and \$1.00; all druggists.

Mining Laws Ontario are so strict that no "wildcat" schemes can flourish there.

Jones: "I've stopped my wife going through my pockets when I'm asleep." Robinson: "Is that so? How did you manage it?" Jones: "I bought one of those mechanical mice the other day and put it in my pocket. Since then she has lost all interest in the financial question."

Mother Graves' Worm Exterminator has no equal for destroying worms in children and adults. See that you get the genuine when purchasing.

Fred: "So you are really going to marry that young widow, eh?" Joe: "Yes." Fred: "She tells me you have promised to give up smoking." Joe: "Yes, sort of mutual sacrifice, as it were. She agreed to give up her weeds if I would give up mine."

A Cure for Fever and Ague.—Parmelee's Vegetable Pills are compounded for use in any climate and they will be found to preserve their powers in any latitude. In fever and ague they act upon the secretions and neutralize the poison which has found its way into the blood. They correct the impurities which find entrance into the system through drinking water or food and if used as a preventive fevers are avoided.

Minister: "So you saw some boys fishing on the Sabbath, my young man. Did you do anything to discourage them?" Small Boy: "Yes, sir; I stole their bait."

Do not give up in despair, you who suffer from obstinate disfigurements of the skin. Anoint the sore spots with Weaver's Cerate and purify the blood with Weaver's Syrup. All druggists keep them.

"Did you show that account to Ardup again to-day?" "Yes, sir." "Did you tell him it had been on the slate long enough, and I'd like to rub it out?" "Yes, sir." "What did he say?" "He said it looked as if you were trying to rub it in."

Some persons have periodical attacks of Canadian cholera, dysentery or diarrhoea, and have to use great precautions to avoid the disease. Change of water, cooking, and green fruit, is sure to bring on the attacks. To such persons we would recommend Dr. J. D. Kellogg's Dysentery Cordial as being the best medicine in the market for all summer complaints. If a few drops are taken in water when the symptoms are noticed no further trouble will be experienced.

## CHANCE TO MAKE A FORTUNE.

### Find a Way of Making Fogs Skiddoo at Your Behest.

The inventor who will devise an efficient method of dispelling fog or of counteracting its effect will reap a great fortune.

It is said that a week of the fog so common in London, especially in the latter part of December, costs the railway companies there \$1,000,000 and the cabmen \$5,000 a day, while the loss to merchants is beyond calculation. According to the Technical World, the excess of gas used on a foggy day would supply a town of 40,000 people an entire year.

It is estimated that in consequence of foul atmosphere the people of the British capital are put to an unnecessary expense of from \$15,000,000 to \$25,000,000 annually; and in winter enjoy sunshine only one-fourth of the time to which they are entitled. The effect of the fog is aggravated by the outpourings of smoke-laden chimneys, which infect the air, bringing periodically an alarming increase in the death rate through accident and from diseases of the respiratory organs.

In the course of life we shake many hands—and many people.

That was a fine text I had today. But the elder knew his man. "Ou, ay," he replied, cautiously. "There was naething wrang wi' the text!"

Milliner's Girl—"Madame said I was not to return until I had collected the amount of your bill." Miss Filine (in tears)—"My poor girl, how sorry I am for you. You have lost your place. You will never go back."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

"Then this," asked the rejected suitor, "is absolutely final?" "Quite!" was the calm reply. "Shall I return your letters?" "Yes, please," answered the young man. "There's some very good material in them I can use again!"

Useful at All Times.—In winter or in summer Parmelee's Vegetable Pills will cope with and overcome any irregularities of the digestive organs, which change of diet, change of residence, or variation of temperature may bring about. They should be always kept at hand, and once their beneficial action becomes known, no one will be without them. There is nothing nauseating in their structure, and the most delicate can use them confidently.

"The desert of Sahara must be a terrible place," said Meandering Mike. "Well," answered Plodding Pete, "there's one good thing to be said of it. There are not a lot of people there on the lookout for farm hands."

Puts You on Your Feet and keeps you there That's what "Ferrovin" does for all those recovering from wasting diseases. It is the best tonic in existence. It stimulates, nourishes and builds up the system.

Business Man: "What do you want?" Applicant: "I came to inquire if you were in want of an assistant." Business Man: "Very sorry. I do all the work myself." Applicant: "Ah, that would just suit me."

A Soothing Oil.—To throw oil upon the troubled waters means to subdue to calmness the most boisterous sea. To apply Dr. Thomas' Electric Oil to the troubled body when it is racked with pain means speedy subjugation of the most refractory elements. It cures pain, heals bruises, takes the fire from burns, and as a general household medicine is useful in many ailments. It is worth much.

Ella: "Bella told me that you told her that secret I told you not to tell her." Stella: "She's a mean thing; I told her not to tell you I told her." Ella: "Well, I told her I wouldn't tell you she told me; so don't tell her I did."

## MARTYRDOM DESCRIBED

Kingston Man Tells How He Suffered and How He Was Released.

Chas. H. Powell

"For years a martyr," is how Chas. H. Powell, of 105 Raglan Street, Kingston, begins his story. "A martyr to chronic constipation, but now I am free from it and all through the use of Dr. Leonard's Anti-Pill."

All Dealers or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

# WHY THE MUTINY FAILED.

## Broke Out Prematurely, Says the Times' Correspondent.

### MUTINY WAS PREMATURE.

London, Friday, Aug. 3.—The St. Petersburg correspondent of the Times says that the mutiny at Sveaborg apparently broke out prematurely, owing to the arrest of the marines, who were preparing a general naval mutiny to begin simultaneously at Sveaborg, Cronstadt and Sebastopol. Having broken out prematurely, it failed to develop according to the plans. The revolutionists hoped by a demonstration at Sveaborg to attract a large number of troops from St. Petersburg to Finland, and thus create more favorable conditions for a mutiny at Cronstadt, and possibly in the capital itself, but the Red Guard, in their misguided zeal, destroyed bridges and tore up sections of the railway, with the result that the movement of Russian troops was seriously delayed, and the plans of the revolutionists were abortive. Party dissensions seem to have further weakened the insurgents, for the various Socialist and and revolutionary cliques who participated in the demonstration proved incapable of forgetting their pet quarrels at the most critical moment.

The correspondent, describing the Cronstadt mutiny as a complete failure, says the garrison, as a whole, has not forgotten the bitter lessons of the October mutiny, and is not in favor of another at the present moment. The agitators apparently did not realize the situation. They persuaded their more devoted adherents to rise on the chance that the garrison would follow. Altogether, the revolutionists displayed an astonishing lack of strategical and tactical capacity. Their abortive attempts will probably only drive the Government towards further reaction. Premier Stolypin's scheme for moderate reforms will probably be abandoned. The members of the Social Democratic Committee for agitation in the army and several other Socialist agitators have been arrested.

### CZAR READY TO FLEE.

A despatch from St. Petersburg says: When the firing began at Cronstadt on Wednesday night there ensued a wild panic in the imperial palace at Peterhof, as the palace lies under the guns of the fortress. All preparations had been made in advance to flee to Tsarskoe-Selo, but a report afloat that the Emperor and his family actually had fled in the middle of the night was denied later at the chancellery of the imperial household. It was explained, however, that on account of "dampness" at Peterhof arrangements had been made for the return of the imperial family to Tsarskoe-Selo.

### GENERAL SHOT AND KILLED.

A despatch from Warsaw, Russian Poland, says: General Markgrafsky, chief of the Warsaw gendarmerie, was shot and killed on Thursday afternoon.

### RUSSIA ALONE CONCERNED.

The St. Petersburg correspondent of the London Times says that the Finnish Senate and the members of the Constitutional party in Finland do not favor insurrection. Senator Michelin, head of the Government, is hastening home through Stockholm from a visit to Norway. He says that the effort of the Red Guard to promote a strike are not receiving much support. He considers that the insubordination of the Sveaborg garrison only concerned the Russian government. Any participation in the mutiny by Finns would imperil their liberties. Senator Michelin's views are

ning. Most of the streets of the capital are not lighted. The railway men here quit work at midnight on Friday night, and those at Moscow at noon Saturday. All the railway stations are held by troops, who are also guarding the entire track of the Finnish Railway between the capital and Viborg.

The head of the Governor of Samara was blown off by the explosion of a bomb that was thrown at him this evening. The assassin was arrested.

The lightermen at Odessa have gone on strike, and the work of the port is tied up. There is a general unrest in the city. It is reported that there is an outbreak at Sebastopol similar to the one at Cronstadt. Two infantry battalions have been sent there from Odessa.

The railway employees on the Baltic line struck on Friday evening. The Nicholas line, between St. Petersburg and Moscow, is plentifully guarded. It is not believed that the employees of this line will strike at present. The Railwaymen's Union reluctantly consented to the order to strike. It is much doubted whether the order will be generally complied with.

### TEN DAYS MORE FOR CROP.

**Bulk of the Wheat Will be Harvested by Then.**

A despatch from Winnipeg says: Continued fine weather throughout western Canada has strengthened the position of the bears, and the harvesting of a crop averaging quite as high as that of last year over a considerably increased acreage is as well assured as anything can be. Another ten days will see the bulk of wheat out of danger. Around Glenboro' the crop is magnificent, standing straight and clean with a prospective average of thirty bushels. The binders started there on Monday. West of there to Baldur and farther out the crop is lighter and probably will not exceed eighteen to twenty bushels. From northwestern Manitoba splendid reports are coming, and farther west around Battleford the harvest will be general within a couple of days.

### HAULED INTO MACHINERY.

**Man Sixty Years of Age Meets Terrible Death at Montreal.**

A despatch from Quebec says: George Richard, engineer in the tannery of Elie Turgeon, St. Valier street, was on Monday morning hauled into the moving machinery, and, before he could be rescued, one of the man's legs and three ribs were broken while his head body and legs were badly cut and bruised. Richard was removed to the Hotel Dieu Hospital. He is about 60 years of age, and had been employed for many years in the tannery.

### CONVICT HANGED HIMSELF.

**Michael Tobin Goes to Seek the Final Judgment.**

A despatch from Kingston says: Michael Tobin, a young man sentenced from Brockville last March to a seven years' term in the penitentiary, committed suicide on Sunday. The deceased had been acting queerly lately and this necessitated his confinement in the insane department of the institution. Guards Bennett and Ryan were on duty at the time and everything was in pro-

### THREE HUNDRED LIVES LOST.

**The Steamer Sirio Wrecked Off Hormigas Island.**

A despatch from Cartagena, Spain, says: A terrible marine disaster occurred on Saturday evening off Cape Palos. The Italian steamship Sirio, from Genoa for Barcelona, Cadiz, Montevideo and Buenos Ayres, with about 800 persons on board, was wrecked off Hormigas Island. Three hundred emigrants, most of them Italians and Spaniards, were drowned. The captain of the steamer committed suicide. The Bishop of Sao Pedro, Brazil, also was lost, and it is reported that another Bishop is among the missing. The remainder of the passengers and the officers and crew got away in the ship's boats or were rescued by means of boats sent to them from shore. A number of fishermen who made attempts at rescue were drowned. Those rescued from the vessel are now at Cape Palos in a pitiable condition, being without food or clothing. The Sirio struck a rocky reef known as Bajos Hormigas, and sank soon after, stern first. Hormigas Island lies about 2½ miles to the eastward of Cape Palos. The vessel was owned by the Navigazione Italiana of Genoa.

### (LATER).

A despatch from Cartagena on Monday says: The captain of the Italian steamer Sirio, which sank off Hormigas Island causing terrible loss of life, did not commit suicide, as reported. He is here, but refused to say anything about the disaster, except that the rock on which his vessel struck is not charted. Popular rage continued to be centred on his alleged cowardice after the steamer struck, which is ascribed to his over-confidence in his knowledge of the coast. A saloon passenger, who is a godson of ex-Queen Margherita of Italy, says he saw several women clinging to life-belts in the water thumped with their fists by men until they were compelled to let go the belts, and all were drowned.

It is officially announced that 348 Italians, 40 Spaniards, 14 Arabs, 10 Austrians, 6 Orientals, 4 citizens of Argentina, 4 Brazilians, 2 Montenegrans, and 119 of unknown nationality were saved. More than 200 of the dead have been brought here.

### SHOT NEIGHBOR'S CHILD.

**Peter Wylie, a Scotch Lad, Arrested on Serious Charge.**

A despatch from Guelph says: A Scotch lad named Peter Wylie, aged 15, who came to Canada three years ago, now lies in the local jail on the charge of having caused the death of a thirteen-year-old girl named Mary A. Berdina Swackhammer at her father's farm in Erin township. The tragedy is alleged to have been caused through a fit of temper on the part of the accused. He was employed by Mr. Darius Kennedy, who was to have helped Farmer Swackhammer with the turnips last Thursday. On account of sickness Kennedy was unable to go, and sent Wylie over to explain matters. Swackhammer set him to work, but on Saturday night the lad became disobedient, refusing to assist with the chores. He secured the stock of a gun from a shed and with it threatened young Stanley Swackhammer, who was hitching up to drive into Acton. The accused wished to go there, too, but was refused. There were some hot words, and Stanley drove off on his journey. Afterwards Wylie, who is said to have been in a very angry mood at the time, secured a gun in the woodshed, and discharged the weapon on Berdina, inflicting shocking injuries from which she died almost immediately. The girl's mother and father rushed to the spot on hearing the report and found their daughter lying in a pool of blood. Wylie exclaimed, "I have shot Berdina," but afterwards made his escape, walk-

## THE WORLD'S MARKETS

### REPORTS FROM THE LEADING TRADE CENTRES.

**Prices of Cattle, Grain, Cheese and Other Dairy Products at Home and Abroad.**

Toronto, Aug. 7.—Flour—New Ontario wheat 90 per cent. patents are quoted at \$2.90 to \$2.95 in buyers' sacks outside for export. Manitoba first patents, \$4.40 to \$4.60; second patents, \$4 to \$4.10, and strong bakers' \$3.90 to \$4, Toronto.

Bran—The market is easy at \$13.50 to \$14 in bulk outside. Shorts are quoted at \$17.50 to \$18 outside.

Wheat—No. 2 white and red Winter quoted outside at 74c, and No. 2 mixed, 73½ to 74c outside; No. 2 goose at 72c to 73c. New No. 2 Ontario wheat quoted at 70 to 71c outside. No. 1 Northern Manitoba quoted at 83½ lake ports, and No. 2 Northern at 81½ lake ports.

Corn—No. 2 American yellow is quoted at 58 to 59c to arrive, Toronto.

Oats—No. 2 white nominal at 37 to 38c on track here, and at 35c outside. No. 2 new oats, mixed, at 32 to 32½c outside, August delivery.

Peas—No. 2 quoted outside at 83c.

Rye—No. 2 quoted at 62c outside.

Barley—No. 2 quoted outside at 48 to 50c, and No. 3 extra at 46 to 47c.

### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.50 to \$1.60.

Honey—Strained honey quoted at 8½ to 9c per lb., and combs at \$1.50 to \$2 per dozen.

Hops—The market is dull at 18 to 16c per lb.

Hay—Car lots of No. 1 timothy are quoted at \$10 on track, Toronto; No. 2 at \$7 to \$7.50.

Straw—\$5.50 to \$6 per ton.

Potatoes—New potatoes are quoted at 65 to 75c per bushel in quantities.

Poultry—Turkeys, fresh killed, 12 to 14c; chickens, 10 to 12c per lb. alive; hens, 8 to 9c per lb., alive; ducks, alive, 15c per lb.

### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 17 to 19c; large rolls, 16 to 18c; and inferior a: 14 to 16c; tubs, 17c. Creamery prints sell at 21 to 22c, and solids at 20c.

Eggs—Good candled stock, 18 to 19c per dozen.

Cheese—They are quoted at 12 to 12½c the latter for twins.

### HOG PRODUCTS.

Bacon—Long clear, 12½ to 12½c per lb. in case lots; mess pork, \$21.50 to \$22; short cut, \$24 to \$24.50.

Hams—Light to medium, 15 to 16c; do., heavy, 14½c; rolls, 12½c; shoulders, 11½c; backs, 17 to 18c; breakfast bacon, 15½ to 16c.

Lard—Tierces, 11½c; tubs, 11½c; pails, 12c.

### BUSINESS AT MONTREAL.

Montreal, Aug. 7.—Grain — Business in Manitoba wheat continues quiet. The market for oats is very dull, and the tone is weak. Sellers are prepared to take 39c in store for No. 4, 40c for No. 3, and 41c for No. 2. Flour—Manitoba Spring wheat, \$4.50 to \$4.70; strong bakers', \$3.90 to \$4.20; Winter wheat patents, \$4.25 to \$4.35; straight rollers, \$3.90 to \$4.10; do., in bags, \$1.85 to \$1.90; extras, \$1.60 to \$1.70. Feed—The demand for all lines of millfeed continues good, and an active trade is reported at firm prices; Manitoba bran, in bags, \$17.50 to \$18; shorts, \$20 to \$21 per ton; Ontario bran in bags, \$17.50, shorts, \$20.50 to \$21; milled mouille, \$21 to \$25 per ton; and straight grain, \$28 to \$29. Provisions—Barrels short cut mess, \$24; half bbls., do., \$12.50; clear fat backs, \$23.50; long cut heavy

ing much support. The considers that he insubordination of the Sveaborg garrison only concerned the Russian government. Any participation in the mutiny by Finns would imperil their liberties. Senator Michellin's views are confirmed by an appeal issued by an assembly of citizens at Helsingfors, urging the populace to assist the authorities in maintaining order and directing that Koch, the leader of the Red Guard, be arrested.

The correspondent points out that the Red Guard, which is a strange combination of the Teetotal League and the Workmen's Militia, is assumed to be acting purely in sympathy with the Russian revolutionists, for Finland has just received the most democratic form of government in Europe.

#### BLAME GRAND DUKE ALEXANDER.

A despatch from London says: The revolutionary outbreak of Russian sailors and gunners combined with the Finnish Red Guard, was provoked largely by the activity of the Grand Duke Alexander Michaelovitch, who for two months has held a special command of the Russian forces employed in preventing gun-running through Finland. The Russian occupation of the Aland islands, and the restless movements of a Russian torpedo fleet around the Finnish coast, both angered, through the heavy work, the men employed in it, and greatly embittered the Finnish revolutionaries. The Russian officers had in almost hopeless task. One of them says that in the garrison artillery that is spread among these islands there is only one officer to 280 men. He himself says he has seen some of his men only once in two months, when they came to get their pay. The Grand Duke Alexander has not gone to the feet at Sveaborg. He remains in his summer residence.

#### EX-MEMBER OF DOUMA SLAIN.

A despatch from St. Petersburg says: The report of the murder of M. Herzenstein, a member of the outlawed parliament is confirmed. He was assassinated at his country house near Terioki, Finland, by men in the pay of the black hundred organization. While walking along the seashore with his wife and laughter several shots were fired at him from an unoccupied building. Two of the shots hit him and he fell dead. His daughter was wounded in the hand. The murderers escaped.

Three hours prior to the murder a phone message was received at a newspaper office from Moscow, asking for news of M. Herzenstein, and saying that it was reported in Moscow that he had been assassinated.

M. Herzenstein was of Jewish descent, and very wealthy. His attacks in the Minister of Finance in the Lower House of Parliament attracted widespread attention. He supported the constitutional Democrat scheme for land appropriation.

He was a practical banker and for a long time was the secretary of the Moscow Land Bank. He was a recognized authority on finance and was regarded as the first in all financial and agricultural matters. M. Herzenstein was a leader in all of the Zemstvo movements, and furnished them all of their financial data. His family had renounced the Jewish faith and become Orthodox Russians several generations ago. He occupied a prominent place in Moscow society and was a popular idol among the peasants.

#### STRIKE FOLLOWS MUTINY.

A despatch from St. Petersburg says: A general strike has been formally declared. It was decreed and is being engineered by a committee composed of social Democratic members of the late Duma, revolutionists, the Peasants' Union and the Railwaymen's Union. It is not known what funds are available to make the movement effective, but it has already begun with vigor. Most of the factories in the Wyborg district of St. Petersburg are closed, including the State bank note printing works. A great part of the street cars and river steamers have stopped run-

ning much support. The considers that he insubordination of the Sveaborg garrison only concerned the Russian government. Any participation in the mutiny by Finns would imperil their liberties. Senator Michellin's views are confirmed by an appeal issued by an assembly of citizens at Helsingfors, urging the populace to assist the authorities in maintaining order and directing that Koch, the leader of the Red Guard, be arrested.

#### A SAD DAY FOR MY DOLLIES.

O, dear, such an accident happened today While Dora and Molly and I were at play! We harnessed my kitty to Molly's red cart And fixed in the dollies all ready to start; My kitty behaved just as well as could be, And purr'd every minute, she liked it, you see. Then into our yard trotted Molly's dog Rover. My kitty just flew with the cart at her heels And tore 'round the corner, when off came the wheels. Then Dora's rag baty bounced into the street And Molly's Amanda cracked both china feet. And— isn't it sad? My wax Ethelind Rose Lost off the wee tip of her dear little nose!

#### JAPANESE BIRTHDAYS.

Japan is the land of topsy-turvy, and so, perhaps, it is only to be expected that individual birthdays—with the exception of that of the Emperor are not taken any notice of, but a sort of general birthday of everybody altogether is celebrated with great rejoicing. There are two of these general birthdays, one for each sex. The male birthday, which is known as the "celebration of the boys," occurs on the third day of the third month, and the "celebration of the girls" takes place on the fifth day of the fifth month. These days are general holidays for the young. All studies and work generally are put aside, and boys and girls respectively receive presents according to their station.

#### WOULDN'T LIE TWICE.

Nora had been told to say at the door that her mistress was not at home when certain callers appeared upon the scene. It evidently went much against the grain for her to make herself responsible for even so small a white lie, but she promised to do so, and with certain modifications she kept her word. "Is Mrs. Blank at home?" queried the caller. "For this was toime, Mrs. Smithers, she ain't," said the maid; "but hivin help her if you ask me again, I'll not lie twice for anybody living."

#### IN A SUBURBAN VILLA.

Mr. Mann: To-morrow is my day off, so I'm going over now to borrow our neighbor's lawn mower. Mrs. Mann: Why, our lawn doesn't need to be trimmed. Mr. Mann: Who said it did? I'll lock it down in the cellar, and then my slumbers won't be disturbed by his infernal racket in the early morning.

#### NO FEAR.

An Irishman got employment as a hod-carrier to take bricks up a ladder to a bricklayer. He was not accustomed to such work, and on getting up the ladder for the first time with the bricks, the bricklayer told him to go down and get some more. "How do I get down?" said Pat. "Why," replied the bricklayer, "the same way that you came up." "No fear," said Pat, "I came up head first."

she died almost immediately. The girl's mother and father rushed to the spot on hearing the report and found their daughter lying in a pool of blood. Wylie exclaimed, "I have shot Berdina," but afterwards made his escape, walking to Acton, where he was arrested as he was about to board a train. He was quite unconcerned, considering the seriousness of his position, and maintains that the discharge of the gun was accidental.

#### CHICAGO BANK CLOSED.

The Shortage is Estimated at Over \$1,000,000.

A despatch from Chicago says: The Milwaukee Avenue State Bank, one of the largest banks outside of the downtown districts, on Monday closed its doors following a run. The news of the suspension spread rapidly, and soon several of the smaller banks in the vicinity were besieged by depositors. The patrons of the bank are mostly Polish working people, who abound in that neighborhood. The statement of the bank, issued June 19th, gave the liabilities at \$4,697,474. Of this amount \$3,175,195 was saving deposits. Loans and discounts amounted to \$3,223,172. As far as now known all of this paper is good. The shortage in the account of the Milwaukee Avenue State Bank will run close to \$1,000,000, much of which has gone in real estate speculation and commercial ventures.

#### DYING UNDER HOT SUN.

The Awful End of a Saskatchewan Settler.

A despatch from North Battleford, Sask., says: On Saturday last a sad accident occurred about three miles from this town when a recent settler, Mr. T. Batchel, was thrown out of his rig and sustained such serious injuries that he died on Sunday morning. The deceased left town on Saturday morning for his homestead five miles out, and it is presumed that his horse bolted and Batchel was thrown with great violence through a wire fence, sticking half way. He hung there all afternoon in the hot sun, not being discovered until eight o'clock at night. His head was badly battered in and he was severely injured otherwise, and died a few hours later. Batchel was aged 65 years, and leaves a widow and three young children.

#### SMUGGLING CHINAMEN.

Practice on a Large Scale is Unearthed Near Brockville.

A despatch from Kingston says: The discovery has been made of the transportation of Chinamen across the St. Lawrence River into the United States. The Chinamen are sent from various Canadian points to woods near Rockport, near Brockville, and close to the islands. The small launches plying about pick up the Celestials and give them safe conduct across the river, where they are cared for and hidden until they can be swallowed up in the big cities.

#### BLOWN TO ATOMS BY DYNAMITE.

Three Lose Lives on James Bay Railway Construction.

A despatch from Dunchurch, Ont., says: Rock Foreman Peter Morrissey, his son, William Morrissey, and a young Italian assistant were blown to atoms on Tuesday evening by the accidental discharge of a dynamite blast on the James Bay Railway construction. The accident occurred on the Jamieson contract, about 36 miles from Parry Sound, and a few miles from the scene of the dynamite explosion a month ago, when four men lost their lives. The home of the two Morrisseys was in Nova Scotia.

\$21 per ton; Ontario bran in bags, \$17.50, shorts, \$20.50 to \$21; milled mouille, \$21 to \$25 per ton; and straight grain, \$28 to \$29. Provisions—Barrels short cut mess, \$24; half bbls., do., \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$21.50; half bbls., do., \$11.25; dry salt long clear bacon, 12½ to 12½¢; barrels plain beef, \$13 to \$13.50; half bbls do., \$6.75 to \$7.25; barrels heavy mess beef, \$11.50; half bbls., do., \$6.25; compound lard, 9 to 9½¢; pure lard, 12 to 12½¢; kettle rendered, 13 to 14¢; hams, 14½ to 16¢; breakfast bacon, 16½ to 17¢; Windsor bacon, 16½¢; fresh killed abattoir dressed hogs, \$11 to \$11.25; alive, \$7.75 to \$8.15 per 100 lbs. Eggs—Straight selects, 20 to 20½¢; No. 1 candled, 17½ to 18¢. Butter—Choicest creamery, salted and unsalted, 22½ to 22½¢. Cheese—Ontario, 11½ to 11½¢; Quebec, 11½ to 11½¢.

#### UNITED STATES MARKETS.

Milwaukee, Aug. 7.—Wheat—No. 1 Northern, 79 to 80¢; No. 2 Northern, 76 to 78¢; Sept., 74¢ asked. Rye—No. 1, 60 to 60½¢. Barley—No. 2, 55 to 55½¢; sample, 40 to 54¢. Corn—No. 3, cash, 50½¢; Sept., 49½¢ asked. Minneapolis, Aug. 7. — Wheat—Sept., 73½¢; Dec., 74½¢; May, 79½¢; No. 1 hard, 76½¢; No. 1 Northern, 75½¢; No. 2 Northern, 74½¢; No. 3 Northern, 72½¢. Flour—First patents, \$4.10 to \$4.20; second patents, \$3.95 to \$4.05; first clears, \$3.25 to \$3.45; second clears, \$2.50 to \$2.60. Bran—\$13.50 to \$13.75.

#### LIVE STOCK MARKETS.

Toronto, Aug. 7.—A slightly better tone was noticeable to trade at the City Cattle Market this morning.

Export Cattle—Choice at \$4.75 to \$5; medium to good, \$4.60 to \$4.75; bulls \$3.50 to \$3.75; bulls, lights, \$3.25 to \$3.50; cows, \$3.50 to \$4.

Butcher Cattle—Choice are quoted at \$4.40 to \$4.60; medium to good, \$4.25 to \$4.40; bulls, \$3 to \$3.50; cows, \$2.50 to \$3.50; canners, \$1.50 to \$1.75.

Stockers and Feeders — Stockers, choice, \$3 to \$3.65; light, \$2.25 to \$3; cows, \$2 to \$2.40; bulls, \$1.75 to \$2.25; short-keep feeders, \$4.50 to \$4.65; heavy feeders, \$4.25 to \$4.50.

Milch Cows—The range of prices is about steady at \$25 to \$50 each.

Calves—Prices are easy at 3½¢ to 6¢ per lb.

Sheep and Lambs—Export ewes are quoted at \$4.25 to \$4.50 per cwt.; bucks, \$3.50 to \$3.75. Lambs were slow at \$7 to \$7.65.

Hogs—Quotations are 25¢ per cwt, lower at \$7.65 for selects and \$7.40 for lights and fats, fed and watered.

#### SIX LIVES LOST OFF LABRADOR.

Four Fishing Vessels Driven Ashore in Gale on July 20.

A despatch from St. John's, Nfld., says: The mail boat in from Labrador reports that four fishing smacks were driven ashore in the gale which ravaged the coast on July 20. All the crews escaped, but most of the smacks were lost. The storm did great damage to fishing gear along the coast, and it is reported that six men were drowned from small boats in attempting to save some of their nets and tackle.

#### RUSH TO THE WEST.

Population of Saskatchewan Shows Large Increase in Five Years.

A despatch from Ottawa says: In seven of the smaller towns in Saskatchewan, the census just taken shows that the total population grew from 1,802 to 6,909 in the last five years, or nearly 300 per cent.—The following are the figures for 1901 and 1906:

|             | 1901. | 1906. |
|-------------|-------|-------|
| Saskatoon   | 113   | 3,031 |
| Indian Head | 768   | 1,545 |
| Oxbow       | 230   | 530   |
| Davidson    |       | 520   |
| Carnduff    | 190   | 491   |
| Wapella     | 397   | 459   |
| Alameda     | 104   | 333   |

## KING AND KAISER TO MAKE UP.

Coming Conference Takes Added Interest From Russian Crisis.

A London despatch says: The announcement that King Edward and Emperor William are to meet within a few weeks is the best possible news that could come to the political world at the present time. It signifies, at least, the mutual desire of the two most powerful rulers in Europe to bring to an end their long personal and political estrangement, which has been the most dangerous feature of the crisis created by the destruction of the balance of power. Few know how deep and bitter has been this antagonism between the two monarchs. Both, of course, have been too wise to give it any direct expression. There has been, in fact, absolute non-intercourse between uncle and nephew for a long time.

The policy of each, however, has been directly opposed to that of the other. King Edward has striven, thus far with consummate success, so to combine the European Powers that Germany should find it impossible to gain any considerable advantage from Russia's impotence. Emperor William's efforts have been aimed chiefly, although in most cases indirectly, against British interests. The result of this diplomatic duel has been to preserve thus far the status quo in Europe.

One great peril still threatens. Any day Russia may be plunged into revolution. The problem of the attitude of the two powers on her western border is a grave one. A conference between the King and Kaiser on the eve of this emergency is the greatest safeguard to peace that could be given. It is understood that the interview will be on the Kaiser's initiative. This is a hopeful augury. They will have other things to discuss also. Prominent among these is the attitude of the powers toward the Mohammedan unrest. This danger could be entirely eliminated by a complete agreement between these two men.

The approaching interview, indeed, may easily be of epoch-making importance to all mankind. Civilization could ask no greater boon than a full understanding between the British King and German Emperor.

## DEADLY HEAT IN GOLD FIELDS.

Prospectors Killed by Temperature of 160 Degrees in California.

A despatch from Los Angeles, Cal., says: According to reports which reached this city on Wednesday, terrible heat conditions are prevailing in the Inyo County gold fields and the adjacent desert, and mining prospectors are dying from the heat. W. H. Adams, a mining engineer, who returned on Wednesday, says eight prospectors were brought in dead from the heat while he was in the Panamint region. During his stay in Panamint six bodies were brought there, all victims of sunstroke. In Ballarat, Mr. Adams says, the thermometer registered 135 degrees at noon and at midnight had dropped to only 114 degrees, which was the average for three days. In the desert section lying south of Redlands, he says, the temperature went up to 160 degrees.

## HEALTH OF TOURISTS.

Board of Health Posts Notices in Summer Resort Districts.

A Toronto despatch says: Notices have been issued by the Provincial Board of Health which will shortly be posted in the Muskoka and Kawartha Lakes districts, forbidding the emptying of sewage and other garbage into the lakes, as the water is used by the tourists for drinking purposes, and the City of Peterboro also gets its water supply from Otonabee River. The minimum fine for the offence is \$5 and the maximum \$50. In this way the health of the tourists will be guarded. The sanitary conditions of the municipalities is left in local hands.

## SOLDIERS FOUGHT POLICE.

Artillerymen at Halifax Placed in Guardroom.

A despatch from Halifax says: An incipient mutiny among the Royal Canadian Artillerymen broke out at the Citadel on Thursday evening, no less than sixteen men being placed in the guard room under close confinement as a result of the trouble. The military authorities are reticent about the matter, but from facts gleaned by your correspondent, it appears that one of the garrison police entered a saloon on one of the upper streets for the purpose of arresting two members of the artillery boat crew, who were in dishabille. One of the soldiers resented this and struck the arresting soldier—a severe blow on the face. After a scuffle, the offending men ran to their barracks, as also did the garrison policemen, who called for assistance to arrest the soldiers. Several of the gunners on being warned for escort duty, refused to act. Extra assistance was obtained, and with the aid of an armed picket, the mutineers were placed in confinement. This caused further trouble, and the rioting soldiers smashed the windows in the guard room where they were in confinement and they tried to escape. Two of them succeeded, but were recaptured during the evening. Besides the mutinous prisoners, two senior non-com's. were placed under arrest for drunkenness.

## ATTEMPT TO SLAY CHILD.

A St. Thomas Couple is Charged With the Crime.

A despatch from St. Thomas says: Cora Stonehouse, aged 26 years, wife of Newton M. Stonehouse, is in the prison ward under arrest, at Amasa Wood Hospital, and the husband in jail charged with the attempted murder of their newly-born child. Thursday morning Crown Attorney McCrimmon was notified that a dead infant had been found in the outhouse of Stonehouse, on Barnes Street. The Crown Attorney notified the police, who at once went to the place, when the child was found to be alive and crying; it was imbedded in filth, which was not deep enough to bury it. The police at once removed it and it was placed in the care of a trained nurse. The mother and father were charged with the crime, which they both strongly denied, stating that the child was not theirs, and that they had been only married two months, but proof will be brought forth that the woman is the mother of the child. A bruise was found on the infant's head, which looked as if it had been struck. The husband is 40 years old and a carpenter.

## GET CANS INSPECTED.

Farmers and Milkmen Must Obey Law by October 15th.

An Ottawa despatch says: The Milk Act as passed requires that when milk is sold by measure all cans or other vessels used for the purpose of such sale shall contain a standard gallon or some multiple of a standard gallon, and that all such cans shall be subject to verification under the general provisions of the Weights and Measure Act, the capacity thereof, and the name of the maker being engraved or stamped thereon. The owners of cans now in use which have not been verified and stamped by an inspector or assistant inspector of weights and measures are required, within three months from July 13, 1906, (when the new Act was assented to by the Governor-General), to present them to the local inspector of weights and measures for verification, when each can be stamped with its capacity to the nearest quart thereof, and will be branded or stamped "milk can." After the three months have expired any person using cans which have not been inspected and stamped shall incur a penalty not exceeding \$50, the cans be-

# HEALTH

## CANDY-EATING.

The articles of food which go to make up the ordinary diet of mankind are two classes—those which go to form the framework of the body, the bone and muscle, and those which supply the fuel by which the machine is run. These are, roughly speaking, the meats and the sweets. There is still another class, applied to the sweets, namely, the fats, but these need not be considered here. They constitute a very useful ingredient in the diet, and are seldom taken in excess, except perhaps by persons who are themselves too fat; but by the majority of mankind they are taken in too small rather than in too great amount. It is in regard to the eating of candy that a word of caution is necessary.

If we lived only on meat, eggs, and the non-starchy vegetables, such as peas, beans, spinach and cabbage, the addition of candy and sweets would be most commendable. The body must have sugar in some form in order to enable it to do its work. But it should be remembered that sugar is the coal of the human machine, and every engineer knows that too much coal will impair the efficiency of his boiler. If the engine is working to its utmost capacity and the drafts are all open, almost any amount of fuel will be consumed, and will give out energy; but if only a little work is required, and if the damper is closed, the addition of coal beyond the normal requirement is not only of no service, but is an evil.

It is the same with the human mechanism. An active boy or man engaged in hard work can take an almost unlimited amount of sweets and starchy foods so long as he does not restrict the amount of proteid food (meats and leguminous vegetables), not only without harm, but with benefit. But women and men engaged in sedentary pursuits will eat much candy at their peril.

There is no doubt that too much of it is eaten. It is taken at the end of a dinner composed largely of potatoes, rice, bread, and other starchy foods, which the digestive juices turn into sugar, or nibbled between meals, and in this way altogether too much is taken for the needs of the body. The result is a clogged liver, resulting in biliousness and gall-stones, in gouty symptoms, and even in diabetes; digestion is impaired, and the nitrogenous elements are not assimilated, so that waste is not repaired.

It should be remembered that the cereals are composed almost entirely of starch, which is transformed in the body into sugar, and that those who live on them, under the mistaken notion that meat is harmful, cannot eat candy as well without serious risk.

## RHEUMATISM.

Formerly all painful affections of the muscles or joints were grouped together under the one title, rheumatism; but now one after the other has been found to be a distinct disease, until, in scientific phraseology although not yet popularly, the term rheumatism is coming to be restricted to acute rheumatism of the joints, or rheumatic fever. This disease is of uncertain nature, although it is generally believed to be of bacterial origin. How the bacteria act is what has not been determined. Some investigators think they are carried by the blood to the affected joints; others believe that they are confined to the tonsils, and that the joint inflammation is caused by the presence of the poisons elaborated by these bacteria and transported in the blood stream.

Rheumatism seems to bear some relation to climate, as it occurs most frequently in the winter and early spring

of Peterboro also gets its water supply from an Otonabee River. The minimum fine for the offence is \$5 and the maximum \$50. In this way the health of the tourists will be guarded. The sanitary conditions of the municipalities is left in local hands.

### LIKE WILL CURE LIKE.

#### Insect Coming From Spain to Fight Codling Moth.

A despatch from Toronto says: To exterminate the codling moth which is so injurious to the fruit crop, and especially the apple, the Ontario Department of Agriculture is about to import an insect from Spain which makes ravaging attacks on the codling moth, but does not injure the fruit. "The experiment," said Hon. Nelson Monteith, Minister of Agriculture, "has proven quite successful in California, and it is altogether likely that the experiment will be tried in Ontario. At any rate something must be done to rid us of the codling moth."

### COAL AT BATTLEFORD.

#### Unknown Prospector Says He Has Found Big Vein.

A Battleford despatch says: Coal has been discovered within a few miles of this town between the Saskatchewan and Battleford Rivers. The coal is of good quality, and the finder, who is an old prospector, claims that there is lots of it. At present he will not divulge the whereabouts of the mine and he himself prefers to remain incognito, but he will resume explorations, and if his further discoveries warrant it, will endeavor to get some capitalists interested. The discovery is of the greatest importance to Battleford.

### THEIR CHOICE OF MEAT.

#### Men of British Navy May Use Argentine or Australian.

A despatch from London says: Replying to a question in the House of Commons on Thursday, Secretary of Admiralty Robertson said that the men in the navy for the present would be allowed the option of drawing Australian or Argentine corned beef in place of American meat. It was not thought necessary to consider special measures for disposing of the American meats in stock, amounting to over £1,500,000 purchased in 1903.

### CHOLERA IN MADRID.

#### Discovery of Cases Attributed to Contaminated Water.

A despatch from Madrid says: Several sporadic cases of cholera have been discovered here, and have caused considerable alarm. The disease is attributed to contaminated water. A committee of hygiene has taken immediate and effective steps to prevent its spread. A number of suspected wells have been ordered closed.

### MEAT CHOKED HIM.

#### Helper on New Welland Canal Dies at Port Dalhousie.

A Port Dalhousie despatch says: Martin Long, a helper on the new Welland Canal, died here very suddenly on Thursday from swallowing a large piece of meat. Dr. Ireland, of Port Dalhousie, was called, and succeeded in getting the meat out of his throat, and worked with him for two hours to revive him, but it was of no avail.

### BRITISH ASSOCIATION.

#### Will Hold Its Next Meeting at Winnipeg in 1909.

A despatch from York, England, says: The British Association for the advancement of Science at its session here on Friday decided to meet at Winnipeg in 1909.

to difficulty in masthead and kicked the rider. He sank, and John Astor, son of Lieut. Astor, dived in and brought up the soldier, saving his life.

### UNITED STATES.

The convention of Catholic societies at Buffalo denounced Socialism.

Thomas O'Toole, under sentence of death for murder, escaped from the jail at Newcastle, Pa., on Friday.

Mrs. Wm. E. Corey, wife of the President of the United States Steel Corporation, was granted a divorce at Reno, Nev.

While walking in his sleep early Tuesday morning, Frank Warfel, 34 years old, stepped out of a second storey window at 1411 Washington ave., St. Louis. He sustained a fractured skull and died at the city hospital a few hours later.

The sixteen girl operators at the Central Union Exchange at Champaign, Illinois, have struck, alleging that the male employees of the company indulge in too much profanity in the operating room, and that the manager declines to stop it.

Congressman Nathan W. Hale, of Knoxville, Tennessee, has received a letter from one of his constituents urging him to introduce a bill in Congress prohibiting women from wearing peek-a-boo shirt waists and corsets and from using powder and paint on their faces.

Five thousand people attended the burial of Joseph Rodecap, a farmer and the heaviest man in Madison county, Indiana, who weighed 460 pounds. His coffin was 3 feet wide, 28 inches deep and 7 feet long. No hearse could carry it and a waggon used. Ten men were required to carry the coffin and sixteen men to lower it into the grave.

### GENERAL.

Japan has removed foreign trade restrictions in Manchuria.

A woman by the name of Bloemers, who was in jail at Berlin for the murder of a military officer, gave birth to a son. The courts say the judgment of execution must be carried out.

Emperor William has ordered an investigation into the case of Major Fischer, who was attached to the headquarters staff in German Southwest Africa, and who has been arrested on the charge of receiving bribes from firms selling war supplies.

### KILLED FOR TRIVIAL CAUSE.

#### Mail Driver Stabbed Wife Who Asked for 25 Cents.

A despatch from New York says: During a quarrel at their home in Harlem on Wednesday, Martin Schnable, 34 years old, a small wagon driver, probably fatally stabbed his wife with a carving knife. Schnable fled, and has not been arrested. Mrs. Schnable had asked her husband for 25 cents to repay a loan from a neighbor and the quarrel resulted.

### LAST LICENSE FOR YEARS.

#### No More Saloons Till Chicago Doubles Population.

A despatch from Chicago says: The last saloon license that will be issued in Chicago until the city nearly doubles its present population was given out on Tuesday. The license number is 7,353. Under the Harkin ordinance, which goes into effect to-day, no more saloons will be permitted in Chicago until the ratio is one saloon for every 500 of population.

### MAKE MONTREAL CAPITAL.

#### Move to Have Quebec Metropolis Seat of Government.

A Montreal despatch says: A movement has been started by a number of the members of the Provincial Parliament to have the Parliament buildings removed from Quebec to Montreal. Some of the members claim they have reason to hope their efforts in having the seat of government changed will be attended by success.

to the nearest quart thereof, and will be branded or stamped "milk can." After the three months have expired any person using cans which have not been inspected and stamped shall incur a penalty not exceeding \$50, the cans being forfeited.

### POSTS ON HUDSON BAY.

#### Adventure Party to Establish Several on Route to Lake Winnipeg.

An Ottawa despatch says: The steamer Adventure, with Major Moodie and a detachment of North-West Mounted Police, sailed on Thursday night from North Sydney for Hudson Bay. The principal achievement which the expedition has in view for the coming winter is the establishment of a route of communication between Fort Churchill, on Hudson Bay, and Norway House, the Hudson Bay Company post at the head of Lake Winnipeg. The distance is some 500 miles. At Split Lake, midway between Fort Churchill and Norway, there is a post of the company, and the Mounted Police will establish two other intermediate posts. It is expected that during the winter two mails will be put through from Hudson Bay by this route.

### A BRAVE WOMAN.

#### Jumped Overboard to Rescue a Drowning Sailor.

A despatch from Milwaukee says: Mrs. E. Allison of New York boldly plunged into the river from the deck of the steamer Christopher Columbus on Wednesday in an attempt to rescue Martin Hull, a sailor, who had fallen overboard. Mrs. Allison, who is an expert swimmer, dived repeatedly, but all to no purpose. Hull evidently had been stunned by his fall and did not rise to the surface. His body was recovered finally with grappling hooks, and Mrs. Allison, without stopping to change her wet clothes, took charge of the efforts to resuscitate the man. Hull was dead, however.

### LEFT THEIR GATES OPEN.

#### Quebec Farmers Fined Under Unique Railway Statute.

A despatch from Three Rivers, Que., says: Dolphis Lizee of Batiscan, William Lizee of the same place, and Euchariste Lajoie of Yamachiche were before Magistrate Desilets on Thursday and fined \$20 and costs, the maximum amount allowed by law, for leaving their farm gates open, thus permitting their cattle to pass through them on to the railway track. Several railway accidents have recently occurred in the Province of Quebec through farmers allowing their cattle to get on to the track, and with a view to removing this danger to the travelling public, the head officers of the companies have notified their local agents to prosecute vigorously all farmers who they find leaving their farm gates open.

### KAISER'S EXPENSIVE TRIP.

#### Paid \$4,250 a Day, or \$119,000 in All, For Steamer.

A Swinemunde despatch says: Emperor William returned here on Tuesday from his four weeks' cruise in northern waters on board the steamer Hamburg. His Majesty is very much unburned. He will remain here for a couple of days to witness the effect of the firing of the heavy guns against two armored hulks. The active battle fleet is now composed of 16 first-class vessels. They are now engaged in target practice in these waters, but the results attained are carefully guarded. The steamer Hamburg, for which Emperor William pays \$4,250 a day, will wait for a few days at Kiel subject to His Majesty's use during the naval manoeuvres.

that the joint inflammation is caused by the presence of the poisons elaborated by these bacteria and transported in the blood stream.

Rheumatism seems to bear some relation to climate, as it occurs most frequently in the winter and early spring and exposure to damp cold seems, at least in the predisposed, to precipitate an attack. Men suffer more often than women, probably in some degree because they are more exposed to the inclemencies of the weather. One attack seems to predispose to another, and not to confer immunity, as happens in typhoid fever and most infectious maladies.

The disease usually begins with pain and stiffness in one of the joints, following a cold in the head or sore throat. In a day or two the joint swells, becomes red, and the pain grows agonizing. After lasting for a while in one or more joints, the inflammatory symptoms often stop suddenly and go to another joint—and so they may play back and forth through all the joints of the body, the disease persisting interminably. The membrane lining or covering the hear, may also be attacked.

The treatment of rheumatism is, of course, a matter for the doctors. The affected joint should be handled as little as possible; attempted massage, or even the lightest friction, may greatly increase the pain. The joint should be embedded in cotton and protected by a wire screen from the pressure of the bedclothes and everything else that may hurt it.—Youth's Companion.

### SOUR MILK FOR LONG LIFE.

It is the opinion of Professor Metchnikoff, an eminent Russian scientist, that the middle age of man should be about eighty years, instead of forty and that his allotted span of life, instead of being three-score and ten, should be seven score.

His theory is that age, or physical evidence of it, is a disease, a result of ravages of certain forms of bacteria. The difficulty of discovering the secret of prolonged life, therefore, lay in finding beneficial germs to combat and overcome those of murderous tendency. The microbe which causes milk to turn sour is the most efficient.

Most famous among Europeans for their longevity are the Bulgarian mountaineers; they are also noted for their custom of consuming great quantities of sour milk. Might there not be an intimate connection between these things?

The germ of the ferment which is used to curdle milk in Bulgaria differs from the ordinary microbe of sour milk only in so much as it is larger and more powerful. Professor Metchnikoff takes it daily himself—he keeps a large bowl of it in his laboratory—and with him in this are many other hard-headed bacteriologists and physicians throughout Europe.

### SASKATCHEWAN CROP.

#### One Estimate Places Wheat Yield at 31,130,000 Bushels.

According to a despatch received at Ottawa on Thursday from Regina, a Saskatchewan crop bulletin estimates the area under crop in that province at 1,955,673 acres, an increase of 320,000 over the previous year. It is estimated that the wheat acreage is 1,336,809 acres, which will give a total yield of 31,130,000 bushels. The crop is reported to be in splendid condition throughout the province, and has suffered no damage up to the present.

### QUEEN VICTORIA IN ENGLAND.

#### Spanish Royal Yacht Reaches the Isle of Wight.

A despatch from Cowes, Isle of Wight, says: The Spanish Royal yacht Giralda, with King Alfonso and Queen Victoria on board, arrived here on Wednesday. Queen Victoria, who looked the picture of health, received a warm welcome.

# My Hair is Scraggly

Do you like it? Then why be contented with it? Have to be? Oh, no! Just put on Ayer's Hair Vigor and have long, thick hair; soft, even hair. But first of all, stop your hair from coming out. Save what you have. Ayer's Hair Vigor will not disappoint you. It feeds the hair-bulbs; makes weak hair strong.

## WHAT OTHER PAPERS SAY

Toronto News.

The government cannot afford to condone that transaction of the commission which gave at private sale a valuable property to kinsman of one of the commissioners. The present ministers condemned this sort of thing in the liberals. They cannot in reason allow it, now that they are in power.

Vancouver, B. C., Province.

The recent storm in the northwest has already occasioned a wall from the Jeremiahs who are always predicting the ruin of the harvest. For years these false prophets have seen their predictions fail, and they now imagine that they have a fair chance to regain their lost reputations. When the harvest is gathered they may find themselves again discredited.

Woodstock Sentinel-Review.

Students of Canadian history will be inclined to smile when they recall how "gladly" the privilege of responsible government was granted to this country by the political party to which Mr. Balfour owes allegiance. They will recall that when the struggle for responsible government was in progress the Balfours of that day were denouncing the reformers as rebels, and indulging in the same gloomy prophecies as to what might be expected if the people of Canada were accorded the privilege of governing themselves.

## FATE OF THE JUNE BUGS.

Awful Punishment That Was Decried by an Ancient Council.

"Berne has an official collector of June bugs," writes a correspondent of the Chicago News from Switzerland. "This personage is appointed by the city council when the triennial pest of June bugs occurs, and he is empowered to destroy all the insects that may be brought to him. Each owner of a small estate is obliged to gather five pounds of bugs, and those who happen to be the proprietors of larger pieces of property must collect proportionately more. For each pound that is missing from this obligatory amount a fine of 10 cents is imposed, but if more than the required quota is forthcoming a premium of 2 cents a pound is paid. This remuneration is offered also to others besides the property owners. A landholder who entirely neglects to gather any bugs at all is subject to a fine of from \$5 to \$10. School children receive permission to enter large estates, where they shake the trees and poke long sticks about in their endeavors to dislodge as many bugs as possible.

"In times of old, the ancient chroniclers tell us, it was the custom to attempt to rid the country of these unwelcome visitors by citing them into court and by banishing them from the country, but the wily insects failed to obey the summons and continued to fly about in the face of the law, laying eggs promiscuously and contrary to edict. In a certain village it was determined to make a terrible and lasting example of all the insects found within its borders. With considerable expenditure of time and patience quantities of bugs were collected and placed in a huge sack. Deliberation was held as to the fate of these hard backed prisoners. Ordinary death was considered too light a punishment for such offenders. A hideous end must be theirs.

"A procession of the inhabitants of the village, advisers and councillors, wise men and children, wended its way

theirs.

"A procession of the inhabitants of the village, advisers and councillors, wise men and children, wended its way slowly toward the place of execution, the summit of a high peak. This was laboriously climbed, an executioner with the bag of buzzing bugs in the lead. With due regard for the responsibility and justness of their act, the wise men approached the edge of the precipice. The bugs were to be ignominiously dashed to pieces on the rocks thousands of feet below. The executioner hung over the crag, the bag, top downward, was opened and the bugs shaken out to their death. But instead of falling like so many lumps of lead, as they ought to have done on such an occasion, the bugs, to the amazement of all, spread their wings and flew away."

### POINTED PARAGRAPHS.

Misers get more out of the world than they put in it.

What others say of you is the effect. You supply the cause.

Life's chief compensations do not come in pay envelopes.

The scorn of egotism is as harmless as the slurs of ignorance.

Every selfish man is the center of his universe—and he's it.

Riches have wings, they say, but poverty isn't built that way.

Quite often the man who is swift and a good guesser distances the slow but sure chap.

The workman who takes a real interest in his work doesn't have to spend much time looking for a job.

### Vegetable Gluttons.

Sundews, common in English marshes, are sufficiently knowing to distinguish between various substances presented to them. Offer them a nice scrap of tender beef, and in a couple of hours they will have concealed it from sight. Try them with a piece of chalk or a tiny pebble, and they remain stolidly immovable. Wet the chalk and offer it again, and the plant apparently mistakes it for meat, the bristles gradually closing round it; then, discovering the deception, they gradually relax and return the chalk without thanks. These vegetable gluttons will absorb morsels of poached eggs and mutton chops, but cheese turns the leaves quite black and finally kills them.

### Saluting the Flag.

Army regulations prescribe in detail what honors shall be paid to the flag, and these regulations are implicitly and gladly observed. No matter how little one may relish the duty of showing the respect due to some military superior, he is always ready and glad to do honor to his flag. Whenever any one in the military service of the United States passes near the unfurled colors or whenever the flag passes before him, he is required to remove his cap in salute, and if sitting he is required to rise and stand at "attention" until the flag has passed.—St. Nicholas.

We like best to call

### SCOTT'S EMULSION

a food because it stands so emphatically for perfect nutrition. And yet in the matter of restoring appetite, of giving new strength to the tissues, especially to the ~~lungs~~, its action is that of a medicine.

## INSECT STINGS CHAFED SKIN SORE FEET HEAT SORES SUNBURN & ALL SKIN DISEASES

ZAM-BUK kills insect poison and stops the pain of the sting. Heals cuts and bruises, sore aching feet, chafing sores, prevents festering, cures blood poison. Is a skin food, and covers ulcers, abscesses, etc., with new healthy skin. Doctors recommend it for Eczema.

Mrs. Angus, of Fenelon Falls, says:—"I have been keeping house for 40 years, and never found anything to equal Zam-Buk. As a household balm and salve it is wonderful."

### NAIL CHARACTERISTICS.

They Are an Aid In Diagnosis of Diseases and Traits.

It is said that the moon at the base of the nail is simply an indication of good health and excellent circulation, while the white spots are always the accompaniment of an impaired nervous system. The common idea that an external application of vaseline will cure the white spots is erroneous, and those afflicted with the little "story tellers" would far better turn their attention to securing perfect physical health in the assurance that the spots will disappear with improved circulation.

It is not possible to create moons at the base of the nails. Frequently the moon is there, but through negligence it is covered by skin, which without attention will grow upward over the base of the nail.

It is not generally understood that the shape and appearance of the finger nails are carefully considered and form an important factor in the diagnosis of disease. Long nails are said to indicate physical weakness and tendency to lung trouble, and this tendency is aggravated where the nails are corrugated and yet more aggravated if they curve from the top back to the finger and across. Where the nails are long and bluish they indicate bad circulation. This same type of nail, but shorter, denotes tendency to throat affection, bronchitis and the like.

Short, small nails indicate heart disease. Where they are short, flat and sunken you may look for nervous disorders. The short pained woman will criticise her friends and her foes, but she will criticise herself with the same severity. She is apt to be sarcastic and sometimes so quick at repartee that she appears almost brutal. The best dramatic and literary critics possess this type of nail.

Hammocks a fine assortment.

MADOLE & WILSON.

Gold.

The first mention which we have of gold is in the eleventh verse of the second chapter of Genesis, or, in other words, 4,004 years before Christ. Gold was used as money by the ancient Egyptians at a very early date. Herodotus tells that the invention of the coinage of gold belongs to Lydia, about 750 B. C. Authorities conflict about the first coinage of gold. Some say it was Miletus and some the Persians, but there are no records to show just when.

### The Justs.

Banaram of Persia bore the enviable title of the Just. The righteousness of his decisions was seldom called in question. This title has been conferred on several monarchs, among them being Casimir II. of Poland, Ferdinand I. and James II. of Aragon, Haroun-al-Raschid of "Arabian Nights" fame, Khosron of Persia, Louis XIII. of France and Pedro I. of Portugal.

### A Colored View.

"Mammy," said Pickaninny Jim as he watched the meteors falling, "does you see all dat brightness comin' down?"

"Yaas, indeed."

"I know what makes it. De cullud angels has been put to work sweepin' up de golden city."

### His Way.

Mr. Hennypeck (peevishly)—When you tell me to do a thing, like a fool I go and do it. Mrs. Hennypeck (acidly)—No, you go and do it like a fool.

Goodness does not consist in greatness, but greatness in goodness.

Our enemies are our outward sciences.—Shakespeare.

### NO MAN IS STRONGER THAN HIS STOMACH.

Let the greatest athlete have dyspepsia and his muscles would soon fail. Physical strength is derived from food. If a man has insufficient food he loses strength. If he has no food he dies. Food is converted into nutrition through the stomach and bowels. It depends on the strength of the stomach to what extent food eaten is digested and assimilated. People can die of starvation who have abundant food to eat, when the stomach and its associate organs of digestion and nutrition do not perform their duty. Thus the stomach is really the vital organ of the body. If the stomach is "weak" the body will be weak also, because it is upon the stomach the body relies for its strength. And as the body, considered as a whole, is made up of its several members and organs, so the weakness of the body as a consequence of "weak" stomach will be distributed among the organs which compose the body. If the body is weak because it is ill-nourished that physical weakness will be found in all the organs—heart, liver, kidneys, etc. The liver will be torpid and inactive, giving rise to biliousness, loss of appetite, weak nerves, feeble or irregular action of heart, palpitation, dizziness, headache, backache and kindred disturbances and weaknesses.

Mr. Louis Pare, of Quebec, writes: "For years after my mother began to fail, my head grew dizzy, eyes pained me, and my stomach was sore all the time, while everything I would eat would seem to lie heavy like lead on my stomach. The doctors claimed that it was sympathetic trouble due to dyspepsia, and prescribed for me, and although I took their powders regularly yet I felt no better. My wife advised me to try Dr. Pierce's Golden Medical Discovery—and stop taking the doctor's medicine. She bought me a bottle and we soon found that I began to improve, so I kept up the treatment. I took on flesh, my stomach became normal, the digestive organs worked perfectly and I soon began to look like a different person. I can never cease to be grateful for what your medicine has done for me and I certainly give it highest praise."

Don't be wheedled by a penny-grabbing dealer into taking inferior substitutes for Dr. Pierce's medicines, recommended to be "just as good."

To gain knowledge of your own body—in sickness and health—send for the People's Common Sense Medical Adviser. A book of 1008 pages. Send 31 one-cent stamps for paper-covered, or 50 stamps for cloth-bound copy. Address Dr. R. C. Pierce, 663 Main Street, Buffalo, N. Y.

## THEIR FIRST RIDE

By T. S. Boyd

Copyright, 1906, by Homer Sprague

Gilder glanced anxiously at his watch. He had only seven minutes in which to catch his train. The night was dark, and he could scarcely walk five blocks in a driving rain, wait for a car and make connections.

Just then a carriage drove up to the curb and an elderly man of about his build alighted. The chairs were all occupied; it would be fully fifteen minutes before the newcomer could get a shave. In that time he could get to the station and the carriage would have time to return.

It was worth the chance. He dashed across the sidewalk, called an order to the driver and jumped in. As the door slammed the horses started up and they were off at a brisk pace before Gilder realized that there was a second occupant in the carriage.

"It did not take you very long," laughed a musical voice.

Gilder sank into the seat with a groan. "I don't know who you think I am," he said apologetically, "but I'm a robber. Don't be afraid. I'm not a regular robber, but one through force of circumstances. I have to catch the 6:48 train, and the only way I could do it was to borrow a carriage without permission."

"My uncle did not give you permission to use the carriage?" demanded the voice. Gilder knew that a girl with a voice like that must necessarily be pretty.

"I didn't ask him," he said calmly. "You see, it would have wasted precious time. I figured that I could get to the station and the carriage could get back before he was shaved. A dollar would have fixed the driver. I suppose now you will have me arrested."

"For trespass, perhaps," she laughed. "On your own confession you did not mean to steal the brougham."

"How was I to know that a man who went in to get shaved would leave a

haps that will be the quickest way of stopping a scandal."

He gave the order to the coachman and stepped inside. "I am sorry to have to inflict my company on you longer," he said penitently, "but it might be as well if I went along. I will take you to the station and then be driven to the house and explain to him in person."

He sat silent as they sped along to the little suburban station, his forgetfulness of which had caused a part of the situation. The Northern was only a fifty mile line, cutting some of the manufacturing towns, and it had entirely escaped his memory.

It seemed a longer drive than it really was, for the girl was annoyed and he keenly felt his responsibility for the awkward position in which he had placed her. Just as they were driving up to the station the horses were pulled up quickly and a blue coated form shortly appeared at the door.

"I didn't think you would be so foolish as to try to get away," was his remark as a policeman stepped into the carriage. "The captain wants to see you at the house."

"Won't it be sufficient if you take me?" demanded Gilder. "This lady is anxious to reach her home."

"They're anxious to have her there," was the terse comment, "but orders is orders, and I was to bring you both in if I found you."

"I don't suppose that \$25 would bring about a forgetfulness of orders?" suggested Gilder.

"It 'ud bring about a broken head," was the wrathful answer.

Gilder remembered that there was a police investigation then on and realized that the policeman feared a trap, so he kept silent until they drew up, before the green lights. The policeman proudly led them up to the desk sergeant, who ushered them into the captain's room.

"Your uncle said he would come right down when we phoned," he explained. "I don't like to lock you up."

Gilder had recovered his self-possession and by the time the wrathful uncle arrived he had made such good use of his time that his apology had been accepted in full. Then the door flew open with a bang and a choleric old gentleman entered flourishing a cane. Even in his excitement Gilder wondered how the coachman had mistaken him for his master, but the next development drove all such thoughts from his head, for the new arrival paused in his belligerent demonstrations.

"Are you Jimmy Gilder's son?" he demanded.

"So I've been given to understand," he answered wonderingly.

The cane flew across the room, and the old man came toward him with outstretched hands.

"You're the living image of your father when he left college," he cried. "I'd have known you anywhere."

"I wish you had recognized me in front of the barber shop," he laughed, then added brazenly: "No, I don't. Then you would just have helped me to catch my train. I'm glad I stayed."

It was easy work explaining. John Davies now regarded the whole matter as a joke and insisted upon carrying Gilder back to his home.

"I'm sorry the elopement wasn't in earnest," he said late that evening as they smoked in the library.

"I'll do the best I can," was the earnest assurance, and when Gilder finally caught the 6:48 Mabel saw him off, and on her finger glistened a ring that had not been there when they took their first ride together.

Had a Welsh Cough.

There was a crowd watching the fire when one of the bystanders gave a

## YOUR BRAIN HOLDS THE NERVE STRINGS

AND IF DISEASE TAKES HOLD OF THE NERVES THE BRAIN LOSES CONTROL OF ALL THE FORCES THAT CONTRIBUTE TO HEALTH AND MENTAL AND PHYSICAL COLLAPSE ARE AS CERTAIN AS SUNSET

## South American Nervine

begins at the beginning to prevent and eradicate disease—it acts on the nerves that control the vital organs of the body, gives strength to the whole nervous system, fills the blood with that richness and purity that is so essential to health—because, remember this, that when these nerves become weakened and exhausted it means indigestion, torpid liver, stagnant kidneys, the heart flutters and becomes irregular and weak, the lungs fail to have the nourishment and weaken, and the climax, naturally enough, is debility—and the next stage may be consumption. All such dire consequences may be saved by the wonderful potency of South American Nervine.

South American Nervine is greatest blood purifier of modern medicine. South American Nervine is woman's best friend in very deed.

You persist and it never fails.

SOUTH AMERICAN RHEUMATIC CURE cures in from one to three days.  
SOUTH AMERICAN KIDNEY CURE for diabetes, Bright's disease and all bladder troubles.

Sold by F. L. Hooper.

## "THE MAN'S DRIVING DOWNTOWN," HE WAILED.

woman waiting in the carriage for him?"

"When one gets as old as uncle one is apt to feel himself privileged," she laughed.

"He doesn't appreciate his privileges," he said boldly. "Now, if I had a pretty niece?"

"Flattery will not amend your offense," she warned. "How do you know what I look like?"

"By your voice," he explained. "It's a sort of intuition."

"I thought that was a feminine gift," she laughed.

"Not entirely," he insisted. The carriage rattled past an electric light, and he peered into her corner. "You know I am right," he added triumphantly.

"What can I say?" she laughed helplessly. "You are a most embarrassing person."

"Don't say anything," he pleaded. "If you did you would probably tell me to get out."

"In all this rain?" she questioned, with a little shudder. "I shall let you go on to the station in common charity."

"The gods are good," he murmured. "I am only sorry it is such a short ride to the station. I'll be there in a minute." He glanced out of the window and gave a cry.

"What is the matter?" she asked.

"The man's driving downtown," he wailed. "I can never make the train now."

"Did you just tell him to drive to the station?" she asked.

"Of course," he said. "There is only one station."

"You forget the Northern," she reminded. "Uncle was taking me there. I live in Union terrace. John supposed that you meant the Northern."

"It served me right," he admitted, glancing at his watch. "I suppose the only thing to do is to drive back to the barber shop and ask his forgiveness."

"He might be getting worried," she suggested.

He lifted the speaking tube and blew through it. When he had given the order for the change of direction he turned to the girl again.

"It's going to be mighty awkward explaining," he said. "Is your uncle inclined to be?"

"Very," she said impressively. "I don't know whether he will cane you or call a policeman."

"Pleasant prospect," he commented.

"You can get out before we get there if you wish," she suggested.

"I usually face the music," he said.

"It's the better way," she said approvingly, "but uncle can play a very lively tune."

"Sort of 'Hot Time in the Old Town Tonight' thing," he suggested with a chuckle.

"Very likely," she assented, "but you will not be long in doubt. Here is the shop."

Gilder threw open the door and darted across the sidewalk. The men in the shop crowded curiously to the door.

"The old gentleman has gone to the police station," they explained. "He thought it was an elopement."

Gilder went back to the carriage.

"Your uncle thinks we have eloped," he said. "Shall we follow him to the police station?"

"I think you had better take me to the Northern," she said coldly. "Per-

There was a crowd watching the fire when one of the bystanders gave a smothered, guttural cough. Immediately the man beside him grabbed his arm.

"You're Welsh," he said eagerly.

The man with the cough looked puzzled. Then his neighbor poured out a volley of Welsh words that ended in English with, "What part of the country did you come from?"

The man with the cough shook his head, and his neighbor became indignant. "It's nothing to be ashamed of, to be a Welshman," he said, "so why not admit it?"

"But I'm not Welsh," said the man with the cough. "I wouldn't know a word of the language if I heard it."

His neighbor was still indignant. "You just said a Welsh word a minute ago," he growled. "You can't fool me. You forgot yourself for a minute."

"I didn't. I only coughed," came in protest, and the man coughed again.

"That's it! That's it!" said the Welsh man enthusiastically. "That's the word I heard."

But the coughing individual lost himself in the crowd, muttering something about "fools being allowed to run."

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1860-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

[Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent Lottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance!

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

## S. BOND & CO.,

ODESSA.

TO THE PUBLIC—

Our Spring Goods have now arrived and we are able to show exceptional values and patterns in Crum's Prints, Sateen Prints, Dress Ducks, Organdies, Priestley's Lustres, and Silks.

We have a full supply of Groceries, Flour, and Feed, Patent Medicines, Boots and Shoes, and Hardware, in fact everything kept by a general store.

We are able to compete with any general store in the provinces

We pay Highest Price for all Farm Produce.

S. BOND & CO., ODESSA.

## FARM LABORERS

To Manitoba and Saskatchewan

1906

\$12 for the going trip.

\$18 additional for the return ticket, under conditions as below.

—GOING DATES—

AUG. 14 Stations south of, but not including main line, Toronto to Sarnia, including Toronto.

AUG. 17 Main line Toronto to Sarnia and stations north, except north of Cardwell Junction and Toronto on North Bay Section.

AUG. 22 From all points Toronto and east to and including Sharbot Lake and Kingston, and north of Toronto and Cardwell Junction on North Bay and Midland Divisions.

One way second class tickets will be sold to Winnipeg only. Representative farmers, appointed by Manitoba and Saskatchewan Governments, will meet laborers on arrival at Winnipeg.

Free transportation will be furnished at Winnipeg to points where laborers are needed. A certificate is furnished when each ticket is purchased, and this certificate, when executed by farmer, showing that laborer has worked thirty days or more, will be honored from that point for a second class ticket back to starting point in Ontario, at \$18.00, prior to Nov. 1st, 1906.

Tickets will be issued to women as well as to men, but will not be issued at half fare to children. Tickets are good only on special Farm Laborers' trains.

For full particulars see nearest C. P. R. ticket agent, or write C. B. Foster, D. P. A., C. P. R., Toronto.

# An Absolute Cure For DYSPEPSIA

Dyspepsia, Indigestion, Belching of gas after eating, mean weakness.

By means of its muscles, the stomach should churn the food—changing solids into liquids—mixing in the gastric juice to start digestion.

If the stomach is weak—then food is not properly churned and mixed with enough gastric juice. Then you have indigestion and then dyspepsia.

## Fruit-a-tives

OR "FRUIT LIVER TABLETS"

strengthen the stomach—just as juicy beef and eggs and milk strengthen the wasted frame of a patient getting over Typhoid.

FRUIT-A-TIVES contain the elements that give new—vigor new energy—to the muscles lining the stomach—stimulate the digestive glands and assure a copious flow of gastric juice for each meal.

More than that, FRUIT-A-TIVES correct the Constipation which usually attends stomach trouble—and by acting directly on kidneys and liver, put the whole system in healthy condition.

FRUIT-A-TIVES are a peculiar combination of fruit juices and tonics that are known all over Canada for their wonderful cures in all stomach, liver and kidney troubles.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES  
LIMITED,  
OTTAWA.

It Should Be Marked For the Latitude In Which It Stands.

In an old shop in lower New York a man keeps up his trade of dial making. The dials, square, octagonal or circular, are hand chased. They do not receive a high polish, and any accidental effect of weather stain or other "tone of time" is carefully preserved if not skillfully added. These dials, fitted with the gnomon, or stylus, are then artfully slipped into the show windows of uptown curiosity shops among a selected debris of Sheffield plate, prism candlesticks, inlaid tea caddies and old blue plates.

A visitor to one of these shops asked: "How old is that brass dial over there? It's all hand work, isn't it?"

"It's all hand work," said the proprietor, whom we will call Truthful James. "I can testify to that, for I know the man whose hands made it. It's about a month old, if you want to know. You're like lots of other people—you want an old Scotch or English dial. Don't you know it would be useless, if you found it, for practical purposes? Excuse me, but haven't you ever studied geography and heard of latitude? A dial ought to be marked out scientifically for the exact latitude in which it is to be set up. So unless you strike the same parallel in the states that the dial left in England it will tell lies from morning till night. You'd be surprised how many people pick up a dial that strikes their fancy which perhaps stood in the garden of an old Virginia estate, intending to hurry it off to the big grounds of some place in Minnesota; or they'll snatch at some quaint dial from New England, with the idea of rigging it up in Texas.

more people would make the same blunder, except that many haven't caught on to dials. Too bad. Nothing is prettier than a simple dial at the crossways of garden paths, or by a fountain or on a terrace or at the entrance of a pergola or near a rustic seat or arbor. You don't have to hire a head gardener and two assistants to keep a sundial. Marble platforms and pedestals are very grand, but unless you're running a big Italian garden with clipped hedges and yews and statues something simple is what you want. The dial will keep just as good time, once it's engraved right, if it's mounted on a tree stump, with ivy planted round it, or on a bowl, or on the coping of an old disused well, or on a column of cobbles mortared together, or on top of the old hitching post that the family doesn't use in these automobile days, but doesn't want to root up and throw away.

"You'd be surprised at the ingenuity of some people," said Truthful James, who himself seemed of ingenious bent. "I mean people who haven't much money to spend and are fond of their own old stuff for association's sake. They're the ones who get effects with a piece of junk, a lump of sentiment and a pocket of small change that can't be bought with a blank check. I've known people who used an old millstone to set the dial on, or who laid a slab over an old stone garden urn, or who saved the capitals from pillars on a house being torn down, or who even rigged up a standard from the bricks of a chimney on an old homestead that had meant a lot to them. One family made a sort of cairn out of a geology collection some ancestor had formed. Another took a flag pole for the gnomon and laid out a dial with pebbles in the grass around the pole.

"No, it doesn't require any skill to set up the dial. Get the noon mark for the gnomon on several days, nick it on the slab and then set the dial in a bed of cement. There you are."

### The Laundry Auction.

"Ever go to a laundryman's auction?" asked the man who was sorting bundles. "You can get bargains there sometimes. Here are forty-eight packages that will be sent to the auctioneer tomorrow. One bundle is labeled 'W. Joblotz. No address. Will call.' Now, I wonder what has become of W. Joblotz, who had no address and promised to call? What has become of the owners of these forty-seven packages? Some of the things thrown on our hands are very fine and as good as new. Just look at that pile of handkerchiefs and those shirt waists and collars and cuffs. It has been more than a year since they were left here. All unclaimed packages are kept a year or more, then they are sent around to a general receiving station to be disposed of at auction."

### Archbishop of Canterbury.

The archbishop of Canterbury is referred to as "his grace," and he writes himself archbishop, etc., "divina providentia," whereas other prelates use the phrase "divina permissione." He is the first peer in the realm. At coronations he places the crown on the head of the sovereign, and the king and queen are his domestic parishioners. The bishop of London is his provincial dean, the bishop of Winchester his subdean, the bishop of Lincoln his chancellor and the bishop of Rochester his chaplain.

## THE SMOKE of DECISION

By Frank B. Wells

Copyright, 1906, by P. C. Eastmont

"Move on there!"

Bondell pulled heavily at his cigar in studied abstraction of the limb of the law. The policeman advanced a step nearer, bellowing hoarsely:

"I tell you to get a move on you! You've been obstructing travel on this corner for a quarter of an hour. Now!"

"See here!" the bundle of obstinacy waved the emblem of authority into silence. "I'm going to stand here till I've finished this cigar. You might as well rest on that."

The policeman made a move for the man's collar. "I'll give you an illustration of the way this city keeps its streets navigable!" he roared.

Bondell smiled grimly and stepped out of range of the policeman's muscular arm. Suddenly he became confidential.

"A young sprig asked my permission to marry my daughter just a few minutes ago, and I've sent him around the corner on an errand."

"Well?"

"Well, if he gets back before I finish this cigar he can have the girl. If

"HOLD ON, SIR!" DEMANDED THE OFFICER. "WHAT'S UP?"

he falls to show up in time he doesn't get her. That's the long and short of it."

The policeman surveyed Bondell with mute astonishment. "It occurs to me," he said, "that you have a rather fickle grasp of human destiny. What kind of an errand did you send this young fellow on?"

"Not much of anything. Just told him to go down and ask the Stillmans for quotations. They're gone today and the office is closed. It hadn't ought to take him long to find that out."

"Now, see here," exclaimed the blue-coat, "that ain't fair! If that young man is any good he will hunt all over the Empire State before he will come

## OPERATION AVOIDED EXPERIENCE OF MISS MERKLEY

She Was Told That an Operation Was Inevitable. How She Escaped It.

When a physician tells a woman suffering with serious feminine trouble that an operation is necessary, the very thought of the knife and the operating table strikes terror to her heart, and our hospitals are full of women coming for just such operations.

There are cases where an operation is the only resource, but when one considers the great number of cases of menacing female troubles cured by Lydia E. Pinkham's Vegetable Compound after physicians have advised operations, no woman should submit to one without first trying the Vegetable Compound and writing Mrs. Pinkham, Lynn, Mass., for advice, which is free. Miss Margaret Merkley, of 275 Third Street, Milwaukee, Wis., writes:

Dear Mrs. Pinkham: "Loss of strength, extreme nervousness, shooting pains through the pelvic organs, bearing-down pains and cramps compelled me to seek medical advice. The doctor, after making an examination said I had a female trouble and ulceration and advised an operation. To this I strongly objected and decided to try Lydia E. Pinkham's Vegetable Compound. The ulceration quickly healed, all the bad symptoms disappeared and I am once more strong, vigorous and well."

"Female troubles are steadily on the increase among women. If the monthly periods are very painful, or too frequent and excessive—if you have pain or swelling low down in the left side, bearing-down pains, don't neglect yourself; try Lydia E. Pinkham's Vegetable Compound."

"No, you don't. He sent you down here on a fool errand. He knew that none of the Stillmans were in the city. You want to marry his daughter, and he wants you to marry her, but he's got it in his head that if you didn't get back by the time he had finished a cigar he wouldn't give his consent. He's got through with the cigar. Now, of course, you don't want to see him."

The youth stood wrapped in bewilderment. "Heavens!" he exclaimed at length. "What am I going to do?"

"Well, I'll tell you if you want me to," replied the policeman.

"Then tell me."

"Do you really want to marry this girl?"

"Yes."

"Does she want to marry you?"

"I—she—said she did."

"All right. Do you know where she is?"

"I do."

"How long would it take you to have the matter straightened out, ceremony performed, and all that?"

The young man calculated rapidly. "Two hours would be sufficient," he announced.

"Then get about it quick. I'll tend to the old man."

# Make Your Hair Grow

Satisfied with your short, stubby, scraggly hair? Or would you like it longer, richer, thicker? Then feed it with Hall's Vegetable Sicilian Hair Renewer. There's solid comfort in handsome hair. Get it! Be happy! For the whiskers and moustache we make BUCKINGHAM'S DYE. It colors a rich brown or a soft black. R. P. HALL & CO., Nashua, N. H.

GIVE THE  
BABY

Dr. **WATERBURY'S**

**INFANT TABLETS**

MENTION THIS PAPER

Destroy Worms. Assimilate the Food. Regulate the Bowels. Sweeten the Stomach, give good and Restful Sleep. Relieve Teething troubles. Alleviate Feverishness. Cure Indigestion, flatulency, Constipation, Colic, etc. **STOPS TALKING IN THE SLEEP AND FRIGHTENED WAKENING. CURES FITS.** Do not contain Lardine, Opium, or other narcotic.

**WHAT WE WILL DO** Any person sending their address can have samples free. We want to give you the proper medicine for children. Have the genuine.

## STORIES OF NOVELISTS

LEGAL MISTAKES THAT HAVE BEEN MADE BY GREAT AUTHORS.

**Dickens and the Famous Case of Bardell Versus Pickwick**—The Trial Scene in Reade's "Hard Cash." Twiss's Dip into the Law.

"Legal fictions," says one of Gilbert's gendarmes, "are solemn things." Yet it is curious how seldom a novelist ventures into a law court without driving his quill through acts of parliament and rules of law alike.

That Dickens' knowledge of law, like Mr. Weller's of London, was "extensive and peculiar" is amply demonstrated by the famous case of Bardell versus Pickwick. Students of that report may have been struck by the fact that neither plaintiff nor defendant appeared in the witness box. The explanation is that at that time parties "upon the record" were not competent witnesses, their interest in the case being regarded as too strong a temptation to, shall we say, inaccuracy. But had Dickens been a lawyer Mr. Winkle and his friends might also have been spared the ordeal of cross examination and their friends and admirers deprived of many merry moments.

In his anxiety to satirize the abuses of cross examination Dickens overlooked the legal rule that the counsel who calls a witness is not permitted to cross examine him at all, but, on the contrary, is bound by his answers; therefore had Serjeant Buzfuz permitted the Pickwickians to be called as witnesses for the plaintiff (which he would have known better than to do) their version of the words heard through the door "on the jar" must have been accepted, and at the first attempt to badger either of them it would have been the learned counsel for the plaintiff who received his lordship's injunction "to be careful."

But all lovers of Dickens will rejoice at his ignorance of the rule which forces counsel never to call a hostile witness. Who could bear to be deprived of the evidence of Mr. Samuel Weller?

Exactly the same mistake is made by Anthony Trollope in his well known novel, "The Three Clerks." There the hero, Alaric Tudor, is placed upon his trial for misappropriating trust money and defended by that famous leader, Mr. Chaffanbrass of the Old Bailey. Tudor's Mephistopheles, the Hon. Undecimus Scott, is called, much against his will, as a witness for the defense, cross examined by the celebrated Chaffanbrass, forced to confess his misdeeds and dismissed covered with ignominy, to be subsequently expelled from his club—poetic justice which would have been defeated even by a chairman of quarter sessions.

The great theoretical and practical knowledge of law possessed by Charles Reade saved him from this error, as from many others. Yet the famous trial scene in "Hard Cash" would have been ruthlessly deprived of its most dramatic moment by any judge of the high court. When the hapless Alfred Hardy, who has been wrongfully imprisoned in an asylum by his wicked father, comes at last to establish his sanity before a jury, his case is closed by the reading of a letter from his dead sister. Writing at the point of death, she solemnly denies his insanity and begs him to show her words to his accusers when she is no more. Read aloud by the judge himself, her letter reduces a crowded court to tears and goes far to secure her brother a triumphant verdict.

## COUNTY COUNCIL.

**FOURTH SESSION**—(Special). Council met at 2 p.m., at the call of the Warden. Members all present except Mr. Creighton; Warden presiding.

Minutes of last day of June session read and confirmed.

**COMMUNICATIONS.**

A communication from Clerk of Camden, as to repairing sidewalk at Centreville, on County road, was read and filed.

From T. J. Ragney, Solicitor for Dr. McCarthy, re claim for services on Saad, was read and filed.

Mr. T. B. Gorman appeared before the Council on behalf of Mr. Rombough, respecting a claim against the County incurred by Commissioner Creighton.

From Provincial Treasurer, inquiring if any alterations had been made in the boundaries of municipalities. Filed.

From John Crawford, mail carrier, asking \$3.20 for damages, extra driving, owing to Mud Creek bridge being repaired, was filed.

A counts, Sawyer-Massey \$5.80, and Jas. Smart, Manufacturing Co., \$22.00, were ordered paid. One from Lionel Rock Drill Co., \$26.00, was laid on table till to-morrow.

The report of R. W. Burgess, as to condition of road machinery, was read and on motion laid on table until to-morrow at 3 p.m.

Report of Warden and Clerk, as to orders on County Treasurer, was read and adopted.

Mr. Paul presented the report of Finance Committee, re sale of County debentures, which was read and referred to the Committee for amendment.

Mr. Miller gave notice of introduction to-morrow of a by-law to appoint an additional or second Public School Inspector for this County, and to define the territory or area over which inspector shall have jurisdiction.

Council adjourned till 9 a.m. to-morrow.

**SECOND DAY—FRIDAY.** Council met as per adjournment. Members all present except Mr. Paul, Warden presiding. Minutes of yesterday were read and confirmed.

Moved by Mr. Clyde, seconded by Mr. Miller, that Commissioner Creighton settle the Rombough claim, and charge to both Fredericksburgh road account. Carried.

An account, Canadian Express Co., \$1.55, was ordered to be paid.

Mr. Baker presented report of Finance Committee, re sale of debentures, which was read and adopted.

Mr. Martin presented report as to manufacture of concrete tile at expense of \$26.22, which was read.

Moved by Mr. Hall, seconded by Col. Clyde, that the report be approved and adopted, and that Mr. Martin collect from the municipalities which get tile from him their cost. Carried.

Moved by Mr. Miller, seconded by Col. Clyde, that by-law to appoint a second Public School Inspector, be read first and then carried.

By-law was read accordingly. Council adjourned till 1.30 p.m. Council resumed.

On motion rule 38 was suspended, to give by-law to appoint Public School Inspector, its second reading, and on motion Council went into Committee of the Whole. Mr. Miller in the chair.

By-law was read clause by clause, and blanks filled in.

Clause 1 was adopted on motion of Messrs. Martin and Woods.

Clause 2 was read. Moved by Mr. Baker, seconded by Mr. Bogart, that clause 2 be struck out. Lost.

Moved by Mr. Miller, seconded by Col. Clyde, that blank be filled in with municipalities of Adolphustown, South Fredericksburgh, North Fredericksburgh, Richmond, Town of Napanee and School Sections 5 and 11 in Township of Ernestown. Carried.

Clause 3 was read. Moved by Mr. Martin, seconded by Col. Clyde, that the blank be filled in with the municipalities of Denbigh, Abinger and Aubrey, Anglesea and Giffingland, Sheffield, Camden, Amherst Island, Villages of Bath and Newburgh, and all of the Township of Ernestown excepting School Sections 5 and 11. Carried.

Clause 4 was read. Moved by Mr. Martin, seconded by Mr. Woods, that the blank be filled in with the names of the following accounts were referred to County Property Committee to report, Madole & Wilson, jail, Fredericksburgh, of Napanee, Cd.

Clause 5 was read, and on motion of Col. Clyde and Mr. Woods, the blank was filled in with the name of Frank C. Anderson, of Napanee.

The blanks in clause 6 were filled in with "15th August." Clause 7 was also adopted.

Committee rose and reported by-law read second time, Warden in the chair. On motion of Mr. Miller and Col. Clyde, the report of Committee was

## GREYNA

A severe electrical storm passed over here Sunday afternoon.

The blueberry season is about over. Fred Deans and sisters Estelle and Gerlie, of Empey Hill, spent Sunday at M. A. Sills.

Mr. and Mrs. W. Hamby visited C. Mellow Sunday.

The children and young people are looking forward to the Sabbath school excursion to 12 O'clock Point per steamer Aletha on August 10. Tickets from Napanee 35 cts; from Rombough's dock 25 cts.

J. P. Mellow sold his three-year-old colt for a nice sum, Tuesday.

W. J. Mellow is spending a few days at Euterprise.

## SIRATHCONA

The hay is pretty well harvested.

Mrs. Balance is on the sick list, also Mrs. Lott.

Joseph Ramsay's little girl, Jean, has been seriously ill, but is a little better at present.

Arthur Jose, while unloading hay on Edward Kook's farm, had a pitch fork pierce his hand. For a while it was very painful, and blood poison was feared, but it is healing nicely.

Mrs. T. Brown and Mrs. J. Kehoe received the sad intelligence that their mother had passed away. She was seventy years of age and had resided in Elzevir for fifty years.

Mrs. George Grant and daughter, Vera, of Watertown, are visiting friends here.

Albert Storings has secured a situation in Rochester, N. Y. He leaves for there on Monday next.

Miss Lizzie Finley is visiting in Napanee.

Mr. and Mrs. Finley spent Sunday with Mrs. G. Wartman, Wesley.

Mr. and Mrs. Guy Pybus and children spent Sunday with her father, H. Wager.

Harry Suttan has been under the doctor's care for several days. He is a little better.

W. Wild and William Ramsay spent a day fishing at Sydenham, securing a large catch.

Large amount of hay is being stacked in this section.

Little Austin Boyer was bitten by a neighbor's dog, recently.

Several from here intend attending the E. L. of Newburgh excursion, Thursday.

## ERINSVILLE

Mr. Weller, of Belleville, has a gang of men loading lumber at the Bay of Quinte station here. Michael Flynn is foreman.

Dr. Burrows, of Marlbank, and his father, inspector of public schools, Napanee, were here a day or two ago. They had an afternoon outing on Beaver Lake.

Miss G. Murphy has returned from the St. Anne's excursion after calling on friends in Montreal. She was accompanied by Mrs. J. A. Killoran.

Mrs. Newels and daughter, of Kingston are visiting friends in this vicinity.

There seems to be a scarcity of harvest hands. Men are commanding as high as \$2 a day.

Thomas Gaffney is harvesting for John Manion, of Richmond.

Robert Paul, egg dealer of Selby, made one of his rounds this week.

Clint Rose, of Tamworth, was here today.

E. Mellon was in Kingston on Sunday.

The most of the visitors have left Lakeview for the present.

Mrs. J. M. O'Brien, of Collingwood,

**MRS. LUKE MORRIS, GIVEN UP TO DIE. HAD SEVEN DOCTORS. PE-RU-NA SAVED HER.**

Mrs. Luke A. Morris, Jacksonville, Fla., writes:

"Peruna has done me more good than any other medicine I have ever taken, and that is saying a good deal, as I have had seven doctors treating me in the past two years."

"I only wish I had begun taking your wonderful medicine some time ago, and I would have saved so many doctor bills."

"I was completely run down, and given up to die, but Peruna braced me up and gave me a good appetite."

"I have taken not quite six bottles of Peruna and would not give it up for all the other medicines in the world."

"I thank you for all the good you have done me. I hope every sick woman who reads my name will give the medicine a trial."

—Mrs. Luke Morris.  
Address Dr. Hartman, President of The Hartman Sanitarium, Columbus Ohio.

## CHEESE BOARD.

accusers when she is no more. Read aloud by the judge himself, her letter reduces a crowded court to tears and goes far to secure her brother a triumphant verdict, with heavy damages.

"Hard Cash" is termed "a matter of fact romance," but, as a matter of fact and law, no such letter could have been received in evidence. Knowing that, under ordinary circumstances, such testimony would be inadmissible, Reade is careful to establish that the writer knew herself to be dying; but he was unaware that a "dying declaration" is only admissible in evidence upon a charge of murder or manslaughter of the person who has made it, and cannot be laid before the jury in any other case whatever.

Numerous and entertaining are the trial scenes which adorn the works of Mrs. Henry Wood, but they hardly profess to be strictly accurate. Let me point, rather, to an interesting slip on the part of that most careful of novelists, David Christie Murray, who shares to some extent the popular confusion on the subject of the law of libel and slander. His powerful story, "A Capful of Nails," has for its hero a working nailer, who becomes an agitator on behalf of his much oppressed class. In consequence of a speech denouncing an unscrupulous employer he is prosecuted on a charge of criminal libel; but, thanks to a faithful friend and a smart lawyer, he emerges triumphantly.

No fault can be found in this case with the way in which the villain is cross examined to pieces. The difficulty is that no such prosecution could have been instituted at all. You may slander a man by defamatory speech, but to libel him you must "write, print or otherwise permanently record" your defamation of him, and, though slander and libel alike may expose you to an action for damages, it is libel alone that can bring you within the grasp of the criminal law.

It is difficult to uphold this distinction. A libel is regarded as a public crime as well as a private wrong because it tends to provoke a breach of the peace, but one would think as much might be said of slander. Still the distinction exists, and the aggressor who confines his attack to words may suffer in purse, but not in person.

Such are a few of the slips to which the novelist is liable who unwarily trespasses upon legal preserves.—Pearson's Weekly.

#### His Prescription.

Boerhaave, the greatest doctor of his time, was anxious that it should go forth that even the most eminent doctor is somewhat of a "humbug." He carefully handed the key of a small diary to his executor, bade him open it immediately after his decease and let the contents go forth to the world at large. When the notebook was opened all its pages but the last were blank, and on that final one there was written in large letters: "Directions to patients: Keep your feet warm and your head cool and trust for the rest to Providence."

#### Very Like It.

His mother tucked four-year-old Johnny away in the top berth of the sleeping car, says a writer in Youth. Hearing him stirring in the middle of the night, she called softly:

"Johnny, do you know where you are?"

"Tourse I do," he returned sturdily. "I'm in the top drawer!"

#### A Wise Man.

Hewitt—How did you come to marry your typewriter? Jewett—Well, you see, I got a good wife and got rid of a poor stenographer.

in with "15th August." Clause 7 was also adopted.

Committee rose and reported by-law read second time. Warden in the chair. On motion of Mr. Miller and Col. Clyde, the report of Committee was adopted.

Mr. Baker asked for vote. Yeas—Col. Clyde, and Messrs. Hall, Martin, Miller, Woods—5. Nays—Messrs. Baker, Bogart, Creighton—3.

On motion Council went into Committee of the Whole on third reading of by-law, now reported, and the report was read and adopted in open Council, signed, sealed, numbered (212) and finally passed.

Mr. R. W. Burgess was heard in reference to the road machinery when received by Ernestown division.

An account of T. V. Anderson, 50c., re road machinery, was ordered to be paid.

Moved by Col. Clyde, seconded by Mr. Creighton, that Mr. Creighton return certain jaws to Rock Drill Co. Carried.

An account of Rock Drill Co. was ordered to be paid.

A communication from Registrar Gibson, re abstract indexes, for Camden East and Tamworth, was read.

Council adjourned till 9 a.m., tomorrow.

#### THIRD DAY—SATURDAY.

den in the chair. Minutes of yesterday were read and approved.

The following accounts were ordered to be paid, for services on Finance Committee, H. A. Baker \$9.00, J. W. Hall \$2.00, Geo. Woods \$5.40, N. B. Miller \$3.30. On Roads and Bridges Committee, Col. Clyde \$7.40, J. W. Hall \$7.50, W. A. Martin \$20.10, J. C. Creighton \$7.70, W. A. Martin \$5.00, Geo. Woods \$3.50.

Council met at 9 a.m., all the members present except Mr. Paul, Ward \$12.63, Court House \$3.94.

An account of Madole & Wilson, \$69.25, road account, was referred to Roads and Bridges committee, with power to act.

Account, W. G. Wilson, law costs, \$35.00, was referred to Finance committee, with power to act, and that said committee take into consideration a grant to the County Treasurer for extra services.

Moved by Col. Clyde, seconded by Mr. Martin, that the expenses incurred in repairs of road machinery, when certified to by representatives of Ernestown Division, be paid on an order of the Warden and Clerk, and charged to machinery account. Carried.

Moved by Mr. Martin, seconded by Mr. Baker, that each Public School Inspector of the County be paid quarterly the annual sum of \$150 for travelling expenses, in addition to their regular pay as provided by statute. Carried.

Moved by Mr. Martin, seconded by Mr. Baker, that when the wheels of the delivery wagons are returned and reported satisfactory, by Col. Clyde, that the Warden give an order on the Treasurer in favor of the Sawyer, Massey Co., for \$72.00, being balance of account for road machinery. Carried.

Moved by Mr. Martin, seconded by Mr. Hall, that \$16,000 of county road debentures moneys be expended during 1906, and that the same be expended in the various municipalities in accordance with provisions of By-laws 204 and 207. Carried.

Moved by Mr. Miller, seconded by Col. Clyde, that the Warden and Mr. Hall be a committee to engage any machinery required by the representatives of any division when county machinery is not available, and charge the same to machinery account. Carried.

Moved by Mr. Martin, seconded by Mr. Woods, that the County Roads accounts of U. E. L. Division be adjusted by the Warden, Mr. Hall and Mr. Miller, in conjunction with Mr. Creighton. Carried.

Moved by Mr. Martin, seconded by Mr. Hall, that the Registrar be directed to prepare abstract indexes for Camden East and Tamworth. Lost. On motion Council adjourned till 29th Nov., 1906.

#### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by using the Eustachian Tube. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

day. The most of the visitors have left Lakeview for the present.

Mrs. J. M. O'Brien, of Collingwood, is the guest of Mr. and Mrs. Neville. Mrs. J. McCormac, Mrs. W. O'Brien, John Flannigan and daughter, John Killoran, Patrick Cairns and William Kennedy made up the party who joined the St. Anne's pilgrimage at this point.

Miss Jordan, teacher of the separate school, here, was singularly successful with her high school entrance pupils this year. Notwithstanding that there was a greater percentage of failure than formerly, among the applicants generally, yet five out of six of Miss Jordan's pupils passed the examination.

#### They Had Escaped That.

A young disciple of Blackstone who had worked his way through college and taken a full course in the study of law besides was making a trip through the southwest in search of an eligible location for the practice of his profession. A thrifty young city, with a considerable body of water on one side of it and a forest on the other, attracted his attention, and he decided to make a few days' stay there and investigate.

"Putting up" at what seemed to be the best hotel, he ate his dinner, then strolled into the office and proceeded in a careless way to interrogate the clerk.

"There is a good deal of business done in this town, isn't there?" he asked.

"Yes, sir," answered the young man. "In one way and another there's a good jag of business going on here."

"Healthy place, isn't it?"

"Middling."

"Is there much litigation here?"

"No, I haven't heard of any cases of that, but there's a lot of chills and fever and occasionally a pretty bad case of the grip."

1530 colored and, 1210 white boarded, 1158c for colored, 11c for white nearly all sold.

#### The Mixture In Roumania.

Roumania is inhabited by a bewildering variety of races, but whether of Greek, Slav or Teutonic lineage, the modern Roumanian makes it a point of honor to claim descent from the colonists whom Trajan planted in the conquered province of Dacia A. D. 107. Calling themselves Romuni and their language Romunie, the proud citizens seldom draw out a legal document without some allusion to their founder, whom they style "the divine Trajan." The Roumanian language reflects the composition of the race and now but faintly suggests the language which Trajan spoke.

#### Tennyson's Gruffness.

Apropos of Tennyson's gruffness is a story repeated by the London Chronicle. Tennyson, in his last days gave audience to an American, a friend of Longfellow and Lowell, who came armed with credentials. "I hope you don't write," was the cautious old poet's first remark. "No, my lord, and I don't talk!" was the swift reply. This response set Tennyson at his ease, and he at least "talked," to his guest's vast contentment.

#### Flattered Men.

There is no exaggerated and baroque compliment a man will not swallow greedily if it be served by a woman. He suspects it from the lips of another man, but is so innately convinced that woman, his inferior, is always secretly worshipping him and longing for him that he will bolt every sugared pill she offers.—M. A. P.

Refrigerators and Hammocks.

# PROFESSIONAL RELIGION

## A Man's Place in Another World Depends on His Progress in This

By their fruits shall ye know them.—  
Matt. vii., 16.

There is a good deal more religion in the world than we sometimes think. True, many assume they have succeeded in classifying and pigeonholing the worlds supply. But you might as well think that truth is to be found only attached to affidavits as to imagine that religion can be identified by labels. No matter what system of classification we may use, there still is a great deal of true religion that gets through the meshes of our sieves.

The higher you go in the scale of things the greater the difficulty in their classification. There are infinitely more shades of difference between men than amongst rocks, and when you come into the world of ideas and motives and attempt to arrange and label things of the spirit only ignorance feels itself capable of the task.

Since religion is neither a button, garb or other inanimate thing, nor a style or cult, nor a theory or a philosophy, but is a matter of attitude of a life, its classification is possible only to the One who sees all hearts.

Religion is the recognition of vital relations to the infinite; it is the finding in these relations of motives that seek to establish right relations to all things, to nature, to man, and to ourselves. A man is religious in the proportion as he sets these relations first in life, as he sets the development of his own life, the cultivation of likeness to the best revealed, the application of the best thus cultivated to

### THE GOOD OF HIS FELLOWS

to the bringing of the kingdom of right relations in this world.

He is religious who lives up and lifts up; he is irreligious who lives down or drags down. Vital tests are the only possible ones here. It makes no difference what your accent or your garb; it makes no difference what your philosophy of the past or the future, what your familiarity with the family of the Deity, the laws of life judge you by the tree of your life and by the fruit it bears.

Religion is not a type of mind; it is the trend of a life. A man may be a beggar or a king, hard headed or tender hearted, practical or speculative, motor or sensory; it makes no difference what his temperament or tastes, he may still seek the right, love truth, cherish high ideals, work in harmony with the infinite, recognize the spiritual by seeking to grow out of the base.

## THE S. S. LESSON

INTERNATIONAL LESSON,  
AUG. 12.

Lesson VII. The Parable of the Two Sons. Golden Text: Mat. 3. 7.

### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Answering Criticisms. — Jesus was wonderfully patient with those who misunderstood the scope, purpose, and spirit of his mission. Every honest criticism of his work, especially by the men to whom the common people were accustomed to look for religious instruction and example, no matter how deeply rooted in prejudice or how manifestly prompted by a misapprehension of

Such a religion cannot be confined to a division or a department of the life. The segregation of religion to Sundays has been successful but in starving it to death. It would be a strange man who should hang out a sign saying, "This is my truthful day." He would not find the world especially impressed with his honor on that or any other day. He who is not religious every day is not religious.

Such religion will not need to express itself in garb. A man's strength does not depend on the cut of his coat. The only thing in your clothes that particularly matters to your religion is whether the bills are paid. Yet there are a good many men who feel sure they would go straight to glory if they should die with their religious coats on.

A man's place in another world depends on his progress in this. If there has been in him a life that has

### GROWN TOWARD THE BEST,

if he has been morally what he has been physically, one developing from weakness to strength, from ignorance to wisdom, from the typically animal to the human, he is then ready for the next step in life; but if his life has been spent in gathering baubles, stills, and paddings, titles and trappings, all these shall be stripped from him, no matter how holy their names may be, and he shall stand a poor, dwarfed, undeveloped soul, unprepared for life because it has not lived.

If a man would know whether he is religious, let him not ask whether he feels titles of emotion, whether he has his name engrossed on charity lists or church rolls, whether he be well armed for theological polemics; let him ask whether the supreme thing in his life is the finding of the good, the serving of the best, the will of the most high, the bearing of the fruits of love, and joy, and peace, of kindness, inspiration, and holiness.

The things within makes the things without. You cannot put your religion on. A new coat will not make you healthy. Turn your face to the light and you shall know the truth; set the things you know to be base beneath your feet; seek touch with the divine and infinite; leave life's doors open to the things that are lovely and of good report; serve your fellows with a free heart and your religion within take care of itself.

HENRY F. COPE

ful cases often assist in determining the authorship of a book or a passage in the Bible.

21. No more worthy to be called thy son.—The confession is made as planned. Several, though not the best ancient manuscripts, add the clause, "make me as one of thy hired servants," thus completing the confession as found in verses 18 and 19. Probably, though, the words should be here omitted. The emotion aroused by the unexpected cordiality and forgiveness of a father doubtless made it impossible for the son to add such a proposal to the confession already made.

22. Shoes on his feet.—Servants and slaves went barefooted. The robe, the ring, and the shoes transformed the boy from a ragged vagabond to a well-clad, honored member of the family and of society.

The fatted calf.—One especially kept for the unexpected occasion when great hospitality would be required. Compare the incident recorded in 1 Sam. 28. 24, 25: "And the woman had a fatted calf in the house; and she hasted, and killed it, and brought it out."

## HUNT FOR PIRATE'S LOOT

BRITISH EXPEDITION FAILS TO DISCOVER IT.

Island Supposed to be Uninhabited Found to be Occupied — No Trace of the Treasure.

The yacht *Alkelda*, commanded by her owner, Captain Gage, has just returned from a treasure hunt in the island of Alboran, in the Mediterranean, opposite Melilla. The search arose from a statement made to T. C. McMichael, of Brighton, by an old army man, who had a secret confided to him when he was a boy to the effect that treasure worth \$5,000,000 was buried by pirates on the island in 1832. Nothing, however, was found.

Captain Gage and Mr. McMichael were accompanied by Colonel Lewis, Captain English, R. N., Captain Chaplain, R. A., the Hon. Alistair Campbell and Messrs J. E. Brown and E. S. Hopkinson.

### ACCOUNT OF THE EXPEDITION.

The following account of the expedition is supplied by a reporter who accompanied it:

"On June 10 the schooner *Alkelda*, R. Y. S., 140 tons, owned by Captain Gage, sailed from Plymouth for Gibraltar.

"We had a picked crew of six Cornish fishermen and a young mate from the mercantile marine and we were commanded by Captain Long, who had been many years in the service of Captain Gage. A cook, two stewards and a forecabin hand completed the ship's company, and the fortunate guests who had been invited for the cruise were Colonel D. T. Lewis, Captain English, and Captain A. Campbell.

The object of the expedition was a treasure hunt, and the information we depended on was briefly this:

"A few years ago a friend who owned house property in Yorkshire had to press one of his tenants for rent.

"This tenant, a retired army captain who was getting on in years, told the proprietor that in his soldiering days he had a private named Robinson as servant, and that in return for some kindness Robinson had told him that when quite a lad he had gone to sea and had served as cabin boy in a merchant ship called the *Young Constitution*. He soon found out that the ship was a pirate, and was carrying on its nefarious business off the coast of Jamaica.

### THE PIRATES' FLIGHT.

"In 1832, he said, British men-of-war were on the lookout for the *Young Constitution*, and being laden with jewels and gold to the value of fully a million pounds, the captain decided to leave the West Indies, and made a course for the Mediterranean.

"They were chased by two British frigates, but being favored with fair winds and fortunate fogs, they passed safely through the Straits of Gibraltar.

"Here the pirate captain lost his bearings. He had no charts of the Mediterranean, and no knowledge of the coast. Before long they hove in sight to a small island, which they found to be uninhabited and waterless.

"They packed their treasure in two great copper boilers and landed them at the south-eastern corner of the island. It took ten men to get the treasure on shore, and they buried it close to the landing-place, eight or nine feet deep, and then sailed away to the nearest port to get water, provisions and charts.

"Later on," said Robinson, "they came in with two unarmed merchant vessels, which they could not resist robbing and scuttling.

"They were caught redhanded, and every one except Robinson was hanged at the yardarm. Robinson was hanged at the yardarm. Robinson was now the only living person who knew of the treasure and he kept the secret until he confided in his master.

"The captain was forgiven his debt in exchange for the secret of the burial

## A Change of Hands

Mr. Edward Dawkes was suffering from what he himself would have described as "the ump." Trade might have been brisker, but he had known it worse; and, moreover, it was but six o'clock, and a tobacconist takes most of his money in the evening, so that it might yet prove a good day.

Mr. Dawkes cast his eyes round the shop, of which he was the sole proprietor, though the name over the door was not his own. It was a snug little place, with a comfortable parlor at the back and a side-entrance leading to the floors above, let to good tenants—Mr. Dawkes being a lonely man, finding it cheaper to "live out." The shop was not in a main thoroughfare, but Chiswick High Road crossed the end of the street, less than fifty yards away, and the situation was a good one. Finally he lit a cigarette and strolled to the door of the shop.

As a general thing, the life and movement of the main road, with its never-ceasing stream of passers and the jangling bells of the electric cars, had an uplifting effect upon him, bringing an indefinite suggestion of custom. But to-day it failed, and he turned into the shop again more depressed than before.

"I'm run down, that's what it is," he said presently, speaking aloud. "I want a 'oliday'."

"Same 'ere, old pal," chimed a rather husky voice, the owner of which—by name Joseph Simpson, but familiarly known as "Simmy"—had followed the tobacconist in. He was about the age of Mr. Dawkes, and possessed a rather bloated face, which, though lacking both beard and moustache, could not be accurately described as clean-shaven, since it was neither.

"Buck up, Neddy! Why, you look as dismal as the day before yesterday."

Finding that this pleasantry had no effect, he set the example, seating himself on the counter and appropriating one of the most expensive cigarettes within reach, a proceeding which required speech, at least, to the shop-keeper.

"Some people would wait to be asked," he remarked, sarcastically.

"Not if they knew you, Neddy," was the quick reply.

Now this might be taken in two ways, and Mr. Dawkes was still pondering as to whether an insult or a compliment was intended, when his visitor continued: "Now, look 'ere, Neddy, I've come to do you a good turn; I've got some news for you."

"If it's another of the 'good things' you've been putting me on lately I'd rather you kept it," said Mr. Dawkes, sourly. "It 'a' be doing me a kindness."

"Well, you can't always win," Simpson remonstrated.

"No; I can always lose, though, can't I?" was the irritable retort.

"It ain't a horse this time. S'pose you know that the big shop at the corner's taken?" he asked.

Mr. Dawkes did not, but muttered nevertheless, that he had heard something of it. The subject was hardly a likely one to improve his temper, for the shop in question was one he much coveted, but lacked the means to take. It stood at the corner and had two windows, one facing the main road and the other the street in which his present premises were situated.

"Then, of course, you know who's got it?" continued Simmy, with a sly smile.

Mr. Dawkes, being cornered, was obliged to confess that he did not, but he also added, with considerable heat that he did not care either, at which his friend smiled again.

"We give great reductions," he murmured, as though to himself. "Try our fine shag at two-three. All packed

was wonderfully patient with those who misunderstood the scope, purpose, and spirit of his mission. Every honest criticism of his work, especially by the men to whom the common people were accustomed to look for religious instruction and example, no matter how deeply rooted in prejudice or how manifestly prompted by a misconception of his work that criticism might be, he answered in straightforward, courteous language. His interest in the scribes and Pharisees themselves, was no less real and deep than his interest in publicans and sinners; and it was only after these men had been given an adequate opportunity to investigate his claims and his work, and had deliberately refused to believe what they saw and heard, that he uttered his scathing rebukes of them, exposing their hypocrisy and wickedness. On several different occasions the Pharisees took exception to the attitude of Jesus toward the outcast and the sinful. Their class prejudice and sense of moral superiority forbade their association with publicans and sinners, and when Jesus manifested an interest in these classes, and sought to lift them to a higher life, the Pharisees questioned the propriety of such action on the part of a religious teacher such as Jesus claimed to be. The answer of Jesus to all these criticisms, on different occasions, was of similar import: "They that are whole have no need of a physician, but they that are sick" (Matt. 9, 11); "Simon, seest thou this woman . . . her sins which are many, are forgiven; for she loved much" (Luke 7, 40-47). These are words which illustrate the spirit in which Jesus answered his critics. It was a similar criticism of his work among the poor and outcast which called forth this exquisite trilogy of parables, the last of which furnishes the text of to-day's lesson.

Verses 11. And he said—Having replied to the criticism of the Pharisees in the words of the two preceding parables, "The Lost Sheep" and "The Lost Coin," Jesus apparently paused and then added a third parable, which, however, is a great deal more than a mere reply to objections. To the thought of divine grace and the seeking love of God, expressed in the two preceding parables, is added the portrayal of the rise and growth of repentance in the heart of a sinner.

12. The portion of thy substance that falleth to me—One third of the whole estate or one-half as much as the oldest son would receive: "But he shall acknowledge the firstborn, by giving him a double portion of all that he hath" (Deut. 21, 17). It was to this double portion to which the firstborn was entitled that Eliezer referred in his request to Eljah: "Let a double portion of thy spirit be upon me" (2 Kings 2, 9).

Devoted unto them his living—The custom of thus dividing property among children during the lifetime of the parent seems to have been widespread among Semitic people.

14. Spent all—With emphasis upon the word all, which in the original has especially emphatic form.

15. Joined himself to one of the citizens of that country—Probably a Gentile. This was the first step in the humiliation of this proud young Hebrew.

To feed the swine—Considered a degrading employment among all ancient peoples, while to a Jew it must have been an abomination.

16. The husks—Gr. The pods of the carob tree. These consist of a leathery case, enclosing a sweet pulpy substance, in which the seeds are embedded. This pulp is edible and nutritious, and is often eaten by the poorer people. The pods are ground and boiled and used in other ways for food. The carob tree is still common in Palestine, where the pods may be seen on sale at the stalls of street merchants.

20. Fell on his neck, and kissed him—In Acts 20, 37, Luke uses exactly the same expression in speaking of Paul's departure from Ephesus. It is just such similarities of language which in doubt-

less, from a ragged vagabond to a well-clad, honored member of the family and of society.

The fatted calf—One especially kept for the unexpected occasion when great hospitality would be required. Compare the incident recorded in 1 Sam. 28, 24, 25: "And the woman had a fatted calf in the house; and she hastened, and killed it; and she took flour, and kneaded it, and did bake unleavened bread thereof; and she brought it before Saul, and before his servants; and they did eat."

24. Dead—Dead to the father, because lost; the second clause being an explanation of the first.

25. Music and dancing—Spontaneous expressions of joy, even among primitive peoples. Both music and dancing have become more rhythmical than they were among the ancients. Music has been elevated to the position of a fine art, and still retains its power to thrill the soul. Dancing, also, has become in a sense more artistic; but, departing from its original significance as a spontaneous expression of joy, is now rather a more or less polished relic of antiquity, which may still serve the purpose of making graceful bodily movements, but which on the whole is of questionable utility and as an amusement of doubtful tendency.

27. Thy father—The formality of the father's speech may possibly reflect the lack of cordial relations between himself and his eldest son, whose cold precision of formal obedience, without filial love and devotion, was as wrong as had been the desire of the younger son for a larger freedom.

28. He was angry—Angry because he saw in the return of his brother, and the cordiality of the father's welcome, a possible loss to himself.

29. Never transgressed a commandment of thine—The blind self-complacency of the young man reflects the self-righteousness of the Pharisees, which Jesus intended, with this parable, to rebuke.

32. This thy brother—The father rebukes the son for his evident lack of brotherly interest in the returned and penitent prodigal.

Was lost, and is found—The ending of the parable at just this point is a skillful touch of the great Teacher. We are not told whether the elder brother yielded to his father's entreaty and joined in the merrymaking, nor yet how the younger son behaved afterward. But all this was a matter of the future, entirely apart from the intended teaching of the narrative, and therefore omitted.

#### LIVING IN CORAL HOUSES.

The church built of coral is one of the curiosities of the Isle of Mahe, on of the Seychelles Islands in the Indian Ocean. The Seychelles Islands, which are supposed by many to be the site of the Eden of the Old Testament, form an archipelago of 114 islands, and are situated 1,400 miles east of Aden and 1,000 miles of Zanzibar. They rise steeply out of the sea, culminating in the Isle of Mahe, which is about 3,000 feet above the level of the ocean, and is nearly the centre of the group. All these islands are of coral growth. The houses are built of a species of massive coral hewn into square blocks, which glisten like white marble, and show themselves to the utmost advantage in the various tinted green of the thick tropical palms, whose immense fern-like leaves give pleasant and much-needed shade. These palms grow as high as 100 feet or more, overtopping both the houses and the coral-built church. They line the seashore and cover the mountains, forming in many places extensive forests.

Too many men measure their horse power by their exhaust.

The sins we wink at to-day are the ones we work for to-morrow.

You cannot get at a man's heart by getting under his skin.

You never can lift the submerged so long as you fear to soil your sleeves.

"They were caught redhanded, and every one except Robinson was hanged at the yardarm. Robinson was hanged at the yardarm. Robinson was now the only living person who knew of the treasure and he kept the secret until he confided in his master."

"The captain was forgiven his debt in exchange for the secret of the buried million."

#### TREASURE SYNDICATE.

"The proprietor was an old man, and not in robust health, so he waited to realize the fortune that lay hidden in the island of Alboran, 140 miles from Gibraltar, until his son was grown up."

"After the usual negotiations with a city firm a small syndicate was formed and an expedition planned. Capt. Gage fitted up his yacht and undertook to convey the syndicate from Gibraltar to Alboran and back and to assist in the search."

"We sailed from Plymouth on June 10, and with fair winds and two days of calm we arrived at Gibraltar on the 19th. The syndicate was not due until the 26th, and so we made expeditions to Algeiras and Cadiz."

#### WELCOMED BY NATIVES.

"Every one hurried on deck when the anchor chain was heard rushing through the hawse pipes, and as we looked through our glasses we made the landing place just as described in Robinson's account."

"But now the island was no longer uninhabited. There was a lighthouse and a large barrack-like building round its base, and we saw seven men and several boys and women."

"Two boats put off. The men, who were of a very superior class, offered us some rock cod for sale, while we offered them Spanish wine, and stuffed the boys with biscuits, bread and butter, and fruit. After breakfast we all landed in the cutter."

"Two of the most diplomatic, accompanied by the interpreter, went up to the lighthouse, and gave a plausible reason for our arrival with picks and shovels and iron bars, while the rest of the party began to prospect for the place where the treasure was hidden."

"We soon found a second landing place which was more accurately at the south-eastern part of the island, but not at the corner. Here was a natural jetty of flat rock, with almost a couple of fathoms of water, and a steep path up the face of the cliff. An old wire rope was suspended from the top."

"The general idea was that this was the natural landing that had existed when the island was uninhabited, and that the one which we had used was made when the lighthouse was built."

"However, we tried at every conceivable place to find soil or sand deep enough to bury treasure in, and nowhere could we find a spot. The soil was not more than three feet thick, and then we came on solid rock. For three days we dug a cut through sand heaps and probed with pointed iron rods, but all to no purpose, and on July 2 a gale sprang up, and we had to sail away, but not before every member of the expedition was satisfied that there was no treasure in Alboran."

#### NEW "SIAMESE" TWINS.

A pair of "Siamese" twin sisters from Bohemia, who, although of totally different temperaments—one being shy, the other merry and outspoken—live very happily together, will shortly appear. The twins have separate pulses and constitutions, and if one is ill the other does not necessarily suffer. They sleep well, one lying on her right side, the other on her left. The girls are well educated, speaking French, English and German, and playing the violin and the zither. They are to be examined under the X-rays by Prof. Schrotter, in order to determine whether there is any danger in an operation to separate them.

Money talks — and the small change you get is back talk.

No man is interested in another man's troubles—unless he is a lawyer.

smile. Mr. Dawkes, being cornered, was obliged to confess that he did not, but he also added, with considerable heat, that he did not care either, at which his friend smiled again.

"We give great reductions," he murmured, as though to himself. "Try our fine shag at two-three. All packet tobaccos at wholesale prices. One hundred pounds' insurance free to regular customers."

Mr. Dawkes's anger and pride dropped from him like a garment; he became the living picture of dismay. "You—don't—mean—that they've got it?" he gasped.

The other nodded emphatically. "Yes, I do," he said. "In a few weeks' time you'll have the Beatal Tobacco Company up against you, Neddy."

"But it's ruin—fair ruin for me! I can't sell at their prices," groaned the unfortunate tobaccoist.

"I'm afraid they won't break their hearts over that, Neddy," said Mr. Simpson.

Mr. Dawkes groaned again while his friend regarded him with the curious satisfaction that being the bearer of ill tidings imparts to some natures. Presently he remarked, "Buck up, Neddy; competitions good for trade."

"And you're a nice pal, you are," snarled Dawkes. "Is this the good turn you come to do me?"

"No, it ain't; but what are you going to do, Neddy?"

"What can I do but stop 'ere and be ruined?" was the disgusted query.

"Neddy, you're a good man at your trade, but you ought to see more life. You ain't smart. Now, you put the matter in my hands."

"I will if you'll wash 'em," replied his friend, with a glance at the members in question.

"I'll wash 'em of you and the whole bloomin' affair if you can't be civil," retorted their owner, indignantly.

They adjourned to the little parlor, where, under the influence of his friend's whisky, Mr. Simpson unfolded his plan.

"What you've got to do is to sell the concern," he began.

"Nobody'll buy when they know what's coming," Mr. Dawkes said, with a still gloomy brow.

"Course not, so we'll take care they don't know," was the brisk retort. "But we shall 'ave to be quick."

"How are you going to manage it?" inquired the tobaccoist.

"You leave it in—leave it to me," said Simmy. "I was in an estate agent's office once an' know the ropes. Now," he continued, "the first thing is, what do you want for the whole show as it stands?"

Mr. Dawkes considered deeply. "I gave a hundred for it, but it's improved a lot in my 'ands," he answered. "It ought to fetch fifty more."

"Very well, we'll try it at that," said his friend, briskly. "My commission'll be ten quid, so if I and you one hundred and forty you'll be satisfied." The other demurred somewhat over the commission, but when his agent threatened to throw up the job, and said it ought to be double, he gave way.

"Now we'll draft a snappy little advertisement—growing business; owner obliged to sell on account of health—that's true, anyway; it wouldn't be healthy for you to stop 'ere—and I'll get it in some of the country papers. You needn't appear; go away an' take your 'oliday. I'll come 'ere and see to everything as your agent, write you when I've sold, and send you the cash. What do you think of it?"

Mr. Dawkes expressed his approval, principally—although he did not say so—because the plan permitted him to keep in the background, so obviating unpleasantness when the purchaser discovered how he had been deluded.

"It may not be so bad after all if the place'll sell," he said. "It only means I shall get married a bit sooner."

"Get married—you!" echoed Simmy, to whom this was news indeed.

"Why not?" retorted his friend. "Do you see any objection?"

"Not if the girl don't," was the somewhat pointed response.

"Well, she don't; she's fair gone on me," said Mr. Dawkes, complacently. "And there's many another would be glad to stand in her shoes," added the now thoroughly angry tradesman. "Her father's got a farm and she's the eldest daughter," he said. "They think I'm in a berth, and when we get married the old man has promised to set us up in business somewhere near her home. You see, if he knew I'd got a shop already he wouldn't give us so much, for, though he's worth a tidy bit, there's other children to be provided for."

Mr. Simpson expressed admiration for his friend's acumen, and casually inquired the lady's name. But there were limits to the other's confidence.

"Time enough for you to know that when she's Mrs. Dawkes," he said, adding, "and that'll be pretty soon. I shall write and tell her I'm leaving the firm and going away for a week or two on business. Meanwhile, she's to find out what the old man's prepared to do. Then with this place sold it'll be all plain sailing."

Three weeks later Mr. Dawkes—disporting himself at Margate—received two letters, one of which had been registered. This he opened first and found it contained bank-notes for £140, with a short scrawl from his agent. Evidently letter-writing was not Simmy's strong point, for he merely mentioned that he had sold the concern, and promised particulars when they met.

The second epistle was from his lady-love, informing him that she was coming to London with her father on the following day, and asking him to meet them. It was a most satisfactory document, and the recipient metaphorically patted himself on the back.

"My luck's fairly in," he reflected. "She's coming up to buy her trousseau, I s'pose, an' the old man's goun' to do the generous."

Thus it was a thoroughly satisfied young man who greeted Miss Amelia Snaggs and her red-faced parent when they emerged from the Tube Station at Shepherd's Bush on the following day. The young lady, though not in her first youth, was by no means uncomely.

"What are you doin' in this part of the world?" asked Mr. Dawkes, as he piloted her across the road in the wake of the farmer. But Amelia declined to satisfy his curiosity, playfully hinting at a surprise in store.

A penny tram-ride took them to Young's Corner, and when they turned up the main road, he experienced a vague feeling of discomfort. Had his duplicity been discovered, he wondered? Moreover, he soon began to meet acquaintances who greeted him unmistakably.

"You seem to be well known in this part of London, Neddy," Amelia said, presently.

He explained that they were customers from the City, where his former place of employment was supposed to be situated. Presently his suspicions became certainty, for they turned down a familiar side-street and stopped at a well-known shop.

"Here we are at last; in with you," cried Mr. Snaggs; and before he realized it the unfortunate Dawkes was standing with Amelia in his own shop, while the farmer's bulk cut off all hope of retreat. Mr. Simpson was behind the counter, but he no sooner recognized his friend than he made a singular noise in his throat and bolted madly into the parlour.

He emerged in a few moments' time with the excuse that he had heard the kettle boiling over.

"This is Mr. Dawkes, what's going to marry my daughter, Mr. Simpson," said the old man.

"Pleased to meet you, sir," said Simmy, rising to the occasion. "Allow me to congratulate you on your good fortune, sir"—this with a low bow to Amelia.

Mr. Dawkes muttered a remark which might have been "Thank you," but sounded suspiciously like something

be shaking a fist at this one. The man, astounded as he was at this reception, comprehended that there was someone in the parlour, and immediately formed his own conclusion.

"Got a lady visitor, eh?" he quizzed, lowering his voice only a shade. "All right, I'll tell the little gal at the post-office."

This insinuation put the finishing touch to the tobaccoist's wrath. "Get out of my shop, you braying ass," he hissed, grabbing the half-pound brass weight so suggestively that the almost petrified humorist promptly obeyed. Neddy waited a few moments and then returned to the parlour.

"Your City friends seemed to have all followed you to Chiswick," Amelia said, coldly, while her father remarked that it was an omen of good luck that his first customer should have been an old acquaintance, on which Simmy nearly had another seizure. Mr. Dawkes eyed them in gloomy silence until the advent of a second customer, and then furtively carried his hat with him into the shop.

He did not return, and when Amelia presently peeped out to see what was detaining him, she found the shop empty. Two hours passed, and still the tobaccoist failed to appear. Amelia's anger turned to anxiety, and she hurried her father off to the missing man's lodgings, where strange news awaited them.

"'E come about two 'ours ago," said the landlady. "Packed 'is things, paid 'is bill, an' drove off in a keb. 'E seemed seemed terrible put out, and didn't give no reasons, nor say where 'e was again."

The mystery was partially solved on the following day by a wildly incoherent letter which Miss Snaggs received. Out of the jumble of vague allusions to circumstances beyond the writer's control, "cruel Fate," and "blighted hopes," the young lady gathered the two important facts that she was jilted and that by this time the culprit was, as he put it, "suffering on the briny ocean." In conclusion, he begged that she would not allow the matter to break her heart.

Miss Amelia had no such intention. She was not one to cry over spilt milk. She arranged to remain in London with an aunt and look after the shop. Mr. Simpson consenting to forego other pressing engagements in order to teach her the business.

The Beattall Tobacco Company came, and saw, but did not conquer, and after languishing for nearly a twelve-month the branch was closed, the lease being transferred to Mr. and Mrs. Simpson. The former, like a wise man, told Amelia the whole story immediately they became engaged, and, as might have been expected, was accounted blameless. Old Mr. Snaggs was not enlightened, and still cites Dawkes as an instance of a man whose intellect was deranged by the joy of approaching marriage.—London Tit-Bits.

## HOME.

### THE BEET AND HOW TO SERVE IT

The value of the beet has become more generally recognized the past decade, because of its proven capacity as a sugar-producer. While there is a greater proportion of sugar in certain varieties of beets than in others, all beets contain more sugar than most vegetables and this fact must be taken into consideration when reckoning its food value for human beings. There is comparatively little of the nitrogenous element in the beet the mineral and carbonaceous elements forming its bulk value. The mineral constituents of food enrich both bone and blood and from time immemorial the red beet's ability to feed and stimulate the blood has been accepted as a proven fact. But the beet has too much sugar in it to be indulged

two tablespoons melted butter or olive or peanut oil and serve on lettuce, cress, or cabbage-heart leaves, with lemon juice.

For a different form of salad scoop out the centres of good-sized, cold, boiled or baked beets, filling with chopped nuts and celery, chopped cucumbers, string beans, or any other vegetable "left-overs," serving on lettuce with mayonnaise. Slices of hard-boiled egg may be added if nuts are not used.

### TESTED RECIPES.

**Canning Sweet Corn.**—Select corn not over ripe or too green; a little practice will show which is right. Cut from cob and put in granite kettle with just a little more salt than would be good for the table, then boil for 15 minutes, put in glass jars and seal tightly. Keep in a cool, dark place. When wanted put in granite kettle, cover with cold water and beat but do not let it boil. When hot, drain off water and then wash and it is ready to prepare for the table.

**Cottage cheese prepared from skim milk and enriched with cream** is a cheap, digestible and nutritious food, and when the materials for its preparation are produced on the farm it is one of the most economical foods that can be used. At two cents per quart for skim milk and thirty-five cents per quart for cream, cottage cheese compares favorably with meats at eleven cents per pound.

**Making Tough Meat Tender.**—Try soaking in weak vinegar a day or over night. The acid cuts and softens the tough fibre. It may also be made tender by soaking in buttermilk. It should be changed often if kept any length of time and thoroughly washed before cooking.

**One Way With Wine.**—For one gallon take one quart fruit juice, three pounds sugar, and complete the gallon with water, or better, pour water over the fruit, from which the juice has been pressed, press again and make up the gallon with this. If put in a jug to ferment, measure your jug and make enough to fill and a little more with which to fill as it works over. Place in the cellar uncorked and watch it, filling up often until fermentation ceases, then cork and let stand for four or six months, and then bottle if you like. Use coffee crush sugar and any kind of fruit preferred.

### WHITE SUGAR WINES.

To one quart mashed grapes add one quart boiling water. Let stand over night and strain. To each gallon of juice add three pounds white sugar. Let it ferment, then bottle and seal.

**Parsnip.**—To one gallon sliced parsnips add four gallons cold water. Boil hard for one hour, strain and add twelve pounds white sugar. Before getting cold, add two tablespoons good yeast.

**Blackberry Cordial.**—Set the berries over a moderate fire and let simmer until they fall to pieces. Strain through a jelly bag and to one pint of juice allow one pound sugar, cinnamon, cloves and mace to taste. Boil fifteen minutes and strain a second time. Set away to cool. When quite cold, add to each pint syrup a wineglass of best brandy. Bottle, cork tight and keep in a cool place.

### NEXT AFTER THE QUEEN.

#### The Beautiful Life of the Baroness Burdett-Coutts.

King Edward, when Prince of Wales, once said of the Baroness Burdett-Coutts, who lately celebrated her ninety-second birthday, "She is, after my mother, the most remarkable woman in the kingdom." His words became still more true as the long life draws to its gracious close.

Her grandfather, Mr. Thomas Coutts, was an eccentric man, and set the family an example of peculiar marriages. For his first wife he chose his brother's housemaid, and for his second

## ON THE FARM.

### IMPORTANCE OF THE SILO.

Evidently the silo is increasing in popularity. I became interested in the use of silage as a feed a number of years ago, writes Mr. G. Latimer. When two years later I started in the dairy business, I fully made up my mind to have one as soon as possible. Previously I had fed corn stover and mixed hay with corn and oats mixed as a grain ration. I am now using the silo a third season. It is 14x26 feet and is located at the end of the barn and connects directly with a feed alley in front of the cows. It cost \$188 above the foundation.

Silage kept perfectly the first season, and was all good after removing about 8 inches of black silage on top. The second season the corn was badly frosted, eight or ten days before being put in the silo, and did not make as good feed as the preceding season. It kept well, however, except the first 4 or 5 feet at the top, where there were small spots here and there, 4 or 5 inches in diameter and 2 or 3 inches thick, held together with a white mold, while all around would be free from mold. I had a similar experience last year; small spots continuing down a little farther than the previous year.

The corn was about the right stage of maturity, or perhaps a little ripier in the parts where the spots were found than where they were absent. I have been told by several men who used the same power and cutter just preceding or following me, that they found similar spots in their silage. None of these spots was within a foot of the walls, where the silage had been tramped down more than elsewhere.

My method of feeding is to give each milking cow 20 to 25 pounds feed, according to the appetite, and the amount of milk given. I feed three to four quarts bran in the morning when milked, feeding silage after milking. Cows are turned out for water and exercise one to three hours, according to the weather in the afternoon, and they are under cover if necessary. The same amount of silage in the evening, sprinkled with one to one and a half quarts old process oil meal is ready for the cows when they are turned in to be milked. A ration of clover or mixed hay is given at noon and sometimes a few stalks or oat straw when out for a change.

My former method was to feed corn stover in a manger or, when the ground was frozen, in the barnyard or field near by, using the ear, either whole or chopped, with oats as a grain ration. This was never a satisfactory way of using our most valuable forage crop. More recently the huskers and shredders have come into use and left the fodder in a condition to be fed with less waste and to better advantage. But even with this improvement, there were seasons when it was impossible to get the shredded fodder dry enough to prevent molding in the mow. Now, with the silo, there are two weeks more or less, according to the season, in which the corn crop can be secured in the right condition. Then it contains the highest percentage of digestible matter of any stage of its growth and can be fed without any loss whatever.

### FARM NOTES.

One good ear to each stalk and two stalks in each hill will make corn yield more than 100 bushels per acre. Many people try to have from three to five stalks per hill and get much less than 100 bushels per acre.

The whole point of forest management is to have new trees of the most useful kind take the place of the old just as soon as possible after they are cut. A thoughtless stroke of the axe will get rid of a fine sapling half the size of a man's wrist, and a dozen years of growth is lost. On the other hand, the

"Pleased to meet you, sir," said Simmy, rising to the occasion. "Allow me to congratulate you on your good fortune, sir"—this with a low bow to Amelia.

Mr. Dawkes muttered a remark which might have been "Thank you," but sounded suspiciously like something less polite, while the lady sniggered and blushed. Neddy noticed that his agent had invested in a new suit and was wearing a high collar, with a tie of startling brilliancy.

"Well, my boy, what do you think of it?" broke in Snaggs. "It's your own, you know."

Neddy did know that, but the remark only further increased his bewilderment. The old man noticed this, and, far from suspecting the real reason, continued in an undertone: "Soon as we saw the advertisement, 'Melis says, 'It's the very thing,' and nothing would do but we must come up and look at it. Well, we did, and she was right. Good, sound concern; owner obliged to sell on account of health—getting nearer death every minute. Mr. Simpson tells me, poor chap' (it did not strike the old chap that this statement might be truly made of every living individual. "They wanted two hundred for it, but I got it for thirty pound less," he concluded, triumphantly.

Mr. Dawkes started as though he had received an electric shock, and glared at his agent. But that worthy was busy dusting a packet of cigarettes, a task which seemed to require his undivided attention.

"There's two floors above, both let to respectable tenants," went on Mr. Snaggs. "The first floor have got notice to go, but you won't want the second until later on, you know."

At this Miss Amelia blushed again, and ejaculated "Father!" in a delightedly shocked manner. Meanwhile Mr. Dawkes listened in a kind of a daze. Light had come to him, it is true, but it only served to make the future more gloomy. He realized that he was saddled again with a shop which would be worth almost nothing when the Beattall Tobacco Company appeared on the scene, and, moreover, he could not live there a week without Amelia learning that he was the former proprietor. Above all, he thirsted for a few moments alone with his agent.

At the latter's suggestion they adjourned to the parlor to partake of tea, and Neddy had to affect an interest in the improvements which Miss Amelia projected. Mr. Simpson avowed that her presence made the parlor perfection, and was told to "go on, with his nonsense"; by which she, of course, meant that he was to stop. Save for an apparently uncontrollable impulse to laugh whenever he caught sight of his friend's gloomy face, Simmy acquitted himself brilliantly. Presently the shop bell tinkled.

"Now, Neddy, forward!" cried Mr. Snaggs, facetiously. "You can't make friends with your customers too soon, you know."

The victim protested, "I don't know where things are kept," he urged.

But this proved almost too much for his friend's risible faculties, and it was only by the most violent facial contractions that he restrained an explosion of laughter. Mr. Dawkes glared at him, and stalked savagely into the shop.

"I can't imagine what's come to him," murmured Amelia, apologetically.

"Jealous," replied Simmy, with a killing look.

"What, of you? How absurd!" came the retort, and the young man promptly subsided. But the conversation in the shop speedily drew attention from himself, for, to the surprise of two of the listeners, the customer greeted the new proprietor vociferously.

"Tcheer, Neddy; so you've got back?" he said. "Been mashing all the gals at Marg—"

He stopped suddenly, and could the occupants of the parlor have seen through the curtained door they would have deemed Neddy's method of serving customers peculiar, for he appeared to

ement in the beet the mineral and carbonaceous elements forming its bulk value. The mineral constituents of food enrich both bone and blood and from time immemorial the red beet's ability to feed and stimulate the blood has been accepted as a proven fact. But the beet has too much sugar in it to be indulged in other than sparingly by those with a tendency to stoutness. Avoid using vinegar with beets as it renders valueless the iron in them.

As Greens.—Save the young beets thrown aside when thinning out the beds and wash very clean. If the roots are large enough to cook, scrape them. Otherwise cut them off close to the leaves. Cook with very little water. Have it boiling as for spinach, and cook the greens from 20 to 50 minutes, varying with their condition. Drain and chop fine, returning to the colander to steam a few minutes, then serve with butter, pepper and salt. If meat is not used at the meal serve with the greens hard-boiled eggs sliced. Otherwise omit, since eggs and meat have virtually the same food values. Lemon juice served with the greens is more dainty and has better results than vinegar, if an acid is preferred. The leaves of the white beets at maturity may also be used as greens.

Boiled.—Be careful in preparing beets not to break the skin and thus lose the rich juices. Also trim off the finest rootlets, only, and leave sufficient of Place in fast-boiling water, time of the leaf-stalks to prevent similar loss, cooking varying with the age of the vegetable. Young beets should require not over an hour, but old ones may with benefit be boiled for over two. Avoid, as far as possible, pricking to test tenderness. When done place in cold water and rub off the skin. Slice thin, dice, or quarter, if beets are young, and replace on stove with a lump of butter, salt and pepper and a little sugar if they seem to lack flavor; When well mixed serve hot.

Boiled With Cream Sauce.—On returning hot, sliced beets to the stove pour over them a cream sauce made smooth with one tablespoon flour, stirring in gradually one cup milk. Flavor with pepper and salt and after letting simmer one or two minutes, serve. Rich, thick cream in simple form may be used instead.

Beet With Lemon Juice or Onion.—As a variation, have ready a small, fine-cut onion heating in a saucepan with one tablespoon butter and in this toss the cubed or sliced beets, adding, if liked, a pinch of nutmeg, with salt and pepper. The onions may be omitted, adding, instead, the juice of half a lemon with a little sugar. Cream may be substituted for the butter.

Escalloped.—Cold boiled beets may be minced, then placed in alternating layers in a baking-dish with bread crumbs or chopped potatoes and onions and a little parsley. Place crumbs and butter on top and bake till brown. You may vary this farther by using cheese instead of onion.

Reheating Cold Boiled Beets.—These may readily be re-heated by placing in a small collander over boiling water or in a saucepan with very little water, serving with butter as if fresh boiled.

Baked.—Baked beets require longer cooking, but have a much better flavor than boiled. Prepare as for boiling and after wiping well bake like potatoes. Two hours will be required for medium-sized beets, longer for larger or old beets. By pinching as with potatoes, their condition may be tested. When done they may be sliced and served with butter or any of the methods used for boiled beets, or with whipped cream and lemon juice.

Mashed With Cream.—After baking or boiling soft, mash, adding a little salt and pepper, then one tablespoon lemon juice and last one cup whipped cream.

Two Fine Salads.—A diced beet salad may be served attractively by adding to the beets chopped, cold, boiled potatoes or carrots, hard-boiled egg and a very little onion. Chopped celery is seldom amiss with beets and nuts may be substituted for egg. Toss this up with

my mother, the most remarkable woman in the kingdom." His words became still more true as the long life draws to its gracious close.

Her grandfather, Mr. Thomas Coutts, was an eccentric man, and set the family an example of peculiar marriages. For his first wife he chose his brother's housemaid, and for his second a beautiful actress. Both marriages were happy ones, and on his death he left his immense fortune to his second wife. She had no children by him or by her second husband, the Duke of St. Albans; and on her death she passed on her great wealth to her step-granddaughter, Angela Georgina, whose sweetness and ability had won the regard of the sensible duchess.

The girl had not been brought up as an heiress, and her plain Christian education stood her in good stead in her sudden change of circumstance. When she found herself in a day the richest woman in England, she threw herself not into gaiety and display, but into intelligent charity. She built and endowed St. Stephen's church in London, and put under its wise care primary and technical schools, workshops, lecture courses, and instruction in cooking and housekeeping years before others recognized these needs.

A list of her charities would cover almost every effort for the improvement of men, women and children. She has endowed bishoprics, built model lodging-houses and markets, planted and opened London churchyards as recreation grounds, sent a whole village full of poverty-stricken people from Scotland to Australia, endowed a reformatory for women, endowed a geological scholarship at Oxford, built up the Irish fisheries and other industries, besides giving wise personal aid to thousands of the needy and suffering.

She proved herself her grandfather's own child by making in 1881 a marriage which set all England agog. She was then sixty-seven years old, and she married an American gentleman of thirty. The marriage seems to have been a romantic one on both sides. He had made her acquaintance in the course of administering the Turkish relief fund, and after their marriage he devoted himself to the noble charities of her devising. He has been a member of Parliament since 1885, and is a man whose opinion commands respect there and elsewhere.

The whole long life of the baroness has been one of wise and unselfish devotion to good works, and a constant testimony to the glorious possibilities in the hands of a rich woman who is filled with the true Christian spirit, and finds it more blessed to give than to get.

## PITY THE POOR RICH!

The rich man looks very enviable— from a distance. But get really intimate with him, and you will be astonished to find how greatly his wealth makes him suffer. The glut of money tempts him to eat more and richer food than Nature requires, and he has to pay the penalty in impaired health and shortened life. He may have four handsome houses, but he can only live in one at a time, and the worry of the servant question drives him to distraction. He can have unlimited leisure, but too much leisure is a bigger bore than too much work. He misses the excitement of the game of making a living—misses its hopes, fears, pleasant surprises and disappointments. He never enjoys the company of his children so much as the poor man enjoys his family life, for they are so hedged round by servants that he never gets into full sympathy with them, nor they with him. The average man knows the joy of seeing his year-old boy splash delightedly in his bath-tub, and of playing hide-and-seek with him all over the house; but the rich man is expected to keep out of the way at baby's bath time. Lastly, the rich man can rarely be sure of the disinterested friendship of the people who hover around him. The average man can.

100 bushels per acre. The whole point of forest management is to have new trees of the most useful kind take the place of the old just as soon as possible after they are cut. One thoughtless stroke of the axe will get rid of a fine sapling half the size of a man's wrist, and a dozen years of growth is lost. On the other hand, the cutting of a good tree may simply open room for worthless trees.

A light application of manure will benefit all crops. Some soils will take more manure than others. Care should be taken to put the manure on the land when fresh. It should not be left too long in small piles in the fields before spreading.

Although the farmer may often be crowded with work, a little leisure time ought to be had in which to cut those weeds in the fence corners and along the road. This will add to the appearance of the farm, and keep the weeds from ripening their seeds.

Weeds and bugs check much of the attention of the farmer at this season; but if he be master of his business, he will destroy the former as soon as they germinate, and the latter during the earliest stages of their growth; to neglect the destruction of either for but a few days will often reduce the crop one-half and may cause its entire destruction.

## LIVE STOCK NOTES.

A spirited horse holds his head high without a check rein, and no check rein in the world can make a broken down horse look like a spirited one.

If one has profitable cows, it won't pay to allow them to get out of condition by economizing on feed, and if they are not all profitable, now is the time to do some effective culling, and thus save feed for the paying animals.

During the heated season the animals should have an opportunity to drink late in the evening. This prevents excessive thirst in the morning and consequent overloading with water. Evening watering also gives the caretaker the necessary opportunity for a general inspection of the animals and stables, which is necessary for the best care.

Pedigree alone is not of much account in swine breeding, but coupled with individual excellence, is evidence that the animal has been bred all right, and counts for a great deal, because it shows the animal's good qualities have been bred into him, and his progeny will show it.

## MAKING BUTTER ON THE FARM.

Cleanliness begins in the stable. Our cows have a good, dry bed and are cleaned before each milking, writes Mr. Fred Evans. We use a cooler creamer in summer, setting the milk 24 hours. In winter we use pens, leaving the milk in a warm room 36 hours. We churn every morning in summer and two or three times per week in winter, using a barrel churn. The cream is churned at a temperature of 60 degrees in summer and 63 degrees in winter. We usually churn from ten to 30 minutes. The buttermilk is then drawn off, and the butter rinsed in cold water. This water is drawn off and the butter rinsed in another water in which has been placed a handful of salt. After this the butter is weighed and salted to suit the taste of your customers, from 1½ to 2 ounces salt per pound being used. The butter is worked twice, first in the churn after salting and again in from three to six hours. It is worked by hand, packed in half-gallon crocks and delivered to our customers every two weeks.

## SENTENCE SERMONS.

Whiners are not winners. Need makes the neighbor. The lowly heart finds the higher life. Difficulties are but doors of delight. Long public prayers point to short private practice. If your religion is not in everything, it is in nothing. It takes a wideawake devil to make a sleepy church.

# BUILDING OF AN EMPIRE

AN AMERICAN WRITER OF CAN-  
ADA'S NORTHWEST.

Remarkable Tribute in a New York  
Magazine — "Conquering the  
Last Frontier."

"Success" Magazine of New York for August is one on the Canadian Northwest, called, "Conquering the Last Frontier," by Samuel Merwin, and gives a graphic description of how an empire is there being built. Part I. of the article, entitled "Our Lost Empire" follows in part:

Definition number seven, in Webster's unabridged, of the transitive verb "to lose," reads: "To fail to obtain or enjoy; to fail to gain or win." Twenty-five years ago Canada was young and diffident. To-day she is strong, rich, and a little proud. Then, had we thought it worth while to make advances it is difficult to say what might or might not have taken place. Now, there are half a million American settlers in Manitoba and Saskatchewan and Alberta, and, if you should ask them, you would find that they are not at all interested in the annexation question. "Things run rather better here," they say, "than in the States. The administration of justice is much more satisfactory. We see no advantage in changing."

If you have ever felt, as I rather fancy you have, that it is in you to explore strange, new countries for yourself, that you would not hesitate very long between going into something in the dry goods way and going into something in the empire-building way, you will do well to open the atlas to the map of North America and let loose your imagination in the splendidly romantic conquest of that Far Northwest which we know very little about, but which we shall, willy nilly, learn a good deal about before "Jim" Hill, and the new Grand Trunk Pacific and the Canadian Northern, and the Canadian Pacific, and the Dominion Government get through with it. They are building—while you wait,—an empire with which we, of these States shall very shortly have to reckon.

## NEW METHOD OF EMPIRE BUILDING

It is the first time an empire was ever built in just this way. The rifle has no place in the undertaking. Thanks to the century-long influence of the Hudson's Bay Company, the Indians and half-breeds are docile. Thanks to the Anglo-Saxon sense of order, and to the Royal Northwest Mounted Police, there are few or none of those "bad men" who have infested our frontiers. The conquering army is made up of farmers and cows and sheep and horses and plows and harvesting machines. The advance skirmishes, if you could see them at work, at hardy young men to rough clothes who carry transits and levels, and travel with pack horses or, in the depth of the winter, with pack dogs.

It is these hardy young men of the transit in whom we are most interested here. The farmer makes excellent foundation material,—the best there is, in fact; but like certain of the others of us he is neither very exciting nor very decorative. In small parties for reconnaissance work, in large parties for survey work, scattered over three thousand miles for construction work, the engineers are blazing the steel trails across the prairies and through the wilderness. Before many of them lies hardship, perhaps starvation. For the larger survey parties provisions are freighted out by Indians and cached where expert woodsmen can find them. But the small reconnaissance parties, plunging into the northwestern mountains for six months at a time, can carry only a few staples. When gun and rod fail, they must eat dog. In

Add to this that all save the Hill undertaking are bolstered up with vast land grants, and, now and then, with cash subsidies, and the wonder grows.

No, the engineer is our man. Of the two types, the man who is risking other people's money is neither so picturesque nor so interesting as the man who is risking his life. It is the engineer who is conquering this last, and perhaps greatest, frontier.

## EDMONTON.

Edmonton is the jumping-off place for all Northwestern Canada, the place where town and wilderness strike hands. Here in Washington Square, the prosperous little city of the Upper Saskatchewan seems even farther away than its accredited 2,500 miles. It is 800 miles west of Winnipeg, and it is some little way north of that fifty-third parallel, beyond which, if one is to believe Mr. Rex Beach, the laws of God and man don't work very well. If one were to attempt this somewhat hazardous feat of walking due east from Edmonton, it would be found necessary to swim the upper waters of Hudson Bay before fetching up the coast of Labrador. All this sounds very remote and inaccessible. It suggests rather the interior recesses of Greenland than the pastoral charms of an Iowa or an Illinois; and if carried away from New York, buttoned inside a prosaic waistcoat, what I took to be the emotions of the explorer, my ignorance was not, I prefer to think, unique.

## A CITY OF CONTRASTS.

Edmonton is the jumping-off place for board of trade; of department stores a block long and a good many storeys high; of paved streets and brick and stone buildings; of well-to-do men in frock coats or in trim riding breeches and puttees; of prettily-gowned women; of the latest thing in automobiles; of clubs, churches, and polo grounds. All this speaks of the life of to-day. But jostling by the prosperous merchant or the English "younger son" is the half-breed in Stetson hat and silk-embroidered gauntlets, or the squaw with papoose bundled on her shoulders. The contrast to one who has surrendered much of himself to the effete influence of our Atlantic States, is somewhat bewildering. One evening I strolled to the brink of the bluff and tried to straighten it out. Edmonton was the frontier; I knew that. But maps, with great "unexplored" patches on them, are not so convincing as they might be when one is in the living presence of clubs, and banks, and churches, and automobiles. Before me was the mile-wide valley, cut out square and deep from the yellow earth. The smoke from the lower town thickened by a May mist, filled the valley to the brim, and in the moonlight it was luminous and faintly purple. Through this veil glistened the silver Saskatchewan, as it wound its leisurely way toward Hudson Bay. It was all very serene and very charming. At this moment it seemed, after all, as if I might be pretty close to those unexplored blank spaces. I should have liked to let my thoughts float off downstream through the mist to encounter the wild adventures of frontier times; but even if they could have slipped safely under the railroad bridge, they would have come up short against the very business-like log boom just below.

## FROM ENGINEER TO GRAND PIANO.

The wild days are almost over with; the frontier is losing ground every day. In the trading stores at Edmonton, the half-breeds sit, and smoke, and talk of the old days when the steamboats ran on the Saskatchewan. Men talk that way of the rotting wharves at Portsmouth, of the ancient, faded glories of the Spanish main. When I heard this plaint, from the lips of a whimsical old trader, I gave up my hope of finding a frontier. I surrendered to the spirit of Jasper street, Prince Rupert, with its electric lights and its automobiles. I merely shook a listless head when a talkative young man put the age-old question, "What's your line?" So he was here, too! Behind a certain pros-

# GIRL FLOGGED TO DEATH

MISSIONARY'S TERRIBLE STORY OF  
THE CONGO.

Human Beast Wreaks Revolting Ven-  
geance Upon Defenceless  
Girl.

So horrible have been the details of the revolting atrocities in the Congo Free State that they would be almost incredible did the evidence of returned missionaries not only confirm, but emphasize, the telegraphed reports. The Rev. Dr. Nassau, who has returned to America after forty-five years of missionary work on the Congo, adds his testimony against the iniquity of King Leopold's administration in the American Journal-Examiner. He took home with him a grim reminder of the scenes of torture, so frequently enacted, in six rhinoceros hide whips, with which native women are beaten to death by their white masters. One instance of such brutality, which he describes as "exactly, pitifully true," Dr. Nassau gives in detail.

## WRITHED IN AGONY.

For some trivial fault a certain official took a dislike to one of his wives, a mere girl, and proceeded to wreak his vengeance upon her in a particularly revolting manner.

"He instructed his black soldiers to seize her and tie her to a stake. Then he advanced, bearing in his hand a stout whip of hippopotamus hide, similar to the ones I have brought home. Raising the whip, he brought the cruel lash down on her unprotected body, causing welts. The victim writhed with agony, but her sufferings only added flame to the man's lust for torture. Again and again the heavy lash swirled through the air and fell across her flesh, until she was cut in a hundred places.

## BEATEN TO DEATH.

"But even then she was not released. Night approached, and still the girl hung to the stake in a frightful condition. Death did not come then to end her suffering, and so through the night she remained there in a torment words cannot describe.

"In the morning the white officer surveyed his work, and finding that the vital spark still flickered faintly, he ordered honey to be smeared all over her wounds, and she was left in the fierce glare of the tropical sun.

"Soon the scent of the honey attracted myriads of insects, which settled on her in droves. Ants swarmed over her, pestiferous insects fought for room on her body, while the sun streamed down, and the young woman suffered worse than death.

"When the second night fell the officer, tired of prolonging the ordeal, and seizing a whip, he beat her to death."

## MORE MICA USED.

Once Seen Chiefly in Stoves—Now Insulates Electric Wires.

There was a time when mica, or isinglass as it was far more commonly called, was familiar in one limited use in every household in which there was a parlor or a sitting room stove, thin, transparent sheets of this mineral being set in the stove door. Through the "isinglass," not destructible when subjected to heat, as glass would have been, the glow of the fire within could be seen.

With long use the mica might become smoked up and opaque, or it might become marred and broken. Then the head of the household would get and set into the stove door fresh isinglass, from the stove dealer's, while the fragments of the old were very probably

# MILES OF TIN STREETS

THE KAFFIR QUARTER OF THE  
"GOLDEN CITY."

Peculiar Architecture of Johannesburg  
—Laid Out With Great  
Regularity.

After struggling for half an hour through pungent brickfields of arid clay, cracked by the heat of the sun into a thousand fissures, dodging shunting trains and snorting engines on a mazy goods siding, the inquisitive visitor to Johannesburg finds himself on the outskirts of "Tin Town."

Topographically, the district is Yvededorp; technically it is the "expropriation area"; actually it is the Kaffir quarter of the "Golden City." Here the black man foregathers with wife and family, and here the fiery cross of revolt is being raised, with what results only the future can show, writes a correspondent of the London Express. "Tin Town" is more than a mile in length and three-quarters of a mile in breadth. It is laid out with great regularity on the American block system.

The streets are unpaved, and the attempts at the construction of sidewalks are pitiful in their primitiveness. The roadways of red earth—dotted with crawling Kaffir babies—are marred by unpleasant undulations and hollows filled with stagnant rain water, near which myriads of pugnacious mosquitoes are forever buzzing.

The crowning feature of "Tin Town" is its architecture. Never were houses more strangely built, nor the weird structures of nightmarish more accurately realized.

## THE PRINCIPAL MATERIALS

from which this great living area has been constructed are petroleum tins, the tin or zinc linings of imported packing cases and large quantities of the lead used in the tea trade. From these limited means, with battens of wood for use as framework, are constructed dwelling places very similar to that made by Peter Pan and his youthful crew for the protection of Wendy.

Every man is his own architect and builder, and the work of erecting these twelve or fourteen feet high sties is simplicity itself. First the ground is marked out, generally exactly square, and at each of the four corners a sturdy stake, some ten feet in height, is driven in. These are strengthened and supported by cross pieces. Then the architect, his wife and eldest children wander abroad in search of tin.

If the colonies one seldom sees petroleum in a cask. It is generally sold in two, four, or six gallon tins. The consumer purchases a specially manufactured pump and draws off the oil as he needs it. As the tins are not returnable, they are pressed into all sorts of strange services. Filled with earth they are used for building walls, painted green they are turned into flower boxes; they are in common use as pails, drinking troughs for cattle, boilers, cooking utensils, besides a thousand and one other familiar objects. Yet, despite this accommodation, many find their way to the rubbish heaps, and are eagerly pounced upon by the "homing" Kaffir.

The tins are cut open, hammered flat and nailed to the upright battens. In a couple of hours—given a sufficient supply of material—the citadel walls are complete, and this sound box of a house only requires the corrugated iron roof and a tin chimney—or, rather smoke outlet—to finish it. The luxury of fire grates is unknown. The fire may be lighted anywhere, and the

## DENSE VOLUMES OF SMOKE

are expected to ascend skyward in the manner provided.

plunging into the northwestern mountains for six months at a time, can carry only a few staples. When gun and rod fail, they must eat dog. In winter—and winter is winter up there—they must roll up in a blanket or two and sleep under the stars. A Canadian Pacific engineer, poor Vance, was frozen to death west of Battleford two winters ago. I know an engineer who has slept under canvas when the camp thermometer registered fifty-six below zero. I know another engineer who thinks little, at forty below, of rolling up in a single Hudson Bay blanket on the snow. In summer this same country is hot, and, in places, dusty, and along the river bottoms the insect pests are all but unbearable. The minute and tedious work of surveying and map-making is relieved only by intervals of pushing through rough country, of building rafts in order to ferry supplies, instruments, and records across rivers, of cutting a way for pack horses through tangled windfalls, or, in winter, of "breaking trail" for the dogs.

#### THE LURE OF THE WILDERNESS.

By way of recompense for this work the engineer, equipped with technical training and with years of hard experience, shares with the college professor the distinction of being the most highly underpaid of brain workers. A fat traveling salesman with a grin, a good story or two, and a fund of questionable grammar, will draw from twice to ten times the salary.

And the curious thing is that they love the life. These lean, youngish men with the clear heads and the magnificent bodies. They will perhaps try to make you think they don't. They are a silent lot, as becomes men who pass their years in the wilderness or in the lonely, wind-swept prairies, and they are working for corporation directors whose business ears are not attuned to the call of the wild. But if you could drop into the Alberta Hotel at Edmonton, on some mild spring evening, and have a look at the assistant engineers and the instrument men who are looked to disappear toward the Rockies, within a day or two, for some six, eight or ten months, you would see what I mean. The undying spirit of adventure is in their eyes; the half-conscious swagger of the soldier of fortune is in their stride. The same haunting desire that drove Stanley back to Africa, that drives the soldier to the wars, or the sailor to the sea, is sending these men back to the wilderness.

\$100,000,000 OR SO.

The spending out of hand of a hundred millions or so for railroad building through a new land obviously means something. Three new trunk lines are already under construction in Western Canada. Before long we shall be hearing a good deal about the foresight and the unflinching courage of the men who are standing back of these huge undertakings. But when you see this sort of thing in the papers, smile. A man would show about as much foresight in staking out a claim in the bullion room at the mint. In Manitoba, Saskatchewan, and Alberta Provinces there are more than two hundred thousand square miles of prairie land, most of it rich, black loam, ready cleared for the plow. As much again awaits clearing. In the mountains are minerals and timber. Settlers are pouring in on every train to occupy this vast region. Towns and grain warehouses are springing up over night. Imagine the Mississippi and Missouri Valleys to settle over again under modern conditions! Imagine anything you like, and you will probably be within the facts.

It is nothing unusual for these prairies to yield a general average of 25 bushels of wheat to the acre, and 40 bushels of oats. Much of the wheat is of a higher grade than any now raised in our West, and it is frequently mixed with ours to bring ours up to standard. No, the wonder is that the pompous gentlemen in the tall hats didn't get their railroad through ten years ago.

merely shook a listless head when a talkative young man put the age-old question, "What's your line?" So he was here, too! Behind a certain prosaic waistcoat, a spark had flickered out. After the engineer, the traveling man; after the traveling man, the steam plow; after the steam plow, the grand piano; that is the way they build up empires to-day.

#### BRITISH ARMY REFORMS.

##### What the New Liberal Government Intends Doing.

In order that our readers may be able to appreciate the exact nature of the army policy of Sir Henry Campbell-Bannerman and his colleagues, the following "points" from Mr. Haldane's speech in the House of Commons are printed:

The army at present is highly unsatisfactory, both in cost and efficiency.

To improve both is the object of the Army Council's scheme.

This great, rich, powerful country would give a lead to other countries in lightening the crushing burden of armaments.

We are suffering from the want of intelligible principle in our army system.

We must see that every penny spent went for fighting efficiency.

Increased efficiency by 50 per cent. would result from the scheme.

Our army existed primarily for overseas work, and to ensure drafts, battalions at home and abroad should be equal.

Militia principle to be observed by setting untrained men to semi-civilian services now done by regulars.

Twenty thousand regulars are to be done away with, and the army organized in six divisions, totalling 150,000 men.

There will be 50,000 regulars, 70,000 reservists, and 30,000 trained on militia basis.

Eight battalions abroad and two at home to be abolished including two battalions of Guards.

Nevertheless, better management would produce more efficient army than at present, especially regarding artillery, which now was incredibly disorganized.

By abolishing ten battalions, 9,000 men were saved, garrison artillery no longer needed saved another 2,000, artillery and depot organization saved 3,850, and miscellaneous reductions of redundancies made up 20,000.

It is hoped that few men would be "put in the street," and that most would be absorbed.

Scheme completes the full strength of the artillery, and also saves £300,000.

Three hundred field guns superseded by quick-firers to be given to volunteers, and 20,000 artillery militiamen trained.

Every man in every department of the army was theoretically asked, "What are you here for, and how do you justify the money the country spends on you?"

Terms of new enlistments to be seven years and five for the line, three years and nine for the Guards, seven years and five for the cavalry, six years and six for the field and horse artillery, and eight years and four for garrison artillery.

Militia having outgrown their original functions one battalion to be put behind every regular battalion and take foreign service.

Volunteers are to be allotted special work according to their localities, infantry, mounted men, artillery, and so on.

All this is a mere beginning, the foundation of a structure which requires time for completion and needs an activity that is unhesitating and unrelenting.

They had had a quarrel. "I won't say marriage is a failure," he said angrily, "but some are more fortunate in what they get than others." She laughed annoyingly. "You are right, dear," she said. "You, for instance, got me; but I got only you."

might become married and broken. Then the head of the household would get and set into the stove doorfire insulating glass, from the stove dealer's, while the fragments of the old were very probably turned over to the children, who were likely to be surprised to find into how much thinner sheets still the thin old pieces from the stove door could be divided. As a matter of fact mica is divisible into sheets one two-thousandth of an inch in thickness.

Now there are many who don't know mica at all, not even as it is used in stoves, people born and raised in houses that are heated by steam, in which no stoves are used for heating purposes; but while the number of these is large and all the time growing, the number of people who yet use stoves is larger still; and so while mica may have passed entirely out of the sight and mind of many who once knew it in this use, and in this use only, the preparation of it for stove use still constitutes a regular branch of the mica trade; and thus one of the old uses of mica still continues.

The chief use to which mica is now put is one not dreamed of until within a comparatively few years, namely, as an insulating material in the construction of electrical apparatus, for which purpose its use is now general and constantly increasing, and far larger than in any use to which it had ever before been put.

Mica is now used also for making chimneys for incandescent gas lamps placed where they would be exposed to drafts, or out of doors, subjected to the weather. Mica is used to make protectors for ornamental candle shades, and it is used for making fancy boxes, and, in place of glass, for covering the labels on drawers, as in a desk. Ground up mica is now used in the manufacture of lubricants and of fertilizers, and of dynamite, and in other forms it is used for boiler coverings.

Mica was long used for windows and for lanterns, and it is still used in lanterns where such use would be advantageous. It is used in place of glass in spectacles worn by stone and metal workers, and in miners' lamps, and it has been in the past or still is put to various other, including ornamental, uses; but among its various modern uses the chief is in its application to electrical machinery. For this the mica is cut into hundreds of different shapes and sizes.

India is the chief source of the world's supply of mica, with Canada next, the United States next, and Brazil and other countries following. Mica, from one source and another, ranges in color from white or transparent, through various shades to black.

In the formations in which it exists it is found in more or less scattering deposits, or in pockets. Its value depends with regard to the uses to which it may be put, on its color, its freedom from impurities and the size of the sheets that can be obtained from it.

Now this anciently known mineral, for many years put to varied thought comparatively limited uses, finds more extensive use than ever in applications peculiarly modern.

Fresh Egg—Old man, you want to cheer up and do away with that countenance of yours.

Hard Boiled Egg—I am sick. I just had a boiling hot bath and I feel as if everything inside of me was solid.

may be ignited anywhere, and the DENSE VOLUMES OF SMOKE are expected to ascend skyward in the manner provided.

Those of the 80,000 Kaffirs in "Jo'burg" who do not dwell in mining compounds reside in one of the several miles of "Tin Town" streets. Seen from a distance in the strong glare of the African sun the bizarre collection of human dwellings looks like some enchanted dream city. The tin walls reflect back the sun's rays like walls of silver, and even the dull roofs of corrugated iron are transmuted into something "mystic, wonderful" by the philosopher's stone of the sun. At close quarters the scales fall from the eyes, and the awakening is rude indeed.

The Kaffir multiplies prolifically, and these unsavory roads are always filled with their naked, copper-skinned offspring. They crawl about the ant-infested roadway and paddle or flounder in the hollows of foul smelling water with evident enjoyment. They are plump little mites, these children. They are much more precocious and develop more rapidly than European infants, and they certainly take life much more good humoredly.

The male population of "Tin Town" does not arrive home until evening, but always before 9 o'clock, for by the law of "Jo'burg" no black, save those in charge of rickshaws, is allowed on the streets after this hour.

Then he can loll up against his tin walls—making them crackle and rattle like concentrated thunder—and smoke his clay pipe, while he discusses his short, but seditious, cuts to freedom.

In the frail habitations of "Tin Town" the flames of revolt have been steadily fanned since the Anglo-Boer peace, and it would be a suicidal policy to underestimate the present menace or to ignore what is behind it.

#### DUDES OF OTHER DAYS.

##### Fashions in the First Part of the Nineteenth Century.

A cure for the confirmed railer against modern dress might be a course of inspection through a file of old fashion magazines or the perusal of such accounts as are given by the author of "Sketches of Lynn." The description is that of a suit worn in the first part of the nineteenth century.

The boots were an important article of dress. The toes were made as broad as the ball of the foot, with the corners well rounded, giving the shoe the resemblance to the snout of a shovel-nosed shark. They were very snug and required strong straps. In order to get into a fashionable pair, the heel of the stocking was well soaped and some pulverized soap sprinkled into the boot. The length of time it took to get one on depended on the strength of the owner and the strap.

The stylish overcoat displayed five capes, one above the other. The trousers were expected to fit as tight as the skin. Just how they were put on is a mystery. The coat was especially snug under the sleeves, and the velvet collar scraped up the back of the head. The camel overcoats, after a little wear, became as stiff as birch bark.

The thing worn about the neck was called a stock. This name was appropriate in its suggestion of an instrument of punishment. The stock was from three to six inches high, and was made stiff. A man was forced to look straight ahead. Only by careful management could he see a little on either side. About half way between his eyes and ears two little points of collar stuck up like toothpicks.

Ruffled bosoms and wristbands finished the costume, with the addition of a tall silk hat. When enclosed in this manner, with a dash of attar of roses on his handkerchief, the man of the period was considered irresistible.

There wouldn't be much matrimony without a maiden effort.

## AUTHENTICATED RECORD

### SOME REMARKABLE MATRIMONIAL DOINGS.

**Courted and Wedded Within Sixty Minutes—Mrs. Ayres Married Nine Husbands.**

A new item has been added to the long and interesting list of authenticated matrimonial records by the marriage of Captain Kuhns, of Maysville, Ohio, to Mrs. Sarah Crawford, of the same town. It is seventy years since the lovers began their courtship, and since the gallant captain, who went through the Mexican and American Civil Wars, was thirty-one years old when he first met his fiancée, it follows that he has reached the age of 101 years. The marriage certificate, indeed, established the fact, and also mentioned that the blushing bride had just entered upon her second century!

This is a very different sort of record from that of Mr. John T. Kruger, of Wabash, Neb., for whom is claimed the distinction of being the only man in the world who was married to his wife, in strict accordance with the laws of a civilized country, within sixty minutes of first having set eyes on her.

As might be expected, this "hustling" was the outcome of a wager, Mr. Kruger having somewhat recklessly betted a friend a "level hundred" that he would ask the first girl he met on leaving the hotel where he was staying to marry him within the shortest possible time. He was exceptionally lucky, for the girl chanced to be unusually pretty and quite willing, though

#### AN UTTER STRANGER TO HIM;

and, as already stated, in something under the hour they were made man and wife.

Statistics prove that most men and women are content to be married once in a lifetime, but in the United States, where the matrimonial and divorce laws afford great facilities for record-breaking, and the penetration of the Press gives publicity to everybody's affairs, people appear to take a more liberal view of the holy bonds. There is Mrs. Ayres, of Taylor County, for instance. That is to say, she was Mrs. Ayres when last mentioned in the Press, but since she was married to no fewer than nine husbands before she was thirty-three, it is quite possible that she is Mrs. Something-Else now. It is a singular fact that this record was attained without the lady having once to have recourse to the Divorce Court. Four of her husbands were shot dead, one died suddenly in a public thoroughfare of heart disease, another was killed in an accident, and two died in their beds. So far as we can discover No. 9 survives.

Recourse to the Divorce Court naturally simplifies record breaking of this description, but the well-known feat performed by Mr. and Mrs. Coffin, of Chicago, is still uneclipsed. They have been married to and divorced to each other three times. Mrs. Coffin is

#### A SUCCESSFUL NOVELIST,

and a daughter of the millionaire Amos Snell, who was murdered some years back in very mysterious circumstances. At one time, in one of the periods between marrying and divorcing Mr. Coffin, Mrs. Coffin relieved the monotony by marrying a Mr. Walker. But it was not a successful innovation, and she shook off the name of Walker in the Divorce Court and re-married Mr. Coffin for the third time; but only to be divorced from him shortly afterwards.

A more satisfactory sort of record, perhaps, and certainly a more wonderful "break," is held by Mr. George Dunville and his wife, who last year made a trip from their home in South Dakota to Washington, at the invitation of President Roosevelt, who had ex-

## FASCINATING SPECTACLE

### THE MOST AWE-INSPIRING SIGHT IN THE WORLD.

#### Volcanoes Belch Forth a Whirlwind of Boiling Mud, Fire and Stones.

While the spectacle of a volcanic eruption is probably the most awe-inspiring that mortal gaze has ever rested on, yet it has a fascination which is perfectly irresistible.

This has been shown during the recent eruptions of Vesuvius. While the inhabitants of the volcanic region have shown a desire to escape as fast as they could the trains from Naples and other towns to the scene of the outburst have been packed with people bent on seeing the eruption in full blast.

Science has so far advanced at the present day that it is now possible to give timely warning of forthcoming eruptions, so that in Europe, at any rate, there is not much likelihood of such a terrible disaster as that which overtook the town of St. Pierre some four years ago.

After sundry preliminary emissions, there suddenly belched forth from the crater at the summit of Mount Pelee a stream of molten lava 20 ft. high and half a mile wide. The fiery liquid rushed down the mountain side and into the sea, a distance of five miles, in less than three minutes! Then a perfect whirlwind of boiling mud, fire, and stones was thrown from the crater upon the town, accompanied by a more than thunderous cannonading, which was heard 300 miles away. In the short space of fifteen minutes 30,000 people were destroyed by this fiery visitation.

#### A TRULY AWFUL SCENE.

was the eruption of Vesuvius which took place so early as the year 79. It was graphically described by the younger Pliny, who testified that a dense column of vapor was first seen rising from the crater. It spread laterally, so that its upper portion resembled the head and its lower the trunk of the pine which characterizes the Italian landscape.

Occasionally this black cloud was pierced by flashes of fire as vivid as lightning, followed by darkness more profound than night. The ground rocked and the sea receded from the shores, so that many marine animals were seen on the dry sand. Ashes fell even among the ships of the Roman fleet at Misenum; and it may be mentioned that the elder Pliny, who commanded them, lost his life by being suffocated by sulphurous vapors in his

## SEQUEL TO A ROMANCE

### ARISTOCRAT SEEKS DIVORCE FROM WASHERWOMAN.

#### Swore He'd Stick to Her, But His Credit Gave Out and He Wanted His Inheritance.

Another chapter can now be added to the romantic story of Count Erasmus Erbach-Erbach's romantic marriage to a washerwoman's daughter, who had herself served an apprenticeship at the tubs before she wedded the infatuated young nobleman, says a Berlin, Germany, letter. It might be entitled *The Sordid Sequel*. It's a case of Cupid being vanquished by poverty—of love yielding to luxury. To rid himself of his wife, which is necessary to secure his reinstatement as the heir to a magnificent property and \$1,000,000 a year, the count has had recourse to the ignominious plea that he was of unsound mind when he contracted the marriage, and has retired to a sanatorium, while his relatives work the machinery of the law to procure the annulment of the marriage.

The count's father, meanwhile, allows her \$50 a month. That is a beggarly stipend for a countess, though it is a big sum for a washerwoman's daughter. However, she does not think it enough and brought an action against her august father-in-law to get her allowance increased to \$125 a month, on the ground that as she and the count, while they were together, had lived at the rate of \$40,000 a year—albeit on credit—to be compelled to live on a \$800 a year scale was

#### A TERRIBLE HARDSHIP.

She contended that she should be treated as a countess rather than as a daughter of the tubs. But this view did not prevail with the court and the verdict was against her. It was pointed out to her, furthermore, that if the marriage were not annulled, she could get no allowance at all. So she is left to ponder over the question whether it is better to be a former countess on \$50 a month or a grass widow countess with nothing at all and the wash tub the only means of earning a livelihood. The next stage will be an action for the dissolution of the marriage on the ground that when it was contracted, Count Erasmus Erbach-Erbach was non compos mentis. Whether or not the countess contests it, it is pretty sure to succeed in a German court. In that event, the count will no doubt be speedily restored to reason, and in due course will become the reigning count himself and figure among the shining lights of the hereditary aristocracy.

## ELEPHANT HAD A CORN

### EXCITING EXPERIENCE IN A NEW YORK MENAGERIE.

#### Big Animal in the Zoo Had Her Corns Pared After Lots of Trouble.

Jewel, the big elephant in the Central Park menagerie, had a part of the sole of her right forefoot cut off lately. She is a mild-tempered beast in general, but she became nervous when the men began to cut her foot.

The operation was made necessary to cure her of a little lameness caused by a corn. The corn did not come from tight footgear, but was due to lack of exercise, as Miss Jewel has been penned up in her stall all winter. If she had been running barefoot about her native jungle the rough ground would have prevented the need of a chiropodist.

#### AFRAID OF KNIFE.

The director ordered Billy Snyder, the keeper, to get the animal's foot in good shape, and the keeper prepared to carry out the instructions one morning before the ropes were taken down to admit visitors. He went into the stall with Keeper Coughlan and carried with him a shoemaker's knife, a blacksmith's knife, a carpenter's drawing knife and a file. Jewel was glad to see him, as she always is. She didn't expect anything unusual to happen.

She had never been trained to do stunts like her young neighbor, Hattie, so when the keeper tried to get the foot with the corn up on the stool she became alarmed and trumpeted. When the foot was up on the stool she swung around her head to get a line on what was going on. Snyder held the shaving knife ready to take off half an inch or so of the foot, but Jewel seemed to think he was going to take off the whole foot. She pulled it down to the floor and ambled over to the other side of the stall.

#### PICKED HIM UP.

The keeper tried to get her to lie down so that he might get at the foot that way, but she had never been trained to lie down at command and the effort failed. He went outside and got an armful of fresh cut grass as a bribe to make her forget. He managed to get the foot up on the stool again, and with a quick stroke of the knife went ahead with the operation.

The elephant stopped eating, swung around her trunk, and with it encircled the keeper's body. She picked him up from the floor, and the other keeper became frightened and called out, "Oh, Billy, what'll I do? She'll kill you!" "She's nothing," said Snyder, as best he

A more satisfactory sort of record, perhaps, and certainly a more wonderful "break," is held by Mr. George Dunville and his wife, who last year made a trip from their home in South Dakota to Washington. At the invitation of President Roosevelt, who had expressed a wish to congratulate them personally on bringing into the world twenty-seven children and never having had a single child.

Mr. Dunville and his wife are still young, being respectively forty-four and thirty-nine, and their goodly family has gathered around them with great rapidity, invariably arriving in triplets—eight sets of three boys, and one set of three girls. No doubt both parents are to be heartily congratulated, but all the same, few people would envy Mrs. Dunville the task of cutting bread-and-butter for her children's tea!

## NEW ITALIAN WARSHIP.

### Great Advance Upon the Battleship Dreadnought.

According to an article contributed by Col. Cuniberti, chief constructor of the Italian Navy, to the new issue of Jane's "Fighting Ships for 1906-7," Italy is building a battleship which is as great an advance upon the Dreadnought as the latter is upon her predecessors. The Dreadnought herself was based on ideas that Col. Cuniberti contributed to Jane's "Fighting Ships for 1903," but Col. Cuniberti, who is perhaps the greatest living warship designer, holds that the Russo-Japanese War proved that 12-inch guns are very unsatisfactory, and it is deduced that he regards the Dreadnought as not being a type best calculated to succeed in modern warfare. He outlines, although with cautious reserve, a "new ideal ship," the main armament of which will be eight 13.5-inch guns, each firing a 1,250-pound shot against the Dreadnought's 850 pounds. In addition to their greater calibre, the guns will be so mounted as to enable all of them to be fired either singly or as a broadside, an arrangement that has hitherto not been adopted. This result will be achieved by placing four turrets, each containing two guns, at the four angles of a rhombus, that is, two turrets will be on the centre line, one forward and one aft, and the others on either beam. Therefore, while the Dreadnought can fire at one discharge 5,100 pounds broad or astern and 6,800 pounds broadside, the new idea will fire 7,500 and 10,000 pounds, respectively, or 50 per cent. more than the British ship. The Dreadnought's speed, too, will be exceeded by two and perhaps three knots. The water line armor on the Italian ship will be thicker than the Dreadnought's. Accepting these details as accurate, it is seen that the ideal ship would be able to keep outside the danger zone of the dreadnought's gun-fire and sink her, while she herself was unharmed.

The London Daily Mail, making a feature of the foregoing, and adding some information of its own, claims that the Dreadnought is outlashed on every point. It contends that it would be useless to build two or three ships of the Dreadnought type, as is proposed, and urges that Great Britain outdo the ideal ship by building a similar vessel, but making her armament 16-inch guns.

## SHE DIDN'T SLEEP WELL.

A woman who lives in an inland town while going to a convention in a distant city, spent one night of the journey on board a steamboat. It was the first time she had ever travelled by water. She reached her journey's end extremely fatigued. To a friend who remarked it she replied:—

"Yes, I'm tired to death. I don't know as I care to travel by water again. I read the card in my slatroom about how to put the life-preserver on, and I thought I understood it; but I guess I didn't. Somehow I couldn't go to sleep with the thing on."

shores, so that many marine animals were seen on the dry sand. Ashes fell even among the ships of the Roman fleet at Misenum; and it may be mentioned that the elder Pliny, who commanded them, lost his life by being suffocated by sulphurous vapors in his anxiety to obtain a near view of the terrible phenomena.

In 1669 there was a notable eruption of Mount Etna. After overwhelming fourteen largely-populated towns and villages, the stream of lava flowed onward to the walls of Catania. There the fiery flood accumulated till it rose to the top of the rampart, 60ft. high, when it fell in a burning cascade within and destroyed.

## A PORTION OF THE CITY.

But it failed to destroy the wall, which was discovered long afterwards when excavations were made in the rock. The solid lava can even now be seen curling over the top of the rampart as if still in the act of falling. In the hope of diverting the stream, a party of fifty men, dressed in skins to protect them from the heat, broke open with iron crow and hooks one of the solid walls which flanked the current.

This caused it to take the direction of Paterno, but the inhabitants of that town, becoming alarmed for their safety, hastily took up arms and compelled the party from Catania to put a stop to their operations. When it entered the sea the fiery liquid had traversed a course of fifteen miles, and was still 600yds. broad and 40ft. deep.

Worthy of mention is the volcanic eruption of Jorullo, in Mexico, which took place in the year 1759. In the month of June hollow sounds of an alarming nature were heard in the ground, and for two months earthquakes succeeded each other in rapid succession. Then, in September, flames began to issue from the earth and huge

## FRAGMENTS OF BURNING ROCKS

were thrown to prodigious heights in the air. By a subsequent eruption of Jorullo, in 1819, the city of Guanaxuato, 140 miles away, was covered with ashes to a depth of 6in.

But when Hecla was in eruption in the year 1845, the dust from it was in ten hours lying thick on Orkney and Shetland. Indeed, more than once when this volcano has reached unusual activity the ashes from it have been carried by the wind over the 700 or 800 miles which lie between Hecya and Ben Nevis, in Scotland.

Ten years before that there was an eruption of Consequina, the ashes from which were borne on the wings of the wind as far as the island of Jamaica, fully 700 miles away. But at a distance of thirty miles south of the volcano the ground was covered with fine dust, disseminated from the crater by the eruption, to the almost incredible depth of 10ft. It has even been asserted that the dust has, in some instances, travelled 1,500 miles.

## GREATEST ONE-MAN BOOK.

No author of any nationality has ever produced books which can compare with those of Shakespeare for world-wide popularity. Five hundred foreigners, at least, have translated them into their own tongues, including such little-known languages as Icelandic, Servian, Bohemian, and Polish. There are to-day as many German readers of German translations of Shakespeare as there are English readers of the original in English. The fate of the work of the average writer is that it rapidly wanes in popularity until in the course of a decade or two it is entirely forgotten—a thing of the past. The selling power of Shakespeare's collected works was, however, quite sixteen times greater in the 18th than in the 17th century, and the 19th century saw another great upward bound in the sales. It is estimated that there are now over six million volumes of Shakespeare's works in circulation, and the demand is so great that nearly every book publisher of note issues a special Shakespeare edition of his own.

countless contests it, it is pretty sure to succeed in a German court. In that event, the count will no doubt be speedily restored to reason, and in due course will become the reigning count himself and figure among the shining lights of the hereditary aristocracy.

The count's marriage occurred only last year and doubtless the main features of the queer story are still fresh in the memories of our readers. The marriage took place in London, because there, both parties being over age, parental objections don't count. The Count's father and the other members of the family

## RAISED CAIN OVER IT.

The Erbach-Erbachs are no end of hereditary swells. They belong to the mediocrity nobility, which means that they enjoy equality of birth with the royal families of Europe. The head of the house is entitled to style himself a serene highness. By law, too, designed to protect their blue blood from plebeian taint, the offspring of a mesalliance, as in the case of royalty, are barred the succession. The house laws of the Erbach-Erbachs, which have been in force for over 500 years, provide furthermore, that the head of the house may disinherit any double-barreled Erbach who marries a woman not of royal rank. At a solemn family council the threat of disinheritance was launched against the contumacious eldest son and heir.

He answered it in a strain of heroic defiance. Not for a moment did he regret the step he had taken. He loved his wife and she loved him, and though of humble birth she was far worthier of lifelong devotion than any of the pampered daughters of royalty or hereditary petty potentates. As for being deprived of his income by his irate father, that did not bother him a bit. He rejoiced in the opportunity it afforded him to prove to the Erbach-Erbachs and the hereditary aristocrats of Europe generally that there was still left a man of noble birth who welcomed the chance of showing his love for the purest and best woman on earth by earning a living for her. And so on and so on.

## IT SOUNDED VERY FINE.

The hereditary workers clapped their hands. This is a man of the right sort, they said; he shows the proper spirit; he is too good for the aristocracy; he is one of the people. But the aristocrats knew the breed. They said "wait." And it did not prove a long wait, either. As long as the heir to the princely Erbach-Erbachs could live on credit, he and the washerwoman's daughter lived happily together and the question of raising the where-withal did not keep him awake nights. But when his credit was exhausted and it became a question of hustling for a living or going penniless, he saw a great awakening light. He left his wife, crept back home and said to his family, get me out of this awful hole I've got myself into and I'll submit to anything. And they are helping him out of it.

## HAPPY THOUGHTS.

There's no argument equal to a happy smile.

The black sheep in every family was once the most petted lamb.

Did you ever notice that the size of trouble depends on whether it is coming or going?

People who can "turn their hand to anything" seldom turn up trumps in the game of life.

## SATISFIED.

"Have you a good place in your class, my little man?"

"You bet I have. Winter it's right alongside the stove, and in summer nearest the door."

"Every woman has one hope as age advances upon her."

"And that is?"  
"That she doesn't look it."

ahead with the operation.

The elephant stopped eating, swum around her trunk, and with it encircled the keeper's body. She picked him up from the floor, and the other keeper became frightened and called out, "Oh Billy, what'll I do? She'll kill you!"

"Do nothing," said Snyder, as best he could with the trunk squeezing him. He knew that the safest thing for him was not to further alarm the elephant and to take his chances. Jewel carried him to the other end of the enclosure and there put him down on his feet without injuring him.

The chiropodist was having his troubles, but the work had to be done. When he got his breath back after the squeezing he chained a hind foot and a forefoot to the floor and called in his little fox terrier, Daisy, to give the elephant a real scare that would make her behave. Jewel is mightily afraid of the dog, which is scarcely larger than the foot with the corn.

After a few more interruptions he got the foot in good condition.

## MAKE WEALTH FAST, DIE EARLY.

### Significant Fact Noted in Connection With Deaths of Millionaires.

The high average of the age attained by men who have acquired large fortunes slowly has for many years past been noteworthy. The average of age of persons leaving estates valued at more than £150,000 each has usually been from 71 to 73 years, and the number of those exceeding 80 years has been remarkable. On the other hand, the possessors of quickly acquired wealth have in some prominent cases died early.

Thus Mr. Barnett Barnato, who died in 1897, leaving £960,000, was only forty-six years of age, and his nephew, Mr. Woolf Joel, who died in the following year, and whose estate was valued at £1,226,000, was thirty-four. Mr. Herbert Davies, a director of mining companies, who died in 1899, aged forty-three years, left £734,000. Colonel North, who left £455,000, was fifty-four years. Mr. Cecil Rhodes was forty-eight, and Mr. Charles Ansell, of the Stock Exchange, who left £345,000 was forty-six.

## BRITAIN STILL ON TOP.

Although the population of the United Kingdom is only 41,605,177, it holds the reins of an entire empire with a population of 396,968,798. The area of the United Kingdom is barely 120,980 square miles; but the British Empire extends over 11,146,084 square miles, being larger than the Russian Empire, which comes next, by more than two million square miles. No empire can produce so wide a range of valuable things, natural and artificial, as the British. Precious minerals and precious stones, ivory, wheat, corn, wool, timber, fruit—in fact, every necessity of life and nearly every known luxury—are to be had at first hand within the Empire, and the words "British Made" are still recognized all the world over as being the hall-mark of excellence on every manufactured product, from suitings to iron churches and from penknives to locomotives. There is one financial institution which stands out boldly above all others, and is indisputably the strongest in the world. It is the Bank of England.

## USEFUL SAWDUST.

The sawdust of fine hardwoods brings good prices. There are about twelve varieties of it, and each has its appropriate use. Boxwood sawdust, the most expensive of all, is used by manufacturers to burnish silver-plate and jewellery. Sandalwood is used for scent bags and for the preservation of furs.

The only sure way to keep a good cook is to marry her.

A man may not say a word and yet be a liar.

# TRUNKS and Travelling Bags

FULL LINES FROM THE LARGEST FACTORIES IN CANADA.

## The Baggage Smasher.

They started for an outing  
They travelled night and day,  
In mountains vales and cities,  
As long as they could stay.

But when their journey ended,  
The baggage man looked blue,  
Because that Trunk they bought from us  
Was just as good as new.

## THE BEST FLOUR.

DAFOE'S NONESUCH  
DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade. A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

# CUSTOM TAILORING.

ARE YOU TIED TO ANY TAILOR

If you're not, don't make up your mind about anything—cloth, style or price—until you see what's going on here this season.

Perhaps we'll surprise you by making you clothes to order for less money than you think. We certainly will if you have been paying extravagant prices.

Suits to Order, \$15, 17 to 23

Overcoats to Order \$14 to 22.

Trowsers to Order, \$3.50 to \$7

We are always busy making clothes for people who know our work, and have come back for more. Wouldn't you like a good fitting, well made suit—if so we can make one for you.

We have but one grade of Tailoring—the best we can do—that is the best there is.

J. L. BOYES.

Johnny Get Your Hair Cut.

J. N. OSBORNE will cut it right, or give you a nice shave.

Binder Twine.

PRESCRIPTION EXACTNESS.

At "Wallace's" you get "Exactly what the Doctor Orders." Every Prescription dispensed by a qualified chemist. Charges moderate. The Red Cross Drug Store.

W. C. T. U.

There will be a special meeting of the W. C. T. U. in the Council Chamber, on Tuesday afternoon August 7th at half past four o'clock. A full attendance of members is requested, as important business will be transacted.

Slaughter Sale of Men's Boots.

For the rest of the month of June, Men's \$4.00 Chocolate Boots for \$3.00; also Men's Tan Boots, Genuine Oak Sole, \$4.50 for \$3.00. Come and see before you buy, at H. W. KELLY'S, Campbell House Corner.

Coal Facts.

Now is the time to get in your stock of Coal for the winter before your lawn gets soft. If you want the best grade of Anthracite, Steam or Cannel Coal you can get it by calling up Van Laven's Office, Phone 92. All coal kept under cover and well screened before delivering.

Decoration Day, August 19.

The Oddfellows of Napanee will hold their Annual Decoration Day Services, on Sunday, August 19th. Bouquets of flowers will be thankfully accepted from anyone having flowers to spare. Leave word at the Post Office or take the flowers to Argyll Lodge, on Saturday, August 18th. The graves in the Western Cemetery will be decorated at 10 a. m. and in the Eastern Cemetery at 2 p. m.

Forging Ahead.

The Lennox and Addington Mutual Fire Insurance Company is steadily forging ahead to the first place of the Insurance Companies doing farm business in these Counties.

For Gasoline Stoves and Engines.

Use only the refined gasoline, kept free from coal oil, containing no sediment to clog the tubes, sold at The Medical Hall, FRED L. HOOPER.

Clearing Sale.

In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves.

MADOLE & WILSON

THERE'S A DIFFERENCE IN SPICES.

Compare any of Wallace's Good Spices with the ordinary kinds sold, you can see a difference even before using them, and the flavour of the pickles made with them is very tempting. We are agents for Whitefield's Cider Vinegar, and Chemically Pure White Wine Vinegar. (The Kid that Keeps the Pickles) at The Red Cross Drug Store.—T. B. WALLACE.

Who is Liable?

A Napanee correspondent writes that at last week's meeting of the council a communication from T. J. Rigney, solicitor for a Kingston doctor, re claim for medical attendance on Saad, the Assyrian, so brutally injured last December, near Enterprise was read and filed. The writer adds: "It is learned that recently the finance committee refused to consider the claim, holding that they were not liable and it seems the solicitor wrote asking what the council were going to do about it. 'Read and filed' is hardly an answer." The Whig has learned that when Saad was brought to the city by the county constable, last December, with his head smashed open from the hands of an immigrant, named White, who is now serving time in the penitentiary, the injured man was placed in the care of a local physician. At the Napanee trial of White the constable swore he placed Saad in the care of the Kingston doctor. An operation was performed on Saad and almost constant medical attendance for four months, and for what is considered a moderate fee, about \$200. The question arises, Who is responsible for the payment of this fee? If not the town of Napanee then surely the township.—Kingston Whig.

Death of Dr. James Grange.

Dr. James Grange, 82 years of age, one of the oldest physicians and surgeons in the city, died suddenly of heart failure at a late hour Friday night. Though his death was sudden it did not come as a surprise to the members of his family, as he has been in feeble health for some time. Dr. Grange was born in Napanee, Canada, over eighty-two years ago. He remained in the city of his birth until seventeen years ago when he came south on account of his wife's health. He settled at Chattanooga. Dr. Grange was a graduate of a number of colleges of world-wide reputation, having received diplomas from the Victoria College, Toronto; College of Physicians and Surgeons, of Toronto, and Columbia College, New York. When he left Canada he gave up an established practice and has not been actively engaged in work of his profession since that time. Besides a wife who is seriously ill at Jacksonville, Fla., Dr. Grange is survived by eight daughters: Mrs. F. F. Andrews of this city, who is now abroad; Mrs. A. E. Tucker and Miss Hattie Grange of this city; Mrs. Casey Trull, of Darlington, Ont.; Mrs. Merritt, and Miss Mabel Grange, of Oakland, Cal.; Mrs. Reid and Mrs. Mulford, of Jacksonville, Fla., and by one son Frederick, of Jacksonville, Fla. The funeral services took place at two o'clock Sunday afternoon from the residence of deceased's son-in-law, A. E. Tucker, 414 Georgia avenue. The interment will be in Forest Hills cemetery. The following were the pall bearers: Drs. W. T. Hope, E. B. Wise, G. R. Wise, Frank B. Stapp, Robert Pritchard, F. F. Granger and F. W. Edwards. Dr. Grange was an esteemed member of Napanee Lodge, No. 86, I.O.O.F.—Times, Chattanooga, Tenn.

Wallace's Drug Store has the sole agency in Napanee for "Huyler's Chocolate" the finest in America.

## PERSONALS

Messrs. Clarence Madill and George Walters are taking in the str. Alexandria's trip to Montreal and Quebec.

Miss Minnie Wales, Toronto is visiting at her home here, during her holidays.

Miss Grace Smith of Chicago, is visiting her mother at South Napanee.

Messrs. F. S. Scott and Geo. Dupree are in Peterborough this week attending Grand Lodge, I. O. O. F.

Mr. and Mrs. E. Curlette and children, of New York, are guests of his mother, Mrs. C. J. Curlette, Dorland.

Mrs. E. S. Lapum is visiting her son Mr. Hart Lapum, Montreal, going per str. Alexandria.

Mr. Arthur Fraser, New York, is visiting his parents at their summer home in Westbrooke.

Miss Florence Stevens is visiting friends in London and Toronto.

Mrs. Abell and Miss Margaret Abell left on Tuesday for Toronto.

Miss Carrie Williams is visiting Miss Lillian McHenry, Chicago.

Miss Helen Curlette, New York, spent last week with friends in Napanee.

Dr. Archie Valteau, of Walcott, Vt. is the guest of his brother, Mr. D. A. Valteau.

Mrs. Dennis Wright and daughter Fannie, of Watertown, N. Y., are guests of Mr. and Mrs. D. B. Wilson.

Miss Olive Robinson, South Napanee is visiting friends in Kingston.

Mr. Harry Fralick is enjoying his vacation at Cheboygan, Mich.

Mr. W. B. Sills, was in Peterborough this week attending Grand Encampment of the I. O. O. F. as representative of Mt. Ararat Encampment, No. 16.

Mrs. A. S. Ashley and Miss Maud Ashley are visiting friends in Kingston.

Mr. J. F. Moore, Window Trimmer for the enterprising firm, Madill Bros. is attending the Convention of the National Association of Window Trimmers, held in New York City, August 6, 7 and 8, being accompanied by Mrs. Moore. While in New York, Mr. Moore will be on the lookout for novelties that may appeal to him as just right for the people of Napanee.

Mr. and Mrs. Thos. Wilson, Enterprise, announce the marriage of their daughter, Lillian Alioux, to Mr. William Guy Fenwick, to take place at St. John's church, Enterprise, Wednesday.

Miss Lena Davis, Toronto, is the guest of her parents for a few days.

Mrs. Vrooman is visiting her son Mr. N. B. Vrooman, Walkerton.

Mr. and Mrs. A. C. Baker and family returned on Monday from Bath.

Miss Gertrude Hardy and Master Heber Hardy are visiting friends at Gravenhurst.

Mrs. Jas. O'Brien returned last week from a two month's visit with her son Mr. Frank O'Brien, New York. Mr. O'Brien went to Watertown to meet her and accompany her home.

Mrs. Geo. D. Hawley and daughter Miss Ethel, are spending a couple of weeks with friends in Kingston.

Mr. Blake Perry has severed his connection with the Dominion Rock Drill Co and left on Wednesday for Schenectady, N. Y.

Mr. Jas Douglas returned on Wednesday from a trip to Oswego.

Messrs D. J. McKinnon and Frank Williams spent a few days this week in Rochester.

Mr. Wm. Yerkes, of Detroit, is renewing acquaintances in town.

Miss Allie McCabe and neice Gladys Vandewater, spent last week at Hay Bay, the guests of Mr. and Mrs. Wm. McCabe.

Mrs. Mason and daughter Gladys, are guests of Mr. and Mrs. F. S. Wartman, Colebrook.

Mr. Frank Hudson and wife, and son Walter, of North Fredericksburg, are ill with diphtheria. Mrs. Hudson's mother, Mrs. Nicholas VanAlstine is attending them.

Mr. C. M. Warner, of Napanee left Tuesday, on a business trip to Providence, R. I.

Dr. G. E. Eakins, of Napanee, left on Tuesday, for Toronto and Fort William.

Miss Edith Hooper, daughter of Mr. C. A. Hooper, of Lindsay, is spending a week with friends in Napanee, on her way home from Montreal.

Master Gray Eakins, of Napanee, went to Glen Island, Saturday, to spend a few days with his mother.

THE NORTHWAY GARMENTS hold first place, and are all sold under a positive guarantee to give entire satisfaction in every way. Raincoats, Top Skirts, Under Skirts, Underwear of all kinds, Silk Blouses, Wrappers—Large variety and unsurpassed values.

## In the DRESS GOODS DEPARTMENT!

### OLD GLORY.

Story of the Stars and Stripes on the American Flag.

The design for the American flag, with thirteen stripes of alternate red and white and thirteen white stars in a blue field, representing the thirteen states struggling for independence, was adopted by the Continental congress on June 14, 1777, a little less than a year after the declaration of independence. The first flag of this design was made as a specimen for the congress by Betsy Ross, a dress-maker, of Philadelphia. It is supposed that this flag was first unfurled by Paul Jones on the Ranger, a vessel of the navy to which he had been assigned on the day that the resolution adopting the design was passed. The thirteen stars of the flag of 1777 were arranged in a circle, though no form was prescribed officially. This flag remained unchanged until 1794, and then, on motion of Senator Bradley of Vermont, which, with Kentucky, had been admitted to the Union, it was resolved that from and after May 1, 1795, "the flag of the United States be fifteen stripes, alternate red and white; that the union be fifteen stars, white in a blue field." This was the flag used in the war of 1812. The act made no provision for future alterations in the flag, and none was made until 1818. Upon the suggestion of Captain Samuel C. Reid of the navy a bill was passed on April 4, 1818, reducing the number of stripes in the flag to the original thirteen and making the number of stars equal to the number of states. The new star for a new state is not added to the flag until the Fourth of July following the admission of the new state.—St. Louis Republic.

### CROSSING SAHARA.

The Costliness of Caravans and the Mortality of Camels.

The merchants who fit out a garfa (caravan) must stand all losses; consequently great care is given to the selection of both the camels which carry the valuable merchandise and the men who accompany them. The tall and swift riding camel known as the mehari is seldom met with in northern Tripoli. The finest male draft camels, the Jamal, costing from \$50 to \$60 apiece, with a carrying capacity of about three hundredweight, are used for transport. From consumption or the effects of the long strain scores often die by the way and many others at the end of the "voyage." The wages of the men for conducting a return cargo are sometimes as high as \$5,000. Not only must the garfa sheiks have great courage and endurance, but must be trustworthy traders and shrewd diplomats of no small caliber. Many of the sultans and chiefs, particularly the Touaregs, through whose territories lie the garfa routes, exact not only homage, but tribute, from the garfa sheiks. To bring this tribute within a reasonable sum and secure a safe conduct requires extraordinary skill and tact. The opportunities for dishonesty afforded the garfa men are many, and occa-

A specialist in Book-keeping, who is also an expert penman, and a specialist in Shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the college is a guarantee of thoroughness.

Catalogue with specimen of penmanship free. Address PRINCIPAL DYER, D. D., Belleville, Ontario.

The Carpenters' strike at Toronto is settled.

Fire in a ship supply warehouse at Buffalo caused a loss of \$75,000 and the death of Capt. Jas. Robinson, a veteran lake captain, and Chas. Johnson, a sail-maker.

Threshers supplies—mills, strong leather Belting, machine oil.  
MADOLE & WILSON

Kingston, Aug. 12—Application is being made to the Attorney-General by Chief of Police White of Perth for a fiat to take Bedore from Kingston Penitentiary to Sharbot Lake to make good his statements in connection with the death of the two Sharbot Lake lads four years ago. Bedore, who is serving fourteen years for shooting at and robbing a Syrian peddler, says the lads were not drowned, as thought, but that his brother slew them, and he knows where they are buried.

the garra routes, exact not only homage, but tribute, from the garra shoiks. To bring this tribute within a reasonable sum and secure a safe conduct requires extraordinary skill and tact. The opportunities for dishonesty afforded the garra men are many, and occasionally men and goods are never heard from again.—Charles Wellington Furlong in Harper's Magazine.

### Dentists as Patients.

"Two of the most troublesome patients I have are members of my own profession," said a dentist in discussing the tortures of teeth. "Strange to say," he continued, "many dentists, whether from natural defects or early negligence, have exceedingly poor teeth, and as no practitioner can attend to his own exchange services. If any of the patients of these two capable D. D. S.'s are revengeful of disposition it would do them good to see them in the chair. All men are much more difficult subjects for dentistry than women, according to my own experience, but the way the two in question wriggle, writhe, groan and cuss under the ordinary operations should be most gratifying to any one who has suffered at their hands."—New York Press.

### Rain Insect Oil.

In certain parts of India the oil extracted from a species of mite is used in medicine as an external counterirritant. The creature is about half an inch long and on pressure exudes an oil of a deep red color. It is only found for a few weeks at the beginning of the rainy season and is, hence, known as the rain insect. E. G. Hill contributes a note on the chemical composition of this oil to the Journal and Proceedings of the Asiatic Society. He concludes that the supposed medical virtues of the oil are imaginary and due probably to its red color.

### The Benefit of It.

Widow's Daughter—Mother, why do you tell people that I am only eighteen when you know I am twenty-four? Widow—Because eighteen's six years younger than twenty-four. Daughter—Yes, I know, but surely I do not need the benefit of those six years at my age, do I? Widow—Not at all, my child, but I do.—London Telegraph.

### Whims of Ibsen.

Like many another man great in his writings, Henrik Ibsen was not without his fancies. Scorning company as he professed to do and declaring always for solitude, he nevertheless delighted to be dinel, and to invite him to a banquet in his own especial honor was to give the great man unalloyed pleasure. In his latter days, too, he developed a passion for decorations, of which he received a large number from his own and foreign monarchs, and on public occasions he would wear all his insignia as probably the most decorated author in the world. It was on public occasions that Ibsen would carry a small mirror and comb in the crown of his hat, and "coram populo" would proceed to arrange his bushy hair and whiskers.

Smith's Jewellery Store,  
Napanea.

### WEDDING AT ENTERPRISE.

There was quite a gala day in Enterprise, Wednesday, the event being the marriage of W. Guy Fenwick, merchant and miller, and son of William S. Fenwick, to Miss Lillian A. Wilson, the only daughter of Thomas Wilson, a wealthy farmer just outside the village. The lucky couple are most popular, and the whole neighborhood took a keen interest in the wedding. The groom is churchwarden and the bride organist of St. John's church, which had been most elaborately decorated for the occasion. The ceremony took place at 1.30 p.m.

The church was more than filled with guests. Miss Laura M. Wilson presided at the organ and the choir sang "The Voice That Breathed O'er Eden." Rev. Mr. Jones officiated.

The bride looked sweetly pretty in white silk and carried a prayer book instead of the usual bouquet. Miss A. Rombough was bridesmaid, and George Fenwick, groomsmen. The bride was given away by her only brother, John Lewis Wilson.

After the ceremony the wedding party proceeded to the bride's home, where an elegant breakfast was duly honored, accompanied by the usual toasts.

The Citizen's Band discoursed music on the lawn during the afternoon. The happy couple took the evening train for Toronto. When they return they will reside in Enterprise.

The wedding presents were useful, numerous and costly, one being a dozen solid silver spoons, a gift from the choir and friends. It is a long time since a more popular wedding occurred in this locality and every one wishes the bride and groom good luck.

### 1000 Per Cent Interest.

Is nothing compared to the preservation of one's eyesight. If your vision is at all impaired, do not neglect it. It will cost you nothing to have your eyes tested in the most scientific manner by a fully qualified optician at The Medical Hall—FRED L. HOOPER.

SERVANT GIRL WANTED—Apply at the Crown Bank.

SELECTED WHEAT LANDS IN WESTERN Canada near transcontinental railroad. Exceptional investments, absolutely safe and profitable. Full particulars on application. Denny & Pringle, Melita, Man. or Kenosha, Wis.

WANTED, by Chicago wholesale house, special representative (man or woman) for each province. Canada salary \$20.00 and expenses paid weekly. Expense money advanced. Business successful; position permanent. No investment required. Previous experience not essential to engaging. Address Manager, 132 Lake Street, Chicago, Ill., U.S.A.

PINE FARM FOR SALE—John M. Hawley offers for sale, his farm of 200 acres, situated at Hawley, 2nd concession, South Fredericksburg. This is one of the very best farms in the county, well drained and fenced, and free from foul seed. 160 acres under good cultivation, 10 acres woodland, 30 acres new land ready to stump. Good orchard, 4 splendid wells. Fine brick residence, lawn and shade trees. 2 large barns, tenant house, new poultry house, hog house, etc. Very convenient to church, school, post office and blacksmith shop. 8 miles from Napanea, 4 miles from Bath, and 3 miles from station. For further particulars enquire of JOHN M. HAWLEY.

## FOR SALE.

That desirable farm known as the Blanchard Farm, situated about one mile south of Napanea containing 240 acres more or less. Will be sold as a whole or in two parts. (1) The north part with the buildings contained 130 acres.

WED. E. ROBINSON, Ethel Robinson, Percy Shewell, Geneva Spafford, Pansy Spafford, Genevieve Taylor, Beatrice Watson, Jennie Whelan, Lizzie Winters, Lena Lowery, Thomas Evans.

Provisional—Morley Conway, Ross Dougan, Bruce Fairbairn, Ruby LeRoy, Leighton Shorey.

Promotion to Form III B of the Middle School.

Jennie Brandon, Teresa Boyce, Pearl McGill, Timothy Pomeroy, John Perry, Day Spafford, Olive Salisbury, Maude Salisbury, Olive Switzer, Fred Sharpe, William Skinner, Archie Wilson, Pearl Wood, Okel Youmans, Gertie Wesse, Eddie Miller, Harold Spafford, Clayton Kehoe, George Paul.

Provisional—Arthur Emberley, Arthur Hanes, Florence McGill, Grace Patterson, George Shorey, Percy Nesbit, Helen Finkle.

Promotion to Form III B, of the Middle School to III A.

McG Aylesworth, Edna Bicknell, Maude Bowyer, Gertie Conway, Ruby Flynn, Olive Galbraith, Mot Hinch, Carl Hawley, Lizzie Hawley, Jessie Leslie, Bernard McCaul, Ethel Mears, Gertie Nesbit, Ruth Patterson, Jean Riley, Frank Ryan, Mary Warner, Tillie Wagar, Alvin Warlman, Frank Clancy.

Provisional—Mata Vanest, Katie Finn, Edna Amey.

#### DEPARTMENTAL EXAMS.

Junior Teachers—Percell Amey, Herbert Cameron (honore), Harry Martin (honore), Wm. Vernon Paul, Fraser Paul, James Pomeroy, Wm. C. Quinn, Alma Vanseltine, Jessie H. Wilson, Florence Youmans.

Matriculation—Herbert Cameron, Harry Martin.

Partial Matriculation—Harold Spafford (4 subs), Edward Miller (4 subs), Vrooman Bradshaw (3 subs), Frank Clancy (4 subs), Clayton Kehoe (3 subs), George Paul, Helen Finkle, Percy L. Nesbit.

#### CUT THIS OUT.

The thoroughness of the training at the "Picton Business College" may be judged by the fact that one year ago, three young ladies, who had not passed the entrance examination to the High School, entered College and at the end of the twelvemonth, two were placed in Toronto at salaries of \$416 and \$520 respectively, while the third was placed in Peterboro at \$780 per annum. Another young lady whom we placed in a position one year ago at \$780 is now drawing a salary of \$900 per annum. We also sent a young lady of 12 years to Toronto, at a salary of \$620 while a telephone message from Port Hope, a few days ago, took one of our young lady undergraduates to a position in that town at a salary of \$920.

No other College in Canada can produce such a favorable history as the above, while with us these things are common occurrences and but a few cases mentioned. For further information address

JNO. R. SAYERS,  
Principal and Proprietor.

#### ARDEN.

The weather continues very dry, and farmers are busy harvesting the grain and hay.

On Sunday afternoon a parade of Orangemen and 'Prentice Boys took place from the lodge room to St. Paul's Anglican church, when Rev. Mr. Fenton preached an eloquent sermon, from the text, "I came not to bring peace, but a sword." The discourse was listened to with rapt attention by a crowded congregation.

Yesterday, the anniversary of the closing of the gates of Derry, was commemorated by the meeting of the lodges and a public dinner was prepared in a large tent. The proceeds, which amounted to over one hundred dollars was for the benefit of the English church building fund.

The Messrs. Ostrom, from Montreal, are camping on the Osborne farm, on the border of Great Clear Lake.

The village was full of visitors from Tamworth and surrounding localities.

R. C. E. Prager was presented with a silver cup by the Canadian Government.

The Government have ordered from the Kingston Locomotive Works two narrow gauge, ten-wheeled passenger locomotives for the Prince Edward Island road.

Mr. M. F. Rittenhouse's gift of land for a Provincial fruit farm in the Niagara district was formally accepted by Hon. Nelson Monteith, on behalf of the Government.

Picton, Aug. 11.—On Friday evening an enthusiastic meeting of the congregation of St. Mary Magdalene's Anglican Church of Picton was held at the parish house, the occasion being an informal reception and presentation tendered to Rev. Mr. Armitage and his bride on their return from their honeymoon. An address was presented by the church wardens on behalf of the congregation, accompanied by a beautiful and massive cabinet of silver. Mr. Armitage made a touching reply on behalf of himself and Mrs. Armitage. The choir also presented an address and suitable souvenir.

**Use Prism Brand Four Enamel**  
It dries quickly, has a varnish gloss, and is true to color. The Medical Hall.—Fred L. Hooper, sole agent for Napanee.

#### LAPUMS WEST.

Mr. Chas. Joyner, and family, of Sydenham, has rented and moved on to Mr. J. Irish's Farm here which was recently vacated by Mr. S. Rikely.

This has been an ideal harvest so far. Cutting will be about finished here this week.

Mr. A. E. Warrenner, who has been with J. A. Simpkins, this summer intends taking in one of the Excursions to Manitoba soon.

A number from here took in the concert at Colebrook on Tuesday night.

Sunday visitors: Mr. and Mrs. E. Snider, Wilton, and Mr. and Mrs. M. Love, at Wilkie Pringle's; Mr. and Mrs. Almond Brown, Wilton, at Stanley Brown's; Mr. and Mrs. Sperry Shibley, Wilton, at Robert Reid's; Mr. and Mrs. Lewis Hartman, Thorpe, Mr. and Mrs. Wm Pringle at B. Rose's; Mr. and Mrs. Frank Wallace, of Yarker, at Charles Joyner's;

Will Brown, Desmond, at his home here.

Mr. Wm. Lapum, has returned home after spending most of the summer at L. Salisbury's, Bethel.

The Misses Henzy, Kingston, and the Misses Amey, Orillia, were on Tuesday last, guests of their cousin, Wm. Lapum.

Mrs. F. E. Brown, accompanied by Mrs. Cyrus Bush, paid a visit on Thursday to the Iximestone City, Miss Mabel Stover, Wilton, was on Sunday guest of Miss Carrie Brown.

Mr. and Mrs. Sandford Vandewater have gone to Verona, where Mr. Vandewater will open a photograph gallery. Cyrus Bush is convalescent, after his serious illness.

William Lapum is spending this week with his aunt, Mrs. Hartman Snider, Maple Lane.

There will be no service in the school-house on Wednesday evening of next week on account of the convention at Yarker.

Henry Bush is spending a couple of weeks with friends at Switzerville.

Mrs. Huster and children, are at Mrs. James Huff's; Mr. and Mrs. Hiram Walker with Mr. and Mrs. Wilbur Love; William Sewersby, and Milton Royce, Murvale, Mr. and Mrs. Wm. Pringle with Mr. and Mrs. B. Rose.

#### KEEP THE FLIES OFF FOR 25c.

A 25 Cent Bottle will make a gallon and a quart of the Fly Mixture. This preparation is used exclusively in the stables at the Toronto Exhibition grounds. The name is *Scabietin* and is the best thing known of for the purpose. Sold at the Red Cross Drug Store.

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXVI.

Everything now seemed to be about ready for the opening of the campaign. One thing only remained.

This concerned the disposal of their suspicions in connection with the guide.

The fact that Lord Rackett did not consider his prejudice without some foundation gave Larry additional strength, and caused him to press the question to a speedy settlement.

As a consequence he suddenly confronted the Mongolian in a dramatic manner, hoping to catch him unawares, and abruptly said:

"Fancy our meeting again."

The heathen Chinese, taken off his guard for once, could not refrain from showing plain signs of perturbation, and Larry chose to look upon his attitude as most highly significant.

If treachery was back of it, better that they should meet the trouble here at the start, where it could be controlled, than later on, when dangers surrounded them.

One experience of this latter sort had been quite enough for the little man.

Larry had learned to act promptly when an emergency threatened; no one could bask in the company of Dr. Jack for any length of time and do otherwise.

He believed he had the fellow on the run, and hastened to get in another blow.

"It's an odd freak that brings us together once more, my good fellow. Suppose you let me have a fair and square look at your face. In such an undertaking as this one wishes to be quite certain of his friends, you know." His intention was evident.

Indeed, if the words he uttered had failed, his belligerent attitude would have proclaimed the fact that he meant to enforce his demand.

The Chinaman seemed to hesitate, and Plympton moved a little nearer, not knowing but that there might be need of his strong arm.

He had seen a native, when cornered, strike out with a murderous knife, and Larry offered a tempting bait to any one thus inclined.

It was quite a dramatic picture.

Avis held her breath, awaiting developments, and only vaguely comprehending what it all meant, beyond the evident fact that some trouble had come upon the carpet before they were even well started on their enterprise.

This element of uncertainty only lasted for a brief minute.

The Chinese guide seemed to understand that further secrecy was out of the question; doubtless he realized that it was folly for any man to think of rubbing wits with a fellow of Larry's accomplishments; others had tried the same thing in the past and made a failure.

At any rate, he suddenly turned his face toward Larry, and one of his arms, encased in the flowing sleeve of his Chinese garment, went up in the endeavor to remove his hat; for in colder Peking the natives adopt a headgear such as is seldom seen in the more tropical regions of Southern China.

Larry stood on his tiptoes, the better to see, such was his great eagerness.

Lord Rackett's muscles were set for action, and he drew a long breath.

awake sentries stood touching elbows upon the ramparts?

So Larry's heart beat high with new hopes, and his courage surged upward in mighty bounds.

He even allowed himself to indulge in rash dreams for the moment, and fancied he could see Avis in the loving arms of one who was, as it were, resurrected from the dead, for, indeed, the person whom misfortune incarcerated in a Chinese prison might well consider himself as good as dead.

This was only transitory—then Larry resolutely thrust all such visions out of his head and gave heed to the condition that confronted them.

Their guide considered it worth his while to go over their disguises one by one, adding a little here, and arranging a garment so that it might appear more in harmony with the style of dress worn by those whom they might meet beyond the walls.

He must restrain his exuberance and act the part assigned him.

Who could blame him if his thoughts wandered back enviously to the occasion in Canton when he rode in such style from Kai Wang's abode to the foreign quarter at Shamen, the obsequious crowds bowing and salaaming on all sides, as though he were a prince of the royal blood and carried the peacock feather of authority.

That was an event he could never forget, although its companion picture, when he was fleeing through the streets in the guise of a native priest, must have aroused emotions of a different order.

Everything being now in evidence, there seemed to be no reason why an immediate advance should not be made.

Larry sought the side of his cousin, perhaps with the vague idea that his presence might give her additional courage; but Avis had summoned her reserve stock of nerve to the fore, and was in no need of assistance in any guise.

Indeed, when the supreme test came, and they were compelled to face danger, perhaps death, she might even be in a position to sustain Larry with brave words of hope and courage.

It had happened on a previous occasion, years before, and there was no reason to believe her nature had undergone any radical change in the time that had elapsed.

When the massive gates in the walls of the Purple City were closed, and the sentries stood thickly upon the walls above the moats, it would seem utterly impossible for anyone to enter or leave the place without the knowledge and permission of those faithful guardians, unless they possessed wings, and were able to soar above the domes and minarets of palace and pagoda.

There was one route, however, over which the authorities had no control.

Kai Wang managed it for his exclusive benefit.

Perhaps in times past it had allowed the entrance of such an illustrious pilgrim as the great Li Hung Chang himself, desirous of a secret interview with the prisoner-emperor.

If so, then the same Li Hung Chang had his eyes bandaged, like all the rest, for this was a rule that could not be broken.

Larry knew what was coming—Larry, who had been through the mill before—and he warned his friends with

army. At the same time the old reliance in the efficiency of the ugly demons is still rampant throughout their civil institutions, and maintains a firm hold upon the soldiers from the interior provinces.

Thus many of those whose duties took them to Peking to guard the palaces of royalty had brought their convictions with them, and it may be readily assumed that, were a foreigner allowed a chance to snap his camera within the confines of the Sacred City, he would secure some amazing pictures, illustrating Chinese ideas of what a doughty warrior should look like in order to strike terror to the hearts of his enemies.

Toward the general run of these chaps, Lord Rackett felt only contempt. Their ancient methods of fighting were hardly in line with modern quick-firing guns; and, should fortune throw them into a contest with the heathen he would have but little doubt as to the issue.

There was one class, however, of whom he stood in some awe, or, rather, for whom he entertained a fair share of respect.

These were the peculiar, tall, muscular mountaineers from the far South—the men who wore no queue, their thick black hair being bunched at the back of their heads under the odd covering of rice-straw thatch, and who had become famous as the Black Flags when Chinese Gordon, of Khartoum fame, led the imperial forces against them in the Gaping rebellion.

These were the natural fighters of the whole empire—the men who, living amid the mountain crags, imbibed the spirit of liberty from the clear air of those lofty retreats, and refused to be slaves.

The French in Tongking could not conquer them; and other foreign nations will, in time to come, have an opportunity to test their mettle in comparison with Afghan tribes or natives of the Philippines.

(To be continued.)

## FEATS OF THE BEAVER

### THEIR ABILITY TO CUT TIMBER AND HANDLE IT.

#### Busiest on Moonlight Nights — Sometimes Repairs a Dam in the Daytime.

It is wonderful what large pieces of wood a beaver will move, says a writer in Outdoor Life. I have frequently seen cuttings of cottonwood large enough for fence posts that had been moved over level ground and through underbrush to water several hundred feet away.

If timber is cut on a bank where a down grade can be had all the way to the streams much larger pieces will be moved. Beavers are very skillful wood choppers and seldom fail to fell a tree in the right direction; that is, with the butts all pointing toward the trail to the stream, and never felling the top of one into the top of another.

Smooth trails are always made from the scene of the operations on land to the water and all of the material is carried over them. If the cutting happens to be on a slide hill above the stream a slide not unlike that sometimes used by lumbermen will be made.

The cutting of the large growth stuff is mainly done in the fall and winter; willows, small poplars and cottonwoods being used.

#### IN THE SPRING AND SUMMER.

After getting down the larger trees the branches are all cut off and made into lengths suitable for transporting and taken to the water, after which the trunk is cut up and as much of it removed as possible.

The bark of these pieces, which with the twigs forms the principal item of food, is all enaved off in the water or

## CHAMBERLAIN'S SUCCESS

### BRIGHT SKETCH OF LIFE OF IMPERIAL STATESMAN.

He Is Always Popular With the Masses — Called the "Mad Mayor of Birmingham."

The London Daily Mail, in a sympathetic review of Mr. Chamberlain's career, says:

The bare outline of Mr. Chamberlain's connection with Birmingham is known to everyone; first, as a youth of 18, then as a successful manufacturer, a social reformer, a prominent educationist, a municipal crusader, and lastly, for 30 years, its political representative. For if you ask any Birmingham man who is his member, he will certainly tell you "Chamberlain," though in reality he only represents one-seventh of the city.

Mr. Chamberlain did not come to Birmingham a full-grown politician, soliciting its suffrages, but a mere lad, who shared in its great fight for the franchise, free speech, and education. He trained his own powers in a debating club so Radical that the honorary secretary proposed they should spend their surplus funds "in buying a Tory" to oppose them in debate! The triumphs of Birmingham were his triumphs, her miseries his own burden. In night school and Sunday school, in a mission in the poorest part of the town, in the public house political meeting, among elections and would-be electors, always maintaining his friendly relations, in spite of his ineradicable delight in satirising and "chaffing" his opponents, in the club which he started for his own workmen; in a hundred ways, he was preparing for his position as the friend and leader of the people of Birmingham. He was learning his lesson, that though no remedy could be found for every evil, there was plenty for every man to do who wished to leave the world a little better than he found it.

#### FRIEND OF WORKMEN.

The workmen were his personal friends. One of them says: "I used to follow him round the town to learn politics; I was fair smitten with him; we was fascinating in his speaking, his wit was natural, and what a common-sense he's got with him! It was a treat to see him come into a public house meeting, as smart as could be, velvet coat, red tie drawn through a ring, with his eyeglass, too; smooth face, smooth hair, trim, set up, looking like a boy; just a wax figure he looked. You'd never think there could be any brains under that dandy get up, not till you heard him speak."

"Chamberlain went for the gas and water for the town, and he got them, too. . . . It was the landlords as was furious with him—they were a nice set, and he had his work cut out for him. The state of the property was awful; there was a place built up agen us, back of our yard, and the sewage drained right down into our well, and we were drinking it! I told them I weren't going to pay my rent till it was put right, and I didn't. And says I to myself, 'If the worst comes to the worst, 'll appeal to Chamberlain, and he'll see me righted. It was him and his congress put me up to it.' Saturday lectures and a congress were arranged for at this time by Mr. Chamberlain, but the official inspection of unsanitary tenements was greatly resented by the landlords. When he got a letter addressed to 'The Mad Mayor of Birmingham,' backed up by a lot of addle-headed councillors, who sent spies as sanitary inspectors into a man's house, he smiled, and reminded the public that '2d. on the Improvement (Scheme) Rate was a gigantic and tangible fact!'

#### TOWN PROUD OF HIM.

And the town was immensely proud of him. Proud of being "the best governed city in the world," proud of the

to remove his hat; for in colder climates, a desire of a secret and the prisoner-emperor.

If so, then the same Li Hung Chang had his eyes bandaged, like all the rest, for this was a rule that could not be broken.

Larry knew what was coming—Larry, who had been through the mill before—and he warned his friends with regard to what they might expect, so that neither Plympton nor Avis were surprised when the guide blandly gave notice that the time had come to press a soft bandage over the eyes of each.

They had passed through a portion of the native quarter and entered a modest native dwelling that reared its thatched roof in the shadow of the wall surrounding the inclosure.

Blindfolded, they took hold of one another's hand, and allowed Kai Wang to lead the way.

Lord Rackett knew readily enough that they were passing through some sort of underground passage, and he smiled at the idea of the authorities believing they could keep strangers beyond the limits of their mystic city.

Presently they stumbled up some stairs, and again felt the refreshing night air as their bandages were discarded, while Kai Wang solemnly declared:

"Excellencies, you are now within the walls of the royal Forbidden City."

#### CHAPTER XXVIII.

The information was just what they expected, still it thrilled them to hear it.

When the Rubicon has been crossed, when their boats or bridges have been burned behind them, men are apt to feel a brief sensation of awe at the very desperate task to which they have pledged their fortunes and their lives, and then comes a stern resolution to conquer or fall.

They had defied the edict of the Chinese authorities that no foreigner should set foot within the territory covered by these walls.

Thus far had they come.

Presently they would see.

As to whether they might add the third chapter to Alexander's laconic message, and conquer, it remained to be proven.

If an earnest prayer from a woman's trusting heart could have any influence upon the status of affairs, their chances were good.

Kai Wang took advantage of this last opportunity to impress several things upon their notice.

These were points that were bound to have a distinct bearing upon the game that called for their attention.

Then he spoke of weapons.

He would be sorry if they were brought to a point where armed resistance must be shown, knowing what a stir such an event was apt to make in the royal neighborhood, but their previous experience had been a lesson that must warn them to omit no means that might add to the success of their venture.

The showing was all right.

Lord Rackett had seen to this, with the result that both himself and his comrades were literally walking arsenals.

When Kai Wang saw the martial display his eyes almost popped out of his head, and he held up both hands in dismay at the possible slaughter that must follow any attempt to interfere with their purpose in the Forbidden City.

All the same, he was secretly pleased, for his sympathies ran not in the line of those ferocious Black Flags and other fighters from various parts of the empire between Tongking and Mongolia, Kansuh and the sea, who had been brought to Peking in order to guard the imperial city against domestic, rather than foreign foes.

It appears to be one of the tenets of Chinese belief that battles are won chiefly by noise and the exhibition of monstrous ugly demons along the firing line.

True, the war with Japan knocked a little sense into some of these Chinese, and there has been a great improvement since in the personnel of their

After getting down the larger trees the branches are all cut off and made into lengths suitable for transporting and taken to the water, after which the trunk is cut up and as much of it removed as possible.

The bark of these pieces, which with the twigs forms the principal item of food, is all gnawed off in the water or at the houses. The barked sticks are then used in repairing or strengthening the dams or stacked on top of the house.

Beavers generally work on moonlight nights only, and scarcely ever in the daytime, though they may sometimes be seen making repairs on a dam when it needs immediate attention.

Contrary to the general opinion the beaver does not always build a house for himself, being content very often with a burrow in the bank of the stream. As is the case with the houses the entrance to a burrow is under water, though sometimes there is an opening from the surface through which brush and sticks are carried for their food supply.

These burrows are sometimes very commodious and offer comfortable quarters for a large colony. They seem to be generally dug from the banks of a stream which is too swift to make the building of dams easy and which has a deep channel. A lone beaver who has been driven out by his fellows for some cause or other is very likely to make such a home.

#### IN THE BANK OF A STREAM.

When a colony of beaver is harassed by its enemies or when internal dissensions arise a part or the whole of the colony will establish a new home some distance away. They lose no time in choosing a weak portion of the river, where the banks are well wooded, and fall at once to work.

Where the river is rapid one of the slow reaches between the rapids is chosen for a dam. The wood is cut above the damsite, sometimes at quite a distance, and transported to the water, where it can be easily moved down stream.

The sticks are placed more or less parallel to each other, so as to make a compact structure, and the continuous pile thus resulting extends directly across the stream.

Mud is continually used to fill the interstices as the dam grows in height. At some distance up stream the house is now built, also of sticks and mud, in as secluded and inaccessible a place as possible.

#### PASTE IN YOUR HAT.

I will find a way or make one.  
I will spend as much time as I can outdoors.

I will not be simply good. I will be good for something.

My every action shall tend to some point, and be perfect in its kind.

I will bear in mind that fame at the cost of honor is dearly bought.

I will not stand and cry; I will press forward and remove the difficulty.

I will remember that very few men have as many faults as their friends accuse them of.

I will remember that there is only one real failure in life possible, and that is not to be true to the best one knows.

After getting down the larger trees the branches are all cut off and made into lengths suitable for transporting and taken to the water, after which the trunk is cut up and as much of it removed as possible.

#### TOWN PROUD OF HIM.

And the town was immensely proud of him. Proud of being "the best governed city in the world," proud of the fine art gallery, and his own munificent contributions to it; the council house, the new parks, the rebuilding of the free libraries after their destruction by fire. On that occasion to the lament, "What shall we do now?" Mr. Chamberlain replied, "Do! Build a bigger and better one than before!" And within two days he went to the Rebuilding Committee with a long list of subscribers in his hand.

The Grammar School also interested him. Once when on a visit of inspection with other governors, a small lad in the gallery, looking down on these grave gentlemen, aimed with much dexterity a paper dart at one of them. Mr. Chamberlain, interviewing the small culprit in the headmaster's room, patted the curly head and read him a little lecture on thoughtlessness, then, reminding Mr. Vardy that "we all were boys once," obtained a very light sentence of punishment. That little lad, much impressed and very grateful, has now, after seventeen years of colonial life, founded a branch of the Tariff Reform League, and was a delegate to the Chamberlain celebration.

#### A LEADER WHO LEADS.

He believes in "a leader who leads; it is his business to educate his party," says Mr. Chamberlain; "but to do it sympathetically, not with contempt." It was on this point that one of his ward committees said:

"After the meeting is over we generally get round him and have a bit of a chat; he's very free when business is done. Sometimes we ask him for the orchid he's been wearing, and once I remember one of our men was very disappointed he did not get it, so Mr. Chamberlain made it up to him somehow—I forget what he sent, but it was flowers or cigars, I think?"

"How should I not love Birmingham?" he said to those who were bidding him God-speed on his African journey. "Here is my home, here is my family life, and no man owes more thanks than I do for the blessings of a family life. Here have I been happy, here also I have, sorrowed; and through good and evil, through all the vicissitudes of my career, the sympathies and the good-will of the people have followed me, and have bound me by links of steel and by the share which they have had in the precious memories of my life."

#### MATERIAL FOR A MAN.

German scientists announce that the material for a man weighing 150 pounds can be found in the whites and yolks of 1,200 hens' eggs. Reduced to a fluid, the average man would yield ninety-eight cubic metres of illuminating gas and hydrogen enough to fill a balloon capable of lifting 155 pounds. The normal human body has in it the iron needed to make seven large nails, the fat for fourteen pounds of candles, the carbon for sixty-four gross of crayons and phosphorous enough for 820,000 matches. Out of it can be obtained, besides, twenty coffeepoons of salt, fifty lumps of sugar and forty-two litres of water.

#### RAINFALL AND TREE GROWTH.

A report has recently been published which shows how closely the growth of trees is dependent upon rainfall. Not only was this seen in the case of one and two year old trees, but in an investigation extending over a period of twelve years, during which time the annual rings of growth were carefully examined. With an annual precipitation of from thirty to thirty-five inches a width of ring was produced varying from eleven to fifteen inches. If, on the other hand, there was either an unusually large or small rainfall in any given year this was followed by a corresponding tree growth in the following year.

## SHATTERED NERVES.

Made Strong and Steady by Dr. Williams' Pink Pills.

When your nerves are out of order your whole health is on the verge of a break-down. Sudden sounds startle you; your muscles twitch and your hands tremble; your self-control is shattered; your will-power gone. Your head aches; your feet are often cold and your face flushed. Your heart jumps and thumps at the least excitement; you are restless at night and tired when you wake. Your temper is irritable and you feel utterly down-hearted. And the whole trouble is because your blood is too thin and watery to keep the nerves strong. There is only one way to have strong, healthy nerves — feed them with the rich, red blood that only Dr. Williams' Pink Pills can make — and do make. Mr. Fred Forth, 17 Sullivan street, Toronto, says:—"I was a complete wreck with nervous prostration, but Dr. Williams' Pink Pills have made a new man of me. I had been nervous for years; the least noise would startle me, and the least exertion would leave me utterly prostrated. I lost in weight, and physically I was almost a wreck. I had not taken the pills long when I found they were helping me; my appetite improved, my nerves began to grow steady, and day by day I gained until I was again a well man. My weight increased twenty-five pounds while I was using the pills. To any who suffer as I did, I can say that if Dr. Williams' Pink Pills are given a fair trial, a cure will be sure to follow."

Dr. Williams' Pink Pills restored Mr. Forth, simply because they made the rich, pure blood which properly nourishes the nerves and keeps them strong. They will cure all the diseases due to bad blood and shattered nerves, such as anaemia, indigestion, headaches and backaches, rheumatism, lumbago, St. Vitus dance, paralysis, general weakness and the secret ailments of growing girls and women. But you must always insist on getting the genuine pills with the full name Dr. Williams' Pink Pills for Pale People on the wrapper around each box. Sold by medicine dealers or sent direct by mail at 50 cents a box, or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

## IN MERRY OLD ENGLAND

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

New Bibles with washable covers have been provided at the Middlesex Sessions for the use of those taking the oath.

More than £4,000 has been raised for the Ipswich Hospital during the last seven years by the working men of the town.

The Irish Unionist members subscribed to present Mr. Austen Chamberlain with a fine old Irish cup on the occasion of his wedding.

An anonymous gift of £1,000 has been received at Coutts' Bank for the Additional Curates Society's work of providing clergymen to serve in large and poor parishes.

More than 50,000 fleeces of wool were "pitched" at Andover Fair last week, when prices ruled 2d. per pound higher than last year, the highest being 13d. per pound.

Exports from Bradford to the United States during the first six months of this year amounted to £1,773,263, being a decrease of £26,908 compared with the first half of last year.

Northumberland miners on Saturday received an advance in wages of 3%

## ODD CARGO IN STEAMER.

A ton of dead flies was the strange cargo a vessel from Brazil unloaded at the London Docks recently. Dead flies are admirable food for chickens, birds in captivity and captive fishes. The River Amazon abounds with flies. Brazilians float down the stream in boats and scoop in millions of the flies which circle in dense clouds just above the water's edge. The flies are killed, dried thoroughly in the sun and packed in bags. They are then shipped. Dead flies constitute one of the richest foods for animals. For chickens the flies are mixed with other ingredients, such as millet and corn. By themselves the flies are too rich, but their power of nourishment is so great that a small quantity of them has a most beneficial effect. Two years ago the Brazilian Government stopped the exportation, being afraid that the fish in the rivers would suffer by being deprived of this fly food. But the prohibition has been removed. Formerly dead flies sold at ten cents a pound, but the demand has grown and the supply so lessened that thirty cents a pound is now charged.

The World is Full of Pains. — The aches and pains that afflict humanity are many and constant, arising from a multitude of indistinguishable causes, but in the main owing to man's negligence in taking care of his health. Dr. Thomas' Electric Oil was the outcome of a universal cry for some specific which would speedily relieve pain, and it has filled its mission to a remarkable degree.

## THIS ELOQUENCE.

Mrs. Littlewit (proudly): "Only just think, Charles has gone to address a public gathering."

Friend: "I didn't think he was a speechmaker."

Mrs. Littlewit: "Nor I, but he has been called to make a statement before a meeting of creditors."

## THE WORST KIND.

After Piles have existed for a time the suffering is intense—pain, aching, throbbing, tumors form, filled to bursting with black blood.

This is when Dr. Leonhardt's Hem-Roid the only absolute Pile cure, brings the results that has made its fame.

Hem-Roid will cure the most stubborn case in existence and a bodily guarantee to that effect goes with each package.

\$1.00. All dealers, or The Wilson-Fyle Co., limited, Niagara Falls, Ont.

## RESERVED SEAT.

Over-dressed youth (to street car conductor): "Is that Noah's ark full yet?" Conductor: "Yes, all but the ass. Jump in."

Dr. J. D. Kellogg's Dysentery Cordial is a speedy cure for dysentery, diarrhoea, cholera, summer complaint, sea sickness and complaints incidental to children teething. It gives immediate relief to those suffering from the effects of indiscretion in eating unripe fruit, cucumbers, etc. It acts with wonderful rapidity and never fails to conquer the disease. No one need fear cholera if they have a bottle of this medicine convenient.

## HE WAS IT.

Mr. Misfit (savagely): "Before I married you was there any doddering idiot gone on you?"

Mrs. Misfit: "There was one."

Mr. Misfit: "I wish to goodness you'd married him."

Mrs. Misfit: "I did."

# LANDS

## In Western Canada

Two cornering sections, selected lands in Saskatchewan, only 8 miles from two railways, C.P.R. & G.T.P. Strong soil, 90 per cent. plough land, spring creek, no sloughs. About 40 miles N.E. of Indian Head. Price \$10.50 per acre. Write for map and full particulars.

R. PARSONS, 91 Wellesley Street, Toronto, Canada.

## YOUR DEBT TO DUST.

Although dust contains many of our deadliest enemies, it is also one of the best friends, for without it the world would be so dismal to live in. Rays of light cannot be seen. We only know where the rays are because the myriads of particles of dust in their path reflect the light. If there were no dust the sky would not be blue, there would be no raindrops, no snowflakes, no hailstones, no clouds, no gorgeous sunsets, no beautiful sunrises. The instant the sun passed out of sight we should be in darkness. The instant it rose it would be a sharp circle of light in a black sky. There would be no evening glow. The dome of the sky would be as dark as it is on a brilliant moonlight night. The moon and stars shine by day in all their brightness. The whole earth would be in a deep, dark shadow, excepting where the sun's rays fall directly upon it in one great blinding circle.

There is a world of difference between working for folks and working them.

Things do not work together for good to the man who will not work at all.

Many a man thinks he is humble because he walks with his nose in the gutter.

Like a bad habit a skin disease grows. Scrofu-

## PROOF.

Tramp: "I lived on the water once for six months."

Lady: "Well, I must say you don't look it."

Tramp: "I used to be a sailor."

It's easy to think you are standing for public liberty when private license is in your eye.

Mission Ointment & Chemical Co., Toronto, Canada.

Exports from Bradford to the United States during the first six months of this year amounted to \$1,773,263, being a decrease of £26,908 compared with the first half of last year.

Northumberland miners on Saturday received an advance in wages of 3½ per cent., in consequence of the recent strike in French mines, which has brought much extra business to the north.

American tourists and Americans keeping up establishments in England and France are Mr. Barton Hepburn, president of the Chase National Bank, declare, spending at least \$80,000,000 annually in Europe.

A handsome blue crane which the 16th (Queen's) Lancers brought from South Africa has had both its legs broken by a runaway horse at Colchester. It is being carefully attended by a veterinary surgeon.

In consequence of a question raised at a recent meeting of the Southport Corporation, the local police have now been forbidden to wear rings whilst on duty.

A record catch of 120,000 hake has been landed at Cardiff recently, while at Southport so many mackerel have been caught that they are being sold at eight a shilling.

The Prime Minister, in a reply to Mr. Field, states that he cannot see his way to act on the suggestion that members' correspondence from the House should be free.

Hen-pens in the Blackburn Union are being assessed for the relief of the poor, and thousands of workmen who keep fowls are affected by this taxation of their hobby.

As the result of a year of thrift, £16,000 has been collected through a Pleasant Sunday Afternoon Holiday Fund at Blackburn, and many of the members are about to start for a week in Paris.

When the annual holiday of the Great Western Railway Company's workmen at Swindon commenced on Saturday, many of the men took the opportunity of getting married and going on their honeymoons.

In the House of Commons on Monday Mr. W. Redmond brought in a bill, which was read a first time, to repeal the law which prohibits the growing of tobacco in Ireland.

### BRITISH WAR MEDALS.

Major-General Lord Chylesmore's collection of medals, which includes no fewer than eight Victoria Crosses and nearly 150 Waterloo and Crimean decorations, besides a number of Orders and other distinctions conferred by foreign Sovereigns on British subjects, has been re-arranged and placed on view in the museum of the Royal United Service Institution, Whitehall. There will also be shortly added to the museum a remarkable exhibit, consisting of a specimen of every war medal and clasp issued by the Royal Mint. The original dies are carefully preserved at Tower Hill, and the authorities are thus able to furnish the museum with 168 silver medals having 243 clasps, twelve bronze medals having ten clasps, and two bronze stars.

Happy is he who never knows when he gets the worst of it. Only two deaths occurred last month at Wanstead, Essex, which has a population of over twelve thousand.

### We like best to call SCOTT'S EMULSION

a food because it stands so emphatically for perfect nutrition. And yet in the matter of restoring appetite, of giving new strength to the tissues, especially to the nerves, its action is that of a medicine.

Send for free sample. SCOTT & BOWNE, Chemists, Toronto, Ont. See and \$1.00; all druggists.

The total imports of tea into Canada and the United States is about one hundred and ten million pounds per annum. One out of every fourteen pounds, both in Canada and the United States, is "SALADA" and this trade is growing very rapidly, and "SALADA" is as easily obtained now in such cities as New York, Chicago, Detroit, Boston, Pittsburgh, Buffalo, St. Louis, St. Paul, Minneapolis, Duluth, Cleveland, Rochester, &c., &c., &c., as it is in Toronto, Montreal, and throughout the Dominion.

### A ROLAND FOR AN OLIVER.

Papa: "See the spider, my boy, spinning his web. Is it not wonderful? Do you reflect that, try as he may, no man could spin that web?"

Johnny: "What of it? See me spin this top? Do you reflect that, try as he may, no spider could spin this top?"

Just the Thing That's Wanted.—A pill that acts upon the stomach and yet is so compounded that certain ingredients of it preserve their power to act upon the intestinal canals, so as to clear them of excreta, the retention of which cannot but be hurtful, was long looked for by the medical profession. It was found in Parmelee's Vegetable Pills, which are the result of much expert study, and are scientifically prepared as a laxative and an alternative in one.

### TIRED OF THE BATTLE.

"So you no longer call your pretty little home 'The Nutshell'? Why did you change it?"

"I got so tired of having funny men ring my bell to ask if the kernel was in."

If your children moan and are restless during sleep, coupled, when awake, with a loss of appetite, pale countenance, picking of the nose, etc., you may depend upon it that the primary cause of the trouble is worms. Mother Graves' worm Extremator effectually removes these pests, at once relieving the little sufferers.

### WOOD WAS USED FOR MONEY.

Wooden Cheques Were Used in England as Late as 1834.

Wooden cheques are the sort of thing one would expect to find used in China or Tibet, but, as a matter of fact, they were used in England from the earliest times down to as late as 1834.

Tallies, as they were called, were made out of a curved piece of hazel, notches being cut along the edges to stand for a certain sum of money; the tally was then sawn half through below the lowest notch, and the notched part split in two pieces, on both of which the notches appeared.

These pieces served as cheque and counterfoil, the latter being always the larger piece with the un-notched end as a kind of handle. The smaller piece was then taken by the payee, the larger sent to the person on whom the cheque was drawn—generally a collector of customs or other revenues, public or private. He would honor the cheque on finding that the two pieces fitted, and had the amount credited to him by the drawer on returning them together to him. Thus was the great danger and expense of transporting large sums in coin avoided.

Forgery of a tally was obviously impossible unless a new counterfoil could be substituted, and if stolen in the ordinary way it would be of little use to the thief, for, unlike our cheques, there was nothing to show on whom it was drawn.

There are still a good many tallies in existence, but the majority were burnt in the great fire, which destroyed the old Houses of Parliament; the remainder are chiefly to be found in the Public Record Office, and, no doubt, also in the muniment rooms of great land owners.

A political pull is the only thing that keeps some men out of jail.

working for folks and working them. Things do not work together for good to the man who will not work at all. Many a man thinks he is humble because he walks with his nose in the gutter.

Like a bad habit a skin disease grows. Scrofulous humors, eczema and all eruptions may be cured with Weaver's Cerate, assisted internally by Weaver's Syrup. All Druggists.

"Yes; we elected Mrs. Milyuns president of the club, thinking she would give us something handsome—" "And—" "Well, she gave us this portrait of herself."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Wife: "You don't seem to enjoy the dinner, dear. What's the matter?" Husband: "I was wondering if there were any typographical errors in that cookery book of yours."

Nothing looks more ugly than to see a person whose hands are covered over with warts. Why have these disfigurements on your person when a sure remover of all warts, corns, etc., can be found in Halloway's Corn Cure.

Mrs. Timid: "Did you ever find a man under the bed?" Mrs. Bluff: "Yes; the night we thought there were burglars in the house, I found my husband there."

More Iron Needed in the blood of pale, run down people. "Ferrovin," the best tonic, will put it there. At all general stores and Druggists.

"I think your son is improving a great deal, sir," said the professor. "He will certainly learn to play the piano." "Is that so?" said the fond parent, much gratified. "I didn't know whether he was really improving or whether I was merely getting used to it."

They Cleanse the System Thoroughly.—Parmelee's Vegetable Pills clear the stomach and bowels of bilious matter, cause the excretory vessels to throw off impurities from the blood into the bowels and expel the deleterious mass from the body. They do this without pain or inconvenience to the patient, who speedily realizes their good offices as soon as they begin to take effect. They have strong recommendations from all kinds of people.

Mistress: "Why, Bridget, at this rate my dishes won't last any time." Bridget: "Don't ye worry, ma'am; they'll last as long as I will, fur I'll be havin' ye the-morrow."

# MANY ACTS OF VIOLENCE

## The Story That Comes Daily From the Russian Empire.

### THEFT AND MURDER.

The London Times' correspondent cables from St. Petersburg as follows:—Telegrams from various parts of the empire published daily in the papers constitute a monotonous record of acts of violence. Wednesday's telegrams tell of robbery and murder north, south, east and west. In Charbin a telegraphist was robbed, his child killed and wife wounded. In Militopol passport forms were stolen, probably for use by local revolutionaries. In Ekaterinoslov, Tula and three other places money was stolen from the Government brandy shops. Agrarian riots naturally are not wanting. On Prince Kochubey's estate in Poltava province buildings were burnt down, and with them perished a quantity of valuable live stock. The buildings and estate of M. Lukyanoff near Poltava are now burning. In the province of Orel the rural guards arrested an agitator, and peasants who attempted to rescue the man killed one guard and wounded two. Bombs abound. In Gomel a bomb burst in a private apartment. Bombs have been discovered in Gomel, Yalta, Kaluga and Samara Roads. Firearms have been seized in Poltava and Theodosia daily. The record of murder tells of the assassination of Commandant Pyatigorsk in the garrison by an insane officer. A woodman was shot at Riga by a rural guard. A director of the prison was shot at Brestlitovsk. A lieutenant, policeman, a lady and a commissionaire were wounded in Warsaw. The peasant deputy from Kieff was beaten on his return home by peasants who were dissatisfied with his explanation of the dissolution of the Douma. Of arrests it is impossible to keep record. In St. Petersburg alone 150 persons were arrested on Tuesday. In the meantime the Black Hundred organizations are active. In St. Petersburg the hooligans are growing bolder, and the notorious Bishop of Saratoff incites the Orthodox to attack the revolutionaries. The Government is busily engaged devising repressive measures to secure the arrest of agitators in the rural districts and prevent the further demoralization of the army officials. The Government offices complain of lack of clear direction, and the conservative members of the Council of the Empire declare that repressive measures are futile, and that the empire is drifting steadily toward anarchy.

### BOMB HURLED INTO STATION.

A despatch from Sosnowice, Russian Poland, says: A bomb was thrown on Wednesday into a crowded waiting-room at the railway station. One man was killed and many were wounded. A panic ensued, resulting in injury to many other persons. Women fainted and children were trampled upon. The thrower of the bomb escaped.

### THE PEOPLE HELD RESPONSIBLE.

A despatch from Warsaw says: The terrorists are continually attacking and robbing post-offices. Government spirit shops, treasuries and the mails. The Governor-General has ordered that henceforth the inhabitants of villages, communities and cities in or near which such crimes occur shall pay the losses resulting from such robberies.

### WILL THE CZAR ABDICATE?

A despatch from Vienna says: It is rumored that it is the Czar's intention to abdicate. The recirculation of this report is ascribed to the reactionary Councilors violently opposing Premier

offered to Vice-Admiral Dubasoff, who was Governor-General of Moscow up to July 18, when he resigned on account of the condition of his health. He is still suffering from the effects of wounds received in Moscow on May 6, when a bomb was thrown at him in the street. At first it was supposed he had received mortal injuries.

The Novoe Vremya says that Grand Duke Nicholas Nicolaievitch, cousin of the Czar, will be appointed to the supreme command of the army without dictatorial powers.

### ATTEMPT TO KILL GRAND DUKE.

A despatch from St. Petersburg says: Grand Duke Nicholas Nicolaievitch, President of the Council of National Defence, narrowly escaped assassination on Friday afternoon at the hands of the Imperial Guards in the guard camp at Krasnoye-Selo. It appears that the Grand Duke was personally reviewing, manoeuvring and putting the troops through blank firing practice, when he suddenly was startled by the hiss of bullets about his head. Fortunately neither himself nor his horse was touched. The command to cease firing was immediately given, and the soldiers of the regiment from which the bullets came were marched back to their quarters, and an investigation was begun in the hope of ascertaining from the barrels of the rifles which of the soldiers fired ball cartridges. Several arrests are understood to have been made.

### FIVE PEOPLE DROWNED.

#### Gasoline Launch Struck Obstruction in the River at Winnipeg.

A Winnipeg despatch says: A merry picnic terminated in a tragedy here on Saturday afternoon, which resulted in the death by drowning of five members of prominent families in this city, and the extremely narrow escape of three others. The dead are: Miss Ethel Brown, her sister Myrtle, and brother Ernest, Miss Thomson and Miss May White. The party left the city for Elm Park in a gasoline launch, those on board being Mrs. C. J. Brown, wife of the City Clerk, and her two daughters, Ethel, aged nineteen, Myrtle, aged thirteen, and her son Ernest, aged fifteen; Miss Thomson, a daughter of J. H. Thomson; Miss May White, stenographer in the office of Stobart, Louis & Co., and niece of J. H. Mitchell, agent of the school board; C. H. Foxwell of the C. P. R. staff, and Alex. Cheyne. While journeying up Red River the launch suddenly struck a submerged pile, listed and sank almost instantly. The gasoline tank kept the boat above water, and to this alone is due the fact that the entire party did not meet a watery grave. The two young men struggled gallantly, though almost unsuccessfully, to save their helpless companions. A man in a boat passed within a few feet of them and refused to give assistance or permit them to cling to his craft, for fear of upsetting it, and passed on, leaving them all to their awful fate. Cheyne, Foxwell and Mrs. Brown alone survive their terrible experience, Mrs. Brown having been restored by artificial respiration. The accident has caused profound regret in the city.

### YOUNG WOMAN ASSAULTED.

#### Miss Jones Found Unconscious by Roadside Near Owen Sound.

A despatch from Owen Sound says: On Sunday morning about 8 o'clock a

### GROWTH OF WESTERN TOWNS.

#### The Quinquennial Sentence Shows a Big Increase.

A despatch from Ottawa says: The quinquennial census of Manitoba, Saskatchewan, and Alberta has now been completed so as to show the population of cities and towns in the North-West Provinces in 1901 and 1906 respectively. The figures are:

| Manitoba.                | 1901.  | 1906.  |
|--------------------------|--------|--------|
| Brandon .....            | 5,680  | 10,409 |

### STEAMER ERINDALE BURNED.

#### The Cook Roused the Crew and Then Disappeared Herself.

A despatch from Newcastle, Ont., says: The steamer Erindale, of the North Shore Transportation Company, was burned down to the water's edge alongside the wharf at Newcastle on Thursday morning at half-past one o'clock, and is a total loss. She arrived here at 10 o'clock the night before, and after being made fast and snugged down for the night the officers and crew turned in. Apparently the deck-hand whose duty it was to keep watch failed to keep awake, as the fire had already got a good hold of the ship before it was discovered by Mr. Jackson, the manager of the company, who was on board.

Grasping the seriousness of the situation, Mr. Jackson roused the officers and crew, and they were all, with the exception of the cook, enabled to escape. Capt. Sullivan, the commander, negotiating a very creditable jump from the bridge-deck to the wharf in the scantiest of costumes.

No sign was made by the cook, and, as the part of the bridge-deck where her cabin was located was enveloped in flames when Mr. Jackson discovered the fire, it is feared that she perished. The discovery of human bones among the debris after the fire was extin-

### THE WORLD'S MARKETS

#### REPORTS FROM THE LEADING TRADE CENTRES.

#### Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, Aug. 14.—Flour—New Ontario wheat, 90 per cent. patents are quoted at \$2.90 in buyers' sacks outside for export. Manitoba first patents, \$4.40 to \$4.60; second patents, \$4 to \$4.10, and strong bakers', \$3.90 to \$4. Toronto.

Bran—The market is unchanged at \$13.50 to \$14 in bulk outside. Shorts are quoted at \$17.50 to \$18 outside.

Wheat—No. 2 old white and red winter are nominal outside at 73c. New No. 2 Ontario wheat quoted at 71 to 71½c outside. No. 1 Northern Manitoba quoted at 80½c lake ports, and No. 2 Northern at 78c lake ports.

Corn—No. 2 American yellow is quoted at 58 to 59c to arrive, Toronto.

Oats—No. 2 white nominal at 30½ to 37c on track here, and at 34 to 34½c outside. No. 2 new oats, mixed, at 31 to 32c outside.

Peas—No. 2 are nominal at 82 to 83c outside.

Hay—No. 2 quoted at 58 to 59c outside.

Barley—No. 2 quoted outside at 47 to 48c, and No. 3 extra at 45 to 46c.

#### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.50 to \$1.60.

Honey—Strained honey quoted at 9½ to 10c per lb, and combs at \$2 per dozen.

Hops—The market is dull at 13 to 16c per lb.

Hay—Car lots of No. 1 old timothy are quoted at \$10 on track, Toronto, and No. 1 new at \$9 to \$9.50.

Straw—\$5.50 to \$6 per ton.

Potatoes—New potatoes are quoted at 65 to 70c per bushel in quantities.

Poultry—Turkeys, fresh killed, 12 to 14c; chickens, 12 to 13c per lb, alive; hens, 9 to 10c per lb, alive; ducks, alive, 10 to 11c per lb.

#### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 18 to 20c; large rolls, 17 to 18c, and inferior at 15 to 16c; tubs, 17 to 18c. Creamery prints sold at 22 to 23c, and solids at 21c.

Eggs—Good caddled stock, 18 to 19½c per dozen.

Cheese—Quoted at 12 to 12½c, the latter for twins.

#### HOG PRODUCTS.

Dressed hogs in car lots are nominal. Bacon, long clear, 12½ to 12½c per lb in case lots; mess pork, \$21.50 to \$22; short cut, \$24 to \$24.50.

Hams—Light to medium, 15 to 16c; do., heavy, 14½c; rolls, 12½c; shoulders, 11½c; backs, 17 to 18c; breakfast bacon, 15½ to 16c.

Lard—Tierces, 11½c; tubs, 11½c; pails, 12c.

#### BUSINESS AT MONTREAL.

Montreal, Aug. 14.—Grain—There is an improved demand for wheat from the other side. Oats continue weak, and a further decline of ½c per bushel was reached to-day. No. 2 being now quoted at 38½ to 39c, No. 3 at 37½ to 38c, and No. 4 at 36½ to 37c per bushel ex store. Flour—Manitoba spring wheat, \$4.50 to \$4.70; strong bakers', \$3.90 to \$4.20; winter wheat patents, \$4.25 to \$4.35; straight rollers, \$3.90 to \$4.10; do. in bags, \$1.85 to \$1.90; extras, \$1.60 to \$1.70. Feed—Manitoba bran in bags, \$17.50 to \$18; shorts, \$20 to \$21 per ton; Ontario bran, in bags, \$17.50 to \$18; shorts, \$20.50 to \$21; milled mouillie, \$21 to \$25 per ton, and straight grain, \$28 to \$29. Provisions—Barrels short cut mess, \$24; half barrels do., \$12.50; clear fat back, \$23.50; long cut

A despatch from Vienna says: It is rumored that it is the Czar's intention to abdicate. The recirculation of this report is ascribed to the reactionary Councillors violently opposing Premier Stolypin's reform scheme, which the Czar supports. The story adds that the Czar will appoint Grand Dukes Vladimir and Nicholas Nikolaevitch as co-regents.

#### PERHAPS DEATH FOR DUTY.

A despatch from St. Petersburg says: M. Onipko, the peasant member of the late Parliament, who was captured red-handed at Cronstadt after the mutiny there, will be tried, it is semi-officially announced, according to the rules of war for inciting and participating in an armed revolt, the penalty for which is death. The authorities hope the case will involve several other prominent extremists in the late Parliament and prevent their re-election to any future Parliament.

#### FOR FAMINE RELIEF.

The Cabinet on Wednesday discussed measures of famine relief. It was decided to recommend credit of \$27,500,000 in addition to the \$7,500,000 voted by Parliament for this use, \$25,000,000 of which sum is to provide food and employment to keep the stricken population from starvation, and the remainder for the purchase of seed grain. Among the public works recommended are construction of flood embankments, ports and other improvements on the Volga, on which the unskilled labor in the chief famine district could be employed and for which \$550,000 were voted at the recommendation of Premier Stolypin.

#### GIRL COMMITTED SUICIDE.

A despatch from Odessa says: A 19-year-old girl, educated and well-dressed, arrived here on Friday morning and engaged a room in a hotel. As she was going out this evening she asked a porter whereabouts was the residence of Gen. Kaulbars, the Governor-General of Odessa. She was informed, and she went to the palace. When a few paces from the entrance she accidentally dropped a handbag and instantly there was an explosion like that of a bomb. The girl was not hurt. She ran back to the hotel, shut herself in her room, and committed suicide with a revolver. Her name is uncertain. One report states that she was a daughter of Gen. Printz, while another says her name was Golupkin. There is no doubt that she was a revolutionist and was carrying a bomb to assassinate Gen. Kaulbars.

One account of the affair is that Gen. Kaulbars and Gen. Karangosoff, the local military commander, were leaving the palace together as the girl approached, and that she fumbled with the bomb, owing to nervousness, and it dropped from her hands.

#### SENTENCES UNJUST.

The sentences passed upon the Sebastopol mutineers probably will be mitigated. It will be recalled that the papers in the cases of these men disappeared mysteriously after the arrival at Sebastopol of Admiral Skrydloff, commander of the Black Sea fleet. Before he left Sebastopol the Admiral intimated that he considered the condemnation of the mutineers prearranged and unjust, and said he thought the officers had been more to blame than the sailors. There is more than a suspicion that the seizure by revolutionists of the papers in these cases was staged by Admiral Skrydloff himself.

On the recommendation of the Admiral, Minister of Marine Bireff instead of confirming the sentences has ordered a complete rehearing of the cases at the end of two months.

#### NEW HEAD FOR RUSSIAN NAVY.

A despatch from St. Petersburg says: It is understood that the Court of Enquiry into the recent mutiny at Cronstadt advises the replacement of Admiral Bireff, Minister of Marine, by some other officer as the head of the Russian navy. It is said that the place has been

#### Miss Jones Found Unconscious by Road-side Near Owen Sound.

A despatch from Owen Sound says: On Sunday morning about 8 o'clock a gentleman was driving into town by the north gravel road he noticed the prostrate form of a young woman under the lower strand of a wire fence on the west side of Mill road, a street which intersects diagonally the former on the west hill near the outskirts of the town. Notifying the people residing in the vicinity, it was found that the young woman had evidently been the victim of a vicious attack. She was alive, but unconscious. A mark over the eye indicated that a heavy blow had been struck, while finger marks on the throat and a terribly swollen tongue showed that if the blow had not rendered her unconscious the attempt to strangle had. She was immediately recognized as Miss Louise Jones, the twenty-one-year-old daughter of Arthur W. Jones, a market gardener, who resides about two hundred yards from where the young woman was discovered. Dr. H. G. Murray was called and ordered the removal of the unconscious form to the General and Marine Hospital.

Miss Jones' absence from home during the night created no apprehension, as frequently she spent the night as company for a lady friend in town whose duties called for night work, and it was supposed that the young woman had remained in town for this reason. Unless unexpected complications arise the physicians expect that the victim will recover, though she is suffering from the shock and the all-night exposure. The police are hopeful that the perpetrators will be captured.

#### BIG INCREASE IN LUMBER.

#### British Columbia Dealers Advance Common Lumber 81 Per Thousand.

A despatch from Nelson, B. C., says: The Mountain Lumbermen's Association decided to raise the price of common lumber one dollar per thousand. There will be a slight advance also on a few other lines. It is claimed that the conditions warranted an advance of \$8 and \$10, but the lumbermen did not wish to take advantage of the situation arising in the Northwest over good crops. One mill on Thursday reported orders for 360 carloads of lumber, with little stock. The coast mills are bare of stocks, with orders months ahead. Thirty-five mills are now in the association but a few more limits will be opened. Sheep and Lambs—Export ewes are quoted at \$1.25 to \$1.60, and bucks at \$3.50 to \$3.75. Lambs are easier at 5½¢ to 6½¢ per lb.

Hogs—Deliveries of hogs were again heavy and quotations at this market are reduced another 25¢ per cwt., making a drop of 50¢ per cwt. for the week. Selects are quoted at \$7.40 per cwt., and lights and fats at \$7.15 fed and watered.

#### HOOK HELD HIM IN AIR.

#### A Cornwall Farmer Is Suspended by Hayfork Chain.

A despatch from Cornwall says: While at work in his father's barn on Thursday, John D. McDonald met with a peculiar and painful accident. He was arranging the hay fork, which had not been used since last season. The rope had been taken out, and a logging chain had been attached to the car. Mr. McDonald climbed up to the cross beam, and gave the chain a swing to remove the car. He then jumped, intending to light on the hay about ten feet below. When he had dropped about eight feet the large hook of the swing chain caught him under the right arm, holding him suspended about five minutes till his brother, Angus, who was working nearby, hearing his cries for help, came, and released him. Dr. D. McEwen, Dunvegan, was speedily summoned to dress the wound, which proved to be a nasty one.

No sign was made by the cook, and, as the part of the bridge-deck where her cabin was located was enveloped in flames when Mr. Jackson discovered the fire, it is feared that she perished. The discovery of human bones among the debris after the fire was extinguished is taken as evidence as to her fate.

Mr. Jackson, the manager, only relieved his brother, who is pursuer, at Whithy, in the afternoon, as the brother did not feel well enough to go on with the trip, and it is probable that but for his presence on board more fatalities would have to be reported.

#### NEW POTATO EVOLVED.

#### Tastes Like a Blend of Asparagus and Turnips.

A London, England, despatch says: Vegetarians will doubtless hail with delight the advent of a new tuber, blue of skin and yellow of interior, which is about to be placed upon the market. This new potato is known to the learned in such matters as the Salaman commersoni violet, and is the result of scientific cultivation by Messrs. Sutton, of Reading. It is quite a distinct flavor of its own. Epicures describe it as a combined flavor of turnips and asparagus. As a business "proposition," too, the growing of the new potato would undoubtedly prove a great success. The plant will thrive anywhere, the wetter or more marshy the soil the better. It is claimed that its productive power is 50 to 100 per cent. over the ordinary kind.

#### GRAVE MISMANAGEMENT.

#### Report of the Commission on Boer War Scandals.

A despatch from London says: The War Office has issued the report of the Royal Commission which was appointed to investigate the South African War stores scandals. While the report acquits the British commissioned officers concerned of the worst charges of corruption, it finds that the losses, equaling about \$5,000,000, were due rather to grave mismanagement and incompetence than to fraud. The commission criticizes severely several officers and public servants, and charges a number of non-commissioned officers with receiving bribes. It declares the errors were due to deplorable and complete want of co-ordination, and the divorce of interest between the different departments of the War Office. The Army Service Corps is declared to have been utterly wanting in business training and experience.

#### DISASTROUS FIRE AT HULL.

#### Thirty-Eight Frame Dwellings Were Destroyed.

A despatch from Ottawa says: The fire doomed City of Hull was again on Friday visited by a conflagration which swept away 38 dwellings and rendered 40 families homeless. As has too frequently happened, the water supply was temporarily cut off just when the fire broke out and for nearly an hour the firemen stood helplessly by their reels or simply aided in the work of removing furniture from the blazing buildings. There was a high south wind blowing at the time, and it is doubtful if the conflagration could have been subdued as soon as it was but for the assistance of the Ottawa Fire Brigade. The district in which the fire broke out is one of the poorest in the city. The homes, all owned by the inmates, were small frame structures and burned up like so much matchwood. It was in the kitchen of one of these dwellings that the fire started. An over-heated cook-stove set the kitchen wall ablaze. The loss is between \$35,000 and \$40,000, of which only about ten per cent. is covered by insurance. Rates are high in Hull, as much as 3½¢ per cent. being charged in the particular district in which Friday's disaster occurred. It is estimated that fully 200 are homeless.

Ontario bran, in bags, \$17.50 to \$18; shorts, \$20.50 to \$21; milled moullie, \$21 to \$25 per ton, and straight grain, \$28 to \$29. Provisions—Barrels short cut mess, \$24; half barrels do., \$12.50; clear fat back, \$23.50; long cut heavy mess, \$21.50; half bbls do., \$11.25; dry salt long clear bacon, 12½ to 12¾¢; barrel plate beef, \$13 to \$13.50; half bbls do. \$6.75 to \$7.25; bbls heavy mess beef, \$11.50; half bbls do. \$6.25; compound lard, 9 to 9½¢; pure lard, 12 to 12½¢; kettle rendered, 13 to 14¢; hams, 14½ to 16¢; breakfast bacon, 16½ to 17¢; Windsor bacon, 16¢; fresh killed abattoir dressed hogs, \$10.75 to \$11; alive, \$7.50 to \$7.75 per 100 lbs. Eggs—Selects, 20 to 21¢; No. 1 candled, 17 to 18¢. Butter—Choicest creamery, salted and unsalted, 22½ to 22¾¢. Cheese—Ontario, 12 to 12½¢; Quebec, 11½ to 11¾¢.

#### UNITED STATES MARKETS.

St. Louis, Aug. 14.—Wheat—Cash, 69½¢; Sep., 69½¢; Dec., 73½¢; May, 77¢.  
Duluth, Aug. 14.—Wheat—No. 1 Northern, 74 to 74½¢; Sept., 73½¢; Dec., 74½¢; May, 78¢.

#### LIVE STOCK MARKET.

Toronto, Aug. 14.—The run of cattle offering at the City Market to-day was light, and, with a fairly good demand for all lines, prices showed a better tone.

Export Cattle.—Choice at \$4.75 to \$5; medium to good, \$4.40 to \$4.60; bulls, \$3.50 to \$3.75; bulls, lights, \$3.25 to \$3.50; cows, \$3.50 to \$4.

Butcher Cattle.—Choice are quoted at \$4.40 to \$4.60; medium to good, \$4.25 to \$4.40; bulls, \$3 to \$3.50; cows, \$2.50 to \$3.50; canners, \$1.50 to \$1.75.

Stockers and Feeders.—Stockers, choice, \$3 to \$3.65; light, \$2.25 to \$3; cows, \$2 to \$2.40; bulls, \$1.75 to \$2.25; short-keep feeders, \$4.50 to \$4.65; heavy feeders \$4.25 to \$4.50.

Milk Cows.—The range of price is unchanged at \$25 to \$50 each.

Calves—Prices are quoted lower at 2¢ to 6¢ per lb.

#### DISCOVERY NEAR TEMAGAMI.

#### The Product Consists of Molybdenum and Gold.

A Montreal despatch says: Another great mineral discovery has been made in the great north lands, where so many precious metals abound. It is a product consisting of molybdenum and gold. The discovery has been made in Net Lake district, near Temagami, about 20 miles south of Cobalt, but, as it lies within the Huronian range, whose geological formation, heavily mineral laden, is practically of a uniform type all the way through to the Labrador coast, it is considered in the highest degree probable that it will be found all through New Ontario and northern Quebec. Mr. L. O. Armstrong, colonization agent of the C.P.R., who returned on Friday from the new mineral region, states that from eight to ten claims are being developed, and he predicts an enormous activity when the nature of the discovery is generally known and its significance realized.

#### RATE MUST BE LOWERED.

#### Commission Fixes Maximum Freight on Cured Meats at 18 Cents.

A despatch from Ottawa says: The Railway Commission has issued an order reducing to 18 cents for 100 lbs. the maximum rate which the Canadian Pacific and Grand Trunk Railways are allowed to charge for the carriage of cured meats, lard, and other packing house products in carloads from Toronto to Montreal for export. Proportionate rates are fixed for similar shipments from other points in Ontario. The Davies Company, of Toronto, appealed against the rate of 19 cents that the railways were enforcing and asked a restoration of the rate of 16½ cents that was formerly collected.

## ONTARIO'S PROSPERITY.

The Farmers are Enjoying an Unprecedented Era of Good Times.

In our general rejoicing over the western wheat harvest the no less prosperous condition of the farmers of Ontario must not be obscured. The recent investigations by our special correspondent in this Province have shown exceptionally gratifying results in every department of agriculture, and his favorable predictions have been amply supported by later reports, says the Globe. These show that the farming community is enjoying an unprecedented era of good times. The steady uplift of the people is disclosed on every hand by the erection of buildings, the improvement in general equipment, and all the evidences of social comfort and improved standards of living.

While the home market is steadily increasing because of the growth of western rural as well as eastern urban population, the foreign demand for our principal products has continued with stiffened prices. The revelations in Chicago's "packing town" incidentally benefited the Canadian meat trade, and the effects are seen in soaring prices for hogs. Only a short journey in the country is necessary to appreciate the high place attained by the animal in our agricultural economy. An increase of nearly three cents per pound in two years means millions to the Province. Equally satisfactory increases have occurred in cheese, which rose from eight to twelve cents, and butter, which has climbed from eighteen to twenty-three cents.

While the western wheat crop is worth perhaps \$20,000,000, Ontario agriculture revels in figures which are too often taken for granted to be properly appreciated. The field crops of this Province were worth \$134,000,000 in 1904, having risen from \$88,000,000 since 1896. An even larger increase took place in the amount of live stock sold, which rose from \$28,000,000 to \$60,000,000 in the same period. The bulk of the exports of cheese and butter, which amount to \$80,000,000 per year, also come from this Province. Taking into account the dairy products consumed at home, this Province produced nearly \$35,000,000 alone in the census year 1901. These figures are not given to make boastful comparisons with the west, but to make it clear that the western crop is not the measure of Canada's agricultural production.

## CROPS IN SASKATCHEWAN.

The Total Yield Is Estimated at 56,227,200 Bushels.

A Winnipeg despatch says: A bulletin has been issued by the Saskatchewan Government with a full report of the acreage and conditions of the crops of the province, which shows that 1,955,673 acres of land are under cultivation this year, while the total crop is estimated at 56,227,200 bushels. There are under wheat 1,336,869 acres, while the estimated crop is 31,230,000. This is an increase of 5,000,000 bushels over last year. The oat acreage is 45,243. While the crop is placed at 23,419,500, an increase over last year of 4,000,000 bushels. The acreage under barley is 41,473, with an expected yield of 1,089,000 bushels. The flax acreage is 30,582, with the yield placed at 447,500. There are 1,506 acres under speltz, and the yield is expected to be 41,700 bushels.

## FOUGHT IN THE WATER.

A Drowning Man Almost Sinks His Rescuer.

A despatch from Sault Ste. Marie says: One of the most heroic rescues recorded along the north shore in a long time was that accomplished by a C. P. R. fireman, W. Fitzgerald, at Algoma Mills. Mr. D. A. Jones had been swimming with a number of companions. He remained behind them in the water and took cramps. The men on shore witnessed his struggles, but could or did not render aid. Just at the opportune

## FARMERS ARE JUBILANT.

Everything Points to a Sure and Immense Yield in the West.

A despatch from Winnipeg says: The latest crop report issued by the Canadian Pacific Railway is very encouraging, indicating that on the eve of the harvest the conditions are such as to ensure a heavy yield, provided sufficient labor is available to garner the grain without loss. During the past week there has been no damage of any kind, and the weather has been suitable to develop the maturing wheat.

The bulletins state that in many places harvesting has commenced, especially in the case of barley, which is said to be a good crop. The yield of wheat is estimated from various districts at between 20 and 25 bushels to the acre, while oats run from 50 to 55 bushels.

## CIVIC PLANT PAID WAY.

Guelph City's Car Service Showed Profit at End of Year.

A despatch from Guelph says: At the City Council meeting on Tuesday night the report of the street railway directors for nine months ending June 30 showed net gain over current expenses of \$4,066. After paying out \$4,000 in maintenance charges, which provided for depreciation, the estimated profit of the three Summer months is \$1,500 to \$2,000 more, making 6 per cent. in all on the capital invested. It is understood that the city's light and power department will make an equally satisfactory statement for the year, showing net gain of \$12,000 or \$13,000 after paying interest and sinking fund and writing off \$8,000 to \$9,000 to older plant.

## USED BAYONETS TO SLAY WOMEN.

A German Soldier in Africa Tells of Atrocities.

A despatch from London says: The Rheinischer Zeitung publishes a letter from a German soldier who is serving in South Africa, in which he says: "When scouting one evening our party, consisting of fourteen men and an officer, came to a water pool, about which we saw some black figures hovering. We captured them, and they proved to be five native women. It was not considered advisable to shoot them, as there were known to be 200 blacks in the neighborhood. At last a soldier suggested that they be bayoneted. The officer forthwith gave orders to that effect and five of us stood in front of the women and five behind them and stabbed them to death."

## KILLED BY STREET CAR.

Sarnia Lady Meets With Shocking Death.

A Sarnia despatch says: Miss Christina Gray, aged 61 years, a highly esteemed resident of Sarnia, met a shocking death on Saturday evening while returning from a trip to Woodrow Beach, two miles from Sarnia. Miss Gray in some manner stepped from the car while it was going full speed and was terribly injured in striking the pavement. She was picked up unconscious and conveyed to the Sarnia General Hospital, where she passed away in an hour and a half. Deceased was a sister of Mrs. James Mackenzie, Messrs. A. Gray, of Sarnia, and A. Y. Gray, of Detroit, and Mrs. Barnett, of Sarnia.

## TO SURVEY TEMISKAMING.

C. P. R. to Send Corps of Engineers Into the District.

A despatch from Montreal says: Sir Thos. Shaughnessy has intimated that the Canadian Pacific Railway Company will despatch a corps of engineers and surveyors to the Temiskaming district to make a preliminary survey and report upon the extension of their line

## KING RECEIVES CHIEFS.

British Columbia Indians Present Address to His Majesty.

A despatch from London says: The King on Monday received at Buckingham Palace the Indian Chiefs from British Columbia who went over to petition him to redress wrongs they say they have suffered at the hands of the whites. Chief Joe Capilano, who organized the chiefs of British Columbia, was the spokesman, and he read an address which he had prepared. With him were Chief Louis F. Kamloops and Chief Charlie, of the Cowichan tribe. At the audience they wore long white robes and fur hats. They also presented three beautiful Indian work baskets to Queen Alexandra, one basket containing a picture of the son and daughter of Chief Koe Capilano. The chiefs were delighted with their reception by the King.

## JOSEPH BRODIE KILLED.

He Receives a Fatal Shock at Fort William.

A despatch from Fort William says: Joseph Brodie, electrician, employed by the C. P. R., was electrocuted on Monday morning about 10 o'clock. Brodie was working on a dead-wire connection on top of one of the poles opposite the elevator, and absent-mindedly let his pliers touch the live wire which supplies power for the elevators. He was instantly killed. The unfortunate young man, upon receiving the shock, dropped instantly upon the wires, and when his body was taken down it was found that the flesh was burned to the bones of his hand and underneath his arm. He was formerly engaged during the construction of elevator E with the Macdonald Engineering Company as an iron worker.

## CALHOUN'S ESCAPE.

Clever Trick Played by a Convict in Alberta Penitentiary.

A despatch from Edmonton, Alta., says: Nothing has been heard of the whereabouts of Calhoun, the escaped convict from the penitentiary. That he is a nervy customer and can take care of himself is quite evident from the nature of his escape. The night before his escape he made his blanket into a pair of trousers, and likewise the sheet into a shirt, which he wore under his prison garments as he went out to work. He slipped in between two piles of lumber, discarded the prison clothes, tore the rim off his straw hat, and then coolly walked off to the bank, observed by everyone, but unidentified as the convict. Fifty dollars is offered for his capture.

## CHOKED TO DEATH.

A Farmer Attempts to Eat Raw Beef at Picton.

A despatch from Picton says: Robert Shaw, a farmer, about fifty years of age, was choked to death on Monday by a piece of raw beef. It seems Mr. Shaw had been drinking during the day, and about 5 o'clock in the evening dropped into Geo. Rose's butcher shop and procured a piece of meat and proceeded to eat part of it, with the above result.

## KILLED BY RAILWAY TRAIN.

Section Man Lying Across Tracks With Boots Off.

A despatch from Ottawa says: Moses McAfee, a C. P. R. section man, was struck by an Ottawa-bound train on the Gatineau Valley Branch near Kazubazua on Sunday night and was instantly killed. For some unknown reason the man had his boots off and was lying across the track. He was noticed by the engineer, but too late to avert a fatality. He was a married man.

## CANADA.

Earl Grey has returned to Ottawa from Newfoundland.

One hundred men in the Strathcona coal mines, Nova Scotia, are on strike.

St. Catharines' water supply has been examined and found to be pure.

"Old Faithful," a noted Sioux brave is dead at Portage la Prairie, aged 107.

A Cartwright, Man., boy was killed by lightning while asleep in bed, on Friday.

Premier Roblin said he believes there are 125,000,000 bushels of wheat in the western crop.

A valuable nickel and copper mine is said to have been discovered near Pontiac on the C.P.R.

Peterboro's by-law imposes a license fee of \$200 on places other than hotels where cigarettes are sold.

The London Street Railway Company refuses to take back all of the participants in the recent strike.

Competition between architects will be arranged in the preparation of plans for new Ottawa public buildings.

Josephine Le Barre, a four-year-old Hamilton child, drank from a cup that had contained lye and was killed.

The consolidated revenue of Canada during July was \$5,760,321, a gain over the same month of 1905 of \$785,000.

The Winnipeg City Council will enter an action against the Street Railway Company for the electrolysis of water mains.

The Gatineau Point Council has decided to keep all young people under 16 off the streets after 9 p.m., by aid of the curfew bell.

Oakville carried a by-law on Friday to issue debentures for \$40,000 for waterworks and \$10,000 for an electric light service.

Chief Justice Howell, Mr. Justice Richards and Mr. Justice Phippen, have been sworn in as members of the Manitoba Court of Appeal.

A display of Cobalt minerals will form part of the ores to be exhibited by the Canadian Government at the New Zealand Exposition.

North Bay had 170 arrests in three months, and Sudbury people are twitting the railway metropolis of the north with being a rough place to live in.

Chief Government Inspector Richard McCarthy, at Winnipeg, says he does not expect that the Grand Trunk Pacific can build its line to Edmonton much before the fall of 1907.

Fire at Little Current destroyed, on Saturday, the Nixon House and surrounding buildings, causing a loss of over \$20,000. Mrs. Powell, an old lady, dropped dead while watching the fire.

It is announced at Victoria, B.C., that the MacLaren Timber Company, made up of Ottawa and Montreal rich men, have purchased all the timber lands that the C.P.R. recently acquired in the Esquimalt and Nanaimo railway belt. By the deal the railway company receives \$3,000,000 or more than was paid the Dunsmuir Company for the entire land grant and railroad.

## GREAT BRITAIN.

Russia may place orders for warships in Great Britain.

King Edward will be a godfather to Emperor William's grandson.

The Duke of Connaught was in an automobile collision in Wales, but escaped injury.

Lord Haddo, son of the Earl of Aberdeen, was married to Mrs. Cockayne at London on Tuesday.

was then accomplished by a C. P. R. fireman, W. Fitzgerald, at Algoma Mills. Mr. D. A. Jones had been swimming with a number of companions. He remained behind them in the water and took cramps. The men on shore witnessed his struggles, but could or did not render aid. Just at the opportune moment a locomotive crossed the bridge. Mr. Fitzgerald noticed the man in trouble and without even stopping to remove his clothes jumped a distance of twenty-five feet from the bridge into the water. The drowning man grasped his leg and a struggle between man and man ensued, but Mr. Fitzgerald's efforts were finally crowned with success when he got Jones to shore.

#### AFTER CANADIAN LUMBER.

##### German Manufacturer Looks for Source of Supply Here.

A Winnipeg despatch says: Mr. G. Spaltholz, a member of the big lumber firm in Dresden, Germany, is here en route to British Columbia with a view to securing a source of supply for their business from British Columbia mills. The advance in prices, he says, has made trade with the United States no longer possible, and he hopes to be successful in establishing a Canadian connection. The possibility of such trade, he says, is practically unlimited. However, he says the tariff war with Germany is liable to hamper him in his efforts.

#### FOR REPEAL OF SCOTT ACT.

##### Inverness, Nova Scotia, Files Petition—Vote Will be Taken.

An Ottawa despatch says: A petition for the repeal of the Canada Temperance Act in Inverness, Nova Scotia, has been filed with the State Department. So soon as the petition has been examined and proven to contain the requisite number of signatures, an order will be issued for the taking of a vote in the county.

The Scott Act, as it is more commonly known, is still in force in twenty-two constituencies in Nova Scotia and New Brunswick. It has been repealed altogether in Prince Edward Island, where a more stringent local law obtains.

#### SHOCK KILLED HORSE.

##### Animal Touched Live Electric Wire—Owner Badly Shocked.

A despatch from Peterborough says: A horse tied to a chain attached to an electric light pole was instantly killed on George Street on Friday. A ground wire runs down the pole to the ground, and it is thought the chain rubbed the insulation off the wire. Joseph Collins, of Douro, owner of the horse, went to release it, and, grabbing the chain, received a shock of several hundred volts and nearly met death. He will recover.

#### FOUND NICKEL MINE.

##### Rich Deposit Said to Have Been Discovered at Pontiac.

An Ottawa despatch says: A valuable nickel and copper mine, as well as a corundum mine, is reported to have been discovered near Pontiac, on the branch of the C. P. R. about two miles from McKee's Station. Assays which have been made by an expert from Cobalt show, it is alleged, thirty per cent. nickel and fifteen per cent. copper. As to the corundum mine the percentage is said to be 90.

#### MANY PARDONS ISSUED.

##### Inmates of Canadian Prisons Receive Their Release.

An Ottawa despatch says: There were 443 persons pardoned during the fiscal year ending June 30 from Canadian penitentiaries for various reasons, but mainly for good conduct. Of this number 173 were under the ticket-of-leave system. The remainder were released unconditionally.

A despatch from Montreal says: Sir Thos. Shaughnessy has intimated that the Canadian Pacific Railway Company will despatch a corps of engineers and surveyors to the Temiskaming district to make a preliminary survey and report upon the extension of their line from Temiskaming to Kippewa and Riviere des Quinze. The object of this line, should it be decided upon after these reports have been received, will be the development of the region where the recent gold discoveries were made, and incidentally it will open up direct railway communication between the main line and the old established agricultural district of Ville Marie.

#### SHE TOOK CARBOLIC ACID.

##### Suicide of Emma Carr at Phillipsville, Near Brockville.

A despatch from Brockville says: Emma Carr, a young girl of nineteen, committed suicide by taking carbolic acid at the residence of a neighbor, Jas. Crapp, near Phillipsville, on Wednesday afternoon. After taking the acid she ran to the house of her father, Nathan Carr, a farm laborer, about ten rods distant, but fell and expired on the doorstep before she could enter. Death ensued in about four minutes after the fatal drug was taken. No reason can be assigned for the act.

#### FIVE JAPS KILLED.

##### Made Concerted Attack on St. Paul Island—Twelve Prisoners Taken.

A despatch from Dutch Harbor, Alaska, says: Five Japanese were shot and killed on the island of St. Paul, of the Pribyloff group, by order of the agent of the Department of Commerce and Labor, on July 17, as the result of a raid by four Japanese schooners on the seal rookeries. The revenue cutter McCullough reached here on Wednesday from St. Paul with 12 prisoners, two seriously wounded, who were turned over to Deputy Marshal Harmon.

#### SENTENCED FOR LIFE.

##### Prince Edward Island Man Found Guilty.

A despatch from Montreal says: Alex. McKenzie, a native of Prince Edward Island, whose relatives reside there, has been sentenced to life imprisonment by the Rosseau, Minn., court, being found guilty on Wednesday on circumstantial evidence of killing John Stewart, a trapper, near the boundary line. John A. Mathieson, K. C., of P. E. I., assisted in the defence.

#### WILL BUILD NEW BRIDGE.

##### Fine Cantilever to Span River at Montreal.

A despatch from Montreal says: A new cantilever bridge to connect Montreal with the south shore of the St. Lawrence, is announced for commencement next week, and completion in two years. The bridge will have a main span of 1,500 feet, and a clear heading of 150 feet, while the actual bridge length will be about two and a half miles.

#### THEY STARVED TO DEATH.

##### Fate of Two Little Girls Who Wandered from Home.

A despatch from Winnipeg says: Word comes from Wood Mountain that the remains of the two little Hoffman girls, aged nine and eleven, who wandered away from their home while going after horses on May 23rd last: have been found by a sheep herder in Porcupine Creek, some 40 miles from their father's ranch. They must therefore have lived for some days, and finally died of starvation. The father left Wood Mountain on Friday to bring the remains home. At the time of their disappearance search was made for several days and their tracks traced for miles, but without result.

on Sunday night and was instantly killed. For some unknown reason the man had his boots off and was lying across the track. He was noticed by the engineer, but too late to avert a fatality. He was a married man.

#### JUVENILE CURIOSITY.

##### Boy Placed Obstruction on Track to see a Train Wreck.

A Moncton, N. B., despatch says: At Gulligan's Siding, near Campbellton, on the Intercolonial, a freight train ran over a large iron bolt placed on the rail. The train was going slowly and no damage was done. A 16-year-old boy named Joseph Daigle, was arrested on suspicion. He protested his innocence, but when being placed in the cell at Campbellton Jail he broke down and confessed. He wanted to see a train wreck, but fortunately missed the express, which passes through at high speed.

#### BRITISH TRADE IN JULY.

##### A Very Large Increase Both in Imports and Exports.

A London despatch says: The Board of Trade returns for the month of July show an increase in imports of \$19,339,000, and an increase in exports of \$28,109,500. The principal increase in imports was food, \$7,500,000. The rest was raw material and manufactured articles. In exports the principal increase was manufactured yarns and textiles, \$10,000,000, the remainder being manufactured metals.

#### AN ORDNANCE FACTORY.

##### Ottawa Man Says Only Government Sanction is Needed.

A despatch from Ottawa says: Mr. Thomas Ahearn states that if the Government gives its endorsement to the scheme for the establishment of an ordnance factory the company having the matter in hand will make a million-dollar outlay immediately and further expenditures later. Ten acres are required for the site, and the town of Prescott is anxious to furnish it.

#### ONUS LIES ON CAPTAIN.

##### Result of Official Enquiries Into Wreck of the Sirio.

A Madrid despatch says: The result of official enquiries into the loss of the Sirio is that grave charges will be brought against the crew, especially against the captain. It is said that the vessel would not have sunk entirely if the captain had exerted his authority. According to the statement of a driver, there are seventy bodies in the interior of the ship.

#### WOMAN ELECTROCUTED.

##### Mrs. Kelly-Blackeslee, of Winnipeg, the Victim.

A despatch from Winnipeg says: Mrs. Kelly-Blackeslee of Vaughan street was electrocuted on Sunday evening, having grasped an electric incandescent lamp while in the bath tub. Mrs. Blackeslee was in the act of stepping into the water when she slipped. She grasped the lamp by the socket to save herself from falling, and the current killed her instantly.

#### ATE PORK AND BEANS.

##### Young Man Dies Soon After Partaking of Canned Stuff.

An Ingersoll despatch says: H. H. Ellis, eldest son of Mr. A. H. Ellis, furniture manufacturer, died suddenly on Friday from ptomaine poisoning, caused by eating canned pork and beans. He ate the pork and beans early Friday, and was soon taken ill. When physicians were summoned he was in a comatose condition, from which he was not revived. The deceased was about 34 years of age and unmarried.

King Edward will be a godfather to Emperor William's grandson.

The Duke of Connaught was in an automobile collision in Wales, but escaped injury.

Lord Haddo, son of the Earl of Aberdeen, was married to Mrs. Cockayne at London on Tuesday.

The British Government is said to have framed a measure providing for a legislative assembly for Ireland.

Alfred Moseley's offices in London are daily besieged with teachers who desire to visit Canada and the United States.

An expedition will leave London next week to search for an island off the coast of Africa on which are said to be

A jury at Lincoln's Inn has decided the Marquis of Townsend capable of taking care of himself, but not capable of managing his affairs.

#### UNITED STATES.

Three negroes were taken from the jail at Salisbury, N.C., on Wednesday, and lynched.

Chester D. Massey of Toronto has donated \$20,000 for a memorial organ at Chautauqua, N. Y.

The paying teller of the defunct Milwaukee Avenue State Bank, Chicago, committed suicide, on Friday.

Hall, leader of the Salisbury, N.C., lynchers, was sentenced to fifteen years in the State Prison, on Friday.

Two electric cars collided near Vermillion, O., on Tuesday, killing two persons and seriously injuring about fifty.

For the first time in thirteen years the United States Government has advertised for silver bullion for coinage purposes.

The son of the fugitive President of the Milwaukee Avenue State Bank, Chicago, will hand over to the receiver his father's property, valued at \$600,000.

Charles D. Sibley, editor of the Era, of New Rochelle, N.Y., is in jail, with a \$25,000 libel action pending, because he called the mayor and aldermen boodlers.

#### GENERAL.

Russia's financial position is said to be precarious.

The Japanese battleship Mikasa has been floated at Sasebo.

A severe earthquake was felt at San Remo, Italy, on Saturday.

The Persian Government has given the people a National Assembly.

Experiments have been begun with a sub-marine telephone in Germany.

Germany is said to contemplate a naval programme of unprecedented magnitude.

Strained relations have arisen between France and Turkey over the frontier of Tripoli.

Goremykin, former Russian Premier, has gone abroad, presumably for his personal safety.

Fourteen miners were killed by the fall of an elevator at Kattowitz, Prussian Silesia, on Saturday.

#### POISONED BY ICE CREAM.

##### Two Toronto Junction Children Are Dead.

A Toronto Junction despatch says: The home of Mr. and Mrs. George Holloway, 49 Vine Avenue, is overcast with gloom, caused by the death of two of their children by ptomaine poisoning through eating ice cream. The children—Vera May, aged 4 years, and Aileen Chribelle, aged 2 years—ate the ice cream on Friday night. The oldest died on Sunday morning and the younger the same night. A number of doctors were called in on the case, but no relief was obtained for the two suffering infants.

#### STUPENDOUS LOSS.

##### Sustained by British Companies in San Francisco.

A despatch from London says: The Times estimates that British companies, including the subsidiary American companies owned by them, lost \$9,225,167 in the San Francisco disaster.

# When the Hair Falls

Then it's time to act! No time to study, to read, to experiment! You want to save your hair, and save it quickly, too! So make up your mind this very minute that if your hair ever comes out you will use Ayer's Hair Vigor. It makes the scalp healthy. The hair stays in. It cannot do anything else. It's nature's way.

The best kind of a testimonial—

## SEASON OF 1906.

UNTIL FURTHER NOTICE THE

### DENBIGH.

Mrs. M. Rodgers and daughter, Nora, have returned home from Syracuse, N. Y., where they enjoyed a couple of weeks, visiting relatives.

Mrs. Charles Both has returned home after a visit with friends in New Ontario, accompanied by her daughter, Mrs. Mary Dawson, of Barwick, who intends to remain a couple of months here.

Misses Mary and Lizzie Marquardt, of Renfrew, have arrived home and intend to spend some time on the old homestead, assisting their parents during the busiest part of the season.

J. Mayer, of Philadelphia, and daughter Susan, have terminated their visit, and have returned home via Montreal and New York. They expressed themselves as being well satisfied with their outing here in every respect, and Mr. Mayer intends to choose Denbigh again for the scene of next summer's recreation for himself and other members of his family.

After having no medical practitioner residing here for some time, Denbigh has had two of them lately. As the practice, however, is not large enough for two doctors, Dr. Spankie has left Denbigh again, while Dr. R. Tennant intends to remain, and has secured the office and rooms at the Chatson house, formerly occupied by Dr. Grant.

Mrs. R. Handley, Renfrew, returned home, after spending a few weeks visiting at her mother's, Mrs. A. McGowan's.

Most of the farmers are done haying and some have begun to cut their grain. The yield of hay is rather under the average, but grain promises to be an excellent crop.

Potatoes and roots are also very promising. Fruit in general is hardly a medium crop. Berries are almost a failure, except raspberries of which there is a fair supply.

### CHEESE BOARD.

Board met in Council Chamber in the town hall on Friday last.

ment store" of the lighthouse service in this country and its foreign possessions. Practically everything in the nature of a mechanical device used in the service, from the biggest lantern to the smallest order of light, and including the apparatus for blowing fog signals and making the lights flash on gas buoys, is turned out in this place, and not only sent to all the stations in this district, which includes Porto Rico, but also as far away as Alaska, and even to the Philippines.

The mechanics employed are all men of the highest grade, for the objects they are at work on are too delicate, as a rule, to allow of much machine labor, and in addition to this the government has never seen fit to spend sufficient money on the plant to fit it out with such machinery. In a stroll through the workrooms one can see men turning out the delicate brasswork that keeps the flashlights on a gas buoy going for three months at a time, the curious brass cylinders that make the wailing cry of a fog siren, tiny floating stops that serve to keep the oil from overflowing in the lamps after the manner of a student lamp, and the clockwork that keeps revolving lights turning around hour after hour through the long nights.

The only thing they don't make in this department store are the lenses, which are imported from Paris or London. These are "assembled" in these shops, however, and one can see lanterns of all sizes in the course of preparation, from the smallest size used in the service to ones of the power sufficient to go in lighthouses of the first order. Of course the department has to be ready for emergencies in the way of breakdowns of lights, as well as of lightships, and so they not only keep two light vessels at the wharf always ready for instant service, but they also have in this storehouse an emergency light that can be put up anywhere and fitted to take the place of any light of any description, whether it be fixed or revolving, red and white or all red.

## Odd Knives.

In a monastery in Ireland there is a very curious collection of knives of the sixteenth century, the blades of which have on one side the musical notes to the benediction of the table, or grace before meat, and on the other side the grace after meat. The set of these knives usually consisted of four. They were kept in an upright case of stamped leather and were placed before the singer.

## Too Methodical.

"As for me," said Aunt Clarissa, "I haven't any use for a woman that takes three or four handkerchiefs with her when she goes to see one of these heart-interest plays. She's too businesslike and calculating to be the genuine thing."—Chicago Tribune.

## Something Wrong.

Mrs. Am I still "the star of your life," as I was when you used to write love letters to me? Mr.—Of course, dear. Mrs.—I don't seem to be drawing a star salary, though.

## SUPPORT

SCOTT'S EMULSION serves as a bridge to carry the weakened and starved system along until it can find firm support in ordinary food.

## WASHINGTON AS A FIREMAN.

He Was a Member of the Friendship Fire Company.

George Washington was a member of the Friendship Fire company, organized in 1774 in his home, Alexandria. At first the company consisted of citizens who, out of "mutual friendship," agreed to carry to every fire "two leathern buckets and one great bag of cornaburg or wider linen." Washington was made an honorary member, and when he went as a delegate to the congress of 1774 at Philadelphia he examined the fire engines in use there. On his return to Philadelphia to the Continental congress in 1775 he bought from a man named Gibbs a small fourth class engine for the sum of £80 10s., and just before he set out for Boston Heights to become commander in chief he dispatched this little engine to the Friendship company.

During his younger days he always attended fires in Alexandria and helped to extinguish them. In the last year of his life a fire occurred near the market. He was riding down King street at the time, followed by his servant, who was also on horseback. Washington saw that the Friendship engine was insufficiently manned, and, riding up to a group of well dressed gentlemen standing near the scene of action, he called out authoritatively: "Why are you idle there, gentlemen? It is your business to lead in these matters."

After which he leaped off his horse, and, seizing the brakes, was followed by a crowd that gave the engine such a shaking up as it had not had for many a day.

## The Unsafe Man.

The man who knows better how to do another man's work than he does his own is not safe for any kind of work.—Louisville Herald.

Hammocks a fine assortment.

MADOLE &amp; WILSON.

## SLEEP HABITS OF ANIMALS.

The Monkey Never Loses Its Instinct of Fear.

"When a monkey sleeps he picks out the highest perch he can find," said an animal trainer. "When the only home of the monkey was a forest, he lived always in deadly fear of the lion. A live monkey is the choicest morsel on the menu of the king of beasts. Although the monkey is wise and knows that in a zoo the lions are securely caged, the fear is born in him and he sleeps on the high perch.

"The lioness, when free from family cares, is prone to lie on its back with its legs stretched up straight in the air and paws pendent. The lion, when the excitement of the day is gone, stretches itself out flatly on its side with paws turned in and twitches and throbs during its slumber a good deal like a dog. Gorillas and chimpanzees sleep with their hands over their heads. Bears, which have no fear, sleep in any position. The same is true of wolves.

"Animals of a cunning or cowardly nature, however, are always on the alert, even when asleep. A seal sleeps like a human being. Once in awhile a seal will sit up with its head on its chest, asleep in the water. Its ears are kept under so that he may hear the approach of an enemy, sound traveling with great distinctness under water."

## Pretty Near Right.

Markley—Wiseman told me today that I'd never get back that ten spot I loaned you. Grafton—He did? Markley—Yes. Grafton—Well, if it wasn't so expensive I'd make him out a liar right now.—Philadelphia Press.

I know of nothing sublime which is not some modification of power.—Burke.

## Whose Say-so is Best?

With nearly all medicines put up for sale through druggists, one has to take the maker's say-so alone as to their curative value. Of course, such testimony is not that of a disinterested party and accordingly is not to be given the same credit as if written from disinterested motives. Dr. Pierce's medicines, however, form a single and therefore striking exception to this rule. Their claims to the confidence of invalids does not rest solely upon the maker's say-so or praise. Their ingredients are matters of public knowledge, being printed on each separate bottle wrapper. Thus invalid sufferers are taken into Dr. Pierce's full confidence. Scores of leading medical men have written enough to fill volumes in praise of the curative value of the several ingredients entering into these well-known medicines.

Amongst these writers we find such medical lights as Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago; Prof. Hale of the same city; Prof. John M. Souder, M. D., late of Cincinnati, Ohio; Prof. John King, M. D., late of Cincinnati, Ohio; Dr. Grover Cox, of New York; Dr. Bartholow, of Jefferson Medical College, of Pa., and scores of others equally eminent. Dr. Pierce's Favorite Prescription cures the worst cases of female weakness, profluvium, anteversion and retroversion, corrects irregularities, cures painful periods, dries up disagreeable and weakening drains, sometimes known as pelvic catarrh and a multitude of other diseases peculiar to women. Bear in mind, it is not a patent nor even a secret medicine, but the "Favorite Prescription" of a regularly educated physician, of large experience in the cure of woman's peculiar ailments, who frankly and confidently takes his patients into his full confidence by telling them just what his "Prescription" is composed of. Of no other medicine put up for woman's special maladies and sold through druggists, can he say that the maker is not afraid to deal thus frankly, openly and honorably, by letting every patient using the same know exactly what she is taking.

Sick women are invited to consult Dr. Pierce, by letter, free. All correspondence is guarded as sacredly secret and womanly confidences are protected by professional privacy. Address Dr. R. V. Pierce, Buffalo, N. Y.

How to preserve health and beauty is told in Dr. Pierce's Common Sense Medical Adviser. It is free. For a paper-covered copy send Dr. R. V. Pierce, Buffalo, N. Y., 31 one-cent stamps to cover mailing only; in cloth binding 50 stamps. Dr. Pierce's Pellets cure constipation.

## The Inspector's Romance

By CLAUDE PAMARES

Copyright, 1906, by M. M. Cunningham

Once every two months—now a day or two earlier, and now a day or two later—Inspector Cranforth had entered the different postoffices on his route and checked up and straightened out affairs. There were postmasters who had seen him grow old and gray since his appointment. They had always found him a pleasant spoken and a just man, but all stood in awe of him. In no department of the public service is Uncle Sam more particular than in the postal. The cash must balance to a cent with the postmasters, and any man or woman who attempts to play tricks with his letters are certain to be pursued with relentless energy.

Inspector Cranforth was generally regarded as a flint hearted man. It was understood that he was an old bachelor and had never known what love was. He accepted no excuses from postmasters and indulged in no dirations while traveling. At fifty years of age he had got to be part of the route, and no one knew him for just what he was. Outside of his officialism he had a heart as warm as any man's, and one reason—perhaps the main one—why he had not married was the fact that he had always maintained a home for a mother and a crippled sister. His salary could do no more. One day a wind-fall came in the shape of a legacy, and if the inspector had dreams of matrimony and a fireside all his own, no one could blame him.

Those who looked upon the man as flint hearted did not know the ins and outs of the case at the Dover post-office. An old soldier had been postmaster there for years. When he died his widow took his place. When she died her daughter Mary, who had known the inspector since her babyhood, was left motherless, fatherless and almost penniless. It was the inspector who paid a part of the undertaker's bill; it was the inspector who had Uncle Billy Smith appointed; it was the inspector who got Mary Williams a clerkship that practically made her postmistress and financially independent.

Even the girl did not know the extent of his kindness. When he found himself asking why he did it he found himself replying that in two or three years more he hoped to be in a position to marry. At present his feelings toward the girl were merely paternal. What they might be in the future he wouldn't discuss with himself.

It was said that Inspector Cranforth took more time for inspection at the Dover postoffice than anywhere else. Some of the village gossips said it was because of Mary Williams, who regarded him as a friend and was always glad to see him come, and others said he had his eye on Tillie Langton, the daughter of the village innkeeper. It was the talk that the two girls were rivals, and the innkeeper's daughter at least came to believe it and to feel bitterly toward the girl in the postoffice. The situation of affairs was just right when there came an official complaint against the Dover postoffice.

William Penfield, son of Deacon Penfield, was in the habit of sending his old father money from Iowa every month or two.

William was of an economical turn and did not want to pay a registry fee or the premium exacted for a money

more sore at heart than ever before in his life when he heard two female voices in the next room. There was a vacant stovepipe hole just above his head that let every word float through. The women were the innkeeper's wife and his daughter, and he heard the mother say:

"Tillie, where did you get that ten-dollar bill changed?"

"At the butcher's," was the reply.

"And what did you do with the letter?"

"Burned it up. Don't you go to fretting over things. They say that Mary will lose her place, but nothing else will happen. I want to get Mr. Cranforth in the parlor tonight and sing and play for him."

Ten minutes later the inspector was at the butcher's, asking questions. He went from there to the postoffice for a few minutes' talk with the accused girl. When he had asked a question or two she remembered that on a certain date when she had half a dozen letters in her hand she had been called into the grocery part in a hurry and had left the letters on the counter for a moment beside the innkeeper's daughter.

"And now about searching your trunk?" asked the inspector.

She handed him the key in a shamefaced way and said:

"I don't want you to, but if you must then you will find the bill in a letter. Read the letter."

The justice was taken along. The letter and money were found, and both read the letter and replaced it and went out of the room almost on tiptoe. The inspector had never heard that Mary even had a beau. The letter proved that she was engaged to a young man in a neighboring town, and he had sent her the money to save up with more against their wedding.

"Why didn't you tell me this before?" asked the inspector of the girl that evening.

"I—I didn't want to hurt you," she replied.

"Hurt me how?"

"I knew you were falling in love with me, and you are so old, you know, and I'd have to say no, you see."

"I understand," he finished, with a sigh, and, going into his own room, he tore up his resignation and sat down and figured it all out and said to himself:

"The girl is right. The man of fifty who has a romance is an old fool!"

He was not entertained in the inn parlor that evening. He never stops there now. The thing was somehow fixed up between the landlord and old Penfield and the government, but it was whispered around that it cost the former a thousand dollars and that Tillie is likely to die an old maid.

### The Lesson He Was Taught.

A southern judge tells of the disqualification of a jurymen who came before him. The case was a capital one and the lanky backwoodsman declared determined opposition to capital punishment. Looking at him sternly and in tones somewhat suggestive of wrath, the judge asked the fellow if he did not think there were conditions so extraordinary as to warrant the hanging of the offender. He said he did not believe anything could make him assent to such a verdict.

"But will your honor let me explain?" said the disqualified citizen. "I'd like to give the court my reasons."

"I don't wish to hear any explanation from you. Go and sit down."

"Excuse me, judge, but you must hear my reason."

"Well, then, give it, and go along with you."

"The reason I am opposed to capital punishment, your honor, is that my old

## NERVOUS DEBILITY CURED

Excesses and indiscretions are the cause of more sorrow and suffering than all other diseases combined. We see the victims of vicious habits on every hand; the sallow, pimpled face, dark circled eyes, stooping form, stunted development, basifol, melancholic countenance and timid bearing proclaim to all the world his jolly and tend to blight his existence. Our treatment positively cures all weakness by overcoming and removing the effects of former indiscretions and excesses. It stops all losses and drains and quickly restores the patient to what nature intended—a healthy and happy man with physical, mental and nerve powers complete.

For over 25 years Drs. K. & K. have treated with the greatest success all diseases of men and women. If you have any secret disease that is a worry and a menace to your health consult old established physicians who do not have to experiment on you.

We guarantee to cure Nervous Debility, Blood Diseases, Stricture, Varicocele, Kidney and Bladder Diseases. Consultation Free. If unable to call, write for a Question Blank for Home Treatment.

DRS. KENNEDY & KERGAN, 148 Shelby Street, Detroit, Mich.

# DR. AGNEW

WITH THE FORESIGHT OF A PROPHET, BY THE AID OF THAT GREATEST OF KNOWN TREATMENTS—"DR. AGNEW'S CURE FOR THE HEART"—IS LEADING THOUSANDS OUT OF "EGYPTIAN BONDAGE," OUT OF ILL-HEALTH AND UNTOLD SUFFERING TO THE "PROMISED LAND" OF PERFECT HEALTH

## DOES YOUR HEART ACHE?

DR. AGNEW'S CURE FOR THE HEART WILL STOP THE PAIN

Is there palpitation—Is there fluttering—Is your breath short—Is it hard to find your pulse sometimes—Do you have smothering spells—Do your feet and ankles swell—Do you have fainting turns—Do you have nightmare—Do you have pain in the left side, shoulder or arm—Ever experience great hunger and exhaustion—Do you have chilly sensations? Dr. Agnew's Cure for the Heart has saved thousands of sufferers, and it can help and cure you; but you cannot afford to toy with heart troubles, so if you have any of the heart symptoms to-day then to-day is the day to put yourself in touch with a remedy—this great heart treatment that never fails.

"I was under treatment," says Mr. A. Lavers, of Collingwood, Ont., "with some of the best physicians in London (England) for what they diagnosed as incurable heart trouble. I suffered agonies through pain about my heart, fainting spells, palpitation and exhaustion. As a drowning man grasps at a straw I tried Dr. Agnew's Cure for the Heart. The first bottle relieved me greatly; two bottles took away all traces of my heart trouble."

DR. AGNEW'S LITTLE LIVER PILLS cure all liver ills—10 cents.  
DR. AGNEW'S CATARRHAL POWDER a sure cure for catarrh.

Sold by F. L. Hooper.

mouth or two. William was of an economical turn and did not want to pay a registry fee or the premium exacted for a money order. The bill was simply inclosed in a letter. The father was inclined to be garrulous and to look upon it as a smart trick to get ahead of Uncle Sam, and so in time every one in and around Dover came to know what would have been more prudent to be kept secret.

A money letter was missing. Old Mr. Penfield haunted the postoffice for a week and then wrote to William. William made affidavit that he wrote and inclosed a ten dollar bill on a certain date. It was the business of Uncle Sam to send out a tracer and for one of his inspectors to follow it up. Inspector Cranforth took his time about it, but he finally traced the letter into the Dover postoffice.

By that time there was great ado in the town. Old Mr. Penfield hadn't hesitated to express his opinions that "some one" right in the home postoffice had cribbed his letter and abstracted the money, and of course he referred to Mary.

She claimed to be innocent, but there were those who held to the contrary, and when Inspector Cranforth arrived to carry his investigation further there was great excitement. To the intense indignation of hundreds of citizens the investigation was held within closed doors—that is, Mary was questioned only in the presence of a justice of the peace. She was nervous and excited and shaken. She admitted her belief that such a letter had arrived at about such a date, but what had become of it, if not delivered, she could not say.

The establishment was a combination grocery and postoffice. A person could have sneaked into the postoffice part from the grocery, but he would have had to look over all the general delivery mail to get the Penfield letter. He would have also had to hit the exact date of its arrival.

Every incident of the day was recalled, but suspicion could not be directed against anybody. The letter had arrived, but what had become of it was a puzzle. Two hours' talk was leaving the investigation just where it had begun, when the outsiders demanded that the girl's trunk at her boarding place be searched. She went pale in an instant, and as the inspector noticed it a suspicion lodged in his heart. When asked if she were willing she hesitated and finally declined. Even the good old

justice, who was her friend, looked at her with pity in his face. The inspector stared into vacancy a moment, and then his mind was made up.

"Mary, have you a ten-dollar bill in your trunk?" he asked.

"I—I"—she stammered.

"Have you or have you not?"

"Yes, but—but"—

"Then you took the letter?"

"Oh, I couldn't have done it—I never did it!" she wailed.

"Then where did the bill come from?"

"I can't tell you. Please don't ask me anything more. I didn't take the Penfield letter, but I—I can't tell you!"

"Poor girl!" sighed the justice as he walked across to the hotel with the inspector.

"I've got a duty to do," was the reply.

When the inspector had reached his room he sat down and wrote out his resignation, to take immediate effect. Some one else would have to arrest Mary Williams. It was the hardest blow of his life. He had been thinking of her for a month past as his wife. It seemed impossible that she could be guilty, and yet the inspector sent on to take his place must arrest her on her own showing. The man was feeling

"Well, then, give it, and go along with you."

"The reason I am opposed to capital punishment, your honor, is that my old mammy taught me it were a sin to kill anything that wasn't fittin' to eat."

#### So Near.

Near Vineland, N. J., there lived a German farmer who brewed his own beer, the superiority of which he was continually proclaiming, though no other person ever enjoyed an opportunity of testing its merits. A young neighbor made a wager that he could trick the farmer into giving him a taste of the much vaunted drink. The youth visited the German one Sunday afternoon and the conversation was deftly steered around to home brewed beer. The young man boasted that his father brewed beer that could not be equaled. The farmer at once vehemently ordered up a mug of his own favorite brew. When it appeared the German raised it to his lips, and the other hand pressing his stomach, drank every drop without taking breath. Then, holding the empty mug to the disappointed young fellow, he said gravely:

"You say your father's beer iss go better as mine! Joost schnell dot mug!"—Lippincott's Magazine.

#### Scientific Language.

"No wonder," said the poet, "that no one cares to read the works of Haeckel, Darwin, Spencer, Huxley and so on. These men have much to say, but they don't know how to say it. They have never taken the time to learn to write." He drew his notebook from his pocket. "When Professor Thompson," he resumed, "hit on a new variety of cathode rays, he announced his discovery in these terms: 'Of an orthocathodic character, a deflectable fluorescencent excitant; of a paracathodic character, a deflectable fluorescencent nonexcitant; of a diacathodic character, a nondeflectable fluorescencent nonexcitant; of an isocathodic character, a deflectable, nonfluorescencent nonexcitant'—and so on for forty or fifty pages."

#### Badly Placed.

Lawley (expert shorthand reporter)—I say, James, the boy from the newspaper office has called for the report of that lecture. Is it finished?

James (a novice)—All but a short sentence in the middle of it, and I can't for the life of me make out from my notes what it is.

Lawley—Oh, just put in "great applause" and let it go.

James acts on the suggestion, and the lecture is sent for publication with the doctored part reading, "Friends, I will detain you but a few moments longer." (Great applause.)—London Express.

#### Ignorance Might Have Been Bliss.

"A lady on a sultry summer afternoon called on some friends," said a lecturer. "The talk buzzed along briskly, fans waved and the daughter of the house kept twitching uncomfortably, frowning and making little smothered exclamations of annoyance. Finally with an impatient sigh she rose and left the room."

"Your daughter," said the visitor, "seems to be suffering from the heat."

"No," said the hostess. "She is just back home from college, and she is suffering from the family grammar."—Milwaukee Sentinel.

#### Wise Man.

"I'll take that," said the man, indicating a silver mounted hand glass, "and I want you to engrave on it 'From J. J. B. to Phyllis.'"

"Very well," replied the salesman, "we'll put it on the back here"—

"Oh, no. Put it around the edge on the front. I want her to see it."—Philadelphia Ledger.

## Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

### Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance!

Respectfully yours,

[NATHANIEL W. REID.]

Enterprise P. O.]

# Fruit-a-tives

OR "FRUIT LIVER TABLETS"

Fruit-a-tives will cure the worst case of Chronic Constipation and Biliousness.

Because Fruit-a-tives are the true liver tonic. They strengthen and invigorate the liver—make the liver give up enough bile to move the bowels regularly. The bile is nature's laxative.

Fruit-a-tives are the finest Kidney and Bladder Remedy in the world.

Fruit-a-tives reduce inflammation and congestion—relieve the over-supply of blood—enable the kidneys to rid the system of waste—and thus prevent the formation of uric acid. Fruit-a-tives take away that pain in the back—and quickly cure irritated Bladder.

Fruit-a-tives completely cure Headaches and Rheumatism.

Headaches and Rheumatism both mean poisoned blood. Either the skin, kidneys or bowels are not ridding the system of waste matter. Fruit-a-tives invigorate and strengthen these organs—start up healthy, normal action—rid the system of poisons—and purify and enrich the blood. That means away with Headaches and Rheumatism.

Fruit-a-tives are the ideal tonic for everyone.

Fruit-a-tives build up, strengthen, invigorate. They sharpen the appetite—steady the nerves—enable one to sleep well—and keep the whole system in perfect health. They are fruit juices, concentrated and combined with tonics and internal antiseptics.

See a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA.

## Rio de Janeiro English.

A firm in Rio de Janeiro recently sent out the following advertisement about olive oil: "Our olives oils have guaranteed of fits quality. Diligently fabricated and filtrated. The consumer will find with them the good taste and perfect preservation. For to escape to any counterfeits is necessary to require on any bottles this contremare deposed conformably to the law. The corks and the boxes have all marked with the fire."

## His Part.

In the English "Cap and Gown" is told the following story of Oxford life. It is called "Hauled by the Dean." The dean, who had rebuked Mr. Brown for having assisted at the ducking of a fellow student, asks the offender, "What part did you take in this disgraceful affair?" and Mr. Brown replies meekly, "The left leg, sir."

## A Facetious Convict.

"This confinement," said the long faced prison visitor, "must distress you greatly." "Yes," replied the facetious convict, "I find the prison bars grating." "Ah, life to you is a failure." "Yes. It's nothing but a cell."

## No Chance to Grow.

Mrs. Newweld—Dear me, these eggs are very small! Grocer—They are indeed, mum, and I'm sure I don't know why. Mrs. Newweld—Oh, I dare say it's because you take them out of the nest too soon.

If your spirits are low, do something; and, if you have been doing something, do something different.—R. F. Hale.

## BOTH WELL INFORMED.

An Interchange of Compliments Between Grant and Lee.

Toward the end of the war between the states the value of a well organized scout service came to be fully appreciated by the leaders of both armies. Perhaps no commanders of modern times were better served in this respect than General Grant and General Lee. Both were kept informed daily as to nearly everything that went on within the enemy's lines.

General Gordon relates that one morning toward the end of the long conflict, when the Confederates, officers and men alike, were reduced to unpleasant straits for food, a captain from the Union headquarters went, under a flag of truce, with a communication to General Lee concerning the exchange of prisoners.

"General Lee," said the captain, with a smile, after delivering his message, "General Grant sends you his personal compliments and bids me assure you that he knows exactly what you had for breakfast this morning."

"General Grant must be misinformed as to this," replied General Lee, surveying the message bearer with a sad smile. "General Grant is a generous man, and if he had known with what a breakfast I had to content myself he would certainly have sent me half of his. But give him my compliments," he continued, with a sudden twinkle, "and say that although I do not know as to his breakfast I have full particulars concerning his dinner last night." —Youth's Companion.

## The Only One in His Class.

Mrs. Grottox—I don't send Reggie to a public school because he is so unlike other boys. He has a private tutor of his own. Mr. Blunt—I see. Your boy is, as you might say, in a class by himself.—New York Herald.

## Too Swift.

"Do you think the opportunity ever seeks the man?"

"Yes, but some men go at such a rapid pace it can't catch up with them."—Detroit Free Press.

## The Pace of the Camel.

As a matter of fact, and in spite of its having carried Mohammed in four leaps from Jerusalem to Mecca, seven miles an hour is the camel's limit, nor can it maintain this rate over two hours. Its usual speed is five miles an hour—a slow pace, beyond which it is dangerous to urge it, lest, as Asiatics say, it might break its heart and die literally on the spot. When a camel is pressed beyond this speed and is spent it kneels down, and not all the wolves in Asia will make it budge again. The camel remains where it kneels, and where it kneels it dies. A fire under its nose is useless.—Times of India.

## He Had His Wish.

Carl Schurz had no consideration for hypocrites or pretenders. Upon literary pretenders he was particularly severe. At a dinner in New York one night a man of wealth who had written a volume of poems sneered at politics.

"I wouldn't give a pica-yune," he said, "for a senatorship or a cabinet office. To be even president wouldn't tempt me. I, for my part, would rather be known any day as a third rate poet than a first rate statesman."

"Well, aren't you?" said Mr. Schurz.

## BY-LAW NUMBER

OF THE MUNICIPAL CORPORATION OF THE TOWNSHIP OF RICHMOND.

A By-Law to provide for the completing and repairing of certain drainage work provided for by By-Law No. 291 of the said Municipal Corporation in pursuance of the report of the Engineer, as embodied in the said By-Law.

Provisionally adopted the Sixth day of August, A. D. 1906.

WHEREAS pursuant to By-Law No. 291 of the Municipal Corporation of the Township of Richmond constructed that certain drain known as Otter Creek Drain for the benefit of the land therein described.

AND WHEREAS by mandamus issued out of the High Court of Justice the said Municipal Corporation have been directed to repair and maintain the said drain.

AND WHEREAS, thereupon under the terms of the said By-Law Number 291, the said Council has procured an examination to be made by Frederick Fraser Miller, Civil Engineer, being a person competent for such purpose, of the said area proposed to be drained and the means suggested for the drainage thereof, and of other lands and roads liable to assessment under the Municipal Drainage Act, and has also procured specifications and estimates of the drainage work to be made by the said Frederick Fraser Miller and an assessment to be made by him of the lands and roads to be benefited by such drainage work and of other lands and roads liable for contribution thereto, stating as nearly as he can the proportion of benefit, outlay liability and injurious liability, which, in his opinion will be derived or incurred in consequence of such drainage work by every road and lot or portion of lot, the said assessment so made being the assessment hereinafter by this By-Law enacted to be assessed and levied upon the roads and lots, or parts of lots hereinafter in that behalf specially set forth and described; and the report of the said Frederick Fraser Miller in respect thereof, and of the said drainage work being as follows:—

To the Reeve and Council of the Township of Richmond.

Gentlemen:—Re. Otter Creek Drainage Works. I have the honor to report to you that I have examined the Creek and ditches and that the following work will have to be done to make the work conform to the original report, known as By-Law No. 291 of the Township of Richmond.

1. The Creek will have to be thoroughly cleaned out to remove the obstructions to the free flow of the water. These obstructions consist of sand bars, stones, poles, etc. also remains of McLaughlin bridge abutments and a couple of bridges which are not high enough and have not span enough and will therefore have to be changed so as to give a clear twenty feet of water.

2. Considerable work will have to be done along the road allowance between the 7th and 8th Concessions consisting of about 74 rods of new ditch, a couple of culverts and about 40 rods of old ditch will have to be cleaned out.

3. The ditches along the south and east sides of the swamp from the above named Concession road north easterly and on the north side of the swamp from the spring north easterly will all have to be deepened and widened to become operative.

4. I estimate that the cost of the above work will be \$680.00 or at the rate of \$1.75 per acre of land benefited as per original By-Law No. 291 in respect to said drainage work and the whole assessment is for benefit liability.

5. I have, in the Schedule hereunder written, assessed the benefit liability of the said drainage works against the several parcels of land liable therefor.

DATED at Nanapace this 24th day of July A. D. 1906.

F. F. MILLER,  
Engineer.

The following Schedule covers description of land, number of acres benefited and total cost assessed upon each.

TOTAL ASSESSED BENEFIT LIABILITY

## WOODEN CHECKS.

Tallies Were Used in England Until the Year 1834.

Wooden checks are the sort of thing one would expect to find used in China or Tibet, but, as a matter of fact, they were used in England from the earliest times down to as late as 1834.

Tallies, as they were called, were made out of a curved piece of hazel, notches being cut along the edges to stand for a certain sum of money. The tally was then sawed half through below the lowest notch and the notched part split into two pieces, on both of which the notches appeared.

These pieces served as check and counterfoil, the latter being always the larger piece with the unnotched end as a kind of handle. The smaller piece was then taken by the payee, the larger sent to the person on whom the check was drawn, generally a collector of customs or other revenues, public or private. He would honor the check on finding that the two pieces fitted and had the amount credited to him by the drawer on returning them together to him. Thus were the great danger and expense of transporting large sums of coin avoided.

Forgery of a tally was obviously impossible unless a new counterfoil could be substituted, and if stolen in the ordinary way it would be of little use to the thief, for, unlike our checks, there was nothing to show on whom it was drawn.

There are still a good many tallies in existence, but the majority were burned in the great fire which destroyed the old houses of parliament. The remainder are chiefly to be found in the public record office and no doubt also in the muniment rooms of great landowners.

## THE DIVINE NAME.

Ineffable Word That Is Never Used by Many Israelites.

An eminent rabbi has given his view of the ancient Jewish rendering of the name of the Deity. He says that the term "Jehovah," the ineffable tetragrammaton, is never pronounced by many Israelites. They use the word "Adonoi," which signifies "the Lord." The translators of the Bible followed this custom, rendering the word "Jehovah" as "Lord." In ancient times the Pharisees replaced the tetragrammaton by Shem. They used "Shemo," which is also Biblical, as the sacred name, and this name is yet retained to some extent among the Jews. But it would appear from passages in the Psalms that Adonoi, or Lord, for Jehovah was more ancient even than the times of the Pharisees. It thus occurs eight times in Psalm lxxiv. It also appears in the book of Exodus, where "Jehovah" had been used in the original Hebrew. This substitution would seem to be older than any other, and it is yet common among all Jews.

The rabbi says he has found that the ancient translations testify in favor of "Adonoi."

Looking at the English translation of the Old Testament, it will be found that the name Jehovah appears in the books of Genesis, Exodus, Judges, the Psalms and Isaiah. It is not in the New Testament.

## The Advice of Experience.

It has sometimes been remarked by the student of child life that the only child learns to read sooner than the child belonging to a large family. There may or may not be psychological reasons for this, but the story of the small boy of five who was struggling with his alphabet blocks for the first time may be enlightening to those who wish

## LEIBIG'S FIT CURE

# RICHMOND MINUTES

Selby, July 16th 1906.

The Council met at Selby.

The members present were Messrs Z. A. Grooms, Fred Sexsmith, Chas. Anderson, E. R. Sills, and Alf. McCutcheon.

The Reeve presiding the Minutes of the last meeting were read and confirmed.

A notice was served on the Council by Charles Maracle in reference to a road leading to his house on lot 19 in the 2nd concession. Laid on the table.

Moved by Fred Sexsmith and les by Charles Anderson, that the complaint of Charles Maracle, Re., a road leading to his house on lot 19 in the 2nd concession be left in the hands of the Reeve for adjustment. Carried.

Moved by Fred Sexsmith, seconded by E. R. Sills that the dispute in reference to the business tax of Fred Hall in Roblin be left in the hands of Charles Anderson. Carried.

Moved by Chas. Anderson and seconded by E. R. Sills, that the council reconsider By law No 523 appointing E. F. Miller Engineer under the Municipal Drainage Act and Amendments thereof. Carried.

Moved by Fred Sexsmith and seconded by Alf. McCutcheon that By law 523 be and is hereby repealed. Carried.

The By law appointing F. F. Miller Engineer under the Municipal Drainage Act and Amendments thereto was read the first time.

The Council adjourned for the second reading of the above By law.

The Council resumed.

Moved by Charles Anderson and seconded by A. McCutcheon that the By law appointing F. F. Miller Engineer under the Municipal Drainage Act and Amendments thereto be read a second time. Carried.

Moved and Seconded that the Council Adjourn for the third reading of the By law appointing F. F. Miller Engineer. Carried.

Moved by Chas. Anderson and seconded by E. R. Sills that Councillor McCutcheon be authorized to examine the work done on the Colonization road in 11th concession and settle the account for the same, if satisfactory. Carried.

The Council resumed for the third reading on the By law.

Moved by Chas. Anderson and seconded by Fred Sexsmith, that the By law appointing F. F. Miller Engineer under the Municipal Drainage Act and Amendments thereto be read the third and last time and numbered 524 and be signed by the Reeve and Clerk and the Corporation Seal attached thereto. Carried.

Moved by Fred Sexsmith and seconded by Chas. Anderson that the following accounts be paid, R. Herrington 5 days work in gravel pit \$7.50, Z. A. Grooms \$7.98 for 114 loads of gravel for road Sections Nos. 6 and 7 order of the Pathmasters in Said road Sections, Mrs. Maxwell to aid \$5.00. Carried.

Moved by Alf. McCutcheon and seconded by E. R. Sills That the following accounts be paid, Good Roads Machinery Company \$8.60, Dominion Rock Drill Company \$31.50, William Dolan wood for crusher \$6.00. Carried.

The Council adjourned to meet at the call of the Reeve.

A. WINTERS.

Richmond August 6th 1906.

The Council met at Selby.

The members present were Messrs Z. A. Grooms and Councillors Fred Sexsmith, Chas. Anderson, E. R. Sills, Alf. McCutcheon.

The Reeve presiding.

The minutes of the last meeting were read and confirmed.

A notice was received from John Doyle Re the cleaning out of No 1 drain. Laid on the table.

# "PE-RU-NA WORKED WONDERS"

Says a Well-Known Canadian.

MR. P. BRIEN.

Mr. P. Brien, Accountant, residing at 23 Third street, Limoilou, Quebec, writes:

"The fatigues entailed by my duties as accountant began to weaken my system about a year ago. I felt that I would not long be able to withstand the severe strain upon my nerves, as, a thing unknown to me before, I would long for office hours to be over in order to rest.

"I gradually grew weaker and a few months later my sight was impaired. I then broke down completely and was obliged to take my bed. I was also suffering from palpitation of the heart.

"After a few weeks' treatment by a local physician, I was in the same critical condition, and as the doctor held out no great prospects for me, I decided to experiment on myself.

"I took several remedies advertised as tonics, but did not derive any benefit.

"Peruna was then given a trial, and before I had taken it a week I felt my condition improving. After a few weeks more had elapsed, during which time I followed the directions carefully, my shattered nervous system became firmer, my sight stronger and I hoped to be out soon again.

"My expectations were realized, for in three weeks I assumed my duties as accountant at the office.

"Peruna certainly worked wonders on my system, and for persons run-down from overwork, I believe it is the most efficacious tonic."

## Assistant War Correspondent Recommends Pe-ru-na.

Mr. H. B. Manley, assistant War Correspondent during the War in China, care "Black and White," 688 Craig St., Montreal, Canada, writes:

"When a man travels in extremely hot or cold climates, he realizes how valuable a friend he has if he carries a bottle of Peruna.

"I know of no article in my traveling outfit which I have learned to praise higher.

"If you are suffering with the extreme heat, Peruna restores you, or if

you are afflicted with a cold, la grippe or bronchitis, Peruna restores you in a short time.

"Or if you suffer with sleeplessness or if your appetite is poor, again Peruna acts as a good, true friend and is the tonic needed.

"I have tried it for months and am only too glad to acknowledge it as a true, loyal standby in times of trouble. I do not hesitate to recommend it to all."

For free medical advice, address Dr. S. B. Hartman, President of the Hartman Sanitarium, Columbus, Ohio.

**Pe-ru-na is a Systemic Catarrh Remedy, Especially Adapted to Cases of Nervous Prostration, Caused By Overwork, Mental Strain Or Extreme Summer Heat.**

IN latitudes where warm weather is of long continuance, the inhabitants become more or less accustomed to it.

In Temperate Zones, however, where the change from winter to summer is great, the system is sometimes poorly prepared to meet the exigencies of hot weather. This is the cause of much sickness.

Stomach catarrh, indigestion and dyspepsia are not among the least of summer ailments.

When the digestion is disturbed, the assimilation is also affected, and as a result the body does not receive the nourishment it should. Lassitude, weakness, brain fog, loss of flesh and nervous prostration are the natural results.

INDIGESTION CAUSES WEAKNESS.

What is needed is a remedy that will restore the digestive organs to their normal condition.

Such a remedy has been found in Peruna. It has proven itself of priceless value in thousands of cases of this kind.

Its action has been seemingly miraculous in restoring some patients who had given up all hope of recovery.

But there is nothing strange about Peruna's action. It simply tones up the mucous membranes of the organs involved restoring them to their normal conditions and leaving Nature to perform her duties unhindered.

That person who has sound, healthy mucous membranes lining the entire digestive tract is well-guarded against the usual summer ailments.

Peruna is the means whereby to attain this most desirable condition.

If you suffer from any of the above-mentioned symptoms, try a bottle of Peruna.

One bottle of this remedy is sufficient to convince any one of its merit as a safe and reliable remedy for all catarrhal conditions.

We have many letters of gratitude received from persons who have experienced its benefits.

These testimonials are proof to us that Peruna has not failed in the mission for which it was intended, that of relieving suffering and restoring health.

PE-RU-NA'S BENEFICIAL EFFECT.

## A LOBSTER'S LEGS.

The Two Front Ones Are Different From the Other Eight.

A lobster's legs, all told, are ten in number, but only eight of these are largely used for walking. The front pair, or big claws, have been specialized, as in the crab and most others of the higher crustaceans, into prehensile organs for catching and crushing the prey. Their use is obvious. Lobsters feed largely off mollusks of various sorts and other hard shelled marine animals. In order to be able to break

## CONSCIENTIOUS ROGUES.

The Big and Formidable Sinners Are Gray of Soul, Not Black.

No paradox is it, but a demonstrable fact, that in a highly articulate society the gravest harms are inflicted not by the worst men, but by those with virtues enough to boost them into some coin of vantage. The boss who sells out the town and delivers the poor over to filth, disease and the powers that prey owes his chance to his engaging good fellowship and big heartedness. Some of the most dazzling careers of fraud have behind them love and respect.

and the water is left clear, tasteless and colorless, but the dissolved sewage is still present and in it may lurk billions of typhoid germs.

"Let those who complain about the lack of filters just turn in and boil their water. A cent's worth of fire will purify a gallon of water better than a \$10,000,000 plant could do it."—St. Louis Globe-Democrat.

The Curious Sensitiveness.

"Sensitiveness is a curious trouble," says a physician. "It is probably due to the disturbance caused by the me-

The Reeve presiding. The minutes of the last meeting were read and confirmed.

A notice was received from John Doyle Re the cleaning out of No 1 drain. Laid on the table.

A By-law was introduced and got its first reading for the closing of the road running east and west across lot number 5 in the 2d concession of Richmond between the Grand Trunk Railway and the Belleville Road.

Moved by Chas. Anderson and seconded by Fred Sexsmith that whereas Mr. John English having appeared before the Council in reference to the claim of Albert Reid for damages for flooding of his lands by certain drainage works, Be it therefore resolved that the matter be referred to the Reeve and Councillor Sills to lay before the Township Solicitor for advice upon the matter, and report to this Council. Carried.

Moved by Chas. Anderson and seconded by A. McCutcheon that whereas there appears to have been an error in a resolution by this council at its June Session containing an item for the remitting of the business tax of Fred Hall and whereas it has become known to this Council that the said Fred Hall has not asked to have the same remitted, Be it therefore resolved that the said item of the resolution be and is hereby repealed. Carried.

The By-law for the crossing of the road running across lot No 5 concession of Richmond between the Grand Trunk Railway and the Belleville road was read the second time and that the third reading be deferred until the next meeting of the Council. Carried.

The By-law for the assessing and completing and repairing the Otter creek Drainage works was read the first time.

Moved by E. R. Sills and seconded by A. McCutcheon that the following accounts be paid. David Martin \$8.33 for 119 loads of gravel for Road Section No 18, E. B. Bell \$11.90 for 170 loads of gravel for Section No 16, John Penny 115 loads of gravel \$8.05 for road Section No 15, E. B. Bell \$2.00 for stringers for a bridge in Section No 73, Clark Pringle \$13.00 for work on roads in the 11th concession, Peter Doyle \$3.45 for repairs for crusher, Fred Sexsmith \$19.00 for to pay Township's share of opening up a drain in Selby. Carried.

The Council adjourned to meet on Monday the 10th day of September at the of 10 o'clock in the forenoon.

A. WINTERS.  
Clerk

## BILEANS CURE A MAN OF SEVENTY.

Mr. Thos. Plunkett, of 172 Manning avenue, Toronto, says:

"For three or four years I suffered from constipation and piles. I also had very severe headaches. All kinds of remedies were recommended to me, but in vain. Then I began to have twinges of rheumatism in my limbs, and became unable to sleep.

"I saw a report about Bileans, and tried a box. They did me so much good that I persevered with them and I am glad to say they have now cured me. The headaches are cured, I have no more trouble from constipation, my rheumatism is better, too and I can sleep at nights again. I have lived in Toronto over 60 years, am over 70 years old, and will be glad to tell anyone my experience."

For constipation, piles, dizziness, loss of appetite, indigestion, "summer lag" debility, etc., Bileans are a certain cure, 50 cents a box. All druggists.

The C. P. R. directors met at Montreal yesterday and authorized the usual dividends. The statement for the year ended June 30 showed gross earnings of \$61,609,758; net \$22,973,313.

the higher crustaceans, into prehistoric organs for catching and crushing the prey. Their use is obvious. Lobsters feed largely off mollusks of various sorts and other hard shelled marine animals. In order to be able to break or crush the shells of these and so to get at the softer flesh within they have acquired such large and very muscular nippers or pinchers. That is not all, however. Not only have the two front legs been differentiated and specialized from the eight others in this manner, but also, by a rare exception to the symmetry of the body, the right claw has been specialized from the left, each being intended to perform a distinct function. One is a scissors, the other is a mill; one is a cutter, the other is a cracker.

As a rule, the right claw is the slenderer and longer. It has toothlike projections or serrated edges on its nipping faces, and it is rather adapted for biting and severing than for crushing or grinding. The left claw, on the other hand, is usually thicker, heavier and rounder. Its muscles are more powerful, and in place of sharp teeth it has blunt tubercles, or hammers, of different sizes. It acts, in fact, more like a nutcracker than like teeth or a saw. It is a smashing organ. Nevertheless you will find it interesting to observe, by noting the lobsters served to you at table, that this differentiation has hardly as yet become quite constant, for sometimes it is the right claw that displays the hammerlike nutcracker type and the left that acts as nipper and biter, while sometimes no difference occurs at all, both claws alike being sharp toothed or blunt hammered in the same specimen.

## THE PRIBILOF ISLANDS.

Where No White Man May Land Unless He Has a Permit.

Unalaska resembles other northern stations, having warehouses, docks, the inevitable Greek church and a score of wooden cabins. Whalers leave here for the arctic regions.

Dutch Harbor is a station for our revenue fleet. There is much coming and going of ships of all nations. There is quite a formidable fleet, and only two ships out of twelve carry colors of the same country.

Just before entering the harbor one notices a detached rock high against the side of the cliff. It bears a striking resemblance to a Russian priest in full robes. Touched by the sunset light, he seems to stand blessing the harbor.

Sailing north out into Bering sea, one looks back at the desolate, silent, treeless islands, which seem to wall the edge of the world. Hundreds of miles west they run toward Vladivostok.

Two hundred and forty miles north of Unalaska are the Pribilof islands, not large, but the greatest seal islands in the world. There are many fur seals around the shores of Bering sea and the Aleutian islands, but the great mass of them are bred on the Pribilof group. No white man is permitted to land on these breeding grounds without a permit signed by the secretary of the treasury of the United States.—Outdoor Life.

## Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

F. J. CHENEY & CO, Toledo, O.

Sold by all Druggists, 75c. Take Hall's Catarrh Pills for constipation.

cough or vantage. The boss who seizes out the town and delivers the poor over to filth, disease and the powers that prey owes his chance to his engaging good fellowship and big heartedness. Some of the most dazzling careers of fraud have behind them long and reassuring records of probity, which have served to bait the trap of villainy.

Not that these decoy virtues are counterfeited. They are, in fact, so genuine that often the stalwart sinner perseveres in the virtue that has lifted him into the high places he abuses. The legislator conscientiously returns the boodle when he finds he cannot "deliver the goods." The boss stands by his fibbers to his own hurt. The lobbying lawyer is faithful to his client. The corrupting corporation president is loyal to his stockholders. The bought-and-sold editor never quite overcomes his craft instinct to print "all the news there is."

In a word, the big and formidable sinners are gray of soul, but not black, so that chastisement according to their character rather than according to their deeds lets them off far too easily.—E. A. Ross in Atlantic.

## FIRE THE BEST FILTER.

Boiling Water the Surest Way to Get Pure Water.

"All this talk about the need of filters, about people dying for lack of filtered water, amuses me," said a chemist. "For filtered water isn't necessarily pure water. Boiled water is a hundred times better."

"A filter, you see, does not free water from things dissolved in it, but only from things floating in it. For instance, if you mix a quart of whisky in a gallon of water and then filter the mixture it will come out colorless, the floating color particles having been left behind, but this colorless fluid will be quite as capable of intoxicating you now as it was before, for none of its dissolved alcohol will have disappeared."

"So with water that is polluted with sewage. All the undissolved portions of the sewage are removed by filtration

Globe-Democrat.

## The Curious Senselessness.

"Senselessness is a curious trouble," says a physician. "It is probably due to the disturbance caused by the motion of the ship to the little organs that govern the sense of equilibrium. In the inner ear are three little semicircular canals. In movement in any plane the fluid in these canals disturbs and telegraphs the sensation to the brain, which is then able to control the balance of the whole. By the motion of a ship, this delicate apparatus of the canal system is, it is suggested, thrown out of gear and wildly telegraphs wrong messages to the brain. And that portion of the brain is intimately connected with the nerve that controls the happenings in the region whence the trouble arises. The whole system, in brief, is short circuited."

## Artificial Halos or "Sun Dogs."

An experiment which illustrates in a very curious manner the actual philosophy of the formation of halos or "sandogs" is performed as follows: Take a solution of alum and spread a few drops of it over a pane of glass. It will readily crystallize in small, flat octahedrons, scarcely visible to the eye. When this pane of prepared glass is held between the observer and the sun or even a candle (with eyes very close to the smooth side of the glass) there will be seen three different but distinct and beautiful halos, each at a different distance from the luminous body.

## Talking on a High Level.

We once heard Mr. Morley in a linguistic pride delightful as it is rare say that when he and Mr. Gladstone sat down to talk both unconsciously stiffened their backs and looked to their periods.—London Outlook.

## Refrigerators and Hammocks.

There is a lot of warm weather yet before us and it will pay you to improve this offer.

# THE WORK THAT ENDURES

## The Spirit of Divine Beauty Gives Eternal Life to Our Labors.

"And establish thou the works of our hands upon us."—Ps. xc. 17.

In every man who lifts his eyes and heart above the road on which he walks lies the deep longing for a share in eternal things. He dwells in an atmosphere of the transitory; hourly does nature remind him of the insistent lessons, all flesh is grass and all the goodness thereof as the flower of the field. But he is the child of eternity and looks away to find somewhere that which shall not wax old, change, or pass away.

He spends his years in toil, labor that seems as futile as a child's building of block castles. He sees in the melancholy ruins of the past the ease with which the greatest achievements are forgotten. Yet still, for all the centuries of vain endeavor, there burns in his breast the passionate longing to do some work that shall last.

This is one of the motives that built pyramids, led hosts, wrote books, and sang great songs; this, with the larger recognition of the fact that we are under some great moral obligation, some law written on the fleshy tablets of the heart, more imperative than any on stone, to do the best we can with all ourselves, accounts for a large part of human progress.

This desire to accomplish things that shall endure is

### A RIGHT PASSION.

It lifts above the lust for fame, the ambition to carve out petty and meaningless names on the skies; it sets the work above the reward; it makes a man determine to do the work that will stand whether its worth be recognized now or later, whether the reward come now or consist only in the permanency of the work.

But how shall one find the task that shall produce an enduring piece of work? How may a man know that his work is the best he can do with his powers? What are the works that abide, standing firm in all the passing procession? What workers of the long ago have so wrought that their work abides to our day?

To answer that question a man comes

to realize that the aspiration preceding the text answers the question. It is the spirit of divine beauty that gives eternal life to our labors, the beauty of service and of reverence. The builders of their own monuments have been forgotten, but the doers of true ministry for others are remembered.

There are those who, for glory and renown, build their names; but their names have perished. There have been the lowly lives, the hearts kept to some height of sacrifice, some peak of love, that have done some deed perhaps small in itself but magnified manifold by its motive, and these who never stop to think of glory, these humble ones the world never will forget.

### ABOVE THE TIDES OF TIME.

The storms of criticism, the changes of our fads and philosophies, the towers of sacrifice, of deeds made great by love, of the ministry of men, stand firm and imperishable. Steel and stone come alike at last to dust, but that which is wrought into life, into character, endures.

This is the day when men are measured by their ability to build great fortunes, when we are likely to become dissatisfied with our own lives, because we cannot do these great works, cannot all be known as the mighty men of our times.

Let no man be so foolish as to turn from the work that can be established, that is enduring, to this cloud's play of piling up yellow dirt. Here lies the satisfaction of the teacher, the true preacher, and of all who give their lives in service to one another or in the service of ideals and truth; that they alone build in the enduring material.

And every life that is given away, every life that follows the true light, the light of love, that seeks the best in thoughts and ideals, in deeds that cost, every life lived as seeing him who is invisible, every life that serves the lives about it, has established the work of its hands, has founded the life that is eternal, the crown of glory that does not fade and cannot be lost.

HENRY F. COPE.

## THE S. S. LESSON

### INTERNATIONAL LESSON,

AUG. 19.

Lesson VIII. The Judge, The Pharisee, and The Publican. Golden

Text: Luke 18. 13.

### THE LESSON WORD STUDIES.

Note.—The Text of the Revised Version is used as a basis for these Word Studies.

Intervening Events. — Following the three parables of grace, of which the third formed the text of our last lesson, Luke records in chapter 16, of his gospel, two parables of Jesus on the use of wealth. They are the Parable of the Unjust Steward, and the Parable of the Rich Man and Lazarus. The first of these Jesus spoke to his disciples, though with intended reference to the Pharisees, while the second was addressed directly to the Pharisees themselves. Both parables teach that the possession of riches involves not sin but responsibility and danger. In Luke 17. 1-10 are grouped a number of disconnected sayings of Jesus. After verse

lecting much more than they paid to their superiors. Hence the publicans, as a class, came to be despised by the people.

11. I thank thee, that I am not.—The prayer of this man reveals the typical spirit of the Pharisee who regarded the rest of men as extortioners, unjust, adulterers, and evil men of every sort.

12. Fast twice in the week.—On Mondays and Thursdays, by rabbinical rule specially appointed days for fasting. It was supposed that Moses had ascended the mountain on the fifth day, coming down again on the second day of the week, and in commemoration of this tradition these two days were set apart.

13. Afar off.—Far removed from the Pharisee, whom the man in his humility regarded as more worthy of the privilege of the sanctuary than himself.

14. Justified rather than the other.—By direct implication Christ here claims a knowledge of the secrets of men's hearts and also of God's judgments.

For every one that exalteth himself shall be humbled; but he that humbleth himself shall be exalted.—On another occasion Jesus uses exactly the same expression. Compare Luke 14: 11. We must remember that the important parables of Jesus were doubtless oft repeated in the course of his public ministry.

## MANY MYSTERIES BURIED

### PEOPLE WHO ARE LAID IN NAMELESS GRAVES.

#### Unfortunate Who Do Not Wish Their Friends To Know of Their End.

Who was "Marie Derval"? She was a woman who committed suicide in a London, England, hotel a little while ago. She left a letter, apologizing to the proprietor of the place for the trouble she was causing him, and nothing more. She died absolutely unknown. No friends came forward to claim her dead body, says Pearson's Weekly.

Not until she was buried did it transpire that "Marie Derval" was a Russian conspirator, who had betrayed her companions, and had fled for her life. She had been hunted from country to country, by the friends of those whom she had sold to prison and Siberia. Finally, hopeless of escaping the vengeance of her enemies, she had committed suicide, and had done all she could to die unknown, because she was unwilling that those who knew her should learn to what an end she had come.

Who has not read of "Mr. Nemo," the haunting character in Dickens's "Bleak House," who died under such peculiarly grim circumstances in a London garret? The man lay dead—dirty, neglected, utterly alone. No one could guess who he was until long afterwards, when it came out that he had been an officer in the Army, who had come to disgrace and poverty, and had done everything he could to die unknown, so that the world should never learn to what depths he had sunk. There has been at least one parallel to "Mr. Nemo" in real life.

#### FOR HIS DAUGHTER'S SAKE.

An officer, holding a high position in the service, was accused of a serious crime. He recognized that his own career was blasted, and that there was no hope for him. But he was willing to do anything to prevent his disgrace from darkening the life of his only child, a daughter, who was engaged to be married. And he knew that if he committed suicide openly there would be a scandal and a revelation of the truth.

So he ostensibly left England to travel in the East. Six months afterward it was given out that he had died in Cairo. But the authorities knew that he had done nothing of the sort. For the sake of the innocent girl the truth was hushed up.

But, shortly after the officer's disappearance, a man who seemed nothing but a friendless outcast was found, self-poisoned, in a London lodging-house frequented by the lowest and vilest. Nothing was found on him to show who he was. He was buried in a nameless grave, and the world never guessed his secret.

#### A DISSIPATED LIFE.

A remarkable case was that of a famous forger, whose real name it would not be fair to drag into light. When he was sent to prison his two little daughters were too young to understand the facts. They were brought up in ignorance of everything, and told that their father was dead. When the convict was released, after half a lifetime spent in prison, they were happily married.

He never went near them. For some years afterward he lived a dissipated, disreputable life under an assumed name. Frequently he was hard pushed, and could have obtained money from his daughters had he gone to them and told them who he was.

But he never did. And when at last he learned that he was suffering from an incurable disease, he destroyed everything that might have revealed his identity, and took to the streets as

## ELECTRICAL WONDERS

### SOME QUEER FACTS ABOUT WIRELESS TELEGRAPHY.

#### Why It Is Easier to Send a Message by Night Than by Day by This System.

In the efforts made to perfect the wireless telegraphic system many curious facts have come to light which have caused scientists and others a good deal of astonishment. It has, for instance, long been noticed that it is possible to send a wireless message twice the distance by night than it is by day. That this queer phenomenon is a fact has been proved without a doubt, and now experts are busy trying to find out the reason why. There are, it is authoritatively stated, two periods of time during every twenty-four hours when to send a message through the air is almost impossible. This is at sunrise and at sunset.

A good number of people—scientists and others—assert that there is much similarity between the human pulse and the Hertzian wave, and that just as the vitality of the human body is at its lowest ebb between midnight and 4 a.m., so is the power of the Hertzian wave weakest as the sun rises and sets. As is well known to everyone who has given any attention at all to wireless phenomena, it is easier to send a message on a foggy than a bright day, and Professor J. Erskine Murray, the celebrated expert, has stated that this is due to the fact that streams of electrified particles, resembling the cathode rays, are ejected from the sun.

#### WITH A VERY HIGH VELOCITY.

and that these streams penetrate the earth's atmosphere on the day side, electrifying it and making it more conductive. During the night the equilibrium becomes slowly restored, and about 5 a.m. there is a minimum of atmospheric electrification. The etheric impulses are therefore lost through dissipation during the daytime.

In conversation with Mr. Edison some time ago, the writer asked the great inventor if he considered wireless telegraphy as important and valuable as is claimed, and he replied that doubtless it would within a very short space of time be the universal means of communication at sea, but he did not think it would ever take the place of the submarine cable. This is a practical reply from the world's greatest scientist to those enthusiasts who declare that the day is fast approaching when wireless telegraphy will render submarine cables unnecessary. Mr. Edison further stated that soon it would be made compulsory by law that every vessel—both steam and sail—should carry some system of wireless telegraphy, and he believed it would be to the advantage of all if the system adopted was a universal one.

Wireless electricity, it is satisfactory to learn, is absolutely harmless, and, though you may be shocked to death by a telegraph or telephone wire, you may "monkey" with the Marconi invention with entire disregard for consequences. At a recent electrical exhibition Professor Ovington allowed 200,000 volts (termed, in scientific parlance, a "high frequency current") to pass through his body, and during the process

#### FELT NO EFFECTS WHATEVER.

This unique demonstration took place in Madison Square Garden, New York, where a wireless plant had been set up for the use and instruction of visitors. Messages were flashed from one end of the great hall to the other, and it was in order to prove his statement that wireless electricity was harmless that Professor Ovington offered to allow as many messages as were desired to pass through his body.

It is certain that if ever this world of ours gets into communication with the

though with intended reference to the Pharisees, while the second was addressed directly to the Pharisees themselves. Both parables teach the possession of riches involves not sin but responsibility and danger. In Luke 17, 1-40 are grouped a number of disconnected sayings of Jesus. After verse 10 should be inserted for purposes of chronological contiguity the visit of Jesus to Bethany and the raising of Lazarus recorded in John 11, 1-54. With verse 11 of the 17th chapter begins Luke's account of the last period of the Perea ministry. The first incident of this period recorded in the narrative is the healing of ten lepers (17, 11-19). The remainder of the chapter contains a discourse of Jesus on the coming of the Kingdom, which is closely connected, both in time and thought, with the first of the two parables in our present lesson.

Verse 1. Spoke a parable unto them.—That is, to his disciples, to whom were addressed the words of the preceding discourse (17, 1-37).

To the end that they ought always to pray and not to faint.—This is one of the few instances in which the intended teaching of the parable is indicated before the parable itself is given. This prefatory explanation also points out the connection in thought between the parable and the discourse preceding it; although the time of Christ's return to deliver his people (17, 30) is hidden from them, still they are not to cease praying for the coming of that deliverance.

2. A judge.—Probably a Gentile official.

Feared not God and regarded not man. Defied both divine judgment and public opinion. The Talmud refers in several places to such godless and wicked Gentile city officials.

3. A widow.—A type of defenselessness; a person without either a protector or coegee, or money to bribe the unrighteous judge.

Avenge me. Literally, do me justice, or vindicate my right from the meaning being "preserve me against the attacks" of mine adversary.

5. Test she.—Or, test at last by her coming she.

Wear me out, Gr., bruise. It is the personal discomfort of the continual annoyance, rather than any interest in the justice or needs of the case that prompts the unrighteous man to action.

6. And the Lord said.—Apparently there had been a pause during which time those who had heard the parable were permitted to reflect upon its meaning.

The unrighteous judge.—Gr., the judge of unrighteousness. The emphasis is on the word "unrighteous," the contrast being between this judge and the righteous judge of heaven and earth.

7. And yet he is long-suffering over them.—Or, and is he slow to punish on their behalf?

8. Then the Son of man cometh.—Here we have pointed out definitely a connection between this parable and the preceding discourse.

9. Shall he find faith.—Or, the faith. The use of the article in the original is significant. It is the essential, necessary, saving faith concerning which inquiry is made.

10. Unto certain who trusted in themselves.—There is no necessary, immediate chronological connection between the following parable and the one preceding, though doubtless both were spoken about the same time. There seems to be no connection in thought. At others.—Gr., the rest.

11. Went up.—The temple stood on the high promontory of Mount Moriah, the highest point in the city.

A publican.—A Roman collector or renter of taxes. It was customary for the Roman government to rent dependent provinces and countries to individuals, who reimbursed themselves by collecting taxes from the people. These men again subrented smaller districts to subordinate collectors who were called publicans. Such a system naturally brought with it extortion and cruelty on the part of tax collectors, who desired to amass a fortune by col-

lection. It is probable that on another occasion Jesus uses exactly the same expression. Compare Luke 14, 11. We must remember that the important parables of Jesus were doubtless oft repeated in the course of his public ministry.

## POSERS FOR PALE PUPILS

### SOME REMARKABLE QUESTIONS IN SCHOOL EXAMS.

#### College of Preceptors Seems to Believe That Children Are Well Informed.

The midsummer examination of the College of Preceptors has provoked a considerable amount of comment, says an English exchange. Some of the examination papers forwarded to us by various amazed correspondents may appear to others of our readers to assume a somewhat unusual amount of intelligence, as well as of knowledge, on the part of ten and eleven year old pupils.

Possibly other examination papers make equal demands on youth; but the following geographical questions in a paper for eleven and twelve year old candidates would strike several elder folk as "posers":

7. How is it that—
  - (a) There are so many old cathedral cities in the eastern half of England?
  - (b) The heaths round London (such as Blackheath) are now so famous for schools and were once notorious for highwaymen?
  - (c) The sites of most old Roman camps are now occupied by railway junctions?
  - (d) So many small articles (such as pins, pens, screws, watch springs, etc.) are made in the Birmingham district?
  - (e) The Broads teem with wild-fowl?

Five people out of six studying the French papers for children of 9-11, and for those of 11-12, would pronounce the former more difficult. Are the following grammar questions, following five French sentences in the junior paper, even readily comprehensible?

1. Change the French of sentences 1, 2 and 3 of Part I., beginning at Jean and ending at soleil, into the present tense, putting two girls, Emilie et Charlotte instead of Jean, and ville, which is feminine, instead of village. Be careful to alter all the words which agree with them.

2. Continue to write sentences 4 and 5 in French in the present tense, but let Emilie and Charlotte themselves tell this part of the story in the first person plural—that is to say, by using nous (we) instead of il and making all verbs, nouns, adjectives, etc., agree.

Take the first three sentences to be translated into French in the senior paper: "(1) Two little boys were playing in the garden; (2) They were called Jean and Louis. Jean was the elder; (3) Jean's father was a General in the army of the King."

And the first three sentences from the junior paper: "(1) If you lose your way in a wood, do not be foolish and cry, but think. (2) When the sun is shining about 12 o'clock, if you follow your shadow you are going north. (3) You have been taught this at school, and you know that our house lies to the north of the wood."

There can, of course, be no question which is the more difficult set of the two to translate; but why is the more difficult given to the younger children?

#### IN HER FAVOR.

Lady (at the registry office)—But I should not care to trust her with a baby. She is too small for a nurse.

Manageress—Her size, madame, we look upon as her greatest recommendation. You see, when she drops the baby, it hasn't very far to fall.

could have obtained money from his daughters had he gone to them and told them who he was.

But he never did. And when at last he learned that he was suffering from an incurable disease, he destroyed everything that might have revealed his identity, and took to the streets as a common tramp. He died in a casual ward, refusing to the end to tell who he was.

Vindictive malice was the motive for silence attributed to a man who died in the infirmary of a provincial prison some twenty years ago. He died of consumption, and would tell nothing about himself. It was certain that the name by which he was known was not his own.

#### A LOVE TRAGEDY.

But years before two sailors had quarrelled in mid-ocean, and one had knocked the other overboard, and had been sent to penal servitude for life in consequence.

And some people believed that the supposed "dead" man had been rescued, had stolen back to England, and deliberately made up his mind to live and die unknown so that the other man, whom he hated venomously, should never be proved innocent, and should continue to eat his heart out in prison.

The death of one of these "unknowns" concealed a love-tragedy. A young country squire, whose life seemed full of every bright prospect, married a pretty but poor girl. Scarcely had they returned from their honeymoon, however, when he had to consult a doctor. With a staggering shock of surprise he learned that he was dying. And he had but a life interest in his property. At his death all was to go to a distant cousin, and his wife would be a beggar.

He gave out that he was going to South America on business, keeping the state of his health to himself. Instead, his wife's brother went, and for years sent letters home which purported to come from the dead man. For he was dead. He had gone secretly to London, and there breathed his last among strangers, nameless and unknown.

#### JERUSALEM DISCOVERY.

##### Ancient Roman Rock-hewn Prisons Unearthed by Archaeologists.

A remarkable archaeological discovery is reported from Jerusalem. Some thirty years ago certain subterranean chambers near the Ecce Homo Chapel in the Via Dolorosa were discovered, but only partly explored by Professor Clermont-Ganneau, the famous archaeologist. Recently the Greeks, while clearing out these chambers, have discovered others. Their researches point to these being ancient Roman rock-hewn prisons, similar to the well-known Latolae of Syracuse, in Sicily.

In one of these newly-discovered chambers is a stone slab, about three feet high, containing a recess, while just above this recess and communicating with it, are two circular holes, which were evidently meant to serve as stocks.

This chamber has been converted into a chapel by the Greek monks, and it has been visited by throngs of pilgrims, who firmly believe the holy site to be the actual prison of Christ. Among other discoveries in these rock-hewn prisons is a kind of oubliette below Christ's prison, which was full of rubbish and human bones.

#### THE AUTOMOBILE RECOGNIZED.

A British commission, after due study of the matter, has recommended the abolition of the limit of 20 miles an hour as the maximum speed at which automobiles may run on country roads, and that only reckless or dangerous driving be prohibited. Incidentally it is mentioned that between January, 1905, and May, 1906, the number of automobiles increased from 51,000 to 86,000. It seems to be considered that a vehicle the use of which is increasing so rapidly has rights on the highway that are entitled to respect.

the great light to the other, and it was in order to prove his statement that wireless electricity was harmless that Professor Ovington offered to allow as many messages as were desired to pass through his body.

It is certain that if ever this world of ours gets into communication with the planet Mars it will be by means of wireless telegraphy. According to Marconi it is a good deal easier to send a message through interstellar space than over land and water, for there can be no possible obstacles to intervene. Mr. Marconi looks forward to the time—within ten years, so he says—when messages will be passing between the earth and Mars as easily and frequently as they now pass between Europe and America. Of course, there will be the difficulty of the Martians being able to understand our messages, but if they are at all in advance of us with regard to education and culture this will not be insuperable.

Nikola Tesla also awaits the day when we shall be in communication with the Martians by means of wireless telegraphy, and he solemnly declared to the writer a few weeks ago that the only thing he needs to demonstrate his ability to send a message to the most interesting of all planets is capital. "Could I find a multi-millionaire," he said, "with sufficient faith in me to yield up his fortune as a temporary loan, I could send a message to Mars, or Jupiter, or even Neptune within a year."

#### IT IS ALL A MATTER OF MONEY

"Of all possibilities of electrical invention," he continued, "I believe that offered by the transmission of power without wires is the greatest. That this dream will be realized in the near future I am certain as that I am living to-day; and when it comes, what will it mean? It will mean that some of the most important questions at present confronting humanity will at once be solved, for it will dispense with the necessity of fuel, it will enable man to conquer the air, and it will do away with innumerable causes of waste."

Wireless telegraphy will be used for the first time in connection with any Polar expedition when Mr. Walter Wellman makes his novel dash for the Pole. Mr. Wellman, who hopes to reach the Ultima Thule of all explorers by means of a dirigible balloon, together with automobile sledges and a metallic boat, informed the writer that it is his intention to carry a wireless telegraphic apparatus with him, so that the instant the Pole is discovered the news will be flashed to the outside world.

Mr. Walter Wellman is himself a very clever Marconi operator, and he sees no difficulty in sending a message from the Pole (should he reach it) to Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. From Spitzbergen to the Pole is only about 600 miles, and Mr. Wellman declared that he and his party will be in constant communication with that place during the whole of their trip, and that information regarding his movements will reach Spitzbergen, where arrangements will be made to receive it. # HOME.

## BEEF KIDNEY.

Cut the kidney into thin slices, flour and fry a nice brown. When done make a gravy in the pan by pouring away the fat, putting in a small piece of butter, one-quarter pint of boiling water, pepper and salt, and a tablespoonful of mushroom catsup. Let the gravy boil up, pour over the kidney, and serve.

**Beefsteak and Kidney Pudding.**—Two pounds of rump steak, two kidneys, seasoning to taste of salt and black pepper, suet crust made with milk in the proportions of six ounces of suet to each pound of flour. Procure some tender rump steak and divide it into pieces about an inch square and cut each kidney into eight pieces. Line the dish (of which we have given an engraving) with the crust made with suet and flour in the above proportions, leaving a small piece of crust to overlap the edge. Then cover the bottom with a portion of the steak and a few pieces of the kidney, season with pepper and salt (some add a little flour to thicken the gravy; but it is not necessary), and then add another layer of beef, kidney, and seasoning. Proceed in this manner until the dish is full and pour in sufficient water to come within two inches of the top of the basin. Moisten the edges of the crust cover the pudding over, press the two crusts together, that the gravy may not escape, and trim up the overlapping edges of paste. Wring out a cloth in hot water, flour it, and tie up the pudding; put it into boiling water and let it boil at least four hours. If the water diminishes always replenish with some hot in a jug, as the pudding should be kept covered all the time and not allowed to stop boiling. When the cloth is removed cut a round piece in the top of the crust to prevent the pudding bursting, and send it to the table in the basin, either in an ornamental dish or with a napkin pinned round it. Serve quickly.

**Stewed Kidneys.**—Four kidneys, one-half a small onion, one ounce butter, three teaspoonfuls flour, pepper and salt to taste. Cut the kidney in small pieces and roll them in flour; chop the onion small and fry with the pieces of kidney in the butter until brown. Then add the pepper, salt, and enough cold water to cover them and stew gently for an hour. Thicken the gravy with flour a few minutes before done and serve hot.

**Kidneys a la Croquette.**—Plunge some mutton kidneys into boiling water, open them down the centre, but do not sear them, peel them, and pass a skewer across them to keep them open, pepper, salt, and dip them into melted butter, broil them over a clear fire on both sides, doing the cut side first; remove the skewers, have ready some maitre d'hotel—viz.: butter beaten up with chopped parsley, salt, pepper, and a little lemon juice. Put a small piece in the hollow of each kidney and serve hot.

## EGGLESS CAKES.

**Laver Cake.**—A teacupful each of sugar and sweet milk, a level teaspoonful of butter, three teaspoonfuls of baking powder, sifted twice with two cupfuls of flour. Beat well and bake in a quick oven. For the filling boil together one teacupful of thick sour cream, one teacupful each of any chopped nut meats; spread between the layers and over the top.

**Date Cake.**—One large cup of sugar, butter the size of an egg, one cup of sour milk, teaspoonful of soda, pinch of salt, spices to taste, two cups of flour, and a pound of dates, stoned and floured. Beat butter and sugar to a cream, add other ingredients, and beat together. Bake one hour in a slow oven. I have

that not a few of the scrofulous diseases common among children proceed from the ignorant habit of being put to sleep in beds and perambulators with the head under the bed clothes, and so inhaling air already breathed and further contaminated by exhalation from the skin.

## TITLED WOMEN WORKERS.

**What They Have Done For The Poor of Scotland and Ireland.**

The restoration of native industries in Scotland and Ireland is due almost entirely to the titled women of Great Britain, who have proved beyond question that they are excellent organizers, and also gifted with insight into social problems.

"We don't want to raise an unemployed fund," one of them wisely said at a recent Leeds industrial exhibition; "we wish to keep the poor employed."

In the north of Scotland, the Duchess of Sutherland has restored comfort and activity to many a village home which for lack of work was perishing, and by her energy and example has developed the making of homespun and tweeds into a solid and flourishing industry.

Lady Aberdeen in central Scotland and the Duchess of Buccleuch in the south practically cover the country between them, and command an excellent sale for their products of their taste and judgment.

The industry so valuable to the poor crofters who weave in the long winter months has steadily progressed from the first. The materials the crofters supply are dyed with seaweed, which gives lovely tints unattainable otherwise, and the goods are all genuine and durable.

As an illustration of the durability, there is a story current that two suits of Harris tweed were sold by a worker to a couple who wished to be dressed alike on their tandem bicycle. Year after year, when their friend visited them, they were still wearing the suits. At last, in the fifth year, the friend saw them no longer, and thought they must now be worn out, when in came five little children all clothed alike in the identical tweed, still whole and good.

What these ladies have done in Scotland by reviving the cottage industries has been repeated in Ireland by the Duchess of Abercorn, Lady Aberdeen, Lady Londonderry, Lady Cadogan, Lady Arthur Hill, and many others. The old art of making beautiful lace, which was languishing for lack of encouragement a few years ago, is now successfully practised, and fashion in Paris has ordained that Irish lace should be the mode. Whole gowns are fashioned of it, and blouses, and no dress is considered complete without the addition of a trimming of Irish lace.

Lady Dudley, wife of a former Viceroy of Ireland, has encouraged the manufacture and sale of the lace to the utmost of her ability, and Lady Mayo seconds her efforts in giving designs, advice and assistance of all kinds to the workers.

Lady Kenmare, in the delightful regions of Killarney, has organized a new industry in the shape of inlaid furniture made by the natives. There are many ventures in making lingerie and art needlework encouraged, presided over and actually created by women. And when one considers how difficult it is to reorganize a dying trade, to find out the best market for the sale of goods, to create fashion and to make money, it must be admitted that these ladies of Great Britain have shown aptitude for organization and activity and perseverance in carrying out their ambitious aims.

## ROMAN RELICS.

**First Century Discoveries in the North of England.**

The work of excavating at Newstead Fort, on the border of England and Scotland, has recently brought to light

## SOME QUEER DISPUTES

**PRIVATE PEOPLE AS THEIR OWN JUDGES AND JURIES.**

**A Valuable Tree That was Claimed by the Proprietors of Two Fields.**

A strange dispute, and a still stranger struggle by way of settlement, was disclosed in a Norfolkshire police-court a short time ago, says Pearson's Weekly. A valuable timber tree which had grown in a hedge, the ownership of which was claimed by the owner of the field on each side, happening to be blown down in a gale, it, like the hedge in which it had stood, was claimed by each of the rival landowners.

The dispute was in no way simplified by the fact that the tree had fallen, with a delightful impartiality, half in one field and half in the other, and each of the claimants was perfectly convinced that it belonged to him. Neither would listen to any proposal for a compromise, determined to enforce his full rights of proprietorship, or perish in the attempt.

One claimant stole a march on the other at night by having the trunk deprived of its branches and trimmed ready for removal. But he had not time to remove the several branches before his rival swooped down upon them and carried them all off.

## A NOVEL TUG-OF-WAR.

There remained the trunk to fight about, however, and upon this a keen watch was kept by both sides, until one of the claimants brought five horses on the scene to haul it away. Before this could be done, however, the other claimant had his team hitched to the trunk, and then ensued a tremendous tug-of-war between the rivals. One moment the tree would be dragged into one territory, and the next into the other and so the struggle went on for several hours. Eventually one side obtained reinforcements, and as the result of a tremendous tug, the other side's chain snapped and broke, giving the rival victory.

Some time ago a really sensational affair was reported from Merthyr, which culminated in the appearance of an engine-driver, named Hopkins, at the local assizes on a charge of imperilling the safety of the public. It arose out of a veritable battle between locomotives at the Cyfartha Steel Works.

From the evidence given at the trial it seemed that Hopkins, who was replenishing his stock of coal, refused to move on until he had finished to allow another engine-driver to obtain a necessary supply of water.

## A RAILWAY WAR.

Both men thereupon got up steam—in their engines as well as themselves—and thrice attempted to force each other back. In the two first encounters the obstructive engine proved the victor, but at the third "advance" the buffers got jammed, and the twice victorious engine was thrown off the metals. In the excitement of the struggle, the men seem to have forgotten that they were trifling with other people's property as well as safety.

This extraordinary incident recalled a battle royal which took place several years before on the occasion of the opening of the Birmingham Extension and Stour Valley Line, when there was quite a marvellous display of locomotive and human force.

The Shrewsbury and Birmingham Railway claimed running powers over the new line, which claim being repudiated by the Birmingham Extension proprietors, the former determined to enforce. Some scores of locomotives were brought out on both sides, each being backed by a small army of navvies with the last of battle in their eyes.

## A CORPORATION QUESTION.

The scene of this ludicrous and well-nigh incredible encounter was the vic-

## FILTHY JAM FACTORIES

**REPORT OF THE BRITISH CHIEF INSPECTOR.**

**Revolted and Inhuman Conditions of Industrial Life — Bakeshop as Toilet Room.**

Amazing revelations of British industrial life, which in the horror of their details almost equals those of the Chicago "Jungle," are made in the annual report of the Chief Inspector of Factories and Workshops for 1905, issued as a blue-book.

"I inspected one jam-factory," says a lady inspector, "where the boiling-room lay between the yard and a stable, and the horses reached the stable through the boiling room. In others I have found the sanitary accommodation very inadequately separated from the rooms where fresh fruit or uncovered jam is kept, and dirty, undrained floors are far too common.

## CAN'T WASH UP.

"Where the workers have no means of washing their hands provided, it is only natural that everything should become coated with stickiness, which any dust in the factory readily adheres to."

A terrible state of affairs exists in some Irish jam factories, according to the report of Miss Deane, another lady inspector. She says:—

"The bottle-washing rooms, in which empty jam pots from which it is desirable to remove the dirt and old labels are washed, are not only very unsatisfactory from the point of view of the workers in them, but would probably very disagreeably impress the customers.

## FOUL WATER.

"In one such place, the usual hot, heavy atmosphere, loaded with steam, was rendered more than usually oppressive by the disgusting smell arising from the water in the tanks, over which the dripping women were bending. In answer to a remark, I was informed by the manager that the water in them was changed 'about once a week.'

"Hundreds of dirty pots were being 'washed' in this liquid, which was like dark soup, and smelt abominably. The pots, when fished out, are allowed to stand till they dry, and are then considered fit to receive the jam, which may be rendered more nutritious by the addition of dirt.

## WOULD NOT KEEP.

"In this place also the empty pots were stacked, not upside down, nor covered in any way, and, though coated inside with dirt, were, I found, held fit to be filled. It is unlikely that the jam contained in them would keep properly, but this did not appear to cause any misgivings."

For disregard of cleanliness it would be impossible to imagine anything worse than the condition of many bakeries.

"Work was over in a bakehouse visited on a Saturday night, but the presence of a brush and comb, sponge, etc., on the baking table led to the explanation: 'When the place is cleaned up we bathe the children here.'

"In another, on Monday morning, I found the sorting of a family 'wash' had overflowed into the bakehouse."

"The sausage and brawn factories," says Mr. Boggis Rolfe, an East End inspector, "are mostly owned by Germans, who have a retail shop on the premises, and employ one or two hands to make the goods in a room behind the shop or in a cellar underneath. These places are small, dilapidated, badly lit, and often infested with rats."

## LICKING CIGARS.

Miss Mary Paterson, acting principal lady inspector of factories, calls attention in her report to the prevalence of the practice of biting and licking cigars

sour milk, teaspoonful of soda, pinch of salt, spices to taste, two cups of flour, and a pound of dates, stoned and flour-ed. Beat butter and sugar to a cream, add other ingredients, and beat together. Bake one hour in a slow oven. I have been complimented on this cake often, as it tastes rich and delicious.

**Canadian Cake**—Two cups each of sugar, water, and raisins, one-half cup of butter, one teaspoonful each of all-spice, cinnamon, and nutmeg, two teaspoonfuls of baking powder, two quarts of flour, mix and bake.

**Spider Cake**—One pint of sour cream, half cup of butter, half teaspoonful of soda, and as much salt, one teaspoonful of sugar, and flour enough to make a soft dough. Mix lightly, roll thin, cut into rounds, place them on a hot spider; brown one side, turn and brown on the other. Serve hot with butter and syrup.

**Feather Cake**—One cupful of sugar, creamed with two tablespoonfuls of melted butter, one cupful of milk, with a tablespoonful of cornstarch dissolved in it, a little less than one and three-quarter cupfuls of flour, with two teaspoonfuls of baking powder. Use judgment in regard to flour.

**Vinegar Cake Without Eggs**. — One pound flour, one-fourth pound currants, one-fourth pound raisins, one-half pound sugar, one-half teaspoonful soda, six ounces of butter, one-fourth pint milk, one-half teaspoonful salt, and a small wineglass of vinegar. Rub the butter into the flour, and add sugar, salt, currants and raisins. Dissolve soda in milk and then mix thoroughly with the other ingredients. Add vinegar last, and bake in a slow oven. This will be found good if prepared as directed.

#### HINTS FOR THE HOME.

When carving salmon and all short-grained fish, cut it lengthwise; use a broad fish slice to avoid breaking the flakes.

Rice is such a wholesome article of diet that it should more generally be used. Simply boiled and nicely dried it is excellent with hot meat, stewed fruit and with cheese.

Hot water cans should always be turned upside down to drain each time after using, or they will quickly get rusty and leak.

An excellent floor polish for either boards or linoleum can be made from candle ends melted and mixed with turpentine. This preparation should be of the consistency of thick cream.

To clean black lace rinse it in cold tea and gin, then gently pull it out and pin on a cloth to dry. If the lace is only crumpled, ironing it between tissue paper will stiffen it.

Clean your white felt as follows: Brush the surface quite free of dust, get some powdered magnesia, and, with some water, make it into a stiff paste. With a small brush smear the whole hat with this paste. Dry thoroughly and brush off the powder with a clean clothes brush. If necessary, repeat the process once or twice. Hats cleaned in this way will look as good as new.

The athletic woman should remember that vaseline rubbed on the soles of the feet the night previous to taking a long walk prevents soreness and aching. Also embrocation rubbed beforehand on any set of muscles, which will be brought into play, prevents a great deal of the ensuing ache.

To prolong life one should take plenty of sleep and remember to sleep lying on the right side, indulge in a morning bath in tepid water, take daily exercise in the open air, keep the window of the sleeping room open all night, take frequent and short holidays, do not be over-ambitious, and hold one's temper.

An excellent gargle is made of one teaspoonful of cayenne pepper, half a cupful of boiling vinegar, and three teaspoonfuls of salt. Mix well together and when settled, strain. Gargle the throat every half hour. Any one subject to sore throat will find a sure cure and preventative in the daily use of salt and water as a gargle.

Bad ventilation deforms more children and destroys more health than accident or plague. There is reason to believe

#### First Century Discoveries in the North of England.

The work of excavating at Newstead Fort, on the border of England and Scotland, has recently brought to light many interesting objects from the period of the Roman occupation.

They have been found in pits outside the fort, as well as within the ramparts, at depths varying from 12 to 30 feet, and all of them were more or less full of decomposed animal and vegetable matter which has a marked preservative influence.

In many instances branches of birch and hazel have been unearthed, with the bark bright and silvery. Even a tiny portion of an egg shell has been distinguished. Some of the articles probably date from the first century, one being a bronze vase with a single handle 11 inches high, and belonging to a type emanating from Southern Italy.

Mr. James Curle, who describes the discoveries in the "Scottish Historical Review," thinks the Newstead finds may ultimately form a collection of the greatest archaeological value, as illustrative of the life on the Roman frontier.

A most valuable collection of pieces of bronze armour was taken out of one pit, and, best of all, a very fine Roman helmet decorated with embossed figures in high relief. They are all objects of the greatest rarity, and in wonderful preservation.

The helmet has an inscription punctured on the rim, probably an owner's name, but it has yet been satisfactorily deciphered. No visitor was found with it. It covered the head and neck, and has a high protecting peak in front. The whole of the crown is covered with an embossed design. At the back a winged figure stands upright driving a two-wheeled chariot, to which a pair of griffins are harnessed. In one hand it holds the reins; in the other a whip with which it urges the animals on. In front another winged figure floats through the air.

#### RED-HAired PEOPLE.

Distinguished Professor Says They Are Delicate and Conscientious.

In the course of a fascinating lecture, recently, Professor Pearson, of London, dealt with the interesting question, "Can we tell character by physiognomy, phrenology, palmistry, handwriting, or other external signs?"

As we might expect from so eminent an authority, the method of inquiry adopted was searching, and based upon hard, solid facts.

So far as he knew, the professor said, no word was uttered as to the color of the hair of Judas, yet the old masters painted it red, and in directions for Passion Plays a red wig was invariably ordered.

The wisdom of our ancestors, as crystallized in proverbs marks a general prejudice against red hair and curly-headed people also seemed objectionable.

Again, roundness of face is associated with foolishness (e.g., 'Antony and Cleopatra,' Act III., sec. 3). And why are shrewd people called "long-headed"?

To answer these and many other interesting questions, Professor Pearson has collected and tabulated thousands of records. A comparison of the coloring of the hair and eyes in regard to temper, health, conscientiousness, intelligence, popularity, and other points yielded a broad general conclusion.

On the whole, red-haired people were more conscientious, more quick-tempered, more delicate, the black being less conscientious, more sullen, and less delicate. There also seemed to be a good deal in the attempt to read character by handwriting, for an investigation of no fewer than 2,000 specimens indicated the fact that bad writing was a distinctly warning note!

In view of the attacks made upon the athletic tendencies of to-day, it is reassuring to hear that there is a very high correspondence between intelligence and aptitude for sports.

brought out on both sides, each being backed by a small army of navvies with the lust of battle in their eyes.

#### A CORPORATION QUESTION.

The scene of this ludicrous and well-nigh incredible encounter was the viaduct at Wolverhampton, where the forces were drawn up in martial array. According to the veracious chronicler of the event, the rival bodies of navvies stood and opposed each other on the viaduct like infantry supporting cavalry. The fight was continued until several of the locomotives had been placed hors de combat by being run off the lines and plunged deeply in the bitterness of defeat and in the newly-laid ballast.

Some time ago a most comical kind of fight was reported from Sunderland. Having a legal right to connect its drainage system with that of Sunderland, the neighboring township of Fulwell essayed to do this at a point which would have rendered it necessary for the borough to enlarge its service. This would of course, have meant considerably increased expenditure, and, as the township persisted, Sunderland actively resisted. As one of the results, the ratepayers were treated to the edifying spectacle of gangs of corporation men shovelling the earth back into the Fulwell trench as fast as it was thrown up by the Fulwell navvies.

As neither side would give way, this went on for some time; and it was only after the Sunderland engineer had made preparations for flooding the trench that the Fulwell people were brought to see the error of their way. Then they recognized the wisdom of coming to an amicable arrangement with their more powerful neighbors.

There have been fights between public bodies for the possession of more than one Irish court-house. Some time ago the Sheriff of Donegal wrote to the County Council, which had its offices in the Lifford Court-house, requesting that the Council clerks be removed from the rooms in the court-house, as the latter would be required by the grand jury during the assizes. The Council, however, would only give up one of the rooms; and, on the Sheriff seeking to obtain possession of the other room, the clerks intimated that they would only be removed by force. The force was soon forthcoming in the shape of a district inspector of police and a number of constables, before whose technical exercise of "force" the Council clerks quietly beat a dignified retreat.

#### THE FATE OF THE SWINE.

A curious fight, the only victims of which were 7,500 pigs, occurred at Moravicza, in Hungary, early one spring. Owing to the thaw having set in, the rivers and canals were in imminent danger of destruction by floods, particularly from the Bega Canal.

Though well aware that by doing so they would inundate the lands of the Van Royal Dutch Company, the peasants determined to cut the dykes of the canal, a proceeding which the directors of the company resolved to meet with force. The parties met on the canal banks, and, after a short fight, the company's men were driven off, the peasants afterwards carrying out their intention of piercing the canal banks and dykes.

As soon as this was done, the pent-up waters rushed out in tremendous volume and in an incredibly short space of time many thousands of acres were covered with water. In fact, retribution was nearly brought on the perpetrators by their wanton act, for the waters spread so rapidly that even they had to flee for their lives.

In the flood's mad career the enormous number of pigs above stated were carried away and drowned, while it was only by a marvellous escape that some thousands of cattle did not share the same fate.

The loss occasioned by the action of the peasants ran into many thousands of dollars, nor did they escape the consequences which the breaking of the canal banks and dykes was intended to prevent; so they fought their funny fight in vain, and were almost overwhelmed by the element they had so foolishly let loose.

#### LICKING CIGARS.

Miss Mary Paterson, acting principal lady inspector of factories, calls attention in her report to the prevalence of the practice of biting and licking cigars in cigar factories.

"It is undoubtedly the quickest way of finishing them," she says, "and while discouraged by employers and managers, the rules against it are not really enforced."

Weight lifting by women and children is referred to by Miss Martindale, who writes: "On revisiting one factory I was interested in seeing again the boy who, in June, 1903, I had found carrying a piece of clay weighing 69 pounds, his own weight being 77 pounds. During the two years which have elapsed he has hardly grown, and he informed me that he weighs at the present time 81 pounds, showing an increase of only 4 pounds. It is evident that the under-sized condition of many of the pottery workers is owing to the excessive physical strain to which many of them have been subjected in their early years."

#### INHALED BRONZE POWDER.

"It was in high-class silver printing—wedding cards, Christmas cards, menus, etc.—that I found early this year," writes Miss Squire, "a number of little girls, aged thirteen and fourteen, employed in hand bronzing by dry powder without any precaution being taken. Several of the little girls working there suffered from sickness, giddiness, bad throats, etc., many of them had not been examined by the certifying surgeon, although employed several months."

"I prosecuted for this latter offence, and one of the little girls was so ill that she was unable to appear; the doctor attending her attributed the serious condition, which necessitated an operation, to the effect of inhaling bronze powder in her delicate state. This girl and two others who had suffered, had some form of nasal obstruction, and being mouth-breathers, were bad subjects for work in poisonous dust."

#### FUTURE PROSPECTS.

"You poor man," said the kind lady. "Can't you find anything to do?"

"Nuttin', mum," replied Frayed Franklyn. "But I got a promise of work yesterday."

"How nice! What doing?"

"Flagman on a crossing fer de first airship line what starts, mum."

Missus—You must know something of this. Why aint yer scared?

Girl—Isnt just as scart as you, missus, only woe don't scare same as hair.

# LABOR MEMBERS' WIVES

## MRS. JOHN BURNS SNUBBED LADY HAVERSHAM.

### Was Presented to the King and Carried It Off Well — Wives of Other Members.

While John Burns, Will Crooks, Keir Hardie, Will Thorne and other labor leaders in the English Parliament are busy at Westminster, legislating for an immense empire, "upon which the sun never sets," their wives at home are probably scrubbing, cooking, sewing and attending to the many details of housework that usually fall upon the wives of workmen.

About 50 members of the present Parliament were elected upon the Labor ticket, and most of them are actual workmen. British lawmakers receive no salary and the labor members must be supported by the various labor organizations.

This means that their incomes are limited. As a rule, they live in very modest homes, in unfashionable neighborhoods. Usually the housework and the care of the children devolve upon their devoted wives.

It is said that, when Mr. Burns, some months ago, visited the King to receive his commission as a member of the cabinet, Mrs. Burns was at home cheerily scrubbing the floors. Mrs. Burns is said to be a simple-hearted, unassuming little woman, although of attractive sense. During all her husband's long career in Parliament—she entered that body in 1892—she has been his warm supporter and efficient helpmeet.

Through all these years the Burnses have occupied a quiet little home in Battersea, a poor suburb at the southwest of London, where the wife cooked the meals, scrubbed the floors and kept her husband's clothing in repair.

After the late political upheaval in England, Mr. Burn's financial condition improved. He was invited into the cabinet as president of the local government board, a position carrying

A SALARY OF \$10,000 A YEAR.

As wife of a cabinet minister, Mrs. Burns has now standing at court functions, the first woman from the circles of labor to enjoy that privilege.

When she was recently presented to the King and Queen this modest little woman, who still does her own housework, was an object of great curiosity to the haughty peeresses who surround the throne. If they expected to titter over a bizarre or awkward spectacle, they were disappointed. They saw a rather pretty woman, becomingly and correctly dressed, whose manner was above criticism.

She was probably the only woman in that brilliant throng capable of cooking her husband's dinner or darning his socks, and yet she did not appear at all uncomfortable or out of place. It was noticed that their majesties were unusually gracious to her. She was somewhat conspicuous in the throng of stately grand dames about her from the fact that she wore no jewels.

Some time ago, it is related with gusto in London, Lady Haversham, a new peeress and a known "liar hunter," who aspires to become prominent as a Liberal hostess, undertook to patronize the woman whose husband had been elevated from labor's ranks to a cabinet position. So she wrote as follows from her fine home in fashionable Grosvenor Square:

"Dear Mrs. Burns:—I should be glad if you would come to my at-home. You would excuse my not calling on you, but I find Battersea is such a long way from Grosvenor Square."

Whereupon the labor leader's wife promptly sent the following reply:

"Dear Lady Haversham:—I have been studying the map, and I find that Gros-

venor is a lecture at Ilkeston, but found that his parliamentary duties would not permit keeping the engagement. Accordingly, Mrs. Macdonald went to Ilkeston and

LECTURED IN HIS STEAD. .... "It was a description of a walking tour, illustrated by lantern slides," she explained later, "and as I had been on the trip with my husband I was able to give the lecture." It is said she gave it most satisfactorily.

When they find time—which is not often—Mr. and Mrs. Macdonald may be seen taking long walks together. They also have a little cottage in Buckinghamshire, to which they retire when Parliament is not in session. Mrs. Macdonald is noted as being one of the best housekeepers in that section.

While Kier Hardie, one of the best known of the labor leaders is attending sessions of Parliament, Mrs. Hardie usually remains in Ayrshire, where she says she is perfectly happy looking after their little home.

The wife of J. Ward, member of the Stoke-on-Trent, while taking a rest from cooking dinner recently, expressed her dissatisfaction with the demands made upon his time.

"He has to leave early in the morning for the work of his union," she explained; "then goes to Parliament, and usually gets home about 2 o'clock in the morning. At week ends he goes about making speeches."

Mr. Ward laughed: "The wife stands that sort of thing about five weeks on a stretch," he remarked, "and then she goes on a strike. Tells me I need not expect any home comforts if I don't spend one day in 50 at home."

One noticeable characteristic of the wives of the labor members of Parliament is the fact, as a rule, that their husband's election to such high and responsible national duties makes little apparent difference in the home life.

They do not seem to think that such distinguished honors in the family should cause them to cease doing their own cooking, washing or housework, or that they should hire girls to do their scrubbing for them.

## PERSONAL POINTERS.

### About Some Prominent People on the World's Stage.

The Emperor of China rises at four o'clock in the morning to study English and Manchu before breakfast, which meal is at five. He makes up for this output of energy, however, by retiring to bed at sunset.

The Earl of Selborne, when he visited Bechuanaaland recently, proceeded by train to Transvaals House, two and a half miles along the railway, driving the locomotive himself all the way. The train passed between lines of cheering natives, the chiefs waving flags.

Mrs. George Cornwallis West, when Lady Randolph Churchill, allowed herself during a visit to India to be tattooed upon the arm just above the wrist. The design she selected was the symbol of eternity—a serpent with his tail in his mouth. Ordinarily this mark is concealed from observation by a gold bracelet.

Lieutenant-Colonel Duff, of the Salvation Army, is a sister of the Duke of Fife and sister-in-law of the Princess Royal. Her position at the Salvation Army headquarters is that of editress of the "Young Soldier" and the "Young People." She is a brilliant journalist and the authoress of some of the Salvation Army's most popular publications.

The Earl of Hopetoun has in his possession an old brass-bound, leather-covered ledger, which is prized very highly as an heirloom. It is the book with which John Hope, the founder of the family, began business in High Street, Edinburgh, more than 200 years ago; and that which makes the book so highly prized is the first entry, which is the following prayer: "O Lord, keep me and this book honest."

# STILL RUSSIA'S ENEMY IN MERRY OLD ENGLAND

## JAPAN SAID TO BE WORKING FOR HER DOWNFALL.

### How Preparations Were Made for the War — Revolutionists at Nagasaki.

While Japan is formally at peace with Russia, it appears from the Russian press that she is doing all she can to embarrass the Czar's Government. First it is asserted that Japan is supplying the revolutionists in Russia with arms, and, second, it is pretty well established that Nagasaki is a Nihilist hotbed. The first charge is developed by the Novoye Vremya as follows: "It has been suspected for a long time that the Japanese were supplying the Russian revolutionists with arms and money, but now the proofs in the case are so complete that there is no room for doubt. The trail of the conspiracy, however, reaches far back, and we will have to begin our story at the outbreak of the war."

The Russian paper proceeds to say that "the Japanese Colonel Akashi, who was military attache at St. Petersburg before the war, went to Stockholm when hostilities broke out, and that city became the centre of the Japanese spy system.

## WELL PLANNED.

"Now in the Autumn of 1904, when the Russian freedom movement began, Akashi connected himself with the Russian Nihilists in Paris, and in November, 1904, an agreement was concluded, by the terms of which an armed insurrection was to be created in Russia for the benefit of Japan." The chief parties to this agreement were "the revolutionist George Dekanosi, one Grusier, and the well-known politician Konni Siliacus."

These men "received money from Akashi to buy weapons, and it was agreed that the arms were to be used by the Russian Social-Democrats, the Grusierian revolutionists, and the Polish and Finland Socialists." According to the Novoye Vremya, there were bought in Switzerland 25,000 guns and 3,500,000 cartridges, while Siliacus purchased several vessels, including one in Hamburg, which was christened John Grafton. This vessel was loaded with weapons, and under command of Captain Bestroom she set sail July 16. But August 25 she ran ashore at Uleaborg, and the mystery of her origin was the source of no small amount of discussion. After she had been abandoned by her crew the ship was boarded by the Russians, and in her hold were found 93 cases, containing 659 rifles, 658 bayonets, and 120,000 rounds of cartridges.

## ANOTHER CARGO.

"Another ship, a steamer, caught fire near the Finland coast, and the subsequent investigation showed that it was packed with an immense quantity of rifles, cartridges, and so forth. And on August 28 there were found on the island of Kolmar over 700 rifles, an immense amount of revolutionary literature, and quantities of ammunition. All of the arms found were of Swiss manufacture." The same journal avers that "the revolutionists of Moscow—during the rebellion of December, 1905—were all armed with Swiss weapons," and thinks that these munitions probably entered by another ship which landed safely. This vessel was fitted out "by George Dekanosi, it sailed from Marseilles to Batumi, and reached port safely. The captain of the ship was a Dutch Nihilist."

## NIHILIST PARADISE.

The Japanese correspondent of the Frankfurter Zeitung declares that Nagasaki before the war was a favorite resort for Russians in the east, and now that the war is over it has become a paradise for the Nihilists. Thus:—

## NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

### Occurrences in the Land That Rejoins Supreme in the Commercial World.

The Prince of Wales has consented to become patron of the Welsh Rugby Football Union.

Field Marshall Sir George White has been admitted to the freedom of the city of London.

Princess Mary of Wales has been given a bicycle, and now rides about the grounds of Marlborough House.

Miss Simmons, superintendent of telegraphs at Chatham Post-Office, has retired after forty years' service.

One applicant at the Chiswick Police Court recently was so stout that she could not enter the witness-box.

Mixed family bathing, which has been allowed in the Woolwich Baths every Monday evening, is to be suspended.

The property belonging to the various Livery Companies of London is estimated to be worth at least fifteen millions sterling.

It is not generally known that Lord Kitchener served as a volunteer under the French flag in the Franco-Prussian War of 1870.

New Bibles, with composition washable cover, have been provided at the Middlesex Sessions for the use of those taking the oath.

The newest warship of the Agamemnon type cost £1,500,000. Nelson's Victory, armament and all, cost no more than £100,000.

The King of Spain has honored Sir Alfred Jones of Liverpool by creating him Knight Commander of the Royal Order of Isabella the Catholic.

According to the report of the Inspector of Explosives, a workman was fined £2 last year for having pockets in his clothing when working in a danger building.

Mr. Alderman Henry Good, Mayor of Colchester, has intimated that he will present two almshouses to the borough to commemorate his year of office.

Over £2,000 has already been received for Lady Minto's fund for the organization of a trained British Nursing Society for the European community in India.

De Beers Diamond Corporation has offered £2,500 towards the fund for the establishment of a college in South Africa for the higher education of natives.

A Camberwell workman, on going to live at Tonbridge, was amazed to find that his next-door neighbor was his brother, whom he had lost sight of for 20 years.

Mr. C. Pallin, the new master of Wolverhampton Workhouse, has caused the motto "Work" to be placed in prominent positions throughout the institution.

The Duchess of Somerset, who for many years has been interested in the welfare of school children, suggests the appointment of a Minister for Children in the Government.

The head waiter at one of the biggest London hotels, giving evidence in a case at Bow Street, said his salary was £1 a week, but his total earnings were £8 or £10.

The Davenport Town Council has decided to instruct the Education Committee to give three months' notice to married woman teachers to terminate their engagements.

Westboughton (Lancashire) has received from Mr. Carnegie £250 towards the decoration of the public library, to the building fund of which he previously subscribed £3,500.

A new bee disease—a kind of paralysis—has been discovered among bees in the Isle of Wight. It is estimated that half the bees kept in the island are now dead through this disease.

way from Grosvenor Square."

Whereupon the labor leader's wife promptly sent the following reply:

"Dear Lady Haversham—I have been studying the map, and I find that Grosvenor Square is exactly the same distance from Battersea that Battersea is from Grosvenor Square.

Will Thorne, who represents the South Westham constituency and is secretary of the Gasworkers' and General Laborers' Union, is especially

#### HAPPY IN HIS HOMELIFE.

although Mrs. Thorne complains that his duties keep him away from his family too much.

"Will goes out at 8.30 o'clock every morning and does not come back until 1 or 2 o'clock the next morning," she remarked recently. "On Sundays he is generally addressing meetings somewhere, so that we see little enough of him since he has been elected to Parliament."

The Thornes occupy a small house in the East End of London, and to the care of this and her children Mrs. Thorne devotes herself. There are ten children in all. Some are grown and married, while the baby is still in the cradle.

Both the father and mother of Mr. Thorne were brickmakers, and the father was killed when Will was seven years old. He never went to school a day in his life, but, through persistent effort, he acquired a good education.

Mrs. Thorne is very proud of her stalwart husband, who has reached the honor of a seat in Parliament, and is perfectly willing to contribute her own labor unsparingly in order to maintain a comfortable home for him. This home, unpretentious enough, is at Upton Park, another rather poor London suburb. In the rear is a garden where Mrs. Thorne raises chickens and hangs out the family wash.

In an even smaller house at Poplar, also in the East End, live Mr. and Mrs. Will Crooks. The hour between 8.30 and 9.30 o'clock every morning is set aside to receive the constituents of Mr. Crooks and poor people of the neighborhood come to him by scores for advice and help. He even listens to and advises them while eating his breakfast. Mrs. Crooks, whom he affectionately calls "mother," is always at his side.

#### AIDING IN HIS HELPFUL WORK.

A gentle, motherly woman, Mrs. Crooks feels deeply the condition of the poor about her, and is constantly endeavoring to aid them. She doesn't forget the fact that her husband spent part of his early life in the workhouse—and at home. Beside keeping house and attending to all her domestic duties Mrs. Crooks conducts an employment bureau in Poplar, devoting her efforts especially to securing work for the wives and families of men who are out of employment.

She is regarded as the good angel of the community, and the people there would gladly elect her to Parliament, if they could, to assist her husband in his plans for the betterment of labor conditions.

In her plain little parlor Mrs. Crooks has some ornaments of which she is very proud. There is a silver tea set, presented to her in recognition of the public-spirited efforts of herself and her husband while he was mayor of Poplar some years ago. Upon the walls are two pictures which were painted and presented to her by a man whom the Crooks had aided while he was in financial straits; on a table are glasses, china, ornaments, and even a comical little china pig—all given in gratitude for help extended at some time of desperate need.

Mrs. J. Ramsey Macdonald, wife of the member for Leicester, finds time from the care of her modest flat in Lincoln's Inn and her four children to take part in the labor propaganda in which her husband is engaged. She is a lecturer and worker for the independent labor party.

Not long since Mr. Macdonald was

Street, Edinburgh, more than 200 years ago; and that which makes the book so highly prized is the first entry, which is the following prayer: "O Lord, keep me and this book honest."

Princess Elizabeth of Belgium, wife of Prince Albert, heir-apparent to the throne, is probably the most accomplished and versatile of Continental Princesses. She is the daughter of Duke Charles Theodore of Bavaria, the famous oculist. The Princess, who has inherited her father's scientific tastes, has taken her degree of M.D., and could, if necessary, act as physician to her husband and children.

Mr. H. T. Pitt, the vendor of the orchid which realized 1,150 guineas, the highest price ever obtained for an orchid sold by public auction, lives at Rosslyn, on Stamford Hill, North London, and spends all the time he can spare from his business in his orchid houses, of which he has nearly a score. Although Mr. Pitt is devoted to orchids and has obtained such substantial sums for his varieties, it is a curious fact that he does not allow the lovely flowers to be used for the purpose of decorating either his rooms or his dinner-table.

A new motor-car which has been built for Mr. G. W. Perkins, the American millionaire, has a drawing-room and a bed-room. The former is furnished elegantly, and has revolving chairs fastened to the floor. The bedroom has a couch for reading purposes. There is a megaphone over the head of the chauffeur, connected with speaking tubes to various portions of the car, so that commands may be passed without moving. Electric heaters warm the apartments throughout, and at the back there is a dainty little cooking kitchen. There is a roll-top desk in the passage-way, and Mr. Perkins uses this on his journeys for his correspondence. The car cost \$25,000.

The Right Hon. Sir George Turner, P.C., who was Premier of Victoria for a number of years, and, later, Treasurer of the Commonwealth, refuses to stand again for the Federal Parliament. He says he is tired of public life, and he has accordingly determined to retire. Sir George, like many other Colonial politicians, has a horror of pomp and display, and dresses in bowler hat and sack suit. Sir George Turner was in London at the time of the Jubilee celebrations, and a story is told characteristic of the man. He was installed at the Hotel Cecil, where he was the guest of the Queen, and one of the Royal servants was told off to look after his personal wants. The first morning a very gorgeous creature stalked into Sir George's bedroom and put down the water for shaving, but seemed to have no intention of going. "Well, my good man," Turner remarked, "what are you waiting for?" "I have come to dress you, sir," was the reply. "Dress me!" the Premier shrieked. "I'm not a baby. Get out of this!" And the gorgeous creature made a dignified, but hasty, retreat.

#### DON'T DELAY, SAVE TO-DAY.

At what age should a man begin to save money? Many say that forty is early enough to begin "putting by" for old age, but most people, according to a well-known statistician, postpone their economizing days until it is too late to save anything worth mentioning. Generally speaking, the question as to whether a man's career is to be a success or a failure is settled between the ages of 30 and 45. At the age of forty 97 per cent of men meet with reverses which absorb whatever money they may have saved. Forty is, in fact, the danger line, and if a man cannot strike prosperity at that age his chance afterwards is almost nil. At fifty years of age the sensible man plays for safety rather than for high stakes, for after that period of life not one man in 5,000 can recover his financial footing. At sixty, 98 per cent. are dependent on their daily earnings, or upon their children for support.

The Japanese correspondent of the Frankfurter Zeitung declares that Nagasaki before the war was a favorite resort for Russians in the east, and now that the war is over it has become a paradise for the Nihilists. Thus:—

"The Russians come again, now that the war is over, but they are no longer the official classes—we now have the Nihilists. As Vladivostok and other large places were pacified the number of Russian revolutionists in Nagasaki constantly increased, and now the colony is so large that we find a Russian newspaper in the town, printed by Russians and in Russian type. This paper is called Voli or 'Freedom', and at first it appeared every other day, but now it is a daily. The character of the paper is well indicated by the following quotation: 'We call upon whoever has the material means, to help our work; we exhort all who have a word to say for the cause, to say it. And we call for help from all Russians who are not content with the Russian Government, who can not tolerate the horrible condition of things in Russia to-day. Our aim is to destroy autocracy by means of a revolution, to give Russia a democratic republic, and later to bring about a Socialistic state of society. But we must not sleep, we must not rest—the autocracy does neither.'"

#### LOTS OF MONEY.

The correspondent says that "this shows clearly the spirit of the Russians in Nagasaki. And what is equally clear is that they have plenty of money—otherwise they could not publish a paper. Naturally the settlement is a thorn in the side of official Russia, but the Japanese take nothing from the Russians to-day, and an official would get rough words who tried to induce the Japanese to take steps against the Nagasaki colony."

#### PEARLS OF TRUTH.

Use no hurtful deceit.

One to-day is worth two to-morrows. Do each day's duty as if it were the last.

They that won't be counselled can't be helped.

"Expect trouble, you bring it," says the proverb.

Drive your business; let not your business drive you.

Lose no time; be always employed in something useful.

Speak not but what may benefit others or yourself.

If you want to keep your good looks, keep your good nature.

Keep your eyes wide open before marriage, half-shut afterwards.

Be not disturbed at trifles, or at accidents, common or unavoidable.

Bury the past and make each day a starting-point towards a higher life.

A man may, if he knows not how to save as he gets, keep his nose all his life to the grindstone; and die not worth a groat at last.

#### WHITE MAN'S PERIL.

Whispers of wholesale native risings in various parts of the British Empire are rather unnerving when one remembers that the white population of the Empire is only 54,000,000 as against 244,000,000 of the colored races. In other words, the whites are outnumbered by more than six to one. India is the portion of the Empire which contains the biggest proportion of native-born people, namely, 98.8 per cent., very few of them being of English parentage. Hong-Kong is at the other extreme, having only 1.7 per cent. of native-born residents. In Western Australia 30.6 per cent. of the population are native-born; in the Orange River Colony 65.2 per cent. In New Zealand is the highest proportion of natives of the United Kingdom, 25.2 per cent. of the whole population; Australia has 17.7 per cent. of its population from the United Kingdom; Canada, 7.3 per cent.; Orange River Colony, 4.8 per cent.

the building fund of which he has previously subscribed £3,500.

A new bee disease—a kind of paralysis—has discovered among bees in the Isle of Wight. It is estimated that half the bees kept in the island are now dead through this disease.

Having tested the flesh of various animals, a Northampton gentleman declares that a donkey makes the most excellent eating of any animal, the flavor resembling that of a young turkey.

The Trinity House authorities are placing a new foghorn signal at the Needles Lighthouse. It is a reed trumpet worked by compressed air, and will be heard eight or ten miles from the lighthouse.

#### FLAVORED WITH KERNELS.

#### How Dishonest Growers Extract the Oil From Nutmegs.

The nutmeg is the kernel of the fruit of several species of trees growing wild in Asia, Africa and America. The cultivated nutmeg-tree is from fifty to seventy feet high, and produces fruit for sixty years. The fruit is of the size and appearance of a roundish pear, yellow in color. The fleshy part of the fruit is rather hard and resembles candied citron. Within is the nut, enveloped in a curious yellowish-red aril known to us as mace.

To prepare the seeds for use they are dried in a moderate heat for about two months. Then the shells are broken and the nutmegs picked out and assorted, the inferior ones being reserved for the oil-press. As the essential oil of nutmeg brings a high price, dishonest growers often steep the nutmegs in hot water to extract the oil from them. They are then coated with lime and sent into the channels of commerce.

Such nutmegs are worthless, their aroma and pungency have disappeared, these qualities being due exclusively to the oil. If, on inserting a pin, no oil rushes out to the surface, the nutmeg is, to all intents and purposes, a wooden nutmeg.

#### STRANGE FIGHT WITH TIGER.

#### How Native Held Beast at Bay Until Help Came.

A native employed on the Chuthamali estate, in India, was returning one recent night from a shooting excursion and saw what he thought was a jackal. He shot and wounded the animal, which made off into the jungle. Early the next morning, while proceeding for another shoot, the man suddenly came across a wounded tiger lying in a patch of jungle.

Presumably it was the beast, and not a jackal, which had been hit the previous night. The tiger immediately made for the man, who had no time to reload his rifle. Finding no other way out of his difficulty, the man threw down his rifle and resolved to fight it out with the tiger. The tiger opened its jaws to seize the man, when the latter shoved his arm right into the tiger's mouth. With his disengaged arm he leveled blow after blow at the tiger with all his might, and at the same time yelled for help.

Hearing the man's cries, a Panyan who was on a neighboring hill, hurried down, and taking in the situation, went and fetched an estate writer, Mr. Ladwin.

The latter came with a gun, but could do nothing at the start for fear of hitting the native. However, the latter managed by a powerful effort to throw down the tiger, whereupon Mr. Ladwin put in a shot. The shot was not fatal, and the tiger made another run at its victim, who was able this time to dodge away. Mr. Ladwin fired again, and the tiger dropped dead.

The wounded man was conveyed to the estate, where the hospital assistant in charge attended to him, and it is satisfactory to report that the man is progressing toward recovery, in spite of his wounds and his terrible experience.

## WILL LONDON COLLAPSE?

**DARK SHADOWS THREATEN  
WORLD'S METROPOLIS.**

**Motor Buses Cause Ruin to Property—  
Houses Depreciate in  
Value.**

The outburst of indignation which is just now being focussed on the defective working of the motor-omnibuses in London shows no sign of diminishing in force.

Point was given to the agitation the other day by a series of statistics given in the Parliamentary papers by the Home Secretary. The statistics cover the two months May and June, and show the number of accidents caused by motor-driven vehicles in that period. They are as follows:—

|                                                         | May | June |
|---------------------------------------------------------|-----|------|
| Accidents caused by motor-cars (including motor-cycles) | 556 | 559  |
| Number which caused personal injury                     | 169 | 178  |
| Number which proved fatal                               | 4   | 4    |
| Accidents caused by motor-omnibuses                     | 400 | 390  |
| Number which caused personal injury                     | 62  | 80   |
| Number which proved fatal                               | 2   | 3    |

### PARK LANE ROCKED.

When these figures are considered in relation to the fact that on June 1st there were 10,826 motor cars and 777 heavy motor vehicles in London, the latter figure including all the motor-omnibuses as well as motor-vans, a full justification is found for the outcry against the present methods of running motor-omnibuses in the streets.

Evidence of the damage and discomfort, the noise, the smell, the breakdowns, the racing, and the many other evils which have become associated with them, continues to accumulate.

Even Park Lane, the home of millionaires, is rocked by the disturbance and choked by the dust.

"This house is built on exceptionally solid foundations," Sir Edward Sassoon told a London Express representative. "Even though the windows are only single ones a heavy van passing does not make them rattle. Yet the motor-omnibuses cause a regular earthquake. The house rumbles and shakes, and the stench and smoke are most disagreeable."

### ENDLESS CHAIN.

The case of the residents on the east side of Onslow square is one of the worst in London. From early morning until long after midnight the omnibuses thunder by in an endless chain, and as the houses are near the roadway, the full effect of the dust, noise, odor and vibration is felt by the occupants.

An Express representative visited many of the residents of the square with the object of ascertaining the extent of their sufferings. He first called on Lady Parsons.

"I have lived here for seven years," Lady Parsons said. "and we used to think the horse omnibuses bad enough. Now, so bad is the noise of the motor-omnibuses that we never notice the others."

"They shake the whole house, and the noise seems worse in the early morning and late at night, when other traffic has ceased. It continues, however, all day long. The omnibuses may be a convenience, but, under present conditions they are a very great discomfort to those whose houses they pass."

Mrs. Butler, who has lived in the square for forty-six years, is perhaps the oldest resident. "I remember when it was finished," she said, "and it was very different then—scarcely a vehicle passed. Now we simply cannot hear one another talk."

"I have almost had to give up using the rooms in the front of the house. I could show you rooms upstairs where

## TAGS ON SALMONS' FINS

**ORIGINAL METHOD OF TRACING  
THEIR COURSE.**

**Only the Liveliest Fish Are Thus  
Adorned—Both Governments  
Co-operating.**

For many years the course of the sockeye salmon after they enter Juan de Fuca strait has been a matter of much dispute. The Dominion Government has now decided to settle the question if possible. An ingenious scheme has been devised as part of this investigation, which is being conducted by Rev. G. W. Taylor, fisheries inspector for Vancouver Island. Trap owners on both sides of the line have consented to co-operate in the project, and fishermen generally have been asked to lend their assistance.

The method adopted in the endeavor to trace the route followed by the salmon consists of a system of numbering tags. A machine is provided, somewhat resembling a paper clip press. On the occasion of each lift at the traps five or six of the liveliest sockeyes are caught and a malleable iron tag pressed over the dorsal fin. This tag bears both

### A LETTER AND NUMBER.

The letter gives the trap and the number, the approximate date. Each trap included in the experiment is known by a certain letter, and each week tags with a different number will be used. Thus, for the first week the trap furthest up the West Coast will use tags marked "A1," for the second week "A2," and so on.

Whenever the sockeye is caught in a trap carrying one of these tags it will be taken off and forwarded to the inspector with the date, place, and hour of capture. From these details it is hoped that a correct idea may be obtained of the route taken by the salmon after the run strikes the entrance of the straits. The generally accepted theory is that the location mentioned is what might be called "the parting of the ways" for the big schools of sockeyes. One portion enters the straits and eventually finds its way to the spawning grounds in the Fraser River, while the remainder continue south and enter the Columbia or Sacramento for similar propagatory purposes.

The great outcry against salmon traps was originally caused through the circuitous course taken by the salmon to the Fraser. As far as is known, after passing Victoria,

### THEY ENTER HARD STRAIT.

and then strike northeasterly to the eastern shore of Boundary Bay at Point Roberts. Soon after the formation of the Anglo (B. C.) Packing Company, that precluded by contract all the canners whose business had been purchased from engaging in the industry within British Columbia for a number of years, they were compelled to seek new locations. A number went to Blaine and Anacortes, and, as a result, traps were erected in the vicinity of Point Roberts under the laws of Washington State. It is certain that the fish caught there would eventually have entered the Fraser, and fishermen became enraged at the curtailment of their harvest from the sea. Many trawlers of the Fraser that formerly produced many sockeyes are to-day almost deserted, and the fishermen have been compelled to go farther and farther outside the mouth of the river to obtain their fish. The institution of traps on the west coast of Vancouver Island has solved the problem of supply to a large extent, as the fish are now caught in the vicinity of Victoria before striking Boundary Bay. This has reduced the catch on the Fraser considerably, but, taking it all in all,

### THE INDUSTRY HAS IMPROVED

under changed conditions. More fish

## BUILT OF PRECIOUS ORE

**REMARKABLE STORY COMES FROM  
MEXICO.**

**Only Portion of Gold and Silver Was  
Extracted and Remainder Left  
in Stones.**

From Mexico comes a strange tale of a city, the houses of which are built of gold and silver. A great wall 100 feet high encompasses the city, and this also is full of gold and silver. Without the wall are miles of mountains which conceal almost incalculable amounts of silver and gold. The whole represents an amount of wealth undreamed of even by the multi-millionaires of the "Arabian Nights."

The most remarkable part of the story however, is that it comes from the authoritative pen of Percy F. Martin, F. R. G. S., and, supported by substantial scientific facts, is set forth in the matter of fact pages of the Financial News, of London.

It seems that Guanajuato, the gold and silver city in question, was built by the Spaniards when they conquered Mexico. It is, indeed, the oldest city in that State.

### MINING MACHINERY BAD.

But when the Spaniards set to work to extract silver from the mines of La Luz, just without the city, the mechanical appliances of the time only enabled them to extract 65 per cent. of the silver ore. The remaining 35 per cent. of silver and gold which the ore also contained was therefore cast contemptuously on one side.

From the waste material were built the city and the wall about it. From this waste ore, too, there sprang mountains of refuse that in reality contained fortunes.

Now these mountains of refuse, the walls of the city, and the house of the city may be demolished, that they may yield up to modern machinery the riches that they contain.

Apart from the gold and silver hidden in the walls of the houses, it is estimated that the refuse heaps comprise alone a million tons of ore each, every ton of which holds \$5 worth of silver. From each of these mountain-like refuse heaps it may be possible, therefore, to obtain \$6,000,000.

Whether the inhabitants of Guanajuato will suffer their houses in like manner to pass through the crushing mills it is hard to say, for the people of the city cling passionately to their picturesque, if dilapidated, dwellings.

### SIGNS OF ANCIENT WEALTH.

There still, indeed, remain in Guanajuato signs of the colossal wealth which the Spaniards discovered in that place. The wall, for instance, with which they surrounded their mine must alone have cost \$200,000 to build. Its carved stone gates are artistic treasures.

The unfortunate peons, who supplied the wealth for the Spaniards, worked under the halibred and the lash. And the halibred and the lash extracted from La Luz \$1,500,000,000 worth of silver during the time of the Spanish occupation.

Most of this went to enrich the King of Spain and to enable that monarch's nobles to build those substantial, if hideous, buildings which to-day, in one respect, make castles in Spain extremely solid facts.

The man who profited most from La Luz was Zambrano, who, though he spent the major portion of his time in the gay capitals of Europe, was well known in Mexico. He, it is said, left a modest fortune of \$60,000,000 as a result of his peons' labors at La Luz.

Before being deserted, about the time of the revolution in Mexico, it is calculated that the mines of La Luz were producing for their proprietors about \$6,000,000 a year.

"There is every reason to believe," says Mr. Martin, "that they can and will do the same again."

## SUNLIGHT SOAP

is better than other Soaps  
but is best when used in  
the Sunlight way. Follow  
directions.

### SUNLIGHT

#### WAY OF WASHING

**FIRST.**—Dip the article to be washed in a tub of lukewarm water, draw it out on a washboard and rub the soap lightly over it. Be particular not to miss anything all over. **THEN** roll it in a tight roll, lay in the tub under the water, and go on the same way until all the pieces have the soap rubbed on, and are rolled up.

**Then go away for thirty minutes to one hour and let the "Sunlight" Soap do its work.**

**NEXT.**—After soaking the full time rub the clothes lightly out on a washboard, and draw it out and roll it up. Turn the garment inside out to get at the seams, but don't use any more soap; don't scrub or boil a single piece, and don't wash through two soaps. If the water gets too dirty, pour a little out and add fresh. If a streak is hard to wash, rub some green soap on it, and throw the piece back into the soap for a few minutes.

**LASTLY COMES THE rinsing,** which is to be done in lukewarm water, taking special care to get all the dirty suds away, then wring out and hang up to dry.

**For Woolens and Finer** proceed as follows:—Shake the articles free from dust. Cut a tablet of **SUNLIGHT SOAP** into shavings, pour into a gallon of boiling water and whisk into a lather. When just lukewarm, work articles in the lather without rubbing. Squeeze out dirty water without twisting and ring thoroughly in two rinses of lukewarm water. Squeeze out water without twisting and hang in the open air.

**For the most delicate colors** may be safely washed in the "Sunlight" way.

**\$5,000 REWARD** will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Your Money Refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

LEVER BROTHERS LIMITED, TORONTO

### WHAT'S IN A DREAM?

**Two Instances Which Show That They  
Came True.**

Is it possible for a dream to foretell an event? Mr. Geo. R. Sims tells a couple of stories which would justify him, at least, in "believing in dreams."

"One morning," he says, "my house-keeper brought me a cup of tea, and I awoke with a start as she entered my room. 'Oh, Mrs. Bully,' I said. 'I've just had such a nasty dream! I dreamt my sister had come to tell me someone was dead.'"

"Three-quarters of an hour later my sister actually did arrive, although it was only a quarter to nine—a most unusual hour for her to be out visiting—and she brought me the news sure enough."

square for forty-six years, is perhaps the oldest resident. "I remember when it was finished," she said, "and it was very different then—scarcely a vehicle passed. Now we simply cannot hear one another talk."

"I have almost had to give up using the rooms in the front of the house. I could show you rooms upstairs where there are large cracks in the walls and ceilings caused by the vibration. My son came to visit me the other day, and he could not sleep here."

"All the people living here want to get rid of their homes, but they cannot let them. The assessments are very high, and the value of the property has depreciated so much that they cannot get any price for them."

#### LIKE RAILWAY DEPOT.

"It is like being in a railway station, and hearing an express go roaring through," stated Mrs. Murrable, another resident. "I have brought you here to the very back of the house because it is about the only place where one can talk, but even here, as you see, the ornaments are continually shaking."

"I shall be obliged to give up my bedroom in the front and go to the back unless something is done, for I cannot get to sleep before half-past two in the morning. If we have any one to dinner we have to keep the front windows closed even in this hot weather, for if we opened them conversation would be impossible."

"The house is my own, and if I tried to sell it I could get no price for it. I should not dare now to ask my friends from the country to stay with us. They would be driven mad."

"People living in the middle of the square used not to hear the horse omnibuses, but now they say they are almost as badly off as we are. Even at Cranley Gardens the noise is intolerable."

Another resident pointed out that it was dangerous for her to go out for a drive. The oil from the omnibuses made the road so slippery that she had three horses fall in one afternoon.

#### SONG SAVES WOMAN'S LIFE.

##### Mountain Lion Mesmerized By a Woman's Voice.

Mrs. John Underwood, the wife of a New York capitalist, has undergone a terrible experience while camping out with her husband in the Black Hills, near Custer, South Dakota.

One evening Mrs. Underwood left the camp to meet her husband, who had been visiting some mines in the neighborhood in which he is interested. She lost her way in the woods and wandered until night fell.

While trying to find the path she was suddenly startled by a frightful scream, and the next moment she was knocked down by an immense mountain lion. As the animal stood over her she realized her probable fate, and shrieked with terror.

This seemed to frighten the animal, and seeing its attention diverted, it flashed on Mrs. Underwood's mind that she had read of wild beasts being subdued by the human voice.

She began singing, first in faltering, uncertain tones, but afterwards more steadily and clearly.

She found that the sound effectually distracted the beast, and throughout the night she sang constantly and desperately, going through all the songs she had ever heard, while the fierce animal lay in apparent content with one huge paw stretched over her, holding her in a vice-like grip.

At daybreak Mr. Underwood, who had been searching all night, discovered his wife's whereabouts from hearing her voice. It was a terrible situation, but Mr. Underwood took careful aim with a rifle and shot the lion in the head. The beast rolled across Mrs. Underwood's body. She collapsed and fainted, but has since recovered.

The lion measured 8 feet from nose to the tip of the tail, and weighed over

problem of supply to a large extent, as the fish are now caught in the vicinity of Victoria before striking Boundary Bay. This has reduced the catch on the Fraser considerably, but, taking it all in all,

#### THE INDUSTRY HAS IMPROVED

under changed conditions. More fish are caught at less expense, and prices that might a few years ago have spell ruin are now met without difficulty.

The other phase of the salmon question—where the sockeyes go between runs—is also being investigated. Present evidence points towards the Kamschatka coast. On the river flowing into the Northern Pacific there are two runs—one early in May and the other late in September. From this it would appear that the run visits the coast mentioned both before and after coming to the rivers of North America to spawn. Such being the case, a well-known authority stated this morning that, in his opinion, the location of the large schools of sockeyes when they pass out of sight is in the deep waters adjacent to the Siberian and Japanese coasts.

#### POLITE JAPANESE CHILDREN.

##### They are Trained to Civility From Childhood.

Japan is the country in which the word "boor," or an equivalent, is not needed. In that land habits of politeness begin to be formed with the first training of the child. Mr. Albert Tracy, in his "Rambles Through Japan," writes of what he observed in the most obscure parts of the country. Among the many things which he found to praise none is more pleasing than the fine courtesy of the children.

I saw some children emerging from school, and stopped on the opposite side of the street to look at them. They came out with none of the rude boisterousness which characterizes pupils at home, but walked sedately and quietly, with books and slates under their arms.

The first to come out were not a little startled, evidently at seeing a bearded foreigner looking at them. They stopped a moment, and then, with a courtesy which I wish I could imagine possible in an English town or an American village, made an exceedingly respectful bow, and passed on. Of course I returned the salutation.

The next ones repeated their civility, and then as fast as the pupils came to the front they stopped and made profound reverences all along the line. It was a very pretty picture, and quite well illustrated the polite bearing of the Japanese, who are thus trained to civility from childhood.

Before a baby can speak, almost before it can totter alone, it is taught to lift the hand to the forehead on receiving a gift; and I never saw a child fail to make this signal of respect and gratitude without being reproved or reminded of the omission by some bystander.

At another place I came suddenly upon two pretty children, who, approaching from the opposite direction, were completely taken by surprise, and had no opportunity to escape. Their faces showed that they were very much frightened, and the younger clung closely to his brother.

Just as I was about to speak they made the most profound of reverences, withal so prettily that I gave them each a penny, demonstrating, I hope, in their minds that even a white-faced barbarian is not dangerous if one is polite.

#### TRANSPORTATION OF LIVE FISH

Fish caught on the coasts of France and Italy are now transported alive by rail to Germany and Russia for the market. The living fish are placed in covered cisterns, running on wheels, and the water is renewed continually by means of a motor pump and a sys-

tem of his peons' labors at La Luz.

Before being despatched, about the time of the revolution in Mexico, it is calculated that the mines of La Luz were producing for their proprietors about \$6,000,000 a year.

"There is every reason to believe," says Mr. Martin, "that they can and will do the same again."

#### 300 TONS OF GOLD.

##### Bank of England Reserve of \$188,000,000 Much Too Small.

Lord Goschen's opinion, expressed at a dinner of the National Discount Company, that England's gold reserve is insufficient, was generally endorsed in London's financial circles.

"It has been admitted for some time past," said an eminent banker, to the London Daily Mirror, "and no one is more alive to the fact than the Bank of England itself, that there ought to be more gold in reserve than there is at present in the vaults."

"The Bank of England is the bankers' bank, and all the joint stock banks keep accounts with it. Therefore, it is the last resort in the matter of reserve in this country. In addition to this, London is the financial centre of the world, and anything that causes an uneasy feeling that we are not prepared for any great crisis should be removed."

"At the present time there is about £37,000,000 of gold and bullion in the vaults of Bank of England—that is a weight of about 300 tons. Now all banking authorities are unanimous in agreeing that this figure is not nearly large enough."

"But the question is, who is going to bear the expense of increasing the reserve? The deputy-governor of the Bank of England made a suggestion some time ago that the joint stock banks should combine with the Bank of England in trying to tackle the question."

"The joint stock companies think the Bank of England ought to bear the expense, but the latter say: 'Why should we bear the whole cost?'"

"About £11,000,000 is issued by the Bank of England against the debt due from the Government to the Bank, and £5,000,000 more is issued against securities. Every other note issued must be against gold."

"Of course, there is one way out of the difficulty. The British Government can always make special provision to safeguard the Bank should the emergency arise."

#### YOUNG AT 105.

##### Remarkable Case of a Woman Who Lived Only on Bread and Milk.

Mrs. Mary Fay died a few days ago in New York at the age of 105. An autopsy was performed by Dr. Chanlon, the coroner's physician, who was astonished to discover that the body was as well preserved and nourished as that of a woman of thirty-five. All the organs were in perfect condition, the only sign of decay being the hardening of the brain arteries. The teeth were wonderfully preserved.

The doctor's report has excited great interest among medical men. Investigation has disclosed that the old woman lived for thirty years entirely on bread and milk, which she liked and found economical. She never ate meat or vegetables, or drank anything except milk and water.

Some physicians believe that the case corroborates the theory of professor Metchnikoff, of Paris, that a diet of sour or curdled milk will successfully combat old age.

Mrs. Fay's great age and wonderful vigor were well known in the neighborhood where she lived. She was never known to complain of an ache or pain. Although her eyesight was not good, she was in full possession of all her other faculties, and delighted in taking long walks about the city.

Mrs. Fay was born in Tipperary in 1801, and came to America over forty

awoke with a start as she entered my room. 'Oh, Mrs. Bully,' I said, 'I've just had such a nasty dream! I dreamt my sister had come to tell me someone was dead.'

"Three-quarters of an hour later my sister actually did arrive, although I was only a quarter to nine—a most unusual hour for her to be out visiting—and she brought me news, sure enough of the death of a brother-in-law!"

"Again, I was in Switzerland with my wife, when, early one morning, she woke up in some agitation and told me she had dreamt that we had got to Chamonix, where a black-bordered letter from my sister awaited me. The letter contained news of a death."

"We arrived in Chamonix the same day. Before we had been there many hours a telegram was handed to me. I was from the sister of whom my wife had dreamt that morning—the same sister who had figured in my own fatal dream on a previous occasion—and it informed me of the sudden death, by drowning, of a young nephew of mine."

#### WHERE MEN OUTNUMBER WOMEN

##### In Most Colonies the Men Outnumber the Women Considerably.

In Western Australia, taking the immigrant population, there are 86,000 males, and only 45,000 females. Queensland has 56 men to every 44 women the Transvaal 55 men to every 45 women, and the Orange River Colony 5 men to every 46 women. These figures refer to whites.

Turning to marriage and to all races the universality of marriage in India is strikingly brought out by the statistics. Of every 1,000 females aged fifteen and upwards, there are unmarried:

|                            |     |
|----------------------------|-----|
| In Ireland .....           | 497 |
| In Scotland .....          | 445 |
| In England and Wales ..... | 395 |
| In Western Australia ..... | 338 |
| In India .....             | 45  |

The contrast is very striking, even when allowing for the earlier stage at which the natives of India marry.

One fact of interest is that Ireland is the country of old men and women. Out of every 1,000 of the population of that country there are 64 men and 6 women sixty-five years of age or upwards.

#### CUPID MISSED.

##### Lover Grabbed Sweetheart's Hair to Save Her and It Came Off.

The Alster, that picturesque stretch of water which separates the residential from the business quarters of the city of Hamburg, was the scene recently, say the German papers, of a rude awakening from love's young dream.

A well-dressed young couple had hired a rowboat at the Gurlittstrasse landing stage for a little spin, and who knows what pretty secrets would have been whispered into Angelia's ear if she had not lost her balance and tumbled into the water? The young man pluckily dived in after her and succeeded in grasping her hair, which, oh horror! came off in his hands. Eventually, the girl was saved by a boatman and the youth got out unassisted, but from all appearance his feelings towards the fair lady had undergone a complete change of which her involuntary immersion was not the only cause.

#### GREENLAND'S GLORY.

The largest mass of ice in the world is probably the one which fills up nearly the whole of the interior of Greenland, where it has accumulated since before the dawn of history. It is believed now to form a block about 600,000 square miles in area, and averaging a mile and a half in thickness. According to these statistics, the lump of ice is larger in volume than the whole body of water in the Mediterranean, and there is enough of it to cover the whole of the United Kingdom of Great Britain and Ireland with a layer about seven miles thick.

# WHICH COLLEGE ?

The important question to be decided by young men and women contemplating a Commercial education, and on their decision may rest their success or failure in life.

THE *Frontenac Business College* Kingston, Ont.

Prepares students for these positions requiring exceptional efficiency and paying the largest salaries. We place our Graduates.

THE BESTEQUIPPED COMMERCIAL SCHOOL IN EASTERN ONTARIO,  
Fall Term Opens September 4th.

Write for Catalogue. T. N. STOCKDALE, Principal.

## THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

## CUSTOM TAILORING.

ARE YOU TIED TO ANY TAILOR

If you're not, don't make up your mind about anything—cloth, style or price—until you see what's going on here this season.

Perhaps we'll surprise you by making you clothes to order for less money than you think. We certainly will if you have been paying extravagant prices.

Suits to Order, \$15, 17 to 23

Overcoats to Order \$14 to 22.

Trousers to Order, \$3.50 to \$7

We are always busy making clothes for people who know our work, and have come back for more. Wouldn't you like a good fitting, well made suit—if so we can make one for you.

We have but one grade of Tailoring—the best we can do—that is the best there is.

Coal Facts.

Now is the time to get in your stock of Coal for the winter before your lawn gets soft. If you want the best grade of Anthracite, Steam or Cannel Coal you can get it by calling on Coal

Portland Cement.

We sell the best cement made. If you have never used any, try it.

BOYLE & SON.

For Gasoline Stoves and Engines.

Use only the refined gasoline, kept free from coal oil, containing no sediment to clog the tubes, sold at The Medical Hall, FRED L. HOOPER.

No Express Next Week.

As it is the custom from year to year to cease publication for one week, The Napanee Express will not be issued next week, and the staff will take a week's vacation. The Job Department will not however, be suspended, and all Job work will be accepted and promptly executed.

THERE'S A DIFFERENCE IN SPICES.

Compare any of "Wallace's Good Spices" with the ordinary kinds sold, you can see a difference even before using them, and the flavour of the pickles made with them is very tempting. We are agents for Whitfield's Older Vinegar and Chemically Pure White Wine Vinegar. The Kind that Keeps the Pickles at The Red Cross Drug Store.—T. B. WALLACE.

The Fall Fair.

The Prize Lists for the Lennox Fall Fair were issued this week and are being distributed. The fall fair at Napanee is always good and will be increasingly popular this year. A number of new and valuable special prizes are this year being offered in addition to the usual list, which is in itself a very lengthy one. Secure a copy of the Prize List and if you have anything to exhibit get an entry form and exhibit it. The secretary Mr. E. Ming will be pleased to furnish any information required.

Died in the Hospital.

Napanee citizens were shocked to hear, on Sunday morning, of the death, in the Kingston hospital, of John S. Ross, a most respected resident of Napanee. It is only about ten days since Mr. Ross left here for Winchester to spend a few days with his brother. He was taken ill while there and his daughter, Miss M. J. Ross, was telegraphed for. Upon her arrival at Winchester, and after a consultation of doctors it was decided to remove Mr. Ross to the Kingston hospital for treatment for jaundice, from which he was suffering. He was taken to the hospital, but gradually grew worse, and the end came suddenly on Sunday morning. Deceased was about seventy years of age, one daughter, Miss M. J. Ross, survives. The remains were taken to Winchester for burial in the family plot. The funeral took place on Tuesday afternoon.

A Family Reunion.

The morning of the 9th August broke forth bright and clear, which rejoiced the hearts of a great many people especially those that were going to the annual File picnic. Instead of going to Massassaga Park, as usual, the beautiful grove in the Napanee Driving Park, was chosen. About 10.30 the friends commenced to gather with baskets and boxes, and at 12 noon the Varuna brought a number from Ameliasburg. Soon the cloths were spread with all kinds of good things, such as cakes, pies, puddings, fruits, different kinds of meats and salads. All partook and pronounced everything good. Among those present were: Dr. and Mrs. A. J. File, Mr. and Mrs. Fred File and little daughter, Mr. and Mrs. Stanley File and little daughter, Mr. A. B. File and Miss File, Mr. G. File, Mr. and Mrs. F. DeLong, and daughter, Mr. and Mrs. B. Adams and son, Mr. and Mrs. Adams and Miss Lout, all of Ameliasburg; Mr. and Mrs. A. Barnes and Miss Barnes, Chicago; Mrs. Herb File and son, Mrs. Bates, and Miss Edna Arnott, Toronto; Miss Bates, Buffalo; Mrs. Hawley and Miss Hawley, of Cleveland; Mr. and Mrs. J. C. Long, Mr. and Miss Long, Richmond; Mr. and Mrs. Frank Amey and Mrs. Gou, Selby; Mr. Robert Madden, Strathcona; Mr. and Mrs.

The congregation of St. Patrick's Church, Napanee, propose holding a bazaar in the town hall about the first week in November. The exact date will be given out later. The object of this bazaar is to meet expenses of the improvement fund. The bazaar will be under the management of competent committees of ladies and gentlemen, and Rev. Father O'Connor.

One young man who left the Frontenac Business College, Kingston, last April at an initial salary of \$8.00 a week writes us that his employer increased his salary to \$800.00 a year after the first month. This speaks for itself: a thorough and reliable College always brings the best results. Catalogue mailed free on request.

T. N. STOCKDALE, Principal.

James E. Richardson, one of Napanee's best known residents passed away on Friday last, after a short illness, aged sixty-six years. Deceased was for over forty years an employee of the G. T. Railway at Napanee, and for the past five years has been driving the Adolphustown stage. Besides his widow, two sons, Reuben Richardson, of Smith's Falls, and Hal Richardson, of Williamsport, Pa., and one daughter Mrs. R. J. Smith, Napanee, survive. The funeral took place on Sunday, services being conducted in the Western Methodist Church, thence to the Eastern Cemetery. The A. O. U. W. of which he was a member had charge of the funeral.

Will put an sale Saturday morning August 11th, two case containing six hundred pieces of China, all useful articles for household use in endless variety direct from the manufacturers in Europe, and at prices never heard of here before for such goods. See show window.

**Coal Facts.**

Now is the time to get in your stock of Coal for the winter before your lawn gets soft. If you want the best grade of Anthracite, Steam or Cannel Coal you can get it by calling up VanLaven's Office, Phone 92. All coal kept under cover and well screened before delivering.

**Both Parties Pleased.**

Not the political parties this time, but the one who makes the cake and the one who eats it; because, our Pure Extract of Vanilla (made from the Vanilla bean and not a chemical product) gives that perfect flavor. Try it. The Medical Hall—FRED L. HOOPER.

**Forging Ahead.**

The Lennox and Addington Mutual Fire Insurance Company is steadily forging ahead to the first place of the Insurance Companies doing farm business in these Counties. The amount of Insurance passed upon at the July meeting of the Directors was \$125,000. The irresistible Agent D. L. Green has a good running mate in the ambitious Mr. Jones, each vying with the other in writing the most business for the Company. The company never did more business, never had more Policy-holders, or more insurance, has been able to meet its losses most promptly and has a good cash surplus on hand, and continues to do business at the old stand (despite reports to the contrary) first, stairway west of Coxall's grocery, in the Town of Napanee.

The Pandora Range for the fall of 1906, most perfect model ever moulded Has them all beaten. Better than ever this year.

**BOYLE & SON.**

Mr. Ernest Long took a snap shot of the party, which were sixty in number, while seated around the feast. The time for breaking up came all too soon, adieus were spoken, wishing all to meet again next year.

**Presented with a Purse.**

A number of the many friends of Mr. Geo. Bustin, met in Dr. Sills' office on Tuesday evening and presented Mr. Bustin with a purse of \$45.00 as a parting gift on the eve of his departure to British Columbia.

Following is the address which accompanied the presentation.

Napanee, August 14th, 1906.

GEORGE L. BUSTIN, Esq.

Dear George—It is with exceeding regret that we have learned you are about to leave Napanee, after a sojourn of some twelve years among us, and we have thought it only fitting that, as many of your male friends as could conveniently do so, should meet together to give you a hearty handshake and a word of farewell. During your long residence in Napanee, you certainly endeared yourself to all the boys and the citizens generally. You have, we feel, been a good, loyal citizen to the Town, a town that has sent out to distant and greener fields, many brilliant and loyal sons. You have always been in the forefront in any project which the boys have undertaken to help our pleasures and to give the old town a name for sociability and hospitality. On an occasion of this kind when another of our popular sons is on the eve of leaving us, memories of old times in Napanee are recalled and it is a very pleasant retrospect indeed when we recall the many good times that the boys have enjoyed together; but there is a sadness too, when we recollect the great number of the large hearted, good fellows, whom limited prospects have forced to leave the parental hearth, to go forth to strange lands to carve out a fortune, and a future among strangers. Some, too, have crossed the great divide but their jovial, generous spirits, we trust, will ever remain a tender and a wholesome recollection. We understand that you are about to take up your residence in the Pacific Province, the most rugged of the precious jewels in the Canadian diadem, and we feel certain that in this far western province, whose shores are washed by the great mighty ocean, and whose areas are rich with wooded hills and generous minerals, you will bring your ripe business experience, your sterling integrity, your unflinching courtesy, generosity and goodfellowship, and thus well equipped in the years to come, earn for yourself that modest, unpretentious motto which spells, "Success and Plenty." As a parting word we would ask you to forget us not, and always remember the old town, and we assure you, we, also, will ever treasure you in our hearts as an honest, upright and loyal citizen, whom the fate of circumstances has driven from us, but whom nevertheless fond recollections will ever hold near and dear. On behalf of your friends and fellow citizens, allow me to present this purse of gold and with our good fellowship and heartiest wishes for your future success.

The Captain of a schooner at Belleville reports having located the schooner Mary sunk last fall with all hands on board.

Nickle plated ware, Agateware, and Tinware.

**MADOLE & WILSON**

**\$16.50**

## BLAZE AT DESERONTO.

One of the most disastrous fires which has occurred here in recent years started on Saturday afternoon shortly after 4 o'clock, and for about an hour threatened to wipe out the eastern portion of the town. The fire originated at the big trestle shed dock owned by the Rathbun Company, and inside of a few minutes the whole structure was a mass of flames. There was a strong south wind blowing towards the town, and it was soon seen that everything was doomed if aid was not procured at once. A fire engine and crew were brought from Napanee and every person available was pressed into service to help keep down the blaze.

A large quantity of lumber and cord wood and fourteen dump cars, belonging to the Rathbun Co. were destroyed. The refuse boilers building, was badly damaged, two houses badly gutted and a number of houses slightly scorched.

There are from 2,000 to 2800 residents in Deseronto, and at one time it was feared that the town would be a serious sufferer from the flames. Fortunately this did not prove to be the case, although the loss was severe enough. A number of residences were threatened, and a good many people moved out of their homes for fear they might be burned out, but only three or four residences were damaged. The Napanee fire brigade did good service. The loss could not be estimated Monday.

## Paul's for School Books.

### DESERONTO ROAD.

Mrs. Charles Keller and Mrs. Archie Fuller, of Phoenix, N. Y. also Miss D. M. Kerr, of Cherry Valley, Prince Edward County, have been visiting at Mr. Levi A. Sager's.

The Tomato crop on this road is excellent this year, and the farmers are busily engaged hauling the same to the Napanee Canning Company.

Mr. Robert Dowling takes the lead this year in thrashing, being the first one to have a machine on this road, and the grain is reported as turning out well.

Archie Amey who has for the past few years occupied the Butler farm near the cemetery has rented Mr. Samuel Sager's place just west of Sand Hill, and will begin his fall ploughing soon. Mr. Sager intends moving to Deseronto in his own house.

Miss Cora VanVlack, of Picton, who has been visiting her cousin Miss Lulu VanVlack for a few days, returned home on Tuesday.

Mr. H. Aylesworth has built a new hen yard of woven wire, which means more tomatoes.

## Races and Base Ball Matches in the Driving Park on Monday.

### STELLA.

Farmers are busy thrashing, harvesting being about completed. Grain is not yielding so well as was expected.

## THE HORSE RACES.

On Monday next Sept. 3rd, the postponed horse races will be held in the Napanee Driving Park. The races and sports promise to be even better than the races which were to have taken place on Dominion Day. More horses are entered and all the races are well filled so that a full day's programme of races is assured. We are unable to publish the list of entries but the secretary of the Driving Park Association, Mr. J. L. Boyes informs us that a large number of the best horses in the district are entered for these races.

A double header baseball match will be played at the Park on Monday, starting at 1.20 o'clock. Yarker and Newburgh teams will play. The winning team will then play the Picton baseball team.

The Picton baseball club are running an excursion to Napanee per Sir. Ella Ross. A number of other excursions are also coming.

## BELL ROCK.

The weather has been fine here for harvesting and thrashing the farmers report a good yield of grain.

Guns, Rifles, Browning Automatic, Powder, Shot, Loaded Shells, Cartridges, &c.

BOYLE & SON.

Miss Ethel Wilson left to-day for Toronto.

Mr. and Mrs. A. S. Kimmerly are spending a few days in Ottawa.

Mrs. J. L. Madill has returned from an extended visit with her sister, Mrs. Madill, Kingston.

Mr. Arthur Gibson returned on Thursday from the West.

Miss Mantell returned on Thursday to assume her position with The Robinson Co.

Mr. Arthur Fraser, of New York, is the guest of his uncle, Mr. J. R. Fraser.

Miss Maud Bruton is in Toronto this week attending the millinery openings.

The death of John Walters, brother of James Walters, Graham street, occurred at Napanee, on Thursday, Aug. 30th, 1906, at the age of seventy-five years. The funeral will take place from the residence of his brother, Graham street, Saturday afternoon at 2 o'clock.

Wholesale boot and shoe dealers will advance prices about 20 per cent on spring samples.

Mrs. W. Pringle and Mrs. R. Reid, were in Kingston on Saturday, also Mr. and Mrs. R. Rose; T. E. Furr, Colebrook, gave us a flying call on Monday.

Mrs. and Mrs. Jedediah Irish and daughter, Hattie, were calling on friends here, Sunday.

Wilbur Love has gone to Sharbot Lake on business.

Sperry Rikley, William McCorman, Arnie Brown, and Allen were on Sunday guests of James Huff.

John Brown paid a flying visit to friends in Verona on Sunday, and was accompanied home by his sister, Mrs. S. Vandewater.

Cyrus Bush is convalescing.

In the absence of our superintendent Wilbur Love, J. E. Boulton took charge of the Sunday school on Sunday.

Mr. and Mrs. B. Rose and Edwin Bell are among the invited guests to attend the wedding of Miss Estella G. Gates and Sperry M. Burt, of Morven, on Wednesday evening, at the residence of George Gates, Westbrook.

THE RIGHT PAINT.

The Right Paint to buy is "Good Paint." Ramsay's Mixed Paint is Good Paint. It gives good satisfaction in wear and looks Wallace's Red Cross Drug Store has the Sole Agency for this paint and The Genuine "Floor Enamel" Jamieson's. We sell also, Bulldog White Lead and the Genuine Elephant White Lead. Remember what you want in paint, oil, varnish, shellac or floor finish, you can get it at "WALLACE'S," prices right.

CAMDEN EAST

The Rev. C. E. S. Radcliffe has just returned from his holidays, after visiting Sharbot Lake, Trenton, Toronto, and Mount Forest, where he took in the old boys and girls reunion and had a most pleasant and enjoyable time.

Mr. A. T. Love, B. A. of Bishop's College, Lennonville, took charge of Parish and his services were much appreciated by the people, during the absence of the Rector.

The Rev F. E. Roy who represents the educational interests of Trinity University, Toronto, preached on Sunday last at Camden East, Yarker and Newburgh. An appeal for financial aid is being made on behalf of the University, which is commended by all the Bishops of the Ecclesiastical Province of Ontario.

The Twinkling of an Eye.

May not mean much sometimes, but every movement is of vital importance when under examination by the expert optician in charge of the new optical department at The Medical Hall. Your eyes tested free and satisfaction guaranteed—FRED L. HOOPER.

Disinterested.

"What a splendid woman she is!" "I am glad to think you have got such a wife."

"Such a wife! Why, man, you have no idea of her generosity. When I was poor she refused to marry me because she was afraid of being a burden upon me, but the moment I came into my fortune she consented at once. What do you think of that for kindness?"

A Stove Talk.

The stove season is nearly here again and you are beginning to plan for that new up-to-date Range and thinking of the comforts, which it will bring to you. We wish to announce to you that we find ourselves in a much better position than formerly to accommodate this growing trade. Increased floor space and light enables us to make a much larger exhibit of this class of goods. Imperial Oxford Ranges still lead, but we have several other good and up-to-date lines. Sizes and prices to suit everyone. Be sure and inspect our stock before you purchase. It will be a pleasure for us to show you the goods.

MADOLE & WILSON

PICTON

Business College and School of Finance

HIGH CLASS INSTITUTION.

17 ex-Public School Teachers and 22 Graduates of other Colleges, helped to compose our class.

SALARIES

of graduates direct from College ranged this year very high.

\$1,200, \$980, \$900, \$800, \$750, etc. Scores of young ladies, \$600.

Price of board very moderate.

Bookkeeping, Stenograph and Typewriting. Telegraphy.

Every graduate in a position.

JNO. R. SAYERS, Picton, Ont., Principal and Proprietor.

Parish of Ernesttown.

The services on Sunday, Sept. 2nd, will be conducted by Rev. W. H. Lipscomb, of St. Paul's, Kingston as follows: Hawley, 11 a. m.; St. Alban's Odessa 3 p. m.

Authorized Capital \$2,000,000.

President, Edward Gurney; General Manager, G. de C. O'Grady.

To accommodate the people of Napanee and district, The Crown Bank of Canada will be open SATURDAY EVENINGS from 7 to 9.

INTEREST PAID ON DEPOSITS 4 TIMES A YEAR AND CALCULATED FROM DATE OF DEPOSIT.

Farmer's notes discounted — farmers' sales notes collected.

A general Banking business transacted.

Your Account is Solicited.

R. G. H. TRAVERS, Manager.

Napanee Branch.

# NOW THE COSSACKS REBEL

## The 24th Ural Regiment Arrests Its Own Officers.

A despatch from St. Petersburg, says: According to private advices, the 24th Ural (Cossack) Regiment has mutinied at Samarikand, Asiatic Russia, arrested its officers and replaced them with men from the ranks. The commander of the garrison of Samarikand, it is said, has demanded the immediate surrender of the mutineers, the artillery has been called out and the city is in a state of panic.

### POLICE ARE POWERLESS.

In spite of the wholesale arrests and deportation of revolutionists the big centres' daily chronicle of murder and robbery is not appreciably diminishing. The police seem to be utterly powerless to capture the criminals. They do not make an arrest in one case out of 25. While the revolutionary opposition to the Government has thus degenerated into a campaign of crime, the three political parties—Constitutional Democrats, Octobrists and Regenerationists—are drifting. The efforts to effect an amalgamation have failed, and all the leaders seem to be greatly at sea as to what tactics to pursue.

### SITUATION DECIDEDLY GRAVE.

A despatch from Samara, Russia, says: The agrarian situation in this province is most grave. Disorders are prevalent in numerous districts, and troops have been requisitioned to restore order in three localities, where firing is going on. Many men have been killed. The peasants of the Kolossof estate, who recently seized and occupied the land, have returned the property to its owners. A strike of factory hands has begun in Samara, and a number of agitators have been arrested.

### RAILWAY STRIKE ARRANGED.

A despatch from St. Petersburg says: At a meeting of one hundred and forty-two delegates, representing all the Russian railways, just concluded in Finland, it was resolved that a general strike will be feasible at a near date and to issue instructions to prepare for it. A committee was appointed to draw up a strike appeal or any other manifesto which may be found necessary.

### LAND-OWNERS GETTING OUT.

Official statistics show the extent of the panic among the land-owners. Since last November 1,762,557 dessiatines (a dessiatine is a little over two and a half acres) of land were offered to the Peasants' Bank at about \$63 per dessiatine, but the amount actually bought and sold to the peasants is not stated. The bank is selling the land to the peasants on easy terms. In some places it is said the land question is settling itself by this method.

### SET THE BODY ON FIRE.

A despatch from Samara says: The commander of the Borissov Regiment on Wednesday was attacked and killed. The murderers escaped after saturating his body with methylated alcohol and setting it on fire.

### COLONEL FATALLY WOUNDED.

A despatch from Warsaw says: Count Fernor, a colonel of the general staff, was fatally wounded on Wednesday by revolutionists. A patrol came up immediately after the affair and discharged a volley into the crowd killing one man.

plosion. Among the dead are: General Zamestin, the Premier's personal secretary; M. Khovostoff, ex-Governor of the Province of Penza; Colonel Federoff, chief of the Premier's personal guard; Court Chamberlain Davidoff, Court Chamberlain Voronin and Aide Doubassoff, Prince Nachachidze and Prince Scherwachidze, two delegates from the Caucasian nobility, and four women and two children.

M. Stolypin's three-year-old son is seriously though not fatally injured, and a number of persons who are injured are prominent in the social and official world.

### SOME CONSPIRATORS KILLED.

Of the four conspirators who engineered the outrage, two were killed with their victims, while the third, who acted as coachman for the party, and the fourth, who remained inside the carriage, in which they drove to the residence, were badly wounded, and are now in the St. Peter and St. Paul fortress.

#### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 19 to 20c; tubs, 18 to 19c. Creamery prints sell at 23 to 24c, and solids at 22 to 22½c.

Eggs—Good candled stock, 16 to 18c per dozen.

Cheese—They are quoted at 13 to 13½c, the latter for twins.

#### HOG PRODUCTS.

Dressed hogs in car lots are nominal. Bacon, long clear, 12½c per lb in case lots; mess pork, \$21.50 to \$22; short-cut, \$24 to \$24.50.

Hams—Light to medium, 16c; do, heavy, 15c; rolls, 12½c; shoulders, 11½ to 12c; backs, 17½ to 18c; breakfast bacon, 15½ to 16c.

Lard—Tierces, 11½c; tubs, 11½c; pails, 12c.

#### BUSINESS AT MONTREAL.

Montreal, Aug. 28.—Grain—Locally there was no improvement in the demand for Manitoba wheat, and bids from over the cable were scarce. Oats—Prices quoted are 36, 37, and 38c in store for Nos. 4, 3 and 2, respectively.

Manitoba spring wheat, \$4.40 to \$4.50; strong bakers', \$3.90 to \$4; winter wheat patents, \$4.25 to \$4.30; straight rollers, \$3.85 to \$4; do; in bags, \$1.85 to \$1.90; extras, \$1.60 to \$1.70. Feed—Manitoba bran, in bags, \$18; shorts, \$21 per ton; Ontario bran in bags, \$17.50 to \$18; shorts, \$21; milled mouillie, \$21 to \$25 per ton, and straight grain, \$28 to \$29.

Provisions—Barrels short cut mess, \$23 to \$24; half-barrels, \$11.75 to \$12.50; clear fat back, \$23.50; long cut heavy mess, \$21.50; half-barrels do, \$11.25; dry salted long clear, 12½ to 12½c; barrels plate beef, \$12 to \$13.50; half-barrels do, \$6.75 to \$7.25; barrels heavy mess pork, \$11.50; half-barrels do, \$6.25; compound lard, 8 to 9½c; pure lard, 12 to 12½c; kettle rendered,

#### EATEN BY CROCODILE.

#### English Trader Seized While Crossing a River.

A Salisbury, Rhodesia, despatch says: An Englishman named Warman, formerly employed at Salisbury Railway Station, has been eaten by a crocodile. Warman and a companion, Mr. H. E. Bennett, decided, at the end of last month, to go on a trading trip across the Kafue River. On arriving at the river they knocked together a rough boat, on which they placed all their belongings, and then embarked. When in mid-stream a crocodile attacked the boat and upset it, Bennett and Warman both being left floundering in the water. They struck out for the opposite shore, which Bennett reached, but on looking around he saw the crocodile seize Warman's leg and drag him under the water. Bennett had to travel 300 miles before he reached a white man's abode.

#### KNEADED DOUGH WITH FEET.

#### Dirty Condition of Prussian Bakeries Denounced.

A despatch from Berlin, Germany, says: The Government Medical Department has issued a report on the sanitary condition of the Prussian bakeries and slaughter houses, to which the newspapers are giving sensational prominence, one of them using the caption "America in Prussia." The report says that many of the butchering establishments were found in a very unclean condition. The Government inspectors found the conditions in the bakeries to be particularly objectionable. In one town boys kneaded the dough with their feet and one bakery was found to be occupied by cats and hens. One baker admitted that his floor and vats were scrubbed only once a year.

#### RIOTERS LOOT CAPE TOWN SHOPS.

#### An Army of Unemployed Do Extensive Damage.

A Cape Town despatch says: Remarkable scenes were witnessed here on Friday. For some time past "unemployed" agitators have been vigorously at work, spreading Socialistic doctrines, and a deputation waited on Dr. Jameson, the Premier, demanding employment. At a certain stage of the interview Dr. Jameson promised food and shelter to the genuine unemployed, but after the deputation had gone two or three white agitators incited a crowd of 700 colored hooligans to loot the shops. Riots followed, and continued throughout the greater portion of the day. A large number of shops were looted, and the police charged the crowd, several conflicts occurring. Nine arrests were made. Very few white men are implicated in the riots, the looters consisting chiefly of a low type of colored hooligans. Order was restored in the evening.

#### THE DEALERS DIFFER.

#### Varying Estimates of the Western Wheat Crop.

A Winnipeg despatch says: The grain dealers and bankers returned on Friday from a trip of inspection of the wheat crop, and while individual estimates of the yield run all the way from 74,000,000 bushels to 97,000,000, the average estimate places it at 84,500,000. The diversity of the figures is an indication of the varied opinions formed. Several American experts with the party are of opinion that the estimates of the yield sent out from Winnipeg on Thursday are approximately correct, but possibly a little high. Finlay Barrel, head of Barrel & Co., Chicago, believes that wheat will go over 89,000,000 bushels, and ventured the statement that within eight years all the contract spring wheat will be grown in the Canadian west. The grades are good, and

A despatch from Warsaw says: Colonel Fernor, a colonel of the general staff, was fatally wounded on Wednesday by revolutionists. A patrol came up immediately after the affair and discharged a volley into the crowd, killing one man.

#### THE CZAR'S UNCLE.

A despatch from St. Petersburg says the Czar had a long conference in Wednesday with the Grand Duke Nicholas Nicolaievitch in regard to the military dictatorship which the Grand Duke has advocated as the sole means of re-establishing order. It is said the Czar is much depressed because the power of the revolutionary element has apparently not been broken. There are strong influences at work, it is said, to make the Grand Duke Nicholas the military dictator, in the hope that he will be able to cope successfully with the situation. The feeling that it will be necessary to install some such regime is gaining ground largely on account of the terrible state of confusion throughout the country.

Another despatch says that Gen. Troppoff, the Chief of Police in St. Petersburg, is suffering from a severe attack of angina pectoris. It is said that he cannot recover.

#### BAD HARVEST.

A despatch from St. Petersburg says: The condition of the harvests is giving the Government serious uneasiness. Heavy rain is general over the wheat-growing provinces, where the crop is 20 per cent. below the average, owing chiefly to the political crisis and a failure to sow in considerable areas. In many places the peasants refuse to gather the crops. There is no movement yet towards importing American wheat, but the Government will probably find it necessary to prohibit the export of all grain owing to the famine conditions in many parts of the country. Last week 400,000 bushels of German rye were bought at two cents per bushel below the Russian prices. This rye is of low quality, and such of it as was sent to the distressed provinces arrived there damp and unfit for sowing.

The Moscow Relief Committee reports bad crops throughout the empire, and food for the peasants' cattle is lacking in the Provinces of Nijni Novgorod and Kazan.

The Imperial authorities are now more concerned with the famine problem than with the revolutionary movement.

#### NEW REGIMENT TO GUARD CZAR.

A new regiment, selected from the squadrons of the different Cossack Guard regiments, has been created to act as the personal escort of the Emperor, who has accepted the title of colonel of the new organization.

The strictest censorship is now exercised over press despatches in the Caucasus, in order to conceal the true state of affairs, both regarding the true inwardness of the Tartar-Armenian warfare, and the fermentation among Russian troops.

The Armenian Tartar situation is worse than is known to the outside world. Almost all the Russian military units are disaffected, and even the Cossacks are rebelling against doing police duty. The latest mutiny is that of the Poltava Cossacks, who several days ago at Tiflis formally demanded to be relieved from police duty, and asked for the discharge of those who had served over three years. The entire regiment was disbanded and confined under guard in their barracks.

#### BOMB KILLED THIRTY-TWO.

A despatch from St. Petersburg says: Thirty-two persons are dead and twenty-four wounded as the result of an attempt on Saturday afternoon to assassinate Premier Stolypin with a bomb while he was holding a public reception at his country house on Aptekarsky Island. The Premier was slightly wounded on the face and neck by flying splinters.

The legs of the Premier's fifteen-year-old daughter were broken by the ex-

ploding. There were twenty-three deaths from dynamite explosions in the vicinity of Kenora during the first six months of the present year.

Clair Adams of London, Ont., has been awarded the prize offered by a London, England, publication for the best original sketch on cricket.

The C. P. R. has decided not to run any more harvest excursions from Cape Breton, as the coal companies are unable to get men for their mines.

The Hudson's Bay Company made a shipment of 101 bales of furs from Prince Albert, Sask., over the C.N.R., for England. The furs are worth \$65,000.

Consul-General Nosse, of Japan, whose four year stay in Canada is now nearly ended, has been advised that his term has been continued indefinitely.

It is rumored in London that Mayor Judd will move in council for a vote of the people on the advisability of the city purchasing the street railway.

The number of people carried from Ontario on the western harvesters' excursions up to date is 12,582, nearly 2,000 more than for the corresponding period of last year.

#### GREAT BRITAIN.

London is suffering from a plague of mosquitoes.

Trade conditions in Britain are brighter in many directions.

Signor Marconi says that wireless messages will soon be sent from Ireland to Canada.

The trial tests of the British battleship Africa were postponed owing to the development of miner defects.

The Times and other British papers express the opinion that President Roosevelt may again be a candidate for the Presidency.

#### UNITED STATES.

The defence of Harry Thaw, the murderer of Stanford White, will be emotional insanity.

American fishermen on Lake Erie complained to the Government that the Canadian cruiser Vigilant was destroying their nets.

The New York Central Railway has been indicted at Jamestown, N. Y., for giving unlawful freight rates to the Standard Oil Company.

John Piche, kidnapped and taken from home eight years ago by unknown parties, returned to his home at Dollar Bay, Michigan, on Wednesday, where his mother lives now. There he found his mother married a second time and discovered that his father had died.

Because he "batted into" an argument between two of his fellow-countrymen, the tip of Anthony Snellkop's tongue was cut off at Minooka, Penn., on Tuesday night. He was one of the guests at a wedding celebration, and his action precipitated a fight, from which he emerged with only three-quarters of his tongue.

Mahala Lewis, a negress, said to be 120 years old, died at Ottawa, Kansas, on Tuesday night. She could tell many incidents in the life of George Washington, whom she insisted she had seen many times. Mrs. Lewis was a native of Virginia, and was unable to read or write.

Carrie Nation spent Wednesday night in the city jail at Denver, Col., on the charge of disturbance and inciting a riot. She had induced 100 women, some carrying babies, to follow her on a crusade into the tenderloin. Hoodlums began abusing the women, causing a stampede, in which some of the women were injured.

#### GENERAL.

The Sydney, N.S.W., Legislative Assembly passed the free education bill.

Jose Miguel Gomez, who is supposed to have instigated the Cuban revolution, has been arrested.

The military Governor at Bilbao, Spain, has unsuccessfully attempted to arbitrate the dispute between the employers and the 60,000 strikers.

22c; barrels plate beer, 12 to \$13.00; half-barrels do, \$6.75 to \$7.25; barrels heavy mess pork, \$11.50; half-barrels do, \$6.25; compound lard, 8 to 9c; pure lard, 12 to 12c; kettle rendered, 13 to 14c; hams, 14c to 16c; breakfast bacon, 15c to 16c; Windsor bacon, 16c; fresh-killed, abattoir-dressed hogs, \$10.50 to \$10.75; alive, \$7.25 to \$7.60 per 100 lbs. Eggs—Selects, 20 to 20c; No. 1 candled, 17 to 17c. Butter—Choice creamery, salted and unsalted, 22c to 23c; medium grades, 22 to 22c. Cheese—Ontario, 12c to 12c; Quebec, 12c to 12c.

#### UNITED STATES MARKETS.

St. Louis, Aug. 28. — Wheat—Cash, 70c; September, 68c; December, 71c; May, 76c.

Milwaukee, Aug. 28. —Wheat—No. 1 Northern, 77 to 80c; No. 2 Northern, 74 to 76c; September, 70c asked. Rye—No. 1, 58 to 59c. Barley—Dull; No. 2, 55 to 56c; sample, 38 to 54c. Corn—No. 3, cash, 48c to 49c; September, 48c, bid.

Duluth, Aug. 28. — Wheat—No. 1 Northern, 77 to 78c; No. 2 Northern, 75c; September, 73c; May, 77c.

Minneapolis, Aug. 28. —Wheat—September, 71c; December, 72c; May, 76c. Cash—No. 1 hard, 77c; No. 1 Northern, 76c; No. 2 Northern, 74c; No. 3 Northern, 72 to 73c. Flour—First patents, \$4 to \$4.10; second patents, \$3.85 to \$3.95; first clears, \$3.25 to \$3.45; second clears, \$2.50 to \$2.60. Bran—\$13.50 to \$13.75.

#### CATTLE MARKET.

Toronto, Aug. 28.—Heavy deliveries of live stock were received at the Western Market to-day.

Exporters were slow of sale. The quotations ranged from \$4.40 to \$4.75 for good, and \$4 to \$4.50 for medium and light animals. Export bulls were worth \$3.50 to \$3.75 per cwt.

Butchers' picked, \$4.60 to \$4.75, good loads, \$4.25 to \$4.50; medium and fair, \$3.60 to \$4; cows, export, \$3.40 to \$3.70; cows, medium, \$2.75 to \$3.25; canners, \$1.50 up.

A light call for stockers and feeders of good quality characterized trade. Short-keeps, \$4.25 to \$4.60; feeders, \$3.60 to \$4.10; stockers, \$2.75 to \$3.50; stock bulls, \$2 to \$2.25 per cwt.

With liberal offerings of milch cows, prices were easy. The range was \$25 to \$50 each for milch cows and springers.

Sheep and lambs were strong—Export ewes, \$4.50 to \$4.75; bucks, \$3.50 to \$3.75; lambs, \$6.25 to \$7 per cwt. Calves were worth \$3.10 to \$6 per cwt.

Hogs were unchanged at \$6.90 for select and \$6.65 for lights and fats.

#### THE AVERAGE YIELD.

Estimated at Fifteen to Twenty-Five Bushels Per Acre.

A despatch from Winnipeg says: In their weekly report on the condition of the wheat crop the Canadian Pacific agents were on Wednesday requested to give an estimate of the average yield in their respective districts. Only a small percentage ventured to make any estimate, those reporting putting the yield at from 15 to 25 bushels per acre. A large portion of the wheat is now cut, and thrashing operations have begun at several points. The weather has been favorable. Samples of wheat in shock are all excellent, and experts say more number one will be thrashed this year than for several years past.

#### APPLES FOR SOUTH AFRICA.

Merchant Buying Fruit for Shipment—Cape Colony Law Strict.

A despatch from Ottawa says: Mr. J. P. Taylor, a South African merchant, is in the city obtaining from the fruit division of the Department of Agriculture names of prominent apple growers and dealers. He is engaged in buying apples for shipment to South Africa.

The law regarding the admission of diseased or wormy fruit into Cape Colony only requires that all apples affected shall be destroyed at the port of landing, without recompense to the shipper.

that wheat will go over 89,000,000 bushels, and ventured the statement that within eight years all the contract spring wheat will be grown in the Canadian west. The grades are good, and samples from the machine will go No. 1 northern or better.

#### A CLEAN MILK SUPPLY.

Provincial Board of Health Sends Out Important Circular.

A despatch from Toronto says: The Provincial Board of Health have sent out instructions to dairymen and other people who supply milk for public distribution, pointing out the importance of keeping cows away from filth pools and sloughs, and stating that milk should be cooled as soon as possible after being taken from the cows. This should be done in a clean and sanitary place, where there are no noxious odors, and strainers and other utensils used should be clean.

#### TO KILL MAGISTRATE.

Threats of H. Dureau, a Winnipeg Horse-Thief.

A despatch from Winnipeg says: H. Dureau was sent to the penitentiary on Friday for two years for horse-stealing. Before leaving the court-room he declared positively he would kill the Magistrate when released. He is a recent arrival from France, and has a police record there.

#### BINDER TWINE SEIZED.

Not Up to Length Marked—Valued, at \$100,000.

An Ottawa despatch says: Large seizures were recently made of binder twine consigned to this country from England that did not measure up to the length stamped on the packages. The twine came from two firms, and the value of the goods seized is about \$100,000. The case is now awaiting disposal at the hands of the Minister of Trade and Commerce.

#### RAIN QUENCHES FIRES.

Serious Damage Done to Timber North of the "Soo."

A Sault Ste. Marie, Ont., despatch says: Heavy rain fell for several hours on Thursday morning, putting out fires which have been running over this end a month. The loss, not yet estimated, was heavy.

#### SERIOUS CUTS.

In dressing a cut, bathe the wound with cold water that, if possible, has been previously boiled. Cut strips of sticking-plaster an eighth of an inch wide. When the bleeding is checked draw the edges of the cut together and strap it with plaster, leaving a narrow space between each strip. Cover the whole with a layer of absorbent cotton, bandaged in place with a narrow strip of cotton. Do not disturb for several days, unless blood oozes through and stains the dressing.

#### SUNSHINE AND SLEEP.

No syrup of poppies, no tincture of opium, no powder or morphine can compare in sleep-inducing with sunshine. Therefore, it is easily understood that sufferers from insomnia should pass as many hours as possible in sunshine, living to a great extent in the air.

#### TEMPERATURE OF THE SICK-ROOM.

A thermometer should be hung against the wall near the bed and the record frequently noted. The temperature should be kept as nearly as possible at 60 degrees F., and on no account should it be allowed to descend below 50 dg.

## YOUNG FOLKS

### THE BEAUTIFUL RECITATION.

Did you ever speak a piece and find  
That all the poem words  
Had flown away out of your minds  
Like little frightened birds?

The people were so very near,  
Their eyes so big and round,  
Your voice came out so high and queer,  
With such a funny sound?

The platform was so long and wide,  
You felt so very small,  
You had to run away and hide,  
And spoke no piece at all?

### THE HAPPY DAY.

The twins were wishing for things.  
They often did that, and when they  
went back to their playthings somehow  
something went wrong. The toys  
weren't nice, and the dolls had ugly  
clothes, and the books were ragged, and  
nothing was very pleasant. Mamma  
never liked to have Max and Molly be-  
gin the wishing game, but the children  
played that nearly every day.

"I wish Geraldine Matilda had a long,  
white silk train and a trunk full of  
pretty clothes," said Molly, taking the  
poor old doll up with a jerk. "Geraldine  
Matilda you are a perfect fright." The  
doll was too polite to hint that  
Molly had allowed her to stay out in the  
rainstorm and ruin the only dress she  
had, so the little girl went on with her  
unkind remarks. "I guess I'll put you in  
the next missionary barrel and send you  
away, way off. You aren't fit for any-  
body but heathen folks to play with."

"Why don't you wish for something  
nice?" said Max. "Who cares for old  
doll clothes? I wish we could do ex-  
actly as we please all day. That would  
be fun, wouldn't it?"

"Yes, it would," said Molly, tossing the  
poor doll into a corner. "I'd stay up late  
in the evening and not go to bed till  
midnight, and I'd—"

"And I'd have candy and popcorn and  
peanuts and—" interrupted Max.

"And I'd play in the dirt without hav-  
ing to wash my hands. What a happy  
day we'd have!"

"Well, you can have a happy day if  
you want," said mamma, who had been  
listening. "Of course you cannot go  
down town by yourselves, but you may  
have your wishes granted as far as pos-  
sible if you think you will have a happy  
day."

"Goody! Goody! Goody!" screamed  
the twins. "Let's go out and puddle."

There had been a little shower, and  
the gutters were brimming with water.  
The twins were soon having a fine time  
dabbling in the mud, with no one to tap  
on the window and tell them to be care-  
ful. Their clothes were soiled, and they  
had mud in their hair, but all the time  
they were laughing and having a good  
time together.

"Now, let's have some candy and  
cookies," said Mollie, after a long time  
spent in splashing and playing in the  
water. "I'm hungry."

"Come, children," called Miss Ethel,  
from across the garden fence. "You  
know this is the day we are to have our  
long ride on the trolley and eat our  
lunch at that pretty house out in the  
country, where we pick flowers. Hurry  
up, for we want to start in half an  
hour."

The twins looked at each other and  
then at Miss Ethel. "We'll have to get  
mamma to wash us up," said Molly.  
"We forgot all about the ride."

"I never could get you ready in half  
an hour," said their mamma. "You  
said you would be happier if you didn't  
have to be washed, so run and have a  
good time."

It isn't a happy day at all," sobbed

## DEATH IN WHIRLPOOL RAPIDS.

One Man Drowned and Another Has  
Narrow Escape.

A despatch from Niagara Falls, Ont.,  
says: Martin Kane lost his life in the  
Whirlpool Rapids on Saturday morn-  
ing, and H. L. McGrath saved himself  
from the same fate by the narrowest  
possible margin. Kane and McGrath  
went down the cliff about 8.30 o'clock to  
swim in the eddy just above the cantilever  
bridge, and within a short distance  
of the rapids. They pushed an old boat  
out into the eddy and amused them-  
selves in diving from it. The eddy car-  
ried them away from the bank, and a  
minute later they were rushing down  
towards the rapids. Both jumped over-  
board and swam. McGrath was suc-  
cessful in reaching a big rock which  
stands up from the river at the break  
of the rapids. Kane missed the rock,  
was swept down the rapids and lost.  
McGrath was rescued from the rock and  
collapsed as soon as he got ashore.

## BLAZE AT DESERONTO.

The Eastern Portion of the Town Was  
Threatened.

A Deseronto despatch says: One of  
the most disastrous fires which has oc-  
curred here in recent years started this  
afternoon shortly after 4 o'clock, and  
for about an hour threatened to wipe out  
the whole eastern portion of the town.  
The fire originated at the big trestle shed  
dock owned by the Rathbun Company,  
and inside of a few minutes the whole  
structure was a mass of flames. There  
was a strong south wind blowing to-  
wards the town, and it was soon seen  
that everything was doomed if aid was  
not procured at once. Two fire engines  
and crews were brought from Napanee  
and every person available was pressed  
into service to help keep down the blaze.  
The big trestle, refuse boilers, thousands  
of feet of lumber and cords of hard-  
wood belonging to the Rathbun Com-  
pany and three houses were destroyed.  
The firemen were handicapped on ac-  
count of scarcity of water. Two docks  
with a large quantity of lumber and St.  
Mark's Church were in danger for a  
time.

## MOTORISTS' FINES.

Nearly \$55,000 Paid in Britain During  
Past Fiscal Year.

A despatch from London says: Nearly  
\$55,000 in fines was paid by British au-  
tomobilists, during the year ending June  
30th last, statistics for which relating  
to "motor-car offences" have just been  
issued. The number of prosecutions  
during the year was 6,165, and 4,915 de-  
fendants were fined, making the average  
fine about \$11. In 1,245 cases the  
prosecution was for exceeding the speed  
limit. Five motorists were sent by the  
magistrates for trial on serious charges  
—injury to pedestrians through neglect,  
drunkenness while in charge of an au-  
tomobile, etc. It is a striking comment  
on the sometimes excessive zeal of the  
rural police against automobilists, that  
739 prosecutions were withdrawn or  
dismissed, while 452 defendants were  
discharged on payment of costs.

## STORM ON LAKE ONTARIO.

Reuben Dowd, a Coal Schooner, Ran  
Aground Near Toronto.

A despatch from Toronto says: The  
three-masted schooner Reuben Dowd,  
belonging to the Conger Coal Company,  
in trying to make her way into the Bay  
through the Eastern Gap, Toronto, ran  
aground just outside the breakwater  
early on Friday morning. She was  
bringing in a cargo of about 800 tons of  
coal from Fairhaven for her owners,  
under command of Capt. Joyce. The  
crew of eight were safely brought off in  
a lifeboat manned by Capt. Ward, and  
hopes are entertained of salvaging part  
at least of the cargo. Though the vessel  
lies in shallow water, it will take some

# HORRORS OF THE QUAKE

## Fifty Thieves Shot Dead While They Were Looting.

A despatch from Valparaiso says:  
From the plaza de la Victoria as far as  
the plaza in the section called Las De-  
licias four-fifths of the houses are com-  
pletely destroyed, and the remaining  
fifth are badly damaged. From the  
Plaza de la Victoria down to the Custom  
House only about one-third of the houses  
sustained damage. The banks and the  
customs warehouses were not damaged.  
With the exception of Espiritu Santo all  
the city's churches were destroyed, as  
were the hospitals and the theatres. The  
number of dead is more than two thou-  
sand. The offices of the Havas agency,  
although seriously damaged, is still be-  
ing used.

The tragic scenes of the San Francis-  
co disaster were reproduced here. There  
was the fight against fire, the lack of  
water, and robbery and pillage.

### ALL THE FIRES OUT.

The authorities now are beginning to  
get in provisions, and water again is  
being supplied. All the fires are out.  
The first shock lasted four minutes and  
a half, and the second two minutes.  
Most of the houses were thrown down  
by the second shock. Estimates of the  
damage range from \$25,000,000 to \$50-  
000,000. The Almendral quarter has  
been absolutely destroyed.

The people are still camping on the  
surrounding hills and the streets and  
plazas, and are calm and courage re-  
turning. The declaration is made that  
80,000 persons will leave the city. The  
lack of food is not yet serious.

Telegraphic communication with San-  
tiago was re-established on Tuesday.  
Several steamers are engaged in moving  
the people of the city to points to the  
north and south.

### ANOTHER ESTIMATE.

The loss of life by the earthquake of  
Thursday, August 16, probably will not  
be short of 3,000, while the property  
destroyed is estimated at \$100,000,000,  
and possibly is far in excess of that  
sum.

Order is being maintained with the  
utmost severity by the military, police  
and armed citizens' patrols, who are  
empowered to shoot on the spot. The  
authorities are showing the utmost en-  
ergy in the protection of property.

With the first terrible shock of the  
earthquake buildings collapsed, their  
walls falling with tremendous noise.  
The inmates in many cases were unable  
to escape. The shock was followed al-  
most immediately by a fierce storm, the  
wind prostrating walls that had been  
weakened by the earthquake, and these  
broke trolley wires, which flashed in-  
cessantly. The second shock was even  
heavier than the first.

### SLIGHT SHOCKS CONTINUE.

A despatch from London says: A  
cable despatch filed late on Tuesday  
night by the agent at Valparaiso of  
Huth & Co., says that slight shocks  
continue, and that further large fires  
have occurred there.

### AN OPTIMISTIC PREDICTION.

A despatch from New York says:  
Adolfo Ortusear, Consul-General for  
Chile, said on Wednesday that he be-  
lieved Valparaiso would be rebuilt with-  
in six months, and that trade would be  
completely re-established before that  
time. The Chilean representative's op-  
timistic prediction as to trade was fa-  
vorably seconded by several merchants  
who do business with the stricken city,  
though they did not believe that the  
damage done by earthquake and fire  
could be repaired in the time set by the

The railroad line between Limache and  
Quilque, in addition to suffering sever-  
ly from the earth shocks of August 16,  
has several enormous crevices, newly  
formed, in its vicinity.

Valparaiso is still without street lights  
at night, but order is maintained, thanks  
to the severity of the authorities, who  
continue shooting all persons who are  
caught committing robberies.

Among the buildings which fell at  
the time of the earthquake are the Pa-  
lace of Justice and the Maritime Prefec-  
ture.

## MURDER AND SUICIDE.

Parry Harbor Man Used His Revolver  
With Terrible Effect.

A Parry Sound, Ont., despatch says:  
Crazed by jealousy, Henry Anderson,  
a middle-aged man, employed in the  
yard of the Parry Sound Lumber Com-  
pany, on Tuesday night shot his wife  
dead at the door of a neighbor's house  
in Parry Harbor, and then returning to  
his own house placed the revolver to  
his head and ended his life with a bul-  
let.

A relative of the dead woman, who  
was standing near, witnessed the first  
act in the tragedy. Anderson fired  
twice, both bullets taking effect. The  
woman was entering the door of the  
neighbor's house when the first shot  
was fired, striking her in the shoulder.  
She turned round facing her infuriated  
husband as he advanced upon her. Then  
taking deliberate aim Anderson fired  
again, the bullet striking her in the  
centre of the forehead, killing her in-  
stantly.

The weapon with which the deed was  
committed was a new one and had  
evidently been recently purchased.

Anderson's family relations have not  
been happy for a long time past, and  
he is reputed to have been cruel and  
overbearing towards his wife. He had  
been at one time arrested for beating  
and ill-treating her, and on one occa-  
sion she sought to have him bound over  
to keep the peace after he had repeat-  
edly threatened her life. He was a man of  
fitful and violent temper and subject to  
fits of violent jealousy. Two children,  
a boy and a girl, are left orphans as a  
result of the double tragedy.

## TWO KILLED IN RAILWAY WRECK.

Collision Between Passenger Trains at  
St. Thomas.

A St. Thomas despatch says: A ser-  
ious head-on collision occurred at the  
C.P.R.-Wabash diamond crossing a  
mile east of this city on Friday morning  
about 8 o'clock. A special Wabash  
train, with a theatrical company from  
New York to Chicago, met the C.P.R.  
regular for Woodstock, both going at a  
high rate of speed. The Wabash train  
crew jumped and saved themselves.  
The C.P.R. crew had not time.

The dead:—Engineer McKay, of  
Toronto Junction, scalded from head to  
foot, skull crushed.

Alex. Wiley, baggage-man, of St.  
Thomas, head crushed.

The injured:—Fireman F. Patterson,  
of St. Thomas, scalded and bruised,  
Peter Stewart, C.P.R. conductor, head  
injured; Borbedie, express messenger,  
St. Thomas. No passengers were in-  
jured.

The C.P.R. had the right of way, so

"I never could get you ready in half an hour," said their mamma. "You said you would be happier if you didn't have to be washed, so run and have a good time."

It isn't a happy day at all," sobbed Max. "The sand in my hair doesn't feel good, and I'd rather have clean hands to eat cookies. I wish I had been a good boy."

"And I wish I never had wished," wailed Molly.

"What's all this?" asked Miss Ethel. "I'll get Molly ready if Mrs. Pope will attend to Max. You can carry your hats, and the hot sun will soon dry your hair. Don't cry."

So it turned out to be a happy day after all, but the twins did not fret about the things they had to give up to go to the little picnic. And since that time they never play the wishing game any more, nor tease to do as they please all day. Can you guess why?

## RELICS OF BOER WAR.

### Two Field Guns and Two Machine Guns Received at Ottawa.

A despatch from Ottawa says: Two small field guns and a couple of machine guns that were captured from the Boers during the South African War arrived some time ago consigned to the Minister of Militia. It has been decided to place the field pieces on Parliament Hill. The quick-firers will also be retained in the capital. One will be kept for the military museum. The other will go to one of the city parks.

## GOLD FOUND IN NEW ONTARIO.

### Kentucky Prospector Makes a Lucky Strike.

A despatch from Toronto says: Gold has been struck in large quantities in northern Ontario, according to the information received by Mr. Cecil B. Smith, chairman of the Temiskaming and Northern Ontario Railway Company. Mr. Smith has learned that a prospector from Lexington, Kentucky, the lucky finder, has located the precious metal in the Township of Playfair, north of the height of land, and about 80 miles distant from New Liskeard. The samples analyzed showed an average of about 411 ounces, or about \$8,000, to the ton. In addition, the ore carried silver to the amount of about 400 ounces to the ton. The find was made three or four days ago, and is expected to draw a large number of miners to the localities as soon as it is known.

A branch of the Temiskaming road recently located, will be constructed near the gold field before long. The Railway Commission has decided to advertise for tenders for the construction of three branches in a few days. One five miles in length will run from Cobalt through the Gillies limit, to be known as the Kerr Lake section. Another will be laid from Englehart to Charlton, a distance of seven miles, and the third from Haileybury to the wharf on Lake Temiskaming.

## WILL RUN FAR NORTH.

### C. P. R. Starts Survey for Extension of Temiskaming Line.

A despatch from Ottawa says: Canadian Pacific engineers have begun the survey of the extension of the Temiskaming Railway, which branches from the main line at Mattawa. The work has been started at Temiskaming station, and will proceed northward along the shore of Temiskaming Lake to Opemicon. At this point the higher level is taken. Ostensibly the line is intended to terminate at Ville Marie, about 50 miles up Lake Temiskaming, but the objective point undoubtedly is much further on, namely, the line of the National Transcontinental Railway. The railway is being built under the charter of the Temiskaming Colonization Railway Co., which is now owned by the C.P.R.

under command of Capt. Joyce. The crew of eight were safely brought off in a lifeboat manned by Capt. Ward, and hopes are entertained of salvaging part at least of the cargo. Though the vessel lies in shallow water, it will take some time to float her. Her stern is badly split, and her rudder is useless.

M. J. Haney, the water works contractor, lost a derrick scow in the blow. It pounded to pieces at the Eastern Gap, and the derrick on it capsized and sunk in rather deep water.

## WIRELESS SYSTEM FOR YUKON.

### Last Winter's Interruptions Have Caused Government to Adopt It.

A despatch from Ottawa says: It is not improbable that before another year is over telegraphic communication for a portion of the distance to the Yukon will be made by the wireless system. Owing to the many interruptions last winter to the Government line, by storms, avalanches and landslides, particularly in the Cariboo district, Dr. Alfred Thompson, M.P., for the Yukon Territory, proposed to the Minister of Public Works the advisability of covering the danger section by the wireless method. The suggestion was accepted by Mr. Hyman, and it is understood that the department has received tentative offers from two companies, Marconi and the DeForest. A definite decision upon the point will not be reached until the inspector, Mr. Joseph Gobeil, returns from the Yukon.

## POTATO BLIGHT IN IRELAND.

### The Disease Has Struck the Crop in Western Sections.

A despatch from Manchester, England, says: The Manchester Guardian's Dublin correspondent confirms the report of potato blight in western Ireland. There is no doubt that its ravages are serious and widespread. The blight was first noticed in the Moycullen district and in Galway. The disease has struck the crop everywhere during the severe rains of the last fortnight. It is too soon yet to talk of famine, but everything will now depend on the weather of the next few weeks.

## LETTER-CARRIER CAUGHT.

### Pierre Compeau of Montreal Pleads Guilty of Theft.

A Montreal despatch says: Pierre Compeau, a Montreal letter-carrier, suspected of stealing money from letters, was trapped on Wednesday by means of decoy letters. In order to make sure of their man two letters containing three and four dollars each were placed in the mail for an address on Compeau's route. The ruse was successful and the carrier was found with the goods on him. Letters with money to the value of \$85 had been stolen, and to taking that amount Compeau pleaded guilty. To the charge of stealing other amounts he entered a plea of not guilty.

## CUT HORSE'S LEGS OFF.

### A Brutal Act of Vengeance at Gladstone, Manitoba.

A Gladstone, Man., despatch says: Early on Saturday morning some party or parties entered the barn of E. Bowman, veterinary surgeon, of this place, and chopped the hind legs off his horse, which stood in the stall. Dr. Bowman had been called to Plumias and returned by train, arriving about 8 o'clock. On going to the stable he discovered the animal. So completely was the work done that the detached parts hung only by the tendons midway between the hoofs and hocks. Mrs. Bowman heard noises early in the morning, but there was a storm raging, and she was timid about going to investigate the cause. The animal was slaughtered. So far there is no clue leading to the discovery of the perpetrator.

timistic prediction as to trade was favorably seconded by several merchants who do business with the stricken city, though they did not believe that the damage done by earthquake and fire could be repaired in the time set by the Consul-General.

## HORRIFYING DETAILS.

A despatch from Santiago says: Some of the horrifying details of the terrible disaster came here on Wednesday in the first mail that has been received since the earthquake began. Fifty children in one house were crushed and three Catholic nuns, who were attempting to rescue those in the ruins, were killed by another shock, which brought the remainder of the building down.

The only light on the first night of the earthquake was that thrown by the feeble rays from the ships in the harbor. The street were filled with wild, shrieking people. The crash of falling buildings on all sides and the noise of breaking glass was a terrific din. The next morning brought a terrible sight. Bodies lay exposed on all sides. No one has had the time or inclination to remove them, and they have been there since. Many squares are now piled with debris.

President Riesco has sent a telegram to the Rothschilds, declining their offer and aid, saying that Chili can rise unassisted. Congress is awaiting further information as to the extent of the disaster before acting on the proposition for raising a loan. Commercial interests are opposed to a scheme for the suspension of payments, claiming that the proposed issue of 80,000,000 pesos will save the situation.

Many rich families in Valparaiso have been completely ruined. One millionaire, Mr. Edwards, lost 40,000,000 pesos (about \$15,000,000) alone.

Small islands have appeared in Valparaiso Bay, and incoming ships confirm the reports of depressions on the coast.

The Chilean insurance companies will sustain heavy losses by the disaster, as a recent law practically drove all foreign companies out of the country. There has been no decision yet regarding the payment of losses.

The Mayor has forbidden the erection of tents in the streets and public thoroughfares.

## PLAGUE IS FEARED.

A despatch from Valparaiso, Chili says: Some of the business houses here reopened on Thursday for the first time since the earthquake. Telephone and telegraph communication with Santiago has been re-established, but the lines are almost exclusively used by the Government officials. The city is still under martial law, traffic ceases at 6 o'clock in the evening, and everybody is compelled to take some part in the work, under the direction of the Ministers of the Interior and Industry, assisted by the local Government officials, in restoring normal conditions here. As a first instalment the Government has appropriated \$1,000,000 for the relief of the destitute. The Custom house was reopened on Thursday, and traffic by water and by rail has been resumed. The post service is also in operation.

One of the greatest difficulties encountered by the authorities is the burial of the bodies recovered from the ruins, as all the cemeteries were destroyed. At the temporary morgue heaps of coffins have accumulated. The work of recovering the bodies is being pushed to the utmost in order to avoid an epidemic, in fear of which many families are leaving the city.

## COMPANY TO RECONSTRUCT.

A movement is on foot to organize a company to facilitate the raising of the money necessary to reconstruct the city.

All the provinces of the north and south, which have not suffered from the earthquake, are sending supplies of food and money to the stricken cities and towns. The Department of Public Works at Santiago has appropriated \$100,000 for the construction of sheds to shelter the refugees from Valparaiso and elsewhere, who continue to arrive at the Chilean capital in large numbers.

of St. Thomas, scalded and bruised, Peter Stewart, C.P.R. conductor, head injured; Borbedie, express messenger, St. Thomas. No passengers were injured.

The C.P.R. had the right of way, so the crew claim, but there is no derailling apparatus at the crossing. The C.P.R. train was travelling at twelve miles an hour, and the Wabash crew saw the predicament and jumped, but could not stop in time to prevent the smash-up. The engines are lying in the mud side by side. The semaphore and diamond were carried away by the C.P.R. engine, but the coaches, with the exception of the C.P.R. baggage coach, where Mr. Wiley was fatally injured, escaped, only a pair of trucks leaving the rails. All the injured were brought to the City Hospital, Engineer McKay dying as soon as he reached that institution and Wiley a little later. The Wabash crew say the smoke obscured the semaphore from view. It is stated that the signal was dropped to danger.

## TO HOLD FIRE INQUEST.

### Provincial Inspector Rogers Has Gone to Haileybury.

A Toronto despatch says: Provincial Inspector Rogers will investigate the Haileybury fire on behalf of the Attorney-General's Department. Hon. J. J. Foy received a private telegraph message from Haileybury Tuesday to the effect that an investigation should be held, and in consequence he has decided to have Inspector Rogers hold a fire inquest. The Attorney-General's Department is strongly possessed of the idea that the destructive blaze at Haileybury was of incendiary origin.

The Provincial Government may be called on to assist the people of the burned town, which was the place of residence for nearly all those engaged in Cobalt mining operations. There is said to be a scarcity of lumber for rebuilding purposes, and the Government may be asked for special and immediate lumber concessions in the new Ontario district. It is understood that special assistance has been authorized by Hon. J. J. Foy, Acting Premier, where needed, and the conditions at Haileybury will be inquired into by the Government.

## BURGLARS LOOT POST OFFICE.

### Professional Thieves Pay Ridgeway a Visit.

A despatch from Ridgeway, Ont., says: Thursday night burglars pried open the front door of the post-office here and blew the safe up, taking about \$200 worth of stamps and about \$90 in cash. No damage was done to the building, but the safe was badly wrecked. I. L. Pound also missed his horse and buggy on Friday morning, and he at once communicated with the chief of police at Fort Erie, and received word that his outfit was there. It is supposed that the burglars drove to Fort Erie and crossed over to Buffalo. The blowing up of the safe was no doubt done by professionals, as there are houses on both sides of the post-office and no one heard the explosion.

## KILLED AT PORT PERRY.

### Mr. Watson Hodgson's Buggy Struck By a Train.

A Port Perry despatch says: Watson Hodgson, an old resident of Port Perry, aged about 75 years, was killed of Saturday by the G. T. R. train. He was driving into town from the country and attempted to cross the track at Kellert's crossing ahead of the 11.30 express. The train struck the buggy and the old man was thrown against a telegraph post, striking his head, which was badly cut, death being instantaneous. No inquest will be held, as all evidence obtainable is to the effect that the train hands gave every warning possible of the approach of the train.

# SAMOA'S GREAT VOLCANO

## THE ERUPTION ON SAVAII GROWING MORE VIOLENT.

Sea Heated to Boiling Point by Tremendous Lava Flow on An Island of the Pacific.

At last accounts the new volcano on the island of Savaii, the largest of the Samoan group, was in more violent eruption than ever. The volcano was just a year old on August 5th.

It came after a series of about 50 earthquakes, some of them very violent. A photograph of the volcano taken only a few weeks after it first came into view shows an enormous mass of volcanic matter heaped around the crater. This mass was lifted from the subterranean depths by the eruptive forces to a height of at least six or seven miles and scattered in the first two or three weeks around the chimneylike vent through which it had passed.

We do not know from what depths under the earth's surface volcanic material may be brought, but the volcanic islands of Samoa rise from sea depths of from 25,000 to 28,000 feet, and the millions of tons of outpourings in the volcano of Savaii were carried up through the throat that opened from subterranean regions to the surface of this island mass.

This is the second volcano that has come to light on this island within three years. All the islands of the group, excepting the coral islets around them, are of volcanic origin, but there is no evidence that volcanic disturbances have occurred on any of them, excepting Savaii.

## FOR THOUSANDS OF YEARS.

The new volcano is the interior of the island, about seven miles from Mauaafi, the volcano that was found in September, 1902. In all phases of these outbursts the recent eruption has been far more severe than its predecessor.

The spectacle at times has been magnificent as well as terrifying, and though Apia, the capital of German Samoa, is about 60 miles away, the inhabitants, from the heights above the town, have at times been able to discern the black outpouring that covered as with a pall the skies above Savaii, and more frequently they have seen at night the glow in the sky reflected from the molten lava that has been flowing in main and branch streams to or toward the northern coast.

On the island itself and to vessels out at sea the scene during the most violent eruptions has been of almost overpowering grandeur. If the calamity had occurred on populous Upolu, with its many hamlets and its rich cacao and cocoa palm plantations, the loss of life and property would have aroused the sympathy of the world.

Upolu is the Garden of Eden in the colonial domain of Germany, but Savaii is still among the wilds of Polynesia. A number of important islands in the vast waste of waters are still partly unexplored, and Savaii is one of them.

A very few white traders and planters live on the coast or a little inland. The native population is scattered among a few hamlets.

The lava flows between August, 1905, and March last made straight for some of these settlements and wiped them out, but

## DAMAGE WAS NOT GREAT.

for these primitive habitations are easily replaced. The flows from the volcano to the north coast were still moving in March, and at all times they have been so regular in their progress that the hour when they would reach a threatened hamlet could be computed closely, and so all had ample time to escape. There has been no loss of life, and the chief sufferers have been a few whites

# DANGER IN VEGETABLES

## A NEW THEORY IN REGARD TO APPENDICITIS.

French Specialist Says Complaint Is Caused by Intestinal Parasites.

The question as to whether it is advisable to operate so frequently for appendicitis continues to arouse the interest of French physicians.

M. Blanchard, a shining light in the French medical world, now comes forward with a startling new theory which entirely upsets all preconceived notions. He asserts—and says his assertion is backed by Prof. Metchnikoff, of the Pasteur Institute—that appendicitis is undoubtedly caused by intestinal worms. These are of three kinds, and the most dangerous is that known as the trygocephal, which causes the sharp pains and symptoms which indicate appendicitis.

## TRYGOCEPHAL EGGS.

Microscopic examination in every case of appendicitis that has come under the observation of Prof. Blanchard and Prof. Metchnikoff has revealed the presence of these parasites in the appendix. "Appendicitis," says Prof. Blanchard, "more especially occurs during the hot weather, and although not contagious or infectious, it frequently assumes the character of an epidemic in certain districts."

Now, according to the professor, market gardens in the neighborhood of great cities, such as Paris and London, are frequently manured and fertilized by the deodorized and chemically treated product of the city sewers. In these market gardens the vegetables are forced, and examination shows that they contain numerous intestinal parasites, and especially the eggs of the dreaded trygocephal.

## OPERATION UNNECESSARY.

The professor says that a surgical operation is absolutely unnecessary, and that it should never be performed unless some hard substance, such as a cherry stone, has been accidentally swallowed by the patient. He urges legislation to forbid the use of deodorized and chemically treated sewage as manure, and that thymol should be extensively used against intestinal worms.

"Appendicitis," adds Professor Blanchard, "when not the consequence of the accidental swallowing of some hard substance, is undoubtedly caused by the parasite to be found in cabbage, turnips, carrots, and cauliflower. The danger lies in eating vegetables that have been forced by manures or watered by contaminated well and spring water."

## MENELIK, KING OF KINGS.

The Man Who Has Made a United Nation Out of Tribes of Savages.

Perhaps the most interesting of reigning kings is Menelik of Abyssinia. He was born in 1842 and claims to be the descendant of the Queen of Sheba, whose own son, of the same name, was reputed to be the son of Solomon.

The visitor to the capital of what Menelik has made a united Abyssinia is agreeably surprised, writes Robert Skinner in the Independent, to find himself travelling over smooth and well constructed roads.

The imperial palace occupies the crest of a hill and dominates the whole city. Standing in garden grounds enclosed by a thatched stone wall, it comprises a number of buildings, to which access is obtained by traversing several courtyards and a spacious campus, where are stationed the only body of regularly trained troops in the Ethiop-

# SOME DREAM WARNINGS

## DEATHS HAVE BEEN TOLD IN REMARKABLE WAYS.

Bazaar Fire in Paris Was Foreseen by an Invalid Lady—Story at a Murder Trial.

While it would be absurd to claim prophetic significance for dreams in general, there can be no doubt whatever that, in some mysterious way, sleepers have often seen in "visions of the night" scenes, remote either in time or place, of which in their wakeful moments they have had no knowledge whatever.

The terrible bazaar fire in Paris, which so shocked the world a few years ago, for instance, was foreseen in all its horrible realism by at least two people, one of whom, in spite of this warning, perished in the flames. On the night before the catastrophe an invalid lady of Vouziers went through all its horrors in a dream; she saw the first outburst of the flames, the beautifully-dressed women rushing frantically in all directions in search of escape; she saw the flames leap on them, and in her terror exclaimed, in the hearing of her doctor and nurse, "They have fallen in a pile across the door, and they are all ablaze! It is raining flames, great drops of fire are falling on them, the ceiling is giving way; they are rolling over each other, piling on top of one another! The poor woman—"

## DRAG HER OUT, DRAG HER OUT!"

And when she awoke from the nightmare vision she described it all in its gruesome detail the scenes which were enacted a few hours later in distant Paris.

Equally singular was the story told not long ago on unimpeachable evidence of Count Cibrario, the head of one of the most ancient families of Turin. The Count's son was mountaineering in the Maritime Alps, and as he was a cautious and expert climber his father had no fears for his safety. One morning, however, he announced to his family that he had had a terrible dream, in which he had seen his son, bleeding and battered, lying at the foot of a precipice, and had heard him exclaim, "Father, I slipped down a precipice and broke my head. I am dying." In vain did the Count's family try to reassure him. He persisted that his son was actually dead, and a few days later news came that Livio Cibrario's body had been found, dreadfully crushed and bruised, at the bottom of a deep crevasse in the Alps.

A remarkable story was revealed at a sensational murder-trial of a couple of generations ago. The dead body of Mr. Norway, an inoffensive Cornish gentleman, had been found by the roadside between Wadebridge and Bodmin, and it was evident that he had been brutally done to death. The whole country was excited, and a large reward was offered for the discovery of the assassins, but all to no purpose. They had effectually disappeared, and the mystery of the crime seemed beyond all solution, when Mr. Norway's brother, a naval officer, arrived in England and told the

## FOLLOWING SINGULAR STORY.

On the very night of his brother's murder, when he was on his ship in the West Indies, he saw him, in a dream, walking along the Bodmin Road, when, from a dark recess in the hedge, two ruffians sprang out, slew and robbed him, and then made their way to a house in Wadebridge, which he saw vividly in his dream. To this house he conducted the police officers, and there he found the very two men whom in his vision he had seen commit the dastardly act. They were arrested, confessed, and suffered the extreme penalty of the law on April 13th, 1840. In this case, as in

# RIVAL COLONIES ON LAKE

## BRITISH AND GERMANS MEET AT VICTORIA NYANZA.

Contrast Between the Colonizing Methods of These Two Nations.

The white men who have settled along the shores of Victoria Nyanza, the second largest fresh water lake in the world, are telling us many things about the lake and the dwellers along its shores that Speke and Stanley, who discovered and explored it, never dreamed of. Scarcely a mail comes to Europe that does not bring new information from this region.

Most of the 2,000 miles of shore team with natives, but the present prospect is that the largest white enterprises will in a few years be scattered along the southern coast in German East Africa. The reason for this is that gold has been discovered here. The fact was first reported some two years ago by the German prospector Jancke, and later investigations have fully confirmed his report that quartz gold mining on an important scale may be developed among the Tshela Mountains. This is a range extending far to the west from near the southeast corner of the lake. It abounds with gold-bearing quartz outcrops, and all the Germans who have visited it declare that this mining region has a great future. Miners would certainly have been there before this time if it were not that, so far as is yet known, it is wholly a quartz crushing and not a placer proposition.

## HEAVY MACHINERY IS REQUIRED.

To-day, however, the machinery may be transported by steam from the Indian Ocean to within fifty miles of the Tshela range. A German missionary who has just returned to his mission station near the lake has written home that eleven years ago he was eighty days making the journey from the Indian Ocean to Victoria Nyanza, and now he has made the same journey in two days. Of course, he was a passenger on the Uganda Railway to Fort Florence, near the northeast coast of the lake, and from that point steamers and sailing vessels ply to all the ports on the long coasts. Machinery will be carried by this route, for the Germans have not yet had the enterprise to build their proposed railway from the ocean to the lake.

Nearly all the coast lands are very populous, for the soil is fruitful. The Germans say, however, that near this future mining region the land is especially productive and would support at least five times the present population. This will be important when mining and the industries related to it are developed there.

The primitive conditions that still exist on Victoria Nyanza are shown in many ways. Every steamer and sailing vessel, for example, ties up or lies at anchor, when night comes, at some island or near the mainland. They dare not navigate at night, for the dangers to navigation have not yet been mapped and the coast waters are strewn with rocks that have usually meant shipwreck for the vessels that have hit them.

## BRITISH AND GERMAN POSTS.

The British and the Germans control the entire coast line, which is divided nearly equally between them. All travellers seem to agree that there is a marked difference between the appearance of the British and the German posts. The British are so busy with the larger aspects of taming the wilderness of nature, building wharves and supplying transportation, that they give little time to less vital matters, which, however contribute to comfort and order. The result is that their streets

when they would reach a narrow hamlet could be computed closely, and so all had ample time to escape. There has been no loss of life, and the chief sufferers have been a few whites who have seen the plantations which they had developed by ten years hard toil swept away in an hour.

We have heard of the heartbreaking labor it takes to clear away the jungle of a tropical forest. It is child's play however, for red-hot lava, and the mightiest trees of the forest melt away as the stream enfolds them like tow in the flame.

One reason why Savaii has not been well explored is that it is almost impossible to pass through these thick forests, but there are roads now to the new volcano, for the rivers of lava have mowed wide strips to the sea; clean cut on the sides, not a vestige of the forest growths remaining, except a sprinkling of ashes.

White men who have seen the spectacle of the last few months say that the grandest sight of all has been the dropping of several of the lava streams into the sea. Some of them have fallen over steep cliffs 100 feet high into the ocean with a mighty splashing of the water and a deafening hiss as clouds of steam arise. The water penetrates through many crevasses to the heart of the molten mass, giving rise to the continual detonation of explosions which blow fragments of the lava high into the air.

#### THE COLOR OF THE STREAM.

Is constantly changing from white to black or yellow or a mixture of all three, according to the sulphurous or other mineral ingredients that are mingled with it. The surrounding waters are raised to boiling heat, hundreds of thousands of fish have been killed and the little coral animal has been destroyed for a long stretch along the shore. In places the advancing lava has passed through the coral reefs and broken them down.

One of the observers says that the scene by night is far more imposing than by day. For hundreds of feet the lava mass rises above the water and looks like a red mass of iron, out of which jets of white flames are constantly emerging.

One of the lava streams in February made an average advance of 404 feet a day and was twenty days in reaching the northeast cape of the island. Another stream flowed 3,336 feet in six days and was steadily approaching the coast at the latest advices.

The Samoan Zeitung reported that at the beginning of March there was more lava in motion than at any previous time and it seemed as though there would be no end to the eruption. The volcanic activity, which began just a year ago, gradually subsided and it was thought in November that the phenomena were practically at an end, for a time at least.

In December, however, the eruptions began again with redoubled fury, and there is no telling when peace and quiet will again bless the lonely island. Savaii is off the usual ocean routes and communication with it is neither regular nor frequent, and so it happens that news only occasionally reaches us from the land that is now the victim of such troublous times.

#### FAINTING ROOMS.

One of the latest ideas in New York is a room to which the ladies can retire if they feel faint and go off in a swoon, amid the most artistic and beautiful surroundings. Several restaurants and tea shops have adopted this idea, and members of the fair sex, whose nerve force is run down, can find in the fainting room a soothing resting place. The room is partially darkened and the prevailing color green, whilst it is liberally decorated with various sweet-smelling flowers. Comfortable sofas and chairs are provided for the "fainters," and a lady doctor is kept on the premises should her services be required.

a number of buildings, to which access is obtained by traversing several courtyards and a spacious campus, where are stationed the only body of regularly European trained troops in the Ethiopian army.

A wide doorway of Indian design admits the newcomer to the audience hall, a large half churchlike structure, with a roof supported by timber bridge work, at the far end of which stands the throne. The floor is covered with Oriental rugs, mixed with certain products of French and German looms. Back of the lines formed by the pillars are massed on ceremonial occasions, in either aisle, hundreds of the chief people of the capital, dressed in many colored raiment.

The throne itself is a sort of divan, and occupies a platform surmounted by a gilded canopy, the gift of France. At receptions each side of it is defended by two young princes with guns, while behind and around are grouped the Ministers, judges and officers of the court.

The first impression made by the Emperor is a distinctly pleasing one. His face is full of intelligence and his manners are those of a gentleman no less than of a king. He sits in Oriental fashion, his legs crossed and his arms sustained by two cushions.

He wears as outer garment a red velvet mantle, which affords glimpses of a snowy white underclothing, and about his head is wound a white handkerchief. Diamond eardrops hang at either cheek, and both hands are adorned with rings.

To converse with the stranger he makes use of his private secretary, who is also his interpreter, since he speaks no other language than those of Abyssinia. Some scraps of French he can, upon occasion, employ apropos, and to an English speaking person he will, as a compliment, say a "howdo."

The Emperor's thirst for information is phenomenal, and his knowledge of other countries is more considerable than one might imagine from the meagre sources at his disposal.

The Empress Taitu rarely or never assists at the reception of visitors, unless some public ceremony is involved absolutely requiring her presence. She is said to be a woman of great force of character and to have been in her youth of striking beauty. She is now 47 years of age, and is the daughter of a former Ras of Gondar and one of the hereditary princesses of the absorbed kingdom of Siemen, the inhabitants of which are reputed for their white skins. Several times married previously, she became the wife of Menelik in 1883. They have no children.

Menelik calls himself "the Lion of the Tribe of Judah, the chosen of the Lord, King of Kings of Ethiopia."

#### ANTIQUITIES FOUND.

Prussian Laborer Finds Valuable Find for Two Cigars.

An interesting discovery was made the other day by a laborer of Leuenburg, Prussia. While digging for the foundations of a house he came upon an ancient cannon, which experts declare to be 500 years old. The cannon, which is made of an alloy of bronze and copper, although in an excellent state of preservation, was, in the eyes of the finder, entirely valueless, so he promptly offered it to a neighboring tobaccoist in exchange for a couple of cigars; an offer which was accepted immediately. The bargain will be a profitable one to the present owner, as it will be presently acquired by a museum.

At Weissenhoehe, Dr. Haupt, of the Posen Museum, has discovered two so-called "Huns' grave," in which skeletons were found, the skulls of which were pierced by arrows. Some valuable urns of the period when Attila's hordes swept Central Europe were also unearthed.

Timmins—"I only want to live until I can become famous." Simmons—"I would not mind living thirty or forty centuries myself."

he found the very two men whom in his vision he had seen commit the dastardly act. They were arrested, confessed, and suffered the extreme penalty of the law on April 13th, 1840. In this case, as in many of the others cited, it must be remembered that the narratives of the dreams formed part of the sworn evidence and should thus be placed above any suspicion of their literal truthfulness.

There are many cases on record in which an opportune dream has saved a life. Writing of the late Admiral Keppel, Lord William Seymour says: "Harry's life was saved by a dream when in Sir Harry Jones's camp at Bomarsund. A brother officer (I think it was Cameron Wrotlesley, who was himself killed two days after) said one morning that he had, in his sleep, seen a shell explode in the middle of the tent where Keppel was sleeping. We cleared out, and sure enough, the next morning a Russian shell lighted just on what had been the site of the tent." And, to give but one more example of this kind, a well-known war-artist writes thus of

#### A WARNING DREAM.

which, in all probability, saved his life a few years ago:—

"This dream coincidence certainly had an effect on my mind, and in a weak moment I decided I would not go. 'I'll be hanged if I go up to Etchowe.' I said to myself, and I didn't. It so happened that I heard of a gentleman then in Durban, who could sketch very well, and when I had put myself into communication with him he offered to take my place and send his sketches down to me, so that I could touch them up and send them to England. I communicated with the proprietors of the 'Illustrated London News,' informing them of the whole incident and what I had done. It is a very curious thing that out of the sixty or more battles I've been present at, witnessed and sketched, such an idea as 'keeping out of it' never occurred to me. The man who went up for me was one of the first killed in the fighting!"

Among the numerous cases of men whose death, or that of a friend, has been foretold in a dream, the following are good samples. On February 19th, 1901, Mr. Henry Gay, of Abertillery, Monmouthshire, had a very vivid dream which impressed him strongly. He was standing in the company of "a radiant being" in a far-spreading cornfield, and his companion, plucking four ripe ears of corn, handed them to him with the words,

#### "THESE ARE FOR THEE."

Mr. Gay was so troubled by his dream that he consulted the Rev. D. Collier, of Abertillery, about it, and told him that he was convinced he had but four more years to live. No arguments could shake this conviction, and, strangely enough, Mr. Gay actually died on the fourth anniversary of his remarkable dream.

The French baritone, Jules Devoyd, on waking one morning, told his wife that in a dream he had seen himself lying dead on the stage. In vain did his wife try to dissuade him from going to the theatre that evening. He went, took his part in "Rigoletto," ruptured a blood-vessel during the performance, and died almost immediately afterwards.

#### JAPAN'S POPULATION.

In strong contrast with the uncertainty about the population of China is the exactness of the figures given for the population of Japan in the Japanese Blue-book for 1905, which has been printed in English by the Japanese Government. The population of the islands constituting Japan proper is 47,812,702, and that of the Island of Formosa 3,059,235. Japan comprises 100 main islands, making the name "Island Empire" peculiarly appropriate. The total area of these islands is about 161,000 square miles. It is noted that there is a close approximation to equality in the division of the population between the two sexes.

of nature, building wharves and supplying transportation, that they give little time to less vital matters, which, however, contribute to comfort and order. The result is that their streets are deplorably dirty, their best buildings are likely to be nothing more than galvanized iron shacks, and their towns, in fact, resemble in many ways a Western mining camp in its early stages. At the railway terminus on the lake the stranger sees a well built railway station, and a few houses large enough to be comfortable are in process of building. The rest of the town, including the shops, looks like galvanized iron barracks.

The same may be said of their stations along the railroad, including Nairobi, about midway on the line, which is certain to have a fine future, as it is the natural market for a large area of rich agricultural land, and white men and their families are now settling among these healthful highlands. It is said that there is not a railway restaurant along the line where the traveller succeeds in appeasing his hunger, and many passengers carry their food supplies for the journey from the coast.

The Germans, on the other hand, keep each post under military government. Streets are regularly laid out, excellent roads lead into the settlements,

#### TREES ARE PLANTED.

comfortable houses for the white inhabitants are erected, a parklike aspect is given to the public square and the thoroughfares must be daily swept and garnished or there is trouble from the powers that be.

There is another contrast between the British and the Germans in inner Africa, which is perhaps not so favorable to the latter. A while ago a German military force started from one of the lake stations on a punitive expedition against the section of the Massai that lives in German territory. One of the officers expressed the opinion that the only way to solve the Massai problem was to wipe these natives out entirely. Too many of the Germans seem to hold the same opinion where they have trouble with the natives.

The British, on the other hand, rounded up their unruly Massai subjects on two reservations with a large amount of grazing and agricultural land. This scheme went into effect two years ago and both the public peace and the Massai seem to be benefitting by it.

#### HE GOT IT FIXED.

Red Tape and Ingenuity in Federal Department at Washington.

The following story, illustrative of the red tape that used to prevail in certain departments of the Federal Government at Washington, is told by an official who began his service there in the humble capacity of a clerk:—

"Shortly after entering upon the discharge of my duties," said the official, "I witnessed a scene in the division to which I had been assigned that astonished me to a degree. One day an elderly clerk whose desk was near mine suddenly rose from his seat, dragged his chair to a fireplace, and, seizing a poker, attacked the offending piece of furniture with what appeared to be maniacal fury. When he had broken a leg of the chair his passion seemed to be exhausted. He flung the damaged chair into a corner of the room and getting another chair, calmly resumed his work just as if nothing had occurred.

"When the time came to leave the office that afternoon I ventured to ask a fellow clerk, who had been a witness to the scene, what it meant. 'Is that clerk,' I inquired, 'subject to attacks of that kind?'

"The clerk questioned smiled indulgently. 'Oh,' he explained, 'there was nothing the matter with him. You see, one of the castors had come off his chair. The department will not replace castors—it repairs nothing less serious than a broken leg and now he will be able to get the castor put on again.'"

## FRENCH PRIEST MISSING

### VILLAGERS OF CHATENAY SCENT MURDER MYSTERY.

He Was Last Seen Riding a Bicycle on the Way to Where He Lived.

The cure of the Village of Chatenay, France, Abbe Delarue, has mysteriously disappeared and despite the careful and anxious search of his parishioners, no clue has been found to the mystery of what is, no doubt, a deliberate murder.

On Monday, July 23, at 5 o'clock in the morning, the Abbe Delarue left his house on his bicycle for the station of Sainville, to take the train for Paris to receive certain sums for the charities of his parish. He was only to be gone forty-eight hours.

On Wednesday evening he arrived from Paris in Etampes, and as it was too late to catch the train from Etampes to Sainville, Abbe Delarue mounted his bicycle to return to Chatenay by road. Since that moment he has completely disappeared.

#### HAD MONEY ON PERSON.

His sister, who lived with him at Chatenay, not seeing him return, telegraphed to the woman in Paris, an old friend of the family, with whom he always stopped when in Paris. She received a telegram that he had left on Tuesday. Abbe Delarue had in his possession a sum of about \$170. The people of Chatenay and the neighborhood were convinced that their cure had been the victim of foul play, and organized sarch parties. The first result was the finding near the Village of Longue-toise of a priest's hat pierced with a knife and stained with blood. This was recognized as the hat of the unfortunate abbe. This is regarded as a proof that he has been assassinated.

In the neighborhood of the spot where the hat was found is a deep pool known as the Etang de Moulineaux. It is supposed that some of the doubtful characters that the harvest season always attracts to the Beauce had laid in wait for Abbe Delarue, attacked and robbed him and made away with the body.

#### PEASANT AND POLICE SEARCH.

It is certain that the assassination can only have taken place in the wild and picturesque part of the country between Etampes and Chalo-Saint-Mars. Here there are masses of trees, thickets and especially numerous pools. One of them, which bears the sinister name of Abime (Abyss), is nearly sixty feet deep.

For the last week the local gendarmes and large bodies of peasants have made a thorough battue of the whole countryside. The cure of Sainville, the commune alongside Chatenay, put himself at the head of his parishioners and made a thorough search all round the spot where the missing priest's hat was found. Men armed with scythes cut the long grass, but nothing was found.

#### THE SODA LAKES OF MEXICO.

National Deposits Said to be Worth Hundreds of Millions.

This is a pretty old world and most of it has been travelled over by human beings, but new discoveries are constantly being made. Recently a discovery of this kind was made in Mexico. Under the blazing sun of the desert, says a correspondent, surrounded by barren sand dunes, lie vast lakes of crystals of carbonate of soda, to all appearances great masses of snow and ice, but in reality a substance from which will be made millions of tons of soap and millions of glass panes.

At only one place in the world is natural soda found under conditions which admit of industrial development, and

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way.

To appreciate the simplicity and ease of washing with Sunlight Soap in the Sunlight way you should follow directions.

After rubbing on the soap, roll up each piece, immerse in the water, and go away.

## Sunlight Soap

will do its work in thirty to sixty minutes.

Your clothes will be cleaner and whiter than if washed in the old-fashioned way with boiler and hard rubbing. Equally good with hard or soft water.

Lever Brothers Limited, Toronto

## HOME LIFE OF A QUEEN

### FAVORITE RESIDENCE OF WILHELMINA OF HOLLAND.

Her Daily Tasks — A Devoted Churchgoer — Interest in Music and Painting.

Het Loo, where Queen Wilhelmina was born, and where she lived throughout her childhood with her parents, is still her favorite residence. The chief characteristic of the royal home is restfulness rather than splendor. This idea is chiefly conveyed by the magnificent, rambling park that surrounds it. But it is not restfulness that the Queen of Holland seeks here. Her life is, on the contrary, an exceptionally active one.

The following, writes a Hague correspondent of the Lokai Anzeiger, is the Queen's approximate daily programme. Breakfast is taken at 8.30 a.m., a thoroughly modest meal, in which the "Geldersche Roggebrood," a homely, dark colored rye bread, figures largely.

After breakfast the Queen withdraws immediately to her private study, where with much consciousness she goes through the state documents which await her perusal and signature each morning. This is a task which for Queen Wilhelmina involves serious work, for she insists upon making minute and accurate investigation of all details and puts her name to no document until she has thoroughly mastered its contents. This means numerous wearisome audience of explanation for the young Queen as well as an

#### EXTENSIVE CORRESPONDENCE

to be carried on with her Ministers.

When state affairs are satisfactorily disposed of Queen Wilhelmina turns to the management of her household. Domestic affairs find her, it is said, less a Queen than a womanly woman. Morning calls, &c., are then made after which lunch is eaten at 1 o'clock. A fresh pile of desk work then occupies Queen Wilhelmina until 4 o'clock, when it is customary for her to take a drive. Dinner, by no means a lengthy or over-luxurious meal, is eaten punctually at 7.

Queen Wilhelmina makes herself popular with all who comes in contact with her by her readiness of speech and general charm of manner. Petitions are brought to her in greater numbers than to most sovereigns, a fact largely owing to the warm personal interest with which she devotes herself to the various causes placed before her.

The grand old park which surrounds Het Loo is Queen Wilhelmina's favorite place of recreation. She is attached to it chiefly because it contains so much that is reminiscent of her childhood. The little playhouse is still standing in

#### RECLUSE LEFT \$55,000.

Derbyshire Miser Dressed in Rags, but Owned a Fortune.

"He was always in rags, looked as if a good meal would do him good, and has accepted coppers even from poor residents," such are some of the things which the people of Hathersage and Bamford say about Alfred Booker, at one time a farmer, who for some years lived at Bamford, England, where he recently died. His will has created quite a sensation amongst the good villagers of Derbyshire. "Owd Alf. Booker" was known throughout Peakland. He tramped the country for miles around, and would walk with a sack on his shoulders, his clothes all in holes, and his boots in a shocking condition. He aroused sympathy wherever he went, but people knew nothing of him excepting that he was very poor. Even the housekeeper who resided with him had no knowledge that this badly-dressed and poorly-fed old man was worth his thousands. He almost starved himself to leave his fortune. He often picked up rags and bones as he walked about, and treasured pins that he found in the road. He would go without a fire, saying he could not afford coal, and during the last cold weather he grumbled at his housekeeper for putting two pieces of coal on the fire. "Poor old Alf," people said, but they did not say this when it was found he had left nearly \$55,000. He carried his eccentricity into his will. Being annoyed because relief was refused to his housekeeper when she was ill by those having control of the Bamford charities, he never forgave them, and left them out of his legacies. His housekeeper, who had to "scrape" in order to make ends meet for her master, now gets \$2,000. Many friends and relatives also get various sums. A friendly policeman has not been forgotten; a postman, who was kind to the old man, gets a legacy; and laborers, carters, a cab driver, the village postmaster, and others have been remembered. He has also left considerable sums to charity.

#### Nobody is Independent.

Writer Declares Every Man to be Born at Mercy of His Ancestry.

We all have our moments of imagining ourselves independent characters, says Arthur Brisbane, in London Daily Mail. We take pride in our independence, and are never as foolish as when trying to prove how independent we are.

Every man, to begin with, is born absolutely at the mercy of his ancestry. You have not a thing in you, and you never will have a thing in you, that you did not inherit from some one of the thousand and thousands of ancestors, all of whom are dimly stored away in your complex make-up.

## KING'S VOICE TREMBLED

### HIS MAJESTY'S FAREWELL TO THIRD SCOTS GUARDS.

Seven Hundred of the Finest Men in the Army Marched Past Him.

"I hope that it may be possible for me or at any rate, my successor, to see a 3rd Battalion of the Scots Guards carrying the same colors again."

The King's voice trembled a little when in the grounds of Buckingham Palace on Saturday he ended his farewell speech to the 3rd Scots Guards with these words, says The London Daily Express.

The scene was a fine one, as the battalion, headed by their pipers in royal tartan, swung over the lawn from the archway at Constitution Hill. The leafy trees in the background threw into relief the gold and scarlet uniforms and added to the splendid appearance of the battalion. Not even the most rabid Little Englander could look unmoved at the disbandment of such a fine body of men.

When it came to the parade ground the battalion halted, "dressed," and then, with a little ripple, sprang to attention as the King, in uniform, stepped from the windows of the palace. As his Majesty reached the parade ground the strains of the national anthem rang out.

The King passed down the ranks in formal inspection of the battalion, and then to the music of the regimental band seven hundred of the finest men in the army "marched past" him.

#### FOR THE LAST TIME.

When it was over and a hollow square had been formed, his Majesty advanced within the space and made the following farewell speech:—

"Colonel Drummond, officers, non-commissioned officers and privates of the 3rd Battalion Scots Guards,—My Government has considered it necessary to reduce the expenses of the army, a consequence of which there is to be reduction both of our artillery and infantry, and in this reduction your battalion is included.

"I have therefore ordered you to come here to-day, that I might inspect you and express to you my appreciation of your services with the battalion, which will shortly cease to exist.

"Let me congratulate you, Colonel Drummond, on the battalion under your command. I never saw a finer body of officers and men, and it is with sincere regret that I part with you.

"You have done your duty well during the six years you have been in existence.

"It is just over five years since I pro

ances great masses of snow and ice, but in reality a substance from which will be made millions of tons of soap and millions of glass panes.

At only one place in the world is natural soda found under conditions which admit of industrial development, and at that place it must be shipped several hundred miles by rail and many tons of water must be evaporated by coal to obtain a ton of the product.

The Mexican lakes are within three thousand yards of the sea and the fierce sun and heat of the desert attend to the evaporation. The world's consumption is very large, amounting to several hundred thousand tons annually, and at present nearly all of it is manufactured from common salt with the use of expensive machinery. At Adair Bay, when the temperature is right, the water of the lake crystallizes into pure carbonate of soda, nature doing what man requires expensive machinery and vast amounts of coal to do.

The Mexican Government declines to dispose of these lakes to any one. President Diaz believing that they may become sources of enormous income to the country, just as the nitrate of soda beds are to Chile. What it may mean to the soap and glass industry of Mexico may be judged when it is stated that at present manufactured soda, one of the principal items of cost, sells for \$75 per ton in parts of that country.

The same article from Adair Bay may be delivered for less than one-third of that price. An estimate of an engineer is to the effect that there is enough soda on top of the ground to produce one hundred tons daily for seventy-five years.

## HANDLING VICIOUS HORSES.

### Rarey's Little Trick for Curing Balking —Causes of Shying.

A balky horse can be cured, when under the saddle, by a very simple method. Turn him around and around in his tracks a few times and then suddenly straighten his head and he will willingly, and even gladly, go forward. This was the method of the celebrated John S. Rarey and has never been known to fail.

The "jibber" differs from the balker inasmuch as his so-called vice is caused by congestion of the brain. The horse thus affected is liable to bolt or run away after one of three attacks and is a dangerous animal.

Rearing, although commonly termed a vice, is often caused by too severe a curb. Sometimes the rearing horse loses his balance and falls over backward. It is needless to say that the rider is then lucky if he or she escapes without serious, if not fatal, injury. When a horse rears loosen the reins and speak to him in a soothing tone; but if he persists give him a sharp blow between the ears with the butt of the whip. This will bring him down on all fours with amazing quickness.

Kicking is certainly a vice. Sometimes, however, it is caused by fear, in which case much can be accomplished by gentle management. Exactly the opposite treatment of the rearing animal should be applied to the kicker. Hold his head up with might and main, for the horse cannot throw out both hind legs at once when his head is elevated. Kicking straps are what the name implies. A strap fastened to the shafts over the horse's croup prevents kicking, but this is only serviceable when driven in single harness. Shying is a dangerous fault. It cannot properly be termed a vice, as it is generally the result of defective vision. Gentle treatment, soothing words and patient persistence in accustoming the animal to the dreaded object will often effect a cure. To lash a horse because he shies or is frightened only aggravates the evil. He will associate the punishment with the frightful object and will fear it more and more each time he encounters it.

Might may make right, but it doesn't always make good.

The grand old park which surrounds Het Loo is Queen Wilhelmina's favorite place of recreation. She is attached to it chiefly because it contains so much that is reminiscent of her childhood. The little playhouse is still standing in which, as a small princess, she used to amuse herself.

Notwithstanding the fact that she takes a serious and intelligent interest in affairs of state, Queen Wilhelmina has a reputation for her love of fun, and is said to be

## AN INVETERATE TEASE.

She is also excessively fond of sport. The ponds in the park grounds offer opportunity for rowing in summer and skating in winter, in which the Queen likes to take active part.

Queen Wilhelmina is a devoted church-goer and usually attends service in the small chapel at Aalmoord, where she is not disturbed by the curiosity of the public as in the big churches at Amsterdam or The Hague. She has a fresh soprano voice, which can be heard throughout the service by small community worshippers. Queen Wilhelmina and her husband are also frequently seen in the Lutheran Church, where the Queen, in deference to Prince Henry's faith, has rented a pew.

Queen Wilhelmina's most advanced accomplishment is painting, and she is often to be seen with palette and oil, fixing on canvas some picturesque spot in the grounds at Het Loo. The Prince, her husband, is passionately fond of hunting, but perhaps equally so of forestry, and has devoted much of his time to improving the grounds of the Loo.

Rumor is wrong in asserting, as it occasionally does, that Queen Wilhelmina's married life is not a happy one. Such whispers penetrate at times to Queen Wilhelmina herself, when she and her husband are said to make merry over them together.

## DOCTORS IN FRANCE.

### The Difficulty a Patient Had in Paying His Bill.

There is one whimsical trait in the French country doctor, says the author of "Home Life in France." He does not relish being paid for his services. The difficulty in dealing with him is the matter of remuneration, by whatever roundabout contrivance to transfer his two-franc fees from your pocket to his. The trait mentioned does not appear in the Canadian physician in the same form but every one will recognize that the spirit is the same in the French doctor and in his benevolent and self-sacrificing Canadian brother.

On arriving at the little Champenois town, says the author, I unfortunately fell ill, and Doctor B. was in close and faithful attendance upon me for many days.

"Do not be uneasy," Doctor B. replied when, as the time of my departure drew near, I asked for his bill. A second attempt to settle the little matter only resulted in the same way, and on the last day it really seemed as if I must leave my debt behind me.

But at the last moment, just as I was about to start for the station, up came the doctor's maid of all work, breathless and flustered, with the anxiously expected account. On my hostess handing her the sum, just a pound, the good woman turned it over in her palm and exclaimed:

"How these doctors make money, to be sure!"

Upon another occasion the same reluctance was even more diversely manifested. I was staying with French friends, and had called in a young French physician. My hostess begged me on no account to offer him money, for he would be offended. So before I left one of the ladies wrote a note at my request, enclosing the customary fee, and making a quite apologetic request that he would accept it.

absolutely at the mercy of his ancestry. You have not a thing in you, and you never will have a thing in you, that you did not inherit from some one of the thousand and thousands of ancestors, all of whom are dimly stored away in your complex make-up.

You may develop marvellously the faculties which they gave you. But you are dependent on those who brought you into the world, and upon those back of them.

The Kaffir, sober, industrious, honest, with all the virtues rolled up within him, has not a fragment of one chance in ten thousand billions of equaling the achievements of a tenth-rate white man whose ancestral start was better.

After birth you start with dependence upon your ancestors, and after youth you are dependent on your education.

If your mind has the right formation, if your brain is provided with the deep convolutions, and good luck has supplied you with a good education in youth, the whole thing is dependent on your liver, your stomach or some other part of your internal machinery.

Very often your success is dependent on your temper and tact. These depend on your digestion. Digestion, of course, depends on your cook, and the cook's attention to business may depend on the politeness of the policeman in front of the house.

You may feel absolutely independent and think you are independent, when, as a matter of fact, you are miserably dependent on the mood of the policeman who has snubbed the lady who cooks your food.

## WOMEN HIGHWAYMEN.

### Hold Up and Rob a Man on a Paris Boulevard.

Two women robbers "held up" a man named Neptier in the Boulevard de Grenelle, Paris, recently, and after stabbing him, rifled his pockets and decamped.

Neptier was walking along the pavement, when the two women sprang suddenly from a dark alley. "We are the Amazons of Grenelle!" they shouted. "Hand over your watch and purse, or you are a dead man!"

Neptier was taken by surprise and somewhat dazed. "Now then, hurry up with the swag," said the women, and they made a threatening move towards him.

He drew back and was beginning to remonstrate with them - when they rushed at him and stabbed him with their daggers. He fell senseless to the ground, and the two viragos then helped themselves to his watch and a considerable sum of money.

The wounded man was later found by the police, and taken to the hospital, where he lies in a critical condition.

## RABBITS IN AUSTRALIA.

A writer describes a plague of rabbits in Australia: "A farmer barricaded himself in with mules upon miles of wire fencing solely to keep out the rabbits. They eat their way up to the barriers, and in the fight for the green land within the wire they die in myriads. All round the enclosed land they lie in heaps of incredible size. Swarms after swarms follow on, and at last the heaps of dead are so high that the late comers make their way over the fence and the farm is ruined."

## THE SIMPLE LIFE.

Mr. George Mead, an interesting Peterborough (England) personality, who has just died, possessed property estimated at \$250,000, and he left no will. He led a simple life, his diet being chiefly bread, potatoes, and hot water, and he was in the habit of running a mile every morning at the rear of the cathedral. His careflessness and frugality were continued to the day of his death, when there was only one cent left in the house. He was in his seventy-ninth year, and a bachelor.

command. I never saw a finer body of officers and men, and it is with sincere regret that I part with you.

"You have done your duty well during the six years you have been in existence.

"It is just over five years since I presented to the battalion the colors which will shortly be relinquished by you, and which were to have been given to you by my revered mother, Queen Victoria.

"I hope that you will later, when your duties are over, confide those colors to my care. I shall always preserve them religiously and carefully at Buckingham Palace, as I hope that it may be possible for me,

## OR AT ANY RATE MY SUCCESSOR.

to see a 3rd Battalion of the Scots Guards carrying the same colors again."

The speech was heard in deep silence, and not a movement broke the rigidity of the ranks as Colonel Drummond stepped forward to reply.

The 3rd Scots would always remember their motto, "Ever ready," he said. They heard with the liveliest satisfaction of the King's intention to receive into his keeping the colors of which they were so proud.

Then the King returned to the saluting base, and, still in silence, the battalion re-formed line and marched up in review order with colors flying and band playing. Then silence again as the bayonets flashed in the sun's rays and the battalion came to the "present." Lieuts. Kemble and Mackenzie lowered the colors in salute, and once more the national anthem rang out while the King stood with his hand raised in acknowledgement of the tribute.

A little pause, and then the rigid symmetry of the ranks was broken as the bearskins raised on the bayonets suddenly shot up in the air and a cheer burst from the Guardsmen. It was repeated again and then again as the King turned at the French windows of the palace to take one last look at the battalion.

Afterwards his Majesty conferred on Colonel Drummond the Royal Victorian Order (fourth class).

## BOY SMOKERS.

### Stringent Bill to Operate in England to Stop Juvenile Smoking.

In their report issued recently the Committee on Juvenile Smoking strongly urged the British Government to introduce a bill next session (partly on the lines of Sir Ralph Litter's measure, which they prefer to Lord Reay's) as follows:

1. Every person knowingly selling cigarettes, cigarette papers, cigars, or tobacco to any child under sixteen to be liable for the first offence to a fine not exceeding £2, and for subsequent offences not exceeding £5.

2. Every child under sixteen found smoking or in possession of cigarettes, etc., to be liable to a penalty not exceeding £2 for each offence.

3. Constables to be allowed to stop youths apparently under sixteen seen smoking in a public place, and to confiscate tobacco found on them.

4. Local authorities to be allowed to extend some of these powers to park-keepers, schoolmasters, and others, and possibly to railway and dock companies.

5. Provisions to be made to exempt children procuring tobacco for their parents or carrying messages for their employers.

No recommendation is made in regard to automatic machines. Teachers are expected to dwell occasionally on the bad effects of the habit.

The committee are satisfied that juvenile smoking has rapidly increased, that it facilitates disease and leads to drinking, and are impressed by the absence of signs of physical deterioration among girls who are as a rule free from the habit.

All that glitters can't be measured by the golden rule.

## Buy Hair at Auction?

At any rate, you seem to be getting rid of it on auction-sale principles: "going, going, g-o-n-e!" Stop the auction with Ayer's Hair Vigor. It certainly checks falling hair; no mistake about this. It acts as a regular medicine; makes the scalp healthy. Then you must have healthy hair, for it's nature's way.

The best kind of a testimonial—  
"Sold for over sixty years."

|                            | \$ 37694 38 |

The amount to be raised over and above estimated receipts is \$27,358 32. The rate therefore will be 25 mills on the dollar, or two mills less than last year.

In striking the rate from the above figures it must be remembered that \$43,100 00 of the property is exempt from taxes except school tax, and \$22,100 00 is wholly exempt.

Coun. Simpson reported that the Government Auditor was working on the books of the town. He was going over a period of ten years and it would likely take about two months to complete the job, at a cost of about \$600. During the discussion it came out that the assessment roll of 1904 was missing.

Moved by Coun. Simpson, seconded by Coun. Williams that the Finance Committee be empowered to pay the Auditor his salary as earned. Carried.

On motion the matter of Mr. L. Moore's overpaid taxes was referred to the Finance Committee with power to act.

On motion Mr. E. B. Perry was granted a week or ten days' holidays, and that Chas. Bruton be engaged in his place at \$1.25 per night.

Mr. Wm. Davy was present and again asked for a sidewalk leading to his residence. Coun. Normile said he had looked the matter over and estimated the cost of material at about \$75.00 for a two-plank walk, and at a previous meeting a report of "no action" had been adopted. The Mayor was of the opinion that the latter report settled the matter.

### ACCOUNTS.

The following account was referred to the Finance Committee with power to act:—A. T. Harshaw, insurance, \$13 90.

The following accounts were ordered to be paid:—Chas. Pollard \$400 P. Bergin \$10.90, Napanee Express \$49 00 J. J. Minchinton \$3.00, George Greer \$19 92, S. Snider \$150, Canadian Express Co. \$145, John Vine \$11.00, G. T. R. 47c., W. R. Pringle \$15.00, John Forman \$16 50, Dominion Wire Rope Co. \$17 25, Eugene F. Phillips Co \$2383 13, J. S. Knapman \$184 20.

Council adjourned.

Mrs. A.—I'm surprised that your husband earns so little if he works as hard as you say. What does he do?

Mrs. B.—The last thing he did was to calculate how many times a clock ticked in the course of 1,000 years.—London Tit-Bits.

### The Hero.

"It must be nice to be a hero," remarked the quiet man.

"It is for a minute," replied Senator Badger. "After that the hero wonders at the world's bad memory!"—Milwaukee Sentinel.

Hammocks a fine assortment. MADOLE & WILSON.

## WOMAN AND THE LAW.

### How Conditions Have Changed in the Last Half Century.

Truly the position of women before the law has suffered mighty changes. Fifty or sixty years ago the twain were indeed one, and that one the husband. He could collect all debts, such as wages that might be due her—though incidentally, he was liable for all she owed. She could not make a will of her real estate, nor of her personal property, without his permission, and he was entitled to the income from her lands. He could lock her up in his house and keep her there. Whether he could inflict chastisement was a moot point, though a judge of the North Carolina supreme court held in 1866 that he possessed this power, provided he used "a stick as large as his finger, but no larger than his thumb."

Over the children the husband had absolute control, and could even appoint a guardian by will who could take them away from the mother. They were to be brought up in the father's religion, without any consideration for her feelings. In fact, it was only about 1886 that the supreme court of Judicature in England directed that the sons and daughters of the deceased nawab of Bengal by an English wife be reared as Mohammedans.—Everybody's Magazine.

### Winners.

"Did your husband ever bet on a winning horse?"

"Oh, yes," answered young Mrs. Torkins. "All the horses Charley bets on win at some time or another."

Honesty sometimes keeps a man from growing rich and civility from being witty.—Selden.

## FACTS IN NATURE.

Not Only Do We Get Inspiration From Nature, But Health as Well.

For people who are run-down and nervous, who suffer from indigestion or dyspepsia, headache, biliousness, or torpid liver, coated tongue with bitter taste in the morning and poor appetite, it becomes necessary to turn to some tonic or strengthener which will assist Nature and help them to get on their feet and put the body into its proper condition. It is becoming more and more apparent that Nature's most valuable health-giving agents are to be found in forest plants and roots.

Nearly forty years ago, Dr. R. V. Pierce, now consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., discovered that by scientifically extracting and combining certain medicinal principles from native roots, taken from our American forests, he could produce a medicine which was marvelously efficient in curing cases of blood disorder and liver and stomach trouble as well as many other chronic, or lingering ailments. This concentrated extract of Nature's vitality he named "Golden Medical Discovery." It purifies the blood by putting the stomach and liver into healthy condition, thereby helping the digestion and assimilation of food which feeds the blood. Thereby it cures weak stomach, indigestion, torpid liver, or biliousness, and kindred derangements.

If you have coated tongue, with bitter or bad taste in the morning, frequent headaches, feel weak, easily tired, stitches or pain in side, back gives out easily and aches, belching of gas, constipation, or irregular bowels, feel flashes of heat alternating with chilly sensations or kindred symptoms, they point to derangement of your stomach, liver and kidneys, which the "Golden Medical Discovery" will correct more speedily and permanently than any other known agent. Contains no alcohol or habit-forming drugs. All its ingredients printed in plain English on wrapper.

The sole motive for substitution is to permit the dealer to make a little more profit. He gains; you lose. Accept no substitute for "Golden Medical Discovery."

Constipation causes and aggravates many serious diseases. It is thoroughly cured by Dr. Pierce's Pleasant Pellets. One a laxative; two or three are cathartic.

# OUT of THE SHADOWS

By Fannie Heaslip Lea

Copyright, 1906, by Ruby Douglas

In the gentle current of Miss Sarah's life by far the wildest eddies were Paola's love affairs. Miss Sarah had never had a lover herself—she had always been too busy taking care of Paola, who was the younger sister, a slim, pale creature, with vivid eyes and a head that habitually drooped a little as though weighted by its own gold hair and a sense of languorous melancholy.

Beside Miss Sarah's old time courtesies Paola was as an orchid to a pansy, but underneath the melancholy was a certain irresponsible devilry, a certain intangible witchery, that brought the most eligible youths of the neighborhood in supplication to her feet and filled Miss Sarah with unceasing wonder and amazement.

Whenever a new victim appeared upon the scene Miss Sarah thrilled with apprehension. As he was friendly, she approved of him; as he was more conspicuously attentive, she watched for him; then in gentle perplexity that never vanished with added experience she saw him hover, advance, retreat, hover again and plunge. When the little comedy was played out she took up her knitting with a sigh of relief, opened her volume of Felicia Hemans at the purple bookmark and prepared to rest before another siege.

Paola herself slipped from one emotional cataclysm to another, as the slender moon from cloud to cloud. They veiled her vivid calm for a moment, but she always emerged unfettered on the other side.

She had been wearing Francis Lockwood's roses for a month, when Miss Sarah one night, after three gentle calls unanswered, stepped through the long French window on to the moonlit veranda with a crimson scarf in her hand. The June night called for no such guard against its close, sweet warmth, but on the subject of damp and dew Miss Sarah was inflexible.

"Paola," she said anxiously, then, since there was no Paola in all the

Lockwood's voice came out of the deeper shadow, low and vibrant and rhythmic. Miss Sarah leaned closer instinctively to hear the words; they escaped her at first, then echoed clearer:

"Remember how when first we met we stood,

Stung with immortal recollections,  
O fact, immured beside a fiery sea  
That leaned down at dead midnight to be kissed!

O beauty folded up in forests old,  
Thou wast the lovely quest of Arthur's knights;

Thy armour glimmered in a gloom of green.

Did I not sing to thee in Babylon?  
Or did we set a sail in Carthage bay?  
Were thine eyes strange? Did I not know thy voice?

All ghostly grew the sun, unreal the air  
Then when we kissed."

The last word quivered sentient on the air, and Miss Sarah trembled with a strange fear of it. Her fingers found the rough bark of the tree and clung; she waited, hungered, for the rest, but young Lockwood's voice broke from the beat of verse into uneven words:

"Paola, my beautiful, it is our story."

"It is the story of Paola and Francesca," said the girl dreamily.

"Paola and Francesca—Paola and Francis—what does it matter? 'Were thine eyes strange? Did I not know thy voice?'"

Miss Sarah, dizzied and enwrapped by she knew not what roseate mist, saw the white grace of Paola waver and lean to the shadow and heard a few moments of magical silence, the whisper, tender, exultant:

"And in the book they read no more that day."

Miss Sarah felt her way back to the path with unnecessary care. If her light footsteps had been the crash of brasses they would not have reached the two by the Black Prince, but Miss Sarah did not know it. She hurried along between the roses, catching her breath in little gasps as she went, and the wraiths of lost years swarmed around her, stinging her to wild, indefinite regret. She passed through the moonlight and up the steps, through the open window, and caught up her neglected knitting with a pathetic desire for things tangible and commonplace. She opened the volume of Felicia Hemans at the purple bookmark, but without knowledge of a line.

"I never knew what it was like!" she said pitifully to herself. "I wish I had known." The magic of the moonlit garden swept over her again, and the music of the lover's verse murmured in her ears. Miss Sarah trembled with a vague, unhappy longing for the things that she had never known—the things that were the inheritance of Paola, her sister, yet had never been hers.

Beyond the window the garden lay vast and wonderful beneath the moon. To her a land where life ran in strange currents between banks of enchanted blossoms.

Suddenly and without warning a tear slipped down Miss Sarah's cheek and splashed upon the purple bookmark. Another followed it and yet another; then Miss Sarah drew herself together and shut between the leaves of Felicia Hemans poems her one belated vision of romance. "And in the book they read no more that day," she said to herself, with a sad little sigh. Then she took up her knitting again to wait for Paola.

## A Roland For His Oliver.

He was very practical, and in order to have everything fair and square beforehand he said:

"You know, darling, I promised my mother that my wife should be a good housekeeper and a domestic woman. Can you make good bread? That is the fundamental principle of all house-keeping."

The average family in Canada uses about 25 pounds of tea per year. If Red Rose Tea were used entirely, not more than 20 pounds would be required. You save real money when you use Red Rose Tea.

## NOBODY NEED HAVE INFLAMMATORY RHEUMATISM!

THAT'S FACT THAT MEDICAL SCIENCE CAN PROVE TO YOU EVERY DAY IN THE YEAR—CARELESSNESS COURTS IT—PRECAUTION PREVENTS—IT'S NOT A CONTAGION THAT STEALS IN UNAWARES!

## South American Rheumatic Cure

is the fortress behind which you may be perfectly secure; and why take chances if, through exposure to heat and wet, you feel those unwelcome chills, then the fever, then the sweating, then the pains in the joints. Do not put off securing the greatest of rheumatic and neuralgia cures. Experience shows that the duration of inflammatory rheumatism, under ordinary treatment, will cover a period of six to eight weeks; and what a wracking it gives to the sufferer, and it seems almost incredible that the great South American Rheumatic Cure has, in thousands of instances, controlled and conquered most stubborn and next to baffling cases in from one to three days.

Lumbago is one of rheumatism's full brothers. It comes and prostrates at times with the suddenness of a thunderclap, and yet, as in the most acute inflammatory cases, the great South American Rheumatic Cure comes as a ministering angel, holds out its healing hand, and bids the bent and bedridden take on the suppleness of youth. Lots of testimony for the asking.

Healthy kidneys are kept so by South American Kidney Cure, and unhealthy kidneys are cured by the same great remedy

**Sold by F. L. Hooper.**

SARAH DREW BACK INTO THE SHADE OF THE GREAT OAK.

shadow dappled length of the veranda, raised her voice a little and called again, "Paola, dear!"

A mocking bird in the cedar by the gate gurgled a liquid impertinence that ended in a low call to his mate, but the rest was silence.

Miss Sarah looked across the lawn, then down at her feet.

"Paola must have this scarf," she said to herself sternly, "and I suppose she is sitting on the bench by the Black Prince—the most imprudent child!" That the Black Prince was a beloved rosebush saved Miss Sarah's remarks from their apparent impropriety, and, mindful of her steps, she hurried into the path that led to the Black Prince's domains across the lawn.

The moon burned white above her in a cloudless sky, and Miss Sarah responded delicately to the influence of the hour. A faint fragrant dream, with boyish eyes, called to her as she went slowly down the path, and young faces swam mistily in her memory as if they had drifted there with the smell of the box in the hedge.

She thought of the night her mother died, another June; of a flowered gown she had worn the day she was sixteen, of a poem, something about daffodils, or was it roses?

"The love that came with the daffodils and went away with the roses"—that was it," said Miss Sarah, with a little sigh of satisfaction, "only the daffodils come back with the spring and every summer there are roses, so I really don't see the sense of that. Those love songs are nearly always rather silly." She stopped to thrust back the daring sweetness of a yellow banksia. "The garden is very sweet tonight," said Miss Sarah to herself, "and God walked in the cool of the garden. I wonder was it like this." She paused on the edge of the Black Prince kingdom, where it lay half in shadow, and lifted her eyes to the moon.

"Oh, dear!" said Miss Sarah, almost aloud, "what a beautiful night it is," which was Miss Sarah's way of saying

that the world was very good and she was happy. Then she lifted her skirts a little higher and sped into the heart of the rose garden.

Paola was sitting on the bench by the Black Prince—Miss Sarah saw that at once—and beside her was young Lockwood, as Miss Sarah had also foreseen, and Paola's head was thrown back, and one of Paola's slim white arms lay like a shimmer of moonlight along the back of the bench. "Positively inviting rheumatism," murmured Miss Sarah miserably.

She was within a few feet of them and a call trembled on her lips, when Paola's own voice stopped her.

"Go on," said Paola in a soft, hurried whisper, and Miss Sarah by some queer instinct drew back into the shade of the great oak behind the bench, fearful lest an incautious movement would betray her, fearful almost of her own breathing, for Miss Sarah was learned in the ways of Paola's suitors, and it was one of her best learned lessons never to interrupt them. So she drew back and waited, innocent of any desire to eavesdrop.

"Go on," said Paola again, and young

housekeeper and a domestic woman. Can you make good bread? That is the fundamental principle of all house-keeping."

"Yes; I went into a bakery and learned how to make all kinds of bread." She added under her breath, "Maybe."

"And can you do your own dressmak-

ing? I am comparatively a poor man, love, and dressmakers' bills would soon bankrupt me."

"Yes," she said frankly, "I can make everything I wear, especially bonnets."

"You are a jewel!" he cried, with enthusiasm. "Come to my arms."

"Wait a minute; there's no hurry," she said coolly. "It's my turn to ask a few questions. Can you carry up coal and light the fire of a morning?"

"Why, my love, the servant would do that."

"Can you make your coat, trousers and other wearing apparel?"

"But that isn't to the purpose."

"Can you build a house, scrub floors, beat carpets, sweep chimneys?"

"I am not a professional."

"Neither am I. It has taken most of my life to acquire the education and accomplishments that attach you to me. But as soon as I have learned all the professions you speak of I will send you my card. Au revoir!" And she swept away.—London Tit-Bits.

### PICTURESQUE ALGIERS.

All Its Streets Are Staircases, and All Are Safe.

Here is a pretty picture of Algiers by Frances Nesbitt: "Now it is possible to safely into even the darkest and remotest corners, and they are dark indeed. A first visit leaves one breathless, but delighted—breathless, because all the streets are staircases on a more or less imposing scale—the longest is said to have at least 500 steps; delightful, because at every turn there is sure to be something unusual to a stranger's eye. The newer stairs are wide and straight and very uninteresting, but only turn into any old street and follow its windings in and out between white walls, under arches, through gloomy passages, here a few stairs, there a gentle incline, always up and always the cool deep shade leading to the bright blue of the sky above.

"Being so narrow and so steep, there are, of course, no camels and no carts. Donkeys do all the work and trot up and down with the strangest loads, though porters carry furniture and most of the biggest things. Up and down these streets comes an endless variety of figures—town and country Arabs, spahis in their gay uniforms, French soldiers, Italian workmen, children in vivid colors, Jewesses with heads and chins swathed in dark wrap-pings.

"Interesting beyond all these are the Arab women flitting like ghosts from one shadowy corner to another, the folds of their haicks concealing all the glories of their indoor dress, so that in the street the only sign of riches lies in the daintiness of the French shoes and the fact that the haick is pure silk and the little veil over the face of a finer material."

### After Long Years.

After long years work is visible. In agriculture you cannot see the growth. Pass that country two months after, and there is a difference. We acquire firmness and experience incessantly. Every action, every word, every meal, is part of our trial and our discipline. We are assuredly ripening or else blighting. We are not conscious of these changes which go on quietly and gradually in the soul. We only count the shocks in our journey. Ambitions die; grace grows as life goes on.—Friederick W. Robertson.

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. I had consulted several physicians and used everything I could hear of, all to no use. Was told to use

## Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

The Kind You Have Always Bought

Bears the Signature of *Chas. H. Fletcher*

## WHAT

## Fruit-a-tives

OR "FRUIT LIVER TABLETS"

## ARE

Fruit-a-tives are the marvels of modern medicine. They have accomplished more actual cures—done more good to more people—than any other medicine ever introduced in Canada for the time they have been on sale.

Fruit-a-tives are fruit juices. They are nature's cure for

- CONSTIPATION
- BILIOUSNESS
- BAD STOMACH
- DYSPEPSIA
- HEADACHES
- IMPURE BLOOD
- SKIN DISEASES
- KIDNEY TROUBLE
- RHEUMATISM
- IRRITATED THROAT

Fruit-a-tives are the juices of apples, oranges, figs and prunes. These juices are concentrated—and by a secret process, the juices are combined in a peculiar manner. This new combination is much more active medicinally than fresh juices—yet so perfect is the union that Fruit-a-tives act on the system as if they were in truth a natural fruit, medicinally stronger than any other known fruit.

To this combination of fruit juices, tonics and internal antiseptics are added, and the whole made into tablets.

These are Fruit-a-tives—sold everywhere for 50c a box or 6 boxes for \$2.50.

FRUIT-A-TIVES LIMITED • OTTAWA.

## SOME FIRST OCCASIONS.

The first canal was made in England when Henry I. joined the Trent to the Witham, in 1134.

Quill pens came into use in 553; the first steel ones in 1820, when the first gross of them sold for \$36.

The first pocket handkerchiefs, utilized in the manner they are today, were manufactured at Paisley in 1743.

From the press of the celebrated Wynken de Worde the first book containing musical characters was issued in 1495.

The first coins were struck in brass about 1184 B. C. and in gold and silver by Pheidon, tyrant of Argos, about 562 B. C.

About 70 A. D. the first glass bottle was made by the Romans, although the manufacture was not taken up in England until 1558.

Movable scenery was first used in theaters in 1508. It was invented by Baldassare Peruzzi and displayed in Rome before Leo X.

Pliny's "Natural History" may be regarded as the first encyclopedia, since it contained 30,000 facts compiled from 2,000 books by 100 authors.

## Declined Her Own Medicine.

There is always more or less talk current about abolishing position and dispersing pell. The trouble is to know just where to begin the destructive reconstruction and to find reformers who are willing themselves to be reformed. An English great lady was once entertaining the labor member of parliament, Henry Broadhurst, the Duke of Argyll and others at her country seat. She was a strong Liberal, and one evening inveighed against the house of lords. It would be sweet

## ON THE SPIRE.

Thrilling Incident in the Life of James Freeman Clarke.

When James Freeman Clarke was a young man he visited Salisbury, England. Here the beautiful cathedral lifts its spire 404 feet into the air. The spire is topped by a ball, and on the ball stands a cross. From the ground the ball looks like an orange, but its diameter is really greater than a man's height.

Workmen were repairing the spire. Mr. Clarke saw them crawling round the slim steeple in the golden afternoon like bugs on a bean stalk. The impulse came to him to climb the spire and stand on the horizontal beam of the cross. Accordingly at dusk, when the workmen had left, the young American slipped in and made his way up the stairs to the little window which opened to the workmen's staging. To run up the scaffolding to the ball was easy. Then came the slightly more buiging curve of the ball. A short platform gave him foothold. He reached up, put his hands on the base of the cross and pulled himself up. To gain the cross arm was merely "shinning" up a good sized tree, and soon he stood on the horizontal timber and, reaching up, touched the top of the cross.

After enjoying his moment of exaltation he slid to the foot of the cross, and, with his arms round the post, slipped down over the great abdomen of the ball. His feet touched nothing. The little plank from which he had reached up was not there!

Here was a peril and one for a cool head and sure eye. Of course he could not look down. The lugging hold that he had to keep on the bottom of the cross shortened the reach of his body and made it less than when he had stood on the plank and reached up to the cross with his hands. He must drop so that his feet should meet the plank, for he would never be able to pull himself back if he should let himself down at arms' length, and his feet hung over empty air.

Now his good head began to work. He looked up at the cross and tried to recall exactly the angle at which he had reached for it, to make his memory tell him just how the edge of that square post had appeared. A few inches to the right or to the left would mean dropping into vacancy.

Bending his head away back, he strained his eye up the cross and figured his angle of approach. He cautiously wormed himself to the right and made up his mind that here directly under his feet must be the plank. Then he dropped. The world knows that he lived to tell the tale.

## Inherited Dollars.

The only reason some men escape social ostracism is because their fathers made enough money to buy them a ticket of admission.—Birmingham News.

## BY-LAW NUMBER

OF THE MUNICIPAL CORPORATION OF THE TOWNSHIP OF RICHMOND.

A By-Law to provide for the completing and repairing of certain drainage work provided for by By-Law No. 291 of the said Municipal Corporation in pursuance of the report of the Engineer, as embodied in the said By-Law.

Provisionally adopted the Sixth day of August, A. D. 1906.

WHEREAS pursuant to By-Law No. 291 the Municipal Corporation of the Township of Richmond constructed that certain drain known as Otter Creek Drain for the benefit of the land therein described.

AND WHEREAS by mandamus issued out of the High Court of Justice the said Municipal Corporation have been directed to repair and maintain the said drain.

AND WHEREAS, thereupon under the terms of the said By-Law Number 291, the said Council has procured an examination to be made by Frederick Fraser Miller, Civil Engineer, being a person competent for such purpose, of the said area proposed to be drained and the means suggested for the drainage thereof, and of other lands and roads liable to assessment under the Municipal Drainage Act, and has also procured specifications and estimates of the drainage work to be made by the said Frederick Fraser Miller and an assessment to be made by him of the lands and roads to be benefited by such drainage work and of other lands and roads liable for contribution thereto, stating as nearly as he can the proportion of benefit, outlay liability and injurious liability, which, in his opinion will be derived or incurred in consequence of such drainage work by every road and lot or portion of lot, the said assessment so made being the assessment heretofore levied upon the roads and lots, or parts of lots hereinafter in that behalf specially set forth and described; and the report of the said Frederick Fraser Miller in respect thereof, and of the said drainage work being as follows:—

To the Reeve and Council of the Township of Richmond.

Gentlemen:—Re. Otter Creek Drainage Works. I have the honor to report to you that I have examined the Creek and ditches and that the following work will have to be done to make the work conform to the original report, known as By-Law No. 291 of the Township of Richmond.

1. The Creek will have to be thoroughly cleaned out to remove the obstructions to the free flow of the water. These obstructions consist of sand bars, stones, poles, etc. also remains of McLaughlin bridge abutments and a couple of bridges which are not high enough and have not spin enough and will therefore have to be changed so as to give a clear twenty feet of water.

2. Considerable work will have to be done along the road allowance between the 7th and 8th Concession consisting of about 74 rods of new ditch, a couple of culverts and about 40 rods of old ditch will have to be cleaned out.

3. The ditches along the south and east sides of the swamp from the above named Concession road north easterly and on the north side of the swamp from the spring north easterly will all have to be deepened and widened to become operative.

4. I estimate that the cost of the above work will be \$630.00 or at the rate of \$1.75 per acre of land benefited as per original By-Law No. 291 in respect to said drainage work and the whole assessment is for benefit liability.

5. I have, in the Schedule hereunder written, as a schedule of the benefit liability of the said drainage works against the several parcels of land liable therefor.

DATED at Napussee this 24th day of July A. D. 1906.

F. F. MILLER,  
Engineer.

The following Schedule very description of land, number of acres benefited and total cost assessed upon each.

| LOT | ACRES | BENEFIT | COST |
|-----|-------|---------|------|
| 1   | 1.00  | 1.75    | 1.75 |
| 2   | 1.00  | 1.75    | 1.75 |

said Municipality of their intention to make application for such purpose to the High Court of Justice during the six weeks next ensuing the final passing of the said By-Law.

AND NOTICE is hereby further given that a Court of Revision required by the Municipal Drainage Act Section 21 Chapter 226, Revised Statutes of Ontario 1897, will be held for the purpose of the said Act by the Council of the said Corporation of the Township of Richmond on the 24th day of September, A. D. 1906, at the hour of ten o'clock in the forenoon at the Town Hall in the Village of Selby for the trial of complaints, which may have been made by owners or persons interested in any property assessed in and by said By-Law in respect of the said Assessments under the said Municipal Drainage Act.

DATED at Selby the Sixth day of August A. D. 1906.

(Sgd.) ABRAHAM WINTERS,  
Clerk.

The water, laughing and lapping, invited. The day was giddy May, and the invited young Lorena, moreover, owned all the folly normal to nineteen. So altogether it would have been a miracle if things had gone exactly as they should. A proper young woman of course would have reckoned chances before baring her feet and dancing joyously in midstream, where the pebbles lay smoothly bedded in fine sand and gleaming jewel-wise wherever a sun ray struck through the ripples.

Lorena did not let herself remember that the ford was but fifty yards higher up or that this special shallow reach of the creek lay between the two lakes that gave the finest fishing. They were not true lakes, of course only water mirrors, still and deep, impounded by dams of the winter flood's building. Lorena did not love them. They were so placid they reminded her somehow of Johnny and whatever did that put her out of temper.

She loved glitter, motion, excitement. It was ecstasy to her to dance all day long and half the night after, footing it as lightly, as feintly, as wind blown thistle seed. If only she could dance alone! But since that was out of the question she naturally preferred partners who kept step and were nimble. Johnny was neither, yet all the time she had been engaged to him he had felt it his right to say, if she did not dance with him, she must dance with hardly anybody else.

And not at all with Granville Gore, the very prince of partners, who was handsome and slender and light hearted, with money in both pockets and a trick of spending it with both hands. Johnny hated him, without reason so far as Lorena could see—at least he gave her no reason—only said, "If you are going ever to belong to me, Lollie, you must be barely civil to that fellow."

Somehow the emphasis on the last word always made Lorena shiver when she recalled it. How could she help it, when Johnny was toward other folk the soul of kindly justice? Still she had felt that he was unfair. If he really knew anything he might let her know it likewise.

If Johnny could have brought himself to tell her the break might not have come. But he was too proud and was careful for that. His wife must believe

FITS CURED

try seat. She was a strong Liberal, and one evening inveighed against the house of lords. It would be swept away if it did not reform, she said with fervor.

"Yes," agreed Broadhurst, "and how will you like that, Mrs. P.?"

"Lady P., if you please, sir," instantly corrected Broadhurst's hostess, drawing herself up laughingly.

If you, your friends or relatives suffer with Fits, Epilepsy, St. Vitus' Dance, or Falling Sickness, write for a trial bottle and valuable treatise on such diseases to THE LEIBIG CO., 179 King Street, W., Toronto, Canada. All druggists sell or can obtain for you

Still she kept out of reach until she was twenty yards off the ford. The flat faced man, laughing and panting after her, caught her there and said as he gave her a resounding kiss: "Pon my soul, Undine, it was worth it. I haven't had such a lark since I was a boy."

Lorena broke from him, crying wildly: "Granville! Mr. Gore! Kill this creature!"

At that the men laughed louder than ever. Granville had discreetly disappeared. He was sorry for Lorena; also angry with her, even angrier than with his friend of the flat, red face. There were millions back of the flat, red face—millions that might mean much to Gore's future. Was he to risk their help, to invite everlasting chaff, to make himself the butt of the grill rooms next time he was in town, by championship of a girl, a silly country girl, who should have known better than to put herself in such case?

Mullen, he of the flat, red face, was not a bad sort, only full of uncouth spirits. Lorena would come to no harm. And if she had sense enough to keep her mouth shut he (Gore) would see to it that she was handsomely made up to fit for her present fright. But of course he could not acknowledge her as an acquaintance when she looked such a guy and had let herself get caught in such a plight.

Lorena, noting his absence, stumbled blindly toward the bank and half fell upon it, covering her eyes with both hands. Mullen scrambled out beside her and tried to lift her to her feet, the rest jeering him, pretending to say things aside and singing in cracked chorus, "Where is my wandering boy?"

They were laughing so loud, watching so intently, Johnny fell upon them like a thunderbolt from blue skies. Johnny was still in working clothes—he had, in fact, started to the blacksmith's shop in a mad hurry in hope of getting a dulled plow point sharpened. So he had come to the ford in the very nick of time to see that a woman was in need of help and to rush to give it.

"Gentlemen," Johnny's voice cut like ice, "you must show me your warrant for taking a prisoner. Unless you do"—He stopped short there, his face white, his eyes two points of flame. Even yet he did not know, but a second later Lorena was beside him, clinging to him, burying her face in his rough sleeve, and sobbing out: "Johnny! Save me! Take me away! Don't stop to fight them—only take me and go!"

"Not yet," Johnny said, putting her gently away.

The events of the next five minutes are better left unchronicled. Suffice it that Mr. Granville Gore and his sportsman friends from the city went away on the night train, at least two of the visitors carrying beautiful black eyes. As to how the eyes had been achieved there was discreet silence. But when in the fall Lorena and Johnny were married there came to the bride a chest of massive silver, along with an unsigned note which ran: "Please accept this in token of forgiveness. Remember, you owe me something—in that I gave you occasion to find out the difference there is between a man and a mouse."

Lorena was for sending it back, but Johnny laughed and said: "Mullen is right. He is a man. You can drub a man into decency, but a mouse always runs away."

"And I hate mice of every sort," Lorena added with a pensive smile.

The Fates.

Fable teaches that the fates were three goddesses, holding, one a spindle, another a distaff and the third a pair of shears. They spun the thread of human life, then cut it off, and men's

SHERIFF'S SALE OF LANDS.

Under and by virtue of a writ of execution issued out of the Fourth Division Court of the County of Lennox and Addington, and to me directed and delivered at the suit of William Jenkins, plaintiff, and Peter Vandewater, defendant, I have seized and taken in execution and will offer for sale at my office in the Court House, in the Town of Napanee, on MONDAY, THE 10th DAY OF SEPTEMBER, 1906, at the hour of eleven o'clock in the forenoon, all the right, title, interest and equity of redemption of the said defendant, Peter Vandewater, in, to and out of all and singular that certain parcel or tract of land and premises situate, lying and being in the Village of Centreville, in the Township of Camden, in the County of Lennox and Addington, and Province of Ontario, being composed of Village Lot Number Eleven in "Block B," according to a plan of the said Village of Centreville made by A. R. Davis, P. L. S., and filed in the Registry Office for the said county.

And also that certain other parcel or tract of land and premises situate, lying and being in the Village of Tamworth, in the Township of Sheffield, in the said County of Lennox and Addington, being composed of the south half Village Lot Number One in "Block W," according to a plan of the said Village of Tamworth, made by A. R. Davis, P. L. S., and filed in the Registry Office for the said County on the 10th day of April, 1889.

GEO. D. HAWLEY,

Sheriff County Lennox and Addington  
Sheriff's Office, Napanee, 7th June '06 35e

CHEESE BOARD.

Board met in Council Chamber in the town hall on Friday last.

HIRAM, KING OF TYRE.

The Phoenician monarch and his effort to imitate the Deity.

Hiram, the Phoenician monarch, strove to imitate God by erecting four mighty pillars upon which he caused seven heavens—apartments—to be built. The first was constructed of glass, 500 by 500 yards, storing therein mock images of the sun, moon and stars. The second compartment of iron, 1,000 by 1,000 yards, was the receptacle of precious stones, causing a terrific noise resembling thunder when they crashed against each other and the casement of the inclosure. The third chamber was of lead, 1,500 by 1,500 yards. The fourth was of tin, 2,000 by 2,000 yards. The fifth was of copper, 2,500 by 2,500 yards. The sixth was of silver, 3,000 by 3,000 yards. The seventh was of gold, 3,500 by 3,500 yards, containing precious stones, pearls and a magnificent throne. A channel of water separated the apartments.

Hiram, imitating the royal splendor of the court of King Solomon, sur-

MOSCOW'S QUICK WORK.

On Tuesday morning, 31st of July, the cheese factory here lay a heap of ashes, it having been destroyed by fire 21st of July, about 1 o'clock in the morning. Last Saturday morning milk was taken into one of the largest and most up to date cheese factories, on the same foundation the old one stood on that there is a long distance from it. It is 45 feet by 50 feet, built with cement blocks, cement floors, cement partitions and covered with asbestos roofing. Its owners, Vanluven Bros., deserve credit for the quick and efficient work, and the place and neighborhood are to be congratulated on having one of the largest and most up to date cheese factories in this section. It is said there will be a public hall in the upper part, which is very much needed in the place. Mr. Harvey, of Deseronto, had the contract for the cement work.

The county stone crusher is expected here soon.

Threshing is the order of the day here now.

Mr. Asa Cronk and mother, of Catham, are visiting friends here.

Mrs. Henry Huffman is seriously ill. Mrs. T. Herrington and children, of Napanee, visited at her father's, Mr. Levi Huffman, over Sunday.

School has started under the management of Miss F. B. Asseltine and Miss Otta Sills.

Miss F. B. Asseltine visited her sister in Minnesota, during the holidays.

MCINTYRE'S CORNERS.

School opened on Monday with a new teacher, Mr. Anderson, of Napanee.

Mrs. W. P. Sharp is on the sick list. Dr. Northmore is attending her.

James Howie was calling on T. Preston, Sunday last.

Mr. and Mrs. Lewis, Napanee, at Mr. Detlor's on Sunday, Mr. and Mrs. Geo. Howie and family, Link's Mills; Mr. and Mrs. Alex. Howie and daughter, Collins Bay, at James Howie's; Mrs. J. W. Boyce, Mrs. William Boyce at W. P. Sharpe's on Sunday; A. Hagerman and family at Mr. Keeney's on Sunday; Mr. and Mrs. Ed. Gilbert and daughter, at W. Miller's on Sunday; Mrs. B. VanWinkel and son, Fred, Master Ross Bell, Belleville, at E. R. Sharpe's last week; Mrs. J. F. Aylesworth, and Miss Lillian Aylesworth, Asseltine, at E. R. Sharpe's; Mrs. Keller, Link's Mills, at Mrs. R. Stone; Mr. and Mrs. O. Snider and daughter, Beatrie, at Odessa, on Sunday.

Miss Holland, Kingston, is visiting T. Prest's.

Mrs. W. Smith spent Saturday and Sunday last at Harrowsmith.

Mrs. Edward Smith and Mrs. Annie Smith at S. Bond's on Tuesday.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness caused by catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

Mr. J. Mayer, of Philadelphia, and

UNITED STATES SENATOR FROM SOUTH CAROLINA PRAISES PE-RU-NA.

Ex-Senator M. C. Butler.

Dyspepsia Is Often Caused By Catarrh of the Stomach—Peruna Relieves Catarrh of the Stomach and Is Therefore a Remedy For Dyspepsia.

Hon. M. C. Butler, Ex-U. S. Senator from South Carolina for two terms, in a letter from Washington, D. C., writes to the Peruna Medicine Co., as follows:

"I can recommend Peruna for dyspepsia and stomach trouble. I have been using your medicine for a short period and I feel very much relieved. It is indeed a wonderful medicine, besides a good tonic."

CATARRH of the stomach is the correct name for most cases of dyspepsia. In order to cure catarrh of the stomach the catarrh must be eradicated.

Only an internal catarrh remedy, such as Peruna, is available.

Peruna exactly meets the indications.

and the hospitality of the Denbigh Parsonage.

Mr. Chas. Becker, Lithographer, of Philadelphia, and daughter, are also enjoying a few weeks' change from City worries and are guests here at the Chatson House well pleased with the change and the romantic scenery and quiet they find here.

Mrs. J. Hakin died at her home after a long and very painful illness on the 13th inst. at the age of 65 years and 7 months. The funeral took place on the 15th at the Lutheran Church and Cemetery.

Rev. G. Darrach was away to Granville on Sunday the 12th inst., assisting in conducting a series of Missionary Services, and last Sunday he was in Pembroke to assist at the Services dedicating a new Church built by the Lutheran Congregation.

The Municipal Council met on the 18th inst. at the Chatson House, and considerable important business was transacted. Owing to unfinished business left over a special meeting will be held on the 1st of September next.

### The Fates.

Fable teaches that the fates were three goddesses, holding, one a spindle, another a distaff and the third a pair of shears. They spun the thread of human life, then cut it off, and men's destiny was either happy or unhappy according to the texture of the wool employed by these inexorable deities. Might it not be said that here below we play more or less the part of the fates? It is we who, in some degree, mold our own destinies.

### Another Shock.

"Yes," said the waiter, "this cafe is thoroughly up to date. We cook by electricity."

"Is that so?" said the guest, pointing to a platter. "Then will you please give that beefsteak another shock?"

### Shavings.

"By the great omelet!" chuckled the old hen, as she cuddled down upon the thirteen eggs, "this nest is made of excelsior. No doubt about it, this is going to be a shaving set."

"Tis not necessity, but opinion, that makes men miserable, and when we come to be fancy sick there's no cure."

## What is a Backache?

IT IS NATURE'S WARNING TO WOMEN

Diseases of Woman's Organism Cured and Consequent Pain Stopped by Lydia E. Pinkham's Vegetable Compound.

"It seems as though my back would break." Women utter these words over and over again, but continue to drag along and suffer with aches in the small of the back, pain low down in the side, "bearing-down" pains, nervousness and no ambition for any task.

They do not realize that the back is the mainspring of woman's organism, and quickly indicates by aching a diseased condition of the female organs or kidneys, and that the aches and pains will continue until the cause is removed.

Lydia E. Pinkham's Vegetable Compound has been for many years the one and only effective remedy in such cases. It speedily cures female organs and kidney disorders and restores the female organs to a healthy condition.

Dear Mrs. Pinkham:—

"I suffered a long time with female trouble, having intense pains in the back and abdomen and very sick headaches every month. I was tired and nervous all the time and life looked very dreary to me and I had no desire to live until I began to take Lydia E. Pinkham's Vegetable Compound and to get some relief. My recovery was slow but it was sure, and I never regretted the money spent for the Compound as it brought me back to good health."

"It seems to be a medicine especially adapted to the ills of our sex and I am glad to say a good word for it."—Mrs. Albert Mann, 154 Gore Vale Ave., Toronto, Ont.

No other person can give such helpful advice to women who are sick as can Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham. Her address is Lynn, Mass., and her advice free.

gold, 3,500 by 3,500 yards, containing precious stones, pearls and a magnificent throne. A channel of water separated the apartments.

Hiram, imitating the royal splendor of the court of King Solomon, surrounded himself by the grandest conceivable display of magnificence. In the seventh apartment was stationed a golden bed, the corners of which were set in pearls without value in all the world, sparkling forth beautiful flashes resembling lightning, which spread wonder and terror among his subjects.

The prophet Ezekiel was ordered to appear before Hiram, who, at a loss as to how to reach the seven heavens wherein the monarch presided, was transported into his castle by the locks of his hair. Upon perceiving the divine messenger Hiram trembled. "Who art thou?" thundered the indignant harbinger of future events. "Why dost thou boast? Art thou not born of woman's womb?"

"I am," replied Hiram, "but I live forever. Like God dwelling over waters, dwell I. Like him reigning over seven heavens, I rule in seven apartments. As God is surrounded by lightning and thunder, so am I. God has stars in heaven; so have I. Many sovereigns have succumbed to mortality, and I still exist. Twenty-one kings of the house of Israel and David, twenty prophets and ten high priests have departed this earth, but I outlive them all."

"Why dost thou boast?" again demanded Ezekiel.

"Because thou didst supply the cedars for Solomon's temple? This puts me in mind of a subject who prepared a splendid garment for his sovereign, and as often as the servant gazed at the glorious piece of work he boastfully remarked, 'This is my manufacture,' until the king, observing his vanity, tore it off in disgust. Such will be thy lot. The temple which thou helpest to build will be destroyed. What will then become of thy pride?"

### Where They Have Time to Be Polite.

Copenhagen, Denmark, is a city of canals and cleanliness—a land of pure delight, free from beggars, organ grinders and stray dogs. The inhabitants thereof are born courteous and seem never to have recovered from the habit.

When a passenger boards a car in Copenhagen he exchanges greetings with the conductor. A gentleman on leaving the car usually lifts his hat in acknowledgment of a salute from that official. When a fare is paid the conductor drops it into his cash box, thanks the passenger and gives him a little paper receipt.

He offers change with a preliminary "Be so good," and the passenger accepts with thanks. If, in addition, transfers are required complimentary exchanges go on indefinitely. Yet there is always time enough in Copenhagen.—Caroline Domett in Four Track News.

### Scotland and Whisky.

"One of the grossest misconceptions from which Scotland suffers," says a writer, "is that her national drink is and always has been whisky. But this is just as untrue, neither more nor less, as that the national garb of Scotland is the kilt. Whisky, like the kilt, is a purely Celtic or highland product, and up to the middle of the eighteenth century it was just as unfamiliar in the lowlands as the clan tartans. It was only after the '45 that the highlanders began to settle in the lowlands and bring their whisky with them, but before that the national drink of the lowlanders had been ale. Tam-o'-Shanter and Goutie Johnny got 'roarin' fow' not on whisky, but on strong beer."

Dr. Spankie, who opened a practice here a short time ago, has removed to Plevana, and Dr. Tennent has located here, and has his office and room at the Chatsworth House.

Mr. J. Mayer, of Philadelphia, and daughter Susan, have returned home after enjoying bush life for six weeks.

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXX.

From afar the royal palace could be seen in the daytime, its marble walls gleaming snow-white, and its tiled roof glowing in the light of the sun, an object of constant wonder, speculation and awe to the people of Peking whose feet have never defiled the streets of the Sacred City.

Lord Rackett's eyes had many times searched along its walls, as far as they could be seen from the place where he took his observation, and with the curiosity that seems a heritage among Anglo-Saxons the world over. He had even sighed for an opportunity to tread those forbidden lanes, to look upon the imperial palace within and without, and discover something of the quaint methods in vogue among the mysterious Council of State that met so solemnly at daybreak each morning in the Palace of Heavenly Purity.

It was hard for Plympton to believe that the wished-for opportunity had come at last, when he might learn all he had desired to discover, and possibly more in the bargain, being at the same time engaged upon an errand of mercy that must redound to his credit whenever mentioned in the presence of those who loved liberty.

Kai Wang marched on just in advance, ready to do any talking that might be necessary, and cutting quite a wide swath in his important bearing, as though still acting the part of a mandarin.

Probably there was not one of them out who wished most earnestly that he night was over, and their work accomplished.

Who would not have done so under the same conditions, with unknown perils in various shapes and guises surrounding them, and the whole future in uncertain prospect?

It is always much more pleasant, not to mention the solid comfort of the thing, to look back at privations and dangers, and figure how close a call his or that came near being, than the actual experience itself proves.

Devious windings, followed by Kai Wang for a policy of his own, finally brought them to a certain point in the rear of a towering building, which Lord Rackett at once judged to be the identical imperial palace that was the ultimate object of their sojourn within the hostile walls of the inner city.

He surveyed the marble pile with interest.

It had a massive look, as though capable of resisting considerable force; hough, of course, this would only apply to the regulation Chinese method of battering rams. One ordinary modern gun would riddle the edifice like a sieve and send it clattering about the startled ears of the imperial law-makers.

To our little party of adventurers the old surface of stone looked very formidable; and, left to themselves, Larry and the Englishman would have been hard pressed to discover some modus operandi whereby an entrance might be effected.

More than ever were they forced to be conviction that Kai Wang stood to them in the light of the wizard whose magic wand was to open these doors of brass and show them the way to the luncheon beneath.

Fortunate, indeed, might they deem themselves who had such a bright mind

What fatality was there about it all that the chosen time should so interfere with their own little arrangements?

Undoubtedly the known fact that the Emperor had signed Dr. Jack's railroad concession, which had in some miraculous manner also slipped through Tsung-li-Yamen, had been the main cause of his secret deposition.

The Dowager Empress would countenance no rival, and chose to side with the Russian party in opposition to the best-read and most thoroughly cultivated among the leaders of Chinese public opinion.

Something connected with her past, long before she was taken from the common people and made the favorite wife of the former Emperor, had caused her to hate the British; and she never lost an opportunity to show this miserable temper toward them when it was considered safe to do so.

Kai Wang was not the man to waste precious time in bemoaning fads that could not be avoided.

He had simply made a plain statement of the case, telling what he knew and what he had reason to believe, so that his friends might understand the difficulties they had to contend with.

This done, his duty was completed up to the point of action, and he turned philosophically to the task in hand.

China may appear to be the land of dragons and enchantments; the popular mind may feed upon the wonderful doings of sorcerers and magicians, and even look upon the spirits of the dead as coming back to inhabit other lower forms, whence they can keep watch and ward over those for whose welfare they may have been solicitous when on earth. All the same, their methods of accomplishing the numerous little things that crop up in the everyday experience of most men are based upon the matter-of-fact ways of less fanciful nations.

In a word, the Chinese, while fond of superstition and flowery language, are a distinctly human race, and have to live like other people.

Thus, the wise and sapient seer, Kai Wang, instead of waving his wizard arms and mumbling a mystic creed before which bolts and bars must give way, carefully produced a great key from under his gown, and in the most prosaic manner possible proceeded to fit it in the brass door; just for all the world as though he were the king's high chamberlain, and, in the ordinary pursuit of his duties, intended paying a visit to the rear and more secluded portion of the massive pile yecept a palace.

And Lord Rackett, who had little faith in the potency of charms, and talismans, while placing sturdy dependence upon the effect of brawn and brain tissue, rejoiced to know their guide disdained to avail himself of the privileges of his race, and rose superior to the occasion.

It was a moment of some suspense to them, so many chances seemed hanging in the balance.

Would the key fit the lock? Might they hope to escape observation with the street close by and the deep moat at the bottom of the elevation, upon which some noisy party of voyagers seemed to be moving in one or more boats?

Larry looked to the right and to the left with not a little concern.

Walls towered above, walls that could

cause something of a strained relation between the two governments.

This was no new idea, however.

He had considered the question from all sides at the time he determined to embark upon the adventure, and throw his fortunes in with Larry and Dr. Jack's widow.

Besides, the vague dream he had many times indulged in was apparently coming to pass, and his opportunity to gaze upon the curious phases of the mysterious Purple City had arrived.

Perhaps—who could say?—they might be given a chance to see something of the astonishing event that, according to Kai Wang, was taking place in the royal palace this night.

Really, it would be something of which he could speak boastfully in the future if he might be a witness to the diplomacy of the Dowager Empress, and see the new Emperor possibly even before the mandarins had a chance to make his acquaintance.

Deep down in his heart Plympton deplored the necessity of their being compelled to labor under such additional disadvantages.

The whole imperial city was undoubtedly under additional guards, and as to the palace itself, he feared lest it must be swarming with those soldiers devoted heart and soul to the service of that wonderful woman whose hand continued to hold the pulse of all China, administering to the wants of the empire as a doctor would to those of his patient.

And if Turkey was formerly and rightly called the Sick Man of Europe, surely China occupies that position in Asia to-day.

It is feared that the multiplicity of doctors who have forced their services upon China, with a bill in the shape of a concession, and who follow each dose with calomel or hypodermic injection, will play the deuce with the country.

Surely there is much truth in that venerable axiom to the effect that "too many cooks spoil the broth."

Kai Wang had evidently made his calculations and come prepared for emergencies.

The presence of the magic key that had unlocked the palace door spoke eloquently of his foresight, and other things destined to follow would prove equally as forcible in declaring the readiness with which he could grasp his opportunity.

It was all simple enough, once the fact became known that Kai Wang, maker of half the great and small images worshiped in the joss house and private homes throughout the empire, was hand-in-glove with the mighty Li Hung Chang, and had made many secret pilgrimages into the Sacred City and the imperial palace, unbeknown to the kcen-witted Empress.

Indeed, he probably knew every nook and cranny of the palace better than the soldiers guarding the secret edifice.

Of course, when the door had been closed, they found themselves in the most impenetrable darkness, but this did not long continue to worry them.

Kai Wang found a lantern—just such an ancient relic as was in common use among the conservative natives; good enough for their forefathers and, consequently, good enough for them.

Where he got hold of the relic, Lord Rackett did not know, but it had evidently served his purpose on many a previous surreptitious visit to the Palace of Golden Hopes, and the guide knew just where to place a hand upon it, even when darkness reigned supreme.

When a match had been applied, a cheerful glow prevailed.

No one can appreciate the value of light until he has been deprived of its benefits for a greater or less period. There seems to be a cense of protection in its presence, as though the evil spirits that haunt the darkness have been exorcised by the yellow rays.

At least all our friends rejoiced to see the coming of this new factor in the game.

Of course, there was more or less danger that this friendly illumination might betray them to the foe, supposed

## MOST AMAZING ROMANCE

### LAKE OF GUATAVITA SAID TO CONTAIN VAST WEALTH.

Capitalists Interested in an Effort to Recover \$500,000,000 From the "Gilded Man."

A small city office situated in London, England, news is anxiously awaited from a man who is sitting on the edge of a mountain lake in Colombia, Central America, waiting for rain. Heavy rain may mean for him, and for those in the city office in London the recovery of treasure worth, so experts say, at least \$500,000,000. The hero of the vigil is H. Knowles, managing director in Bogota of Contractors, Limited.

The story of the company is one of the most amazing romances of treasure-seeking in history. The Lake of Guatavita, in Colombia, lies in the basin formed by the cone of an extinct volcano. It is nine to ten thousand feet above the sea level, and it is but a few miles from the thriving little coal city of Bogota. Many centuries ago it was the Sacred Lake of the Chibchas, a race which at the time of the Spanish conquest numbered over 1,000,000 individuals. The Chibchas worshipped the "Gilded Man," and devoutly believed that their deity made his home at the bottom of the Lake of Guatavita. Periodically they are declared to have made pilgrimages to the lake, when they cast every imaginable kind of treasure, gold, silver and jewels into the waters with the object of propitiating the "Gilded Man," who through his army of priests threatened all kinds of pains and penalties unless the treasure were offered in sufficient quantities. The story of the Chibchas has many times been investigated by travellers, and all agree in believing that the lake contains untold treasures. Humboldt, the famous traveler and historian, was one of those who estimated its value at \$500,000,000.

### A PROSAIC BRITISH SYNDICATE.

Quesada, the Spanish conqueror of the Chibchas, was told the story of the treasure, and succeeded in reducing the water of the lake, then 214 feet deep, to fifteen feet. Then the sides fell in and all his labor was wasted. Further attempts were abandoned, and the lake regained to a very large extent its former depth. When the Spanish great administrator failed, however, Contractors, Limited, a prosaic British syndicate, formed just over six years ago, has determined to succeed. The syndicate was formed for the purpose of exploiting a concession obtained from the Colombian Government to drain the lake and recover for their own use the treasure believed to be hidden by its waters. Among its directors are R. J. Price, M. P. for the eastern division of Norfolk, chairman, and C. J. de Murieta, Its capital was originally \$150,000, and was increased to \$170,000 in 1903.

After six years of hard work, however, some of those connected with the company are beginning to believe that the "Gilded Man" is still at the bottom of the lake guarding his treasure. Encouraging finds of isolated gold and silver gods, and jewelled goddesses have from time to time supported the tradition of the treasure, but so far the dreams of untold wealth have not materialized. First the lake was drained. It was not an easy task, for it is some nine miles in length, and unforeseen difficulties were continually confronting the workers. The most harassing of these was the constant rain, which, winter and summer, hardly ever ceased.

At last, however, towards the end of 1903 the welcome news reached London that Mr. Knowles and his staff of engineers and workmen had succeeded in cutting through the basin of the lake, and the water had been drained off successfully. There was a great jubilation, and preparations were made for the large consignments of gold, silver and

the conviction that Kai Wang stood to them in the light of the wizard whose magic wand was to open these doors of brass and show them the way to the dungeon beneath.

Fortunate, indeed, might they deem themselves who had such a bright mind at their beck and call.

Heaven knows they had need of him. Alone in the streets of the jealously-guarded Forbidden City, they would necessarily soon have attracted attention, and drawn upon their heads the fearful wrath of outraged Chinese law.

Indeed, but for the guide they could never have crossed the barriers save by balloon or some ingenious flying machine.

It was with considerable interest, coupled with natural curiosity, that they waited to see what line of action Kai Wang would adopt in order to solve the puzzle which faced them.

They never doubted his ability for a moment; and when he signified that they should cluster about him so that he could speak in a soft voice, one and all understood affairs had reached a crisis where the guide desired a conference, or else wished to graphically explain just what lay beyond.

"Kai Wang had by degrees come to a conclusion that promised to be unpleasant for them—at least, it complicated matters considerably.

From the start many things had told him this unusual activity in the Forbidden City indicated something out of the common run.

His suspicions were aroused by lights in the windows of the palace where such illumination was rarely seen; and, after observing these, and many other signs that were of an ominous nature to the man who understood Chinese character and could read back of them, Kai Wang solemnly declared the night of nights had surely come when the will of the resolute Dowager Empress was about to be made dominant, and in all probability a change of puppet emperors take effect.

Little cared the Chinese people. So long as they had to be ruled, one Emperor was the same as another; and such a firm hold had the Dowager Empress taken upon the cabinet that she had been able to make them do her will, even to temporarily banishing China's great diplomat, the wealthy and powerful viceroy, Li Hung Chang.

Little would our friends have bothered us to who might be nominal Emperor of the vast territory and domain along the sea and back to the table lands of the Pamirs, on the crest of the lofty Himalayas, had the change of emperors occurred on any other than this one particular night, which they had selected to test the favor of fortune.

It really seemed very unfortunate that such great events, each virtually important in their way to those who engineered them, should be set down upon the calendar as destined to come off upon the same occasion, and Larry was warned in the fear and belief that these dates might in some way somehow conflict.

This would, of course, be to their detriment, as they were the weaker party.

Since their advice had not been asked in the premises and was not desired, all they could do was to push straight on and trust to Providence and the sagacious Kai Wang to keep trouble at arm's length.

This venerable section of old Peking has doubtless witnessed many strange spectacles in its day, which extends back far into the remote past; yet it would be safe to say that a more desperate and quixotic mission was never undertaken within those walls than the one that now engrossed our friends' attention.

It annoyed Plympton to know that their mission of humanity was brought in peril because, forsooth, a woman, despairing of accomplishing her sweet will with the sickly and yet stubborn monarch of the Li Hing Chang party upon the throne, chose to take this very night as a time most fitting for the substitution of another in the place of the present ruler.

the street close by and the deep moat at the bottom of the elevation, upon which some noisy party of voyagers seemed to be moving in one or more boats?

Larry looked to the right and to the left with not a little concern.

Walls towered above, walls that could not be scaled, the blocks of marble being as smooth as plate glass.

How thankful they should be that there was no silvery moon hung up like a great lantern up in the heavens, to betray their suspicious actions to some hovering sentry.

In all his experience Larry had seen nothing in Chinese cities to equal these imperial palaces; for, like the Japanese, the people of the Flowery Kingdom seem to think more of a bamboo roof, thatched to keep off the water, than anything in the shape of a proper domicile, so that a man might call his home his castle.

By the time Larry had looked in all directions and grasped their bearings to some degree, he heard a low exclamation from Kai Wang, and, turning, found the astute individual holding the great brass door open, and by his action inviting his friends to accept of the hospitality afforded by the most wonderful of all palaces within the Forbidden City's walled boundaries.

## CHAPTER XXXI.

They were now well started upon the campaign, and had reached a point where it was about as easy to advance as retreat.

Kai Wang stood holding open the door, and the big Englishman was the first to accept the invitation so plainly expressed; indeed, it was only right that he should do so, since his countrymen have this long time been loudly declaring their adherence to the "open-door" policy in China.

Besides, Lord Rackett was by nature a man who scorned danger.

Larry had cast that comprehensive glance all around him ere committing himself to the gloom of the palace.

It was really a desire to get his bearings, and not such a final farewell look as a condemned criminal might expect to cast about him ere taking up the death march to the gallows.

He did not forget that it devolved upon him to defend Avis, now that she seemed no longer to have her legal protector.

Larry had ere now proved to the complete satisfaction of all concerned that in spite of his limited stature, he could assume this office with honor, and was no foe to be despised.

Thus, then, the little party went in, peaceably enough, and with at least fair hopes that their future would be safe in the hands of the keen-witted Kai Wang, devoted to their cause.

What their coming out might be, the future alone must decide.

The atmosphere and sky gave them no warning of what awaited them beyond.

Unlike the sailors who plowed the vast ocean, no barometer could tell them when a hurricane bore down with mighty force that called for reefed sails.

Consequently, it was necessary for them to be prepared at all times for an emergency, and this was pretty much of a tax and strain.

When they had entered, Kai Wang proceeded to close and secure the brass door again, having reasons of his own for being so particular; nor did any of the others dream of questioning the wisdom of that policy.

So long as the big key remained fast in his girdle, they could make their speedy exit when the proper time for decamping arrived.

The mere conviction that he was actually under the roof of the royal palace was quite enough to give Lord Rackett a thrill.

Perhaps certain strange thoughts floated athwart his mind, for he was still in a measure connected with the diplomatic service of Great Britain, and if this fact ever came out, it was apt to

been excused by the yellow rays. At least all our friends rejoiced to see the coming of this new factor in the game.

Of course, there was more or less danger that this friendly illumination might betray them to the foe, supposed to be vigilant upon this night of nights; but that was a chance of war which they had to accept, and from which there was no escape.

Larry had seen some of his friend's work before now, and could give a fairly good guess as to what he might do should they run across some of the Chinese soldiers in the passages of the palace.

Kai Wang had not manufactured all manner of marvellous gods during these years without discovering the strong features in such models as appealed to the populace.

He had also studied the nature of his fellow Celestials with considerable profit both to mind and pocket, and was in a position to take advantage of his knowledge.

Unless Larry was considerably out in his conjecture, there would be some surprise in store for the doughty warriors of the empress, should an unhappy fortune insist upon rubbing them up against this same unique Kai Wang.

(To be continued).

## WATCH THAT SPEAKS THE TIME.

A Swiss watchmaker has invented a watch which speaks the time from a tiny phonograph. A very small hard rubber plate has the vibrations of the human voice imprinted on it, and is actuated by clock-work, so that at a given time the articulation is made, indicating the hour. The utterance is sufficiently strong to be heard 20 feet away. It is possible by means of a device of this kind to combine sentiment with utility, as the vibrations can be made by any clear voice, and a man's watch may tell him the time in the tones of wife or children.

## THANKS FOR FOOD.

A pretty table observance in Danish families is for children, even little ones who can scarcely toddle, to go gravely after dinner to salute their parents and say, "Tak for mad" ("Thanks for the meal"). Even visitors shake hands with their host and hostess and go through the same formality. In German families that hold to tradition the same custom prevails. When the evening meal is ended the party stand up around the table and each shakes hands with the neighbor, saying, "Gesegete Mahlzeit"—blessing the food.

These two desirable qualifications, pleasant to the taste and at the same time effectual, are to be found in Another Graves' Worm Exterminator. Children like it.

Wife: "I caught Bridget starting the fire this morning with paraffin, John." Husband: "How much do we owe her?"

Wife: "Four months' wages." Husband: "Well, let her go on with the paraffin."

Don't that Mr. Knowles and his staff of engineers and workmen had succeeded in cutting through the basin of the lake, and the water had been drained off successfully. There was a great jubilation, and preparations were made for the large consignments of gold, silver and jewels which might be expected to arrive by the next boats. Unfortunately, however, the water is not the only barrier on which the "Gilded Man" has to rely for the safekeeping of his treasure. The jubilation in London was summarily ended by a cablegram stating that twenty-five feet of solid mud, or some 30,000,000 cubic feet in all, still lay between the treasure seekers and their quest. A new engineering feat was decided on—the construction of a great dam across the hole made in the side of the basin terminating in a shaft through which the mud should be washed and carefully precipitated, so as to secure the gold and silver treasures as they were distributed from their hiding place of centuries. The dam was constructed, and with it the cleansing shaft, but while the work was in progress a strange thing had happened.

## WAITING FOR THE RAIN NOW.

The "Gilded Man" was evidently at work again. For over three years the engineers had worked in the rain, in such a downpour, indeed, as was unprecedented in Central America. As the water ran from the lake, however, the rain had stopped, and a drought equally without a parallel in the history of the country set in. For more than two and a half years not a drop of rain has fallen at the scene of the operations and when the engineers had completed the construction of the dam it was only to find that the sun had baked the 30,000,000 cubic feet of mud into the consistency of hard rock. Then, metaphorically speaking, the engineers sat down and wept. The rock-like substance still lies as an impenetrable bomb-proof lid over the golden gods and the silver dishes and ornaments, to say nothing of the jewelled goddesses and their glittering handmaidens. The few natives in the region, remnants of the great race of Chibchas, occasionally visit the scene, and smile cheerfully at the downcast Englishmen. "It is all the work of the 'Gilded Man,' who is watching over his treasure mountain," they say, and they plainly hint that when the rain comes—if ever it does come—to soften the mud, some other obstacle will defeat the desire of the treasure-seekers. Letter after letter from Mr. Knowles to the little office in London dejectedly refers to the determined opposition Nature has placed in his way. "I regret to say rain absolutely refuses to fall here," he wrote in one of his letters. The "Gilded Man" is taking care of his own.

## SPELLING AT BREAKFAST.

Mr. Topnoody had been to a minstrel show over night, and the funny conundrums and jokes he heard set him thinking. So at breakfast he began on Mrs. Topnoody. She was fretful, and not very much in the humor for pleasantries, but Topnoody slashed away.

"I say, Mrs. Topnoody, can you spell money with four letters?"

"No, I can't," she said.

"Ha, ha! That's good. A woman never can get at this sort of thing in the same clear-headed way a man can. Well, the way to spell it is c-a-s-h. Isn't that money?"

Mrs. T. failed to smile, and Topnoody started out with another.

"Wait a minute," she interrupted.

"I've got one. Let's see if you can guess it. Spell Topnoody with five letters."

Topnoody puckered his brows awhile, and gave it up.

"Ha, ha!" laughed Mrs. T. "That's good. A man can never get at this sort of thing in the same clear-headed way a woman can. Well, the way to spell it is I-d-i-o-t. Isn't that Topnoody?"

But Topnoody never smiled, and the breakfast was finished in silence, except for an occasional chuckle from Mrs. Topnoody's end of the table.

## WHY GIRLS ARE PALE.

**They Need the Rich, Red Blood Dr. Williams' Pink Pills Actually Make.**

Three years ago Miss Ellen Roberts, who holds the position of saleslady in one of the leading stores in Halifax, N. S., was a pale delicate looking young woman, who then lived at home with her parents at Amherst, N. S. She complained of general weakness and loss of appetite. Her blood was thin and watery and she grew thinner day by day until she looked almost a shadow. Her cheeks were sunken, all trace of color had left her face and her friends feared she was going into decline. "I had no energy," says Miss Roberts, "and suffered so much from the headaches and dizziness and other symptoms of anaemia that I felt I did not care whether I lived or died. One day, however, when reading our local paper I read a testimonial given by a young girl in favor of Dr. Williams' Pink Pills, and as her symptoms were almost identical with my own I determined to try this medicine. Before I had used the second box I began to feel benefit, and I continued taking the pills until I had used seven or eight boxes, by which time I was fully restored to health." To-day Miss Roberts looks as though she had never been ill a day in her life, and she has no hesitation in saying she owes her present energy and health to Dr. Williams' Pink Pills.

Bad blood is the cause of all common diseases like anaemia, headaches, paleness, general weakness, heart palpitation, neuralgia, indigestion, and the special ailments that only womenfolk know. Dr. Williams' Pink Pills cure these common ailments because they make rich, red, health-giving blood, bracing the jangled nerves and giving strength to every organ in the body. Do not take any pills without the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by all medicine dealers or by mail at 50 cents a box, or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

## SEA WOLF LED SEAL RAID

**THE MOST ROMANTIC FIGURE ON PACIFIC COAST.**

**He and His Schooner Have Figured Largely in Piratical Raids on the Rookeries.**

Despatches from Dutch Harbor, Alaska, indicate that the raid on the seal rookeries of St. Paul Island, which resulted in the death of five Japanese poachers, was led by Alex. McLean, one of the most romantic figures of the Pacific coast, and the original of more than one hero of popular fiction.

Probably no sea ranger since Capt. Kidd has figured so prominently in story though the public history of this remarkable person extends over not more than a dozen years.

Although well known in the Aleutians and Behring Sea for some time, Capt. McLean's personality was first disclosed to the country at large in May, 1904, in the harbor of San Francisco. It was supposed then that his schooner, the Carmencita, was fitting out for a nefarious sealing expedition, but nothing could be proved against her, and she was permitted to sail out of the Golden Gate as free as the west wind. It was rumored soon afterward that she had picked up a sealing outfit in Half Moon Bay and proceeded to the Kuriles and the Smoky Sea, as she was reported in that neighborhood at various times for a year.

Capt. McLean was next heard of when still master of the Carmencita. He was arrested in September, 1905, in Victoria, B. C., by the Canadian authorities at the request of the American Consul. Again nothing definite was ob-

## TWO GERMANS LIVE ON NOTHING.

**Secret of the Simple Life Is Solved at Last.**

Two German professors have solved the problem of how to live on "nothing a day." They are at present leading an exceedingly simple existence in Kabakon, a small island in the Bismarck archipelago, in the South Seas, where their food consists only of coconuts, their clothes of loin cloths and their amusements of sitting in the sea reading or watching native dancers.

The discovery of how to live on nothing was made by Prof. Engleheart, of Munich and Erlangen Universities. He suffered from ill health from his childhood, and nine years ago he started experimenting with a fruit diet.

He was soon convinced that the fruits obtainable in Europe were not most suitable, and in 1901 he left for Ceylon, and after experimenting there and in Kabakon, he has come to the conclusion that the coconut is the original, and therefore the most suitable, food of man.

The professor was joined fifteen months ago by Dr. A. Bethmann, and the two are now living on coconuts at a cost of nothing per day.

H. M. Robson, of Cowan-terrace, Newcastle-on-tyne, who has just returned to London after a pleasure trip to Kabakon, gives an interesting account of the professor's simple life.

"I went out by the German-Lloyd boat for a holiday. The trip lasted seventeen weeks and cost less than \$200," he said. "I found both the professors in very good health. I adopted the coconut diet myself, and found it agreed with me excellently.

"The coconuts are quite different from those seen in this country. They are fresh and soft, and are eaten with a spoon, like butter. The nut is full of a fresh milk, and that is the only drink used.

"The island is a land of perpetual spring. It is thickly covered with vegetation, is only two miles long and one broad, and is an ideal place to take a trip to," concluded Mr. Robson. "I should strongly advise anyone who can spare the time to go. Visitors will be warmly welcomed by the professors, and the only expense will be the passage money, for living there costs nothing."

## JAPANESE RAILWAYS.

Some of the institutions on Japanese railways are peculiar to that country. One of these is a smear of paint across the windows of third-class carriages. This is made necessary because thousands of native travellers in Japan, accustomed to only paper walls for letting in light, have no knowledge of glass. Its utter transparency leads them to believe that the window is simply a hole in the side of the car. With painful results many native passengers have stupidly attempted to slick their heads through the glass. For a long time ambulances from receiving hospitals had to meet nearly every train arriving in Japanese cities, and hence the streak of paint is a warning to the Oriental farmer from the back country that there is something more than atmosphere in the window.

## HOW IT SPREADS.

The first package of Dr. Leonhardt's Hem-Roid (the infallible Pile cure) that was put out went to a small town in Nebraska.

It cured a case of Piles that was considered hopeless.

The news spread, and the demand prompted Dr. J. S. Leonhardt, of Lincoln, Neb., the discoverer, to prepare it for general use. Now it is being sent to all parts of the world.

It will cure any case of Piles. \$1.00, with absolute guarantee. All dealers, or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

"You say you think George does not

**R. PARSONS, 91 Wellesley Street, Toronto, Canada.**

and the Smoky Sea, as she was reported in that neighborhood at various times for a year.

Capt. McLean was next heard of when still master of the Carnenita. He was arrested in September, 1905, in Victoria, B. C., by the Canadian authorities at the request of the American Consul. Again nothing definite was obtained against his schooner, for this time she was under the Mexican flag.

#### SAILED UNDER VARIOUS FLAGS.

Cleared of this specific trouble, McLean appeared at various points in the Pacific, sometimes under his own flag, sometimes under the Norwegian emblem; and then the captains of the revenue cutters in the North began to recall him as the chief of many a furious raid of previous years. It was always said he was close to piracy, but it could never be proved against him. He was suspected and was challenged, but never convicted.

The Commander Islands, owned by the Russians, presented about that time the finest of all killing grounds for the holluschikie. The "Asiatic herd" was the technical term for this seal people; and, knowing that the Russian navy was busy in another part of the world, McLean descended in his might, expecting to meet with no resistance. But the coast guard was as crafty as he, and beat him off.

McLean was overwhelmed once, too, on the perimeter of the restricted Pribiloff group by the British cruiser Sheerwater, but again the Mexican flag afforded him protection until that Government finally withdrew it by revoking his license.

It is not at all improbable that Kipling elevated the captain into verse in "The Rhyme of the Three Sealers," when the guilty Reuben Paine of the Strand asserts:—

"But I've six thousand skins below and Yeddo Port to see;  
And there's never a law of God or man runs north of Fifty-three."

It remained, however, for Jack London to portray one of the darkest figures in fiction, for the terrible form of Wolf Larsen was hewn, it is said, from the life of Alexander McLean.

#### REMARKABLE ATHLETIC FEAT.

An exacting all-round test has just been accomplished by a young Indian officer, Mr. K. Barge, of the 17th Cavalry. The scene of this exploit was a level mile on the road between Bannu and Dehra Ismail Khan, and this mile Mr. Barge had to cover four times—at a run, at a walk, on a horse, and on a bicycle—in 20 minutes. He walked the first mile in 7 minutes 52 3/5 seconds, ran the second in 5 minutes 12 seconds, galloped the third in 2 minutes 4 seconds, and bicycled the fourth in 2 minutes, 59 2/5 seconds, thus achieving his task in 19 minutes 8 seconds (inclusive of the time taken in changing mounts), and winning with 52 seconds to spare.

#### OUT AT LAST.

"Why do they call these dentists' offices dental parlors?" asked Smith of his friend.

"Why, parlor is the old-fashioned name for drawing-room."

## CONTINUE

Those who are gaining flesh and strength by regular treatment with

### Scott's Emulsion

should continue the treatment in hot weather; smaller dose and a little cool milk with it will do away with any objection which is attached to fatty products during the heated season.

prompted Dr. J. S. Leonard, of Lincoln, Neb., the discoverer, to prepare it for general use. Now it is being sent to all parts of the world.

It will cure any case of Piles. \$1.00, with absolute guarantee. All dealers, or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

"You say you think George does not love you as much as he used to do?" "Yes." "Why so, dear?" "Well, whenever we're alone he talks as sensibly as if we weren't."

We have no hesitation in saying that Dr. J. D. Kellogg's Dysentery Cordial is without doubt the best medicine ever introduced for dysentery, diarrhoea, cholera and all summer complaints, sea sickness, etc. It promptly gives relief and never fails to effect a positive cure. Mothers should never be without a bottle when their children are teething.

Fenshaw: "I hear you are to wed Colonel Swinger, Mrs. Grasse. He's a noble fellow, every inch a soldier, born to command." Widow Grasse: "H'm! We'll see about that, Mr. Fenshaw; we'll see about that."

When all other corn preparations fail, try Holloway's Corn Cure. No pain whatever, and no inconvenience in using it.

He: "Ah! Before you married me you used to think there couldn't be another man like me, and now—"

She: "Now I'm sure of it—there couldn't."

Rose-colored spots on the bodies of children are sometimes mistaken for measles. The trouble may be roseola, a local disease of the skin. Promptly cured with Woorer's Cerate.

"Will you think of me when I'm gone?" asked the lovelorn youth, who seemed unable to tear himself from her presence. "Oh, yes," answered the fair one, as she struggled a yawn. "That is, if you ever give me the opportunity."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

"Have you seen Professor Gableton, the scientist, lately?" "Yes; I listened to him for more than an hour at the club last night." "Indeed! What was he talking about?" "He didn't say."

No Alcohol in It.—Alcohol or any other volatile matter which would impair strength by evaporation does not in any shape enter into the manufacture of Dr. Thomas' Electric Oil. Nor do climatic changes affect it. It is as serviceable in the Arctic Circle as in the Torrid Zone, perhaps more useful in the higher latitudes, where man is more subject to colds from exposure to the elements.

Mr. Graspall: "Yes, you can marry my daughter if you like; but I tell you candidly she won't have a penny until I die. Are you still of the same mind?" Young Doctor: "Will you permit me to medically examine you, sir?"

Overworked Persons, either mentally or physically, should try "Ferrovin," the world renowned nerve and blood tonic and they will quickly recover strength and health.

"Ah, Amelia!" he cried, fervently. "I am not rich in this world's goods, nor am I as clever as are some men. But if a tender and everlasting love goes for anything—" "It goes with me all right," she interrupted. "But, Henry, I'm afraid it won't go with the tradesmen."

A Sound Stomach Means a Clear Head.—The high pressure of a nervous life which business men of the present day are constrained to live make draughts upon their vitality highly detrimental to their health. It is only by the most careful treatment that they are able to keep themselves alert and active in their various callings, many of them know the value of Parmelee's Vegetable Pills in regulating the stomach and consequently keeping the

#### NEW YORK EXCURSION.

The Lackawanna Railroad will sell tickets round trip from Buffalo to New York and return, \$10.00, on August 29th, good returning to September 2nd inclusive. Special features: Bryan \$10.000 reception and banquet; Labor Day in America's capital of Labor; Holiday in the world's merriest city, base ball, races, Coney Island, etc. Lackawanna Limited at 9.30 a.m., 10.50; The Bryan Special at 9.00 a.m., and trains at 3.15 a.m., 5.30 p.m., 8.45 and 11.30 p.m., \$10.00. Children half fare. Go with the crowd on the Road of Anthracite, August 29th. Full information, reservations, etc., call of phone A. Leadley, Canadian Agent, 75 Yonge St., Toronto, Ont., or Fred P. Fox, D.P.A., D.L.&W., 289 Main St., Buffalo, N. Y.

Lena: "Fred didn't blow his brains out because you jilted him the other night; he came right over and proposed to me." Maud: "Did he? Then he must have got rid of them in some other way."

Mild in Their Action.—Parmelee's Vegetable Pills are very mild in their action. They do not cause griping in the stomach or cause disturbances there as so many pills do. Therefore, the most delicate can take them without fear of unpleasant results. They can, too, be administered to children without imposing the penalties which follow the use of pills not so carefully prepared.

#### PALACES AND THE PEOPLE.

Homes of Kings Now Public Show-Places.

The great royal chateaux, not of Touraine only, but of the world, are all nearing their appointed end of public ownership, says Richard Whiteing in the July Century. Kings build; peoples inherit, the palace in its uses broadens slowly down to the multitude. The smaller houses sometimes fall by purchase to the middle class, but that is only the change in one of its stages. The larger ones soon reach their ultimate destiny of the museum and the pleasure-ground; and this even in countries and at times that are not distinctively republican. Louis XIV. built Versailles; who holds it now? The caretaker for the man in the street. The Louvre is a museum; the Tuilleries has gone—to make way for a garden. Kensington Palace is now among the sights of London. Windsor Castle is not much more. And lately, when there happened to be no music for the visitors to the castle on a public holiday the royal band, "to prevent disappointment," was heartily recalled from a distant scene. The Tower of London, once a palace, now holds the regalia that serve as a toy for the crowd. Potsdam and Sans Souci are, for all and several, in the same sense; so is the huge Escorial. The Kremlin of the Czars is no better, and even the Hermitage, which, strictly speaking, is one of the halls of the Winter Palace at St. Petersburg, is a picture gallery to which all could find their way, until the Nihilists threatened its integrity.

"Halloa, old man!" exclaimed Bull at the reception. "It's a delightful surprise to see you here." "So good of you to say so," replied Corbyn. "Yes; you see, I was afraid I wouldn't find any but bright and clever people present."

Spiced.—One peck of crabapples, 7 pounds brown sugar, 1 quart good cider vinegar, 5 cents worth stick cinnamon, whole cloves, allspice and nutmeg. Boil all together; take out apples and cook down juice, pour it over fruit and can

#### MIXED FARM OR SMALL RANCH FOR SALE.

1850 acres, excellent shelter, wood, water any hay, land rolling soil chiefly deep black loam, suitable for grain, good crops on adjoining lands, about two-thirds can be ploughed, one-and-a-half miles river frontage, and one-and-a-half miles of the picturesque Jumping Pond Creek, with open spring ensuring a never-failing water supply, first-class trout fishing, 200 acres can be irrigated. The ranch is fenced into pastures all connected by subways with 12 miles of four-wire cedar post fencing. There are two small houses and out-buildings on the property, situated within half-a-mile of the school, church, post-office and shipping point of Cochrane, Alberta. Price \$12.00 per acre.

G. E. GODDARD, Cochrane, Alta.

#### THE RADIUM CLOCK.

We cannot say that perpetual motion has actually been discovered, but the radium clock comes very near to it. A small quantity of radium is put in a glass tube, at the lower end of which is an electroscope with two long strips of silver. The activity of the radium induces the "minus beta" rays to be conducted to the tips, when the leaves of the electroscope expand and touch the sides of two conducting wires. Of course, the currents are at once released and the leaves fall back again. The beats are repeated every two minutes, and the calculation is that it will continue for no less than 30,000 years, which is about as near to perpetuity as anyone need trouble about.

Invalid: "Doctor, I must positively insist upon knowing the worst." Dr. Wise: "Well, I think my bill will be about one hundred dollars."

Jack: "Engagement is off, eh? Has she sent him back the ring?" Tom: "No; that's what's bothering him. He owes money on that ring."

# BURDENS THAT CURSE

## Hints For Those Who Have Succeeded In Turning People From Religion.

They bind heavy burdens and grievous to be borne, and lay them on men's shoulders; but they themselves will not move them with one of their fingers—Matt. xxiii., 4.

What a relief to discover that the Almighty's requirements are not the same as those set up by His self-nominated representatives. The small man always has a multitude of rules—for other people. The infinite wisdom sets before man only great and broad principles for his guidance. After all, it is a much simpler thing to do right and to live a religious life than many would have us suppose. The complexities are of our making.

Religion has suffered from people who have an itch to be regulators; they seek to escape the practice of the deeds of righteousness by devotion to the enactment of its regulations. They seek to compound with their consciences for the lusts to which they yield by excessive restrictions regarding those for which they have no desire.

These creators of burden, these childish inventors of trivial regulations and deprivations, have succeeded in turning many a heart back into the desert. Men longing for larger life, looking to the way of religion and seeing nothing but innumerable and infinitesimal legal negotiations, have turned away

### EMPTY AND DISAPPOINTED.

Hearts hungry for the infinite have turned perplexed from a church that says, if you would find God and life you must put your soul into the harness that we have been making these thousand years, the harness of prejudice, prohibitions, penalties, and proscriptions; if you would be pious you must cultivate a woebegone visage, speak in a whine, and take all life as if it were a nauseating dose. Thank God there always were those who would rather go empty than get into this harness.

Religion, real religion in the soul of man, seeks to get out of the narrow, gravelike pen into the place where God seems to be; the spirit of worship cries out for the large spaces, the soul swings

in sublime circles about the stars. Religion cannot breathe where men crowd thick in angry debate about foolish questions; it seeks to be where rustling leaves and southing winds are breathing their adoration of a God who inhabits eternity.

The only safe way, the only one along which lie both happiness and usefulness, is to live out the life you have within, to be natural, to tell the truth to yourself. Don't call yourself a vile worm of the dust when you believe you are a fairly decent citizen, and don't pose for a portrait in the church window type when you know that you belong with the tricky traders in the temple.

If we but knew it, there is enough good in every one of us waiting expression both to keep us busy and to make up, and more than make up for our deficiencies in those virtues we envy.

### MANY A MAN IS SIGHING

because he cannot be Saint Anthony who is doing a great deal more good in the world by just going on with his every day business of blacksmith or merchant. Live out your present best; that is what the world needs; it will lead to the things yet better.

Honest, plain, straight, square dealing has its increment in religion as well as in business. If you want to be a better man the simple, easy, and only way is to make the most of the good you already have; setting busy the virtues we possess we soon find ourselves blest with those we had admired afar off, but perplexing our hearts with the burdensome restrictions manufactured by others, even the good we have become ill.

As a matter of fact, men who are rich in character seldom have time for moral inventory; they simply go on living their best, neither knowing nor caring whether men think they are wealthy or bankrupt in the things within. No man ever loses any of his virtues by saying little about them. It is only the man who has a small stock who sets it all in the window.

HENRY F. COPE.

the man's heart and life we must take into account the supernatural knowledge which he possessed, and which was necessary for his work.

For to-day—lit. this very day. Both the choice of the word, and its position at the beginning of the clause heighten the emphasis.

6. Received him joyfully—The despised publicans were not as a rule thus honored by rabbis of acknowledged standing.

7. They all murmured—Apparently those who composed the multitude, all of whom, doubtless, shared the contempt for the man with whom Jesus had consented to speak and sojourn.

A man that is a sinner—The accusation of the multitude was beyond doubt just and founded on facts, the publicans as a class having the reputation of being extortioners and oppressors of the poor.

8. Behold, Lord—Zacchæus cannot have failed to hear, or at least to anticipate the criticism of the multitude on the act of Jesus. His conscience, moreover, condemned him, and justified the charge of the multitude.

If I have wrongfully exacted ought of any man—This is just the charge which men generally made against him and all of his class.

I restore fourfold—The law in extreme cases of deliberate robbery sometimes exacted even a sevenfold restitu-

# HOME.

## DOMESTIC RECIPES.

To Reheat a Roast of Beef.—The following way to reheat a roast of beef is given by a European cook. By it the roast will be, to all appearances and flavor, a first service, unless it has been marred by the marks of a carving knife: Wrap the roast in tough, buttered paper and put it in the oven. Let it stay until it is thoroughly heated, but do not allow it to cook. Reheat the gravy and serve beside the meat in a hot gravy boat.

Cucumber and Potato Salad.—Peel and cut one good sized cucumber into small dice, cover with salted water, and set on ice for one hour. Dice five potatoes—cold boiled—sprinkle with one saltspoonful of salt and one teaspoonful of minced onion. Drain the cucumber, add it to the potato, pour over them one cupful of salad dressing, and let it stand one-half hour to one hour on ice.

Compote de Melon.—Prepare a thick syrup out of one pound of sugar, the juice of five lemons, and one pint of raspberry juice. Peel and quarter two sound cantelopes, stew in syrup until tender, take out, and arrange in your compote dish, and strain the remaining syrup. When cold serve in each quarter cantalope some lemon ice.

Cantalope Blanc Mange.—Peel and stew two large cantelopes in one quart of water until soft. Press pulp through a sieve in a bowl, add the juice of six oranges, one-quarter pound sugar, two ounces gelatin—previously dissolved in a little hot water—set the bowl in cracked ice, beat the mixture with an egg-beater until it becomes almost snow white, then take your jelly mold and pour mixture in and set on ice until quite firm.

Egg Fricassee with Cheese.—Four thick slices white bread, two eggs, saltspoonful of salt, dash of pepper, two tablespoonfuls milk; beat thoroughly; dip the bread in this mixture and sauté till brown on both sides. Have one-half cup grated dairy cheese, one-half cup chopped fried ham, one cup cream; cook slowly; add a dash of salt and pepper (cayenne), one saltspoonful mustard. Turn over toast and serve.

Potato Puff.—Into a quart of finely mashed and seasoned potato beat the stiffly beaten whites of two eggs. Turn into baking dish and brown lightly.

Fried Green Tomato.—Cut hard green tomatoes into thick slices. Dip each slice in crumbs, beaten egg (well seasoned), and crumbs again. Fry slowly in butter till tender, and serve. The flavor much resembles fried oysters.

Fish.—Salmon trout is a delicious fish, and one of the best ways of cooking them is the following. Place in a dripping pan with just sufficient water to keep it from burning. Rub the fish well with butter before putting in the oven and bake slowly, basting carefully. When done take it from the oven and pour one cup of cream—previously heated to prevent curdling—into the dripping pan with any gravy which is left. Put into one teaspoonful of butter and a little chopped parsley. Let this gravy boil up and serve with the fish. Carrots when well mashed and well done improve the flavor of the gravy.

Onion soup.—Boil six young but fully grown onions in two waters, turning off the first at the end of ten minutes' boil, and replacing with fresh hot water. There should be a quart of the second water. When the onions are tender, add a cupful of dry, fine bread crumbs and cook gently for five minutes more. Pour the contents of the bottle into a colander and rub the onions and crumbs through it into the liquid in the bowl below. Return all to the fire, simmer for a minute, and stir into the soup a "roux," made by heating to a bubbling cream a great spoonful of butter with one of flour in a frying pan,

and the flues cleaned at least twice a week.

Do not wring the flannel skirt in the laundry, but wring it in a cloth and put it through the mangle, and when half dry put the skirt into a fresh cloth, carefully folded, and mangled till all moisture is pressed out.

To freshen a stale loaf is quite easy. Just dip the loaf into cold water for a second only and place it in a hot oven for five or ten minutes to dry. A loaf treated like this, though it be a week old, will be as good as if new.

To make an excellent grate polish, boil two ounces of best blacklead with half a pint of beer and a piece of yellow soap the size of a walnut. When cold, place in a bottle and keep tightly corked. Use this sparingly, and polish vigorously with a nice clean brush.

A child's day sleep is often spoiled by the way in which the little one is put to bed. First of all the shoes should be taken off and if at all tight the socks too. Then make sure that every part of the dress is quite loose, and that there are no strings or bands to cramp the sleeper. There is no doubt that a child sleeps better with many of his garments taken off, and then lightly covered with a shawl or thin blanket.

## HORSESHOES AND LUCK

### THE SUPPOSED ORIGIN OF THIS SUPERSTITION.

#### There is a Right Way and a Wrong Way to Invoke Goddess of Fortune You Must Know.

There is a right way and a wrong in the picking up of a horseshoe. I was walking with a country-bred boy along a Somerset lane and saw one lying in the crumbling summer rut. "There is a horseshoe," said I. The lad sprang forward, but stopped suddenly before his fingers touched the iron. "But I won't pick it up," said he, "or I shall spoil your luck." It may perhaps have been only a point of etiquette, but he assured me that a horseshoe of my finding could bring luck neither to him nor to me if he touched it before me.

The origin of the superstition, says a writer in the London Evening Standard, now lingering chiefly as a saying and a jest, is perhaps earlier than the horse shoe, and has nothing whatever to do with it. It was from the influence of the new moon that good was to be expected and still there are some who turn the money in their pockets when they first see her in the sky. The early horseshoe was a simple crescent, and the superstition has lingered around an object that at first was only

### A CONVENIENT SYMBOL.

It was to the protection of some moon goddess, therefore, that the household first trusted when he kept the witch out of his dwelling by hanging a horseshoe on the door. Neither spell nor malignant wish, nor the power of the evil eye could cross the threshold in the presence of her symbol. Even the pixies "no brought a certain whimsical merriment into their practical joking, were no good in the face of that. Cheated out of their nocturnal rides they might as well retire underground at once if a horseshoe barred their entry to the stable.

For these troublesome elves, in day gone by, had a way of working the cat at night for their own amusement and when the good man came in the morning he found the poor beasts "all terrified like an' out in a lather a sweat." And they had even a worse trick than this. They would get at the good wife's vat and wantonly spoil the brew. To prevent this she drew with her finger two hearts and a cross-cross upon the mash, and thus the beer was saved. Whether crescent or cross, in matter, The pixies would slink away abashed by the sign of it.

To this day there are horseshoes

## THE S. S. LESSON

### INTERNATIONAL LESSON, SEPT. 2.

#### Lesson X. Bartimæus and Zacchæus. Golden Text: Luke 19. 10.

##### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Three Accounts.—Parallel accounts of the healing of blind Bartimæus at Jericho will be found in Matt. 20. 29-34, and Mark 10. 46-52. The three accounts of this event differ in detail in many respects. Matthew mentions two blind men, while Mark and Luke speak of only one. Matthew and Mark, again, represent the miracle as taking place when Jesus was leaving Jericho, while Luke represents it as taking place when he was approaching the city. According to Matthew Jesus heals the man with a touch, according to Mark, with a word of comfort, and according to Luke, with a word of command. It is useless to attempt to harmonize the three narratives in these points of detail. The differences are such as we

was approaching the city. According to Matthew Jesus heals the man with a touch, according to Mark, with a word of comfort, and according to Luke, with a word of command. It is useless to attempt to harmonize the three narratives in these points of detail. The differences are such as we might naturally expect in three independent accounts of the same event, given by three different persons several decades after the event itself had taken place. We have here a good example of the fact that divine inspiration in no case rules out or destroys the human element, and it is only a narrow view of inspiration and its effects which is concerned to reconcile these differences, and make each of the three accounts tally word for word with the others. The fact, moreover, that such differences occur in the gospel narrative is a strong argument in favor of the authenticity of that narrative. Were the gospel stories concerning the miracles wrought by Jesus the product of the imagination of men living at some later time, or were they the cunningly devised fables of ingenious men, we might expect—armony in detail in the narratives of different writers who together conspired to deceive those for whom they wrote. With the attempts which have been made to harmonize the three accounts of the healing of the blind man, or men, we need not concern ourselves. The story of the visit of Jesus to the home of Zacchæus is peculiar to Luke's narrative.

Verse 35. As he drew nigh unto Jericho—From beyond Jordan to the east where for a short time he had been in retirement with his disciples.

A certain blind man—Mark records his name, which was Bartimæus.

Begging—Blind beggars sitting by the wayside are still a common sight in the Orient.

36. Inquired what this meant—The blind man's chance for gain depended largely upon the nature and character of the crowd which was passing.

37. Jesus of Nazareth—The most common title of our Lord among the people at this time. It had doubtless been given to him at first by the Pharisees and others of his enemies who wished to ridicule him. To the common people it had now become a magical term.

38. Jesus, thou Son of David—A clear indication that the blind man had come to believe in Jesus as the Messiah.

39. Rebuked him—His outcry doubtless diverted the attention of the multitude from Jesus, and was likely to interrupt the conversation in which he might be engaged.

Cried out the more a great deal—Prompted by the conviction that Jesus was the Messiah, and that this probably was his one chance to be healed of his blindness, the unfortunate man refuses to be silent.

40. Jesus stood—Stopped and gave attention. That urgent cry could not be a cry for alms simply, but betrayed a deeper longing and faith.

Commanded him to be brought—Mark records the change of attitude of the multitude toward the blind man as soon as it was perceived that Jesus took notice of him.

41. What wilt thou—A question asked, not for information, but to test and draw out the faith of the man.

2. Zacchæus—Not mentioned elsewhere in the New Testament. In the Talmud mention is made of a Zacchæus who lived at Jericho and also of his son, the celebrated Rabbi Johanan.

Chief publican—A superior among the tax collectors having subordinate collectors under him.

4. A sycamore tree—Lit. fig-mulberry. This tree, which is common in Palestine, was related to both the fig and the mulberry, though not identical with either. Its fruit resembles that of the fig tree, its leaf that of the mulberry; hence the name.

5. Zacchæus, make haste, and come down—We need not assume any miraculous power in connection with Christ's recognition of Zacchæus, and his calling him by name. When, however, we note how thoroughly Jesus understood

any man—This is just the charge which men generally made against him and all of his class.

I restore fourfold—The law in extreme cases of deliberate robbery sometimes exacted even a sevenfold restitution, but in ordinary cases only an amount equal to the sum wrongfully acquired with a fifth added was required.

9. A son of Abraham—Zacchæus proved himself to be this in a twofold sense. Though despised, he was still a member of the Jewish race, and therefore a son of Abraham after the flesh; while his penitence and faith proved him to be a true son of the "father of the faithful."

## ...HIS REVERENCE THE TIGER...

### In India, if Possible, He is Left Very Respectfully Alone.

If one is to believe Ernest Ingersoll's recently published "Life of Mammals," most of the Hindus and Malays meekly accept the tiger as an evil to be endured, and in this mood have lifted it, with superstitious terror and reverence, into a sort of malignant deity, which must and may be pacified.

You can be shown to-day forest shrines and suitly tombs where the tiger comes nightly to keep pious guard, and you may hear in any Hindu village of jogis to whom the cruel beasts are as lap dogs.

One of the difficulties which British officers have encountered in certain parts of India, in their attempts to kill off the cattle lifting or man eating tigers of some dangerously infested neighborhood, or to have sport with them, is the opposition of the people to their destruction.

Mr. Ingersoll quotes an illustration of this from one of the earlier sportsmen writers, the scene of the incident being not far from Bombay:

"While sitting at breakfast we were alarmed by hearing cries of distress proceeding from the jagheedar's hut, and on running to ascertain the cause we found old Kamah in a furious state of excitement, his left hand firmly fixed in the woolly pate of the hopeful scion of the house, and belaboring him with a stout bamboo.

"We inquired what crime young Moideen had been guilty of to bring upon him such a storm of parental indignation, and learned to our astonishment that it was all owing to his having killed a tiger.

"One of his father's tame buffalos having been killed by a tiger on the previous day, the young savage had watched for him during the night and shot him from a tree when he returned to feed upon the carcass. This most people would have considered a very gallant and meritorious exploit on the part of a lad of 15, but the old forester was of a different opinion.

"It was all very well for us who lived in the open country to wage war with tigers, but with him, who lived on sociable terms with them, in the jungle, the case was different.

"I have no quarrel with tigers," said he. "I never injured one of them, they never injured me; and while there was peace between us I went among them without fear of danger. But now that this young rascal has picked a quarrel and commenced hostilities, there is no saying where the thing will end."

## IRISH HONEYMOON.

"I hear th' Widdy O'Flynn has married Martin Mahoney at lasht," said Mr. O'Tunder.

"Yis," replied Mr. O'Toole. "They wor married lasht Choosday."

"An' phwere are they now?"

"Shure, Katie told me this marnin' that they hov gone away fer their Mahoneymoon!"

When a lazy man comes home to supper he likes to tell his wife how hard he has worked all day.

more. Pour the contents of the bottle into a colander and rub the onions and crumbs through it into the liquid in the bowl below. Return all to the fire, simmer for a minute, and stir into the soup a "roux," made by heating to a bubbling cream a great spoonful of butter with one of flour in a frying pan. Have ready heated in another saucepan a cup of milk in which you have dropped a pinch of soda. Take the boiling soup from the fire, stir in the hot milk, and pour into a heated tureen. Pass Parmesan cheese with it.

## HOUSEHOLD HINTS.

A little kerosene on a sponge or cloth will clean the outside of your windows in freezing weather; polish them well with a clean, dry cloth after.

To keep sweet potatoes wrap each in paper, and hang in bags in a rather warm place. Allow no moisture.

It is a good plan to burn pine tar occasionally in a sick room, as it is an excellent disinfectant, and it also induces sleep.

A small quantity of borax added to the cold starch in starching shirts, collars, cuffs and pillow shams, will give them additional stiffness.

When making custards allow them to cool a little before adding flavoring, for in this way a smaller quantity will be required.

Fly catchers may be made as follows. Boil linseed oil with a little resin till it forms a viscid, stringy paste when cold. Spread upon a thick string by means of a brush.

When cleaning windows add a little kerosene to the water; this will prevent the flies settling and saves labor, as the windows will not require to be cleaned so often in the summer.

To remove mildew from linen, rub over the marks with a piece of raw tomato, scatter salt over it and lay in the sun. Repeat the process for two or three times if necessary.

Wooden bedsteads should be wiped at this time of year with spirits of naphtha, paraffin, or turpentine, and allowed to air for several hours before the mattress is put back.

A good hot oven can only be procured if the flues are properly cleaned and all clinkers removed. An oven that is in daily use requires to be scrubbed out

good wifes vat and wantonly spoil the brew. To prevent this she drew with her finger two hearts and a cross-cross upon the mash, and thus the beer was saved. Whether crescent or cross, no matter. The pixies would slink away abashed by the sign of it.

To this day there are horseshoes on the doors of many cottages in quiet villages. Doubtless the cottagers do but put them up for a whim, or in the same jocular half serious spirit, yet with

## A SECRET SATISFACTION.

too, in which so many of us perform obsolete practices "just for luck." And why not I, who find a secret delight in its forgotten significance?

It was rusty, with a crooked horsenail still hanging in one of the holes. There are some who think there is virtue in the rust. But that is nonsense. I polished mine until it was bright as the silver moon, and indeed might almost be mistaken for the metal sacred to Diana. There is a right way and a wrong in putting up the horseshoe on your door. One thing is thoroughly established; if you turn it upside down, it cannot hold the luck.

And where ought it be placed? The Old World folk often nailed it to the threshold. The growing moon has her horns always toward the left, and only on the wane does she point them to the right. I would have this a true crescent, waxing every day.

## LATEST IN SUBMARINES.

### Boat Can Make Momentary Appearances at Full Speed.

The greatest secrecy is maintained in Germany concerning the capabilities and results of the trials of the submarines which were launched at Kiel for the German navy a few days ago.

It transpires, however, that the boat is fitted with mechanism invented by the Marquis De Quevillay, by means of which it can come to the surface and be made to disappear again at will while steaming at full speed.

The captain of the submarine can thus, in all security, make his observations during the brief moment that his vessel is on the water level, while the enemy has no time to train his guns on it.

She—That's all very pretty, Jack, but do you think we can live on love and kisses?  
He—It's much the safest—everything else is either adulterated or poisoned or tainted!

## THE BOY BEHIND THE GUN

### NEW CADET CORPS GO INTO CAMP AT BISLEY.

Stalwart British Guardsman Instructed  
Sturdy Five Hundred Little  
Commandoes.

The nucleus of the future National Army of Defence went into camp at Bisley, England, recently for the first time. It was 500 boys strong.

The youthful force has been recruited from the grammar schools and elementary schools throughout the land. It owes its inception to Lord Chylesmore, president of the National Rifle Association, who recently came to the conclusion that the time was ripe for extending the cadet corps.

The association started a fund, to which the King subscribed fifty guineas, and then decided to try the experiments of a "boys' Bisley"—the elementary and grammar schools to be asked to supply the boys.

The first half dozen—they came from the Upper Tooting High School—arrived at Bisley about 3.30 the other day. They were met on the grassy slope near the Scottish Officer's "hut," by a tall and dignified officer of his Majesty's Guards—Colonel Horace Ricardo—who, in a tone of gentle authority, gave the word of command to fall into line.

#### JUVENILE SOLDIERS.

In a quarter of an hour more than 350 boys, from 24 grammar schools, and similar schools throughout the country, were drawn up in squads.

One or two of the sturdy little commandoes marched to the parade ground with bugles blowing and drums merrily beating, but the majority of the boys came up laughing and joking in twos and threes.

Col. Ricardo received England's future guards as they arrived, and in a few minutes had the detached groups and companies marshalled on parade—a battalion in column.

The boys were a little excited at first, but they soon grew serious, and as Lord Chylesmore approached to inspect the lines, they dressed smartly like real little soldiers on the stalwart Guardsmen, towering above them, who are to act as guides and instructors.

Then the Grammar school soldiers marched away with swinging step to their tents, where for the rest of the week they are to live under the command of their respective masters, while they learn the art of war from picked sergeant-instructors furnished by the Brigade of Guards.

A few hundred yards away an even more significant camp was pitched—a camp of 180 boys from the elementary schools of the city of London, sons of caretakers, policemen, postmen and others.

#### RIOTERS LED BY YOUNG WOMAN.

Hamburg Mob Excited by Amazon of Twenty-five.

Elizabeth Rolph, a young woman 25 years of age, who has just been sentenced at Hamburg, Germany, to three years' imprisonment for revolutionary activity, is a political Amazon with a remarkable record. She was a maid-of-all-work with a wage of 85 per month, and her days were devoted to scrubbing floors, cleaning windows and doing the work of the household generally.

At the beginning of the year a proposal was made to alter the suffrage laws of Hamburg in such a way that thousands of electors belonging to the poorer classes would be disfranchised, and a meeting of the citizens was held to protest. The meeting was attended by nearly 5,000 working men.

A considerable difference of opinion as to the policy to be pursued had just been made clear when a female figure was seen advancing from the entrance

## As Understudy to George.

The announcement of the forthcoming marriage of Mr. Matthew Bullworthy, of Bullworthy Hall, Beverley, Yorks, and Queen's Gate, Hyde Park, with Miss Agnes Armitage, daughter of Colonel Armitage, D.S.O., of the Luburnums, Surbiton, interested Mr. Jack Huntley greatly.

Not that Jack was acquainted with either of the parties at the time; that was an affair of destiny and the future.

Mr. Huntley took a general and professional interest in all forthcoming marriages notified in the public papers. It must not be assumed by this that he was in the furnishing line, and had an eye to future contracts. Jack Huntley's business instincts lay rather in the opposite direction; he was an unfurnisher, so to speak—in other words, a cracksman.

Not a burglar of the grim and gory Bill Sikes type, but of a distinctly modern school, suave and gentlemanly in appearance, crisply scientific in method. Jack was a specialist in wedding presents.

To obtain an entry to the Luburnums on the night before the ceremony was to take place required only an elementary exercise of Jack's talents. The hour being a little after midnight the window of the drawing-room was, of course, closed, and the shutters fastened. But five minutes after his arrival they stood open, and Jack was within the room. As previous experience had led him to expect, the wedding presents—a respectable show—were displayed on a table in that very apartment.

A selection of those articles which for portability and easily negotiable value, commended themselves to his taste, was soon transferred to Jack's baize-lined bag. As he completed this, he heard a step in the passage.

Mr. Huntley was not unarmured, for emergencies are apt to arise in his profession. But he had an objection to scenes of violence when they could be avoided. Yet he realized that it was a close call. The house seemed to be aroused, for there were other sounds of movement.

Not in the least flurried, but without undue delay, Jack dropped through the window—which he had thoughtfully left open—and cut swiftly across the garden to the lane at the side of the house. As he went he heard the sound of an opening door, then the quick tap of footsteps on the gravel path—he was pursued! He vaulted the gate, bag in hand. The lane was overshadowed by trees and quite dark. Somewhere—about a hundred yards from the gate—he ran into a mass of warm metal and an atmosphere of burnt petrol.

Then a side lamp was held up, a scared face looked at him over the back of the motor-car and a scared voice spouted out: "Hall—o!—oh—wh-a-t!"

Jack did not wait to offer explanations; he heard those footsteps behind him, coming pretty rapidly down the lane.

Quick as thought he drew his revolver and sprang into the car. The owner of the scared face, an undersized man of indecisive type, appeared to have been searching amongst some wraps in a big receptacle—evidently intended for luggage—at the back of the car; the door of this stood open and so suggested Mr. Huntley's next line of action.

"Hop in, Daisy!" he ordered, gripping the young man's arm.

The indecisive one opened his mouth, but the revolver touched his temple and he shut it again. That impelled him also to crawl into the receptacle without further delay.

Small though he was, it seemed a pretty tight fit, but Mr. Huntley con-

"But George will come on to auntie's, of course?" was the young lady's next anxious question.

"Of course; he'll get there almost as soon as we shall," Jack replied, cheerily, adding mentally, "If George happens to be the party in the box, it's likely he'll get there on spot time with us!"

Silence followed; then the girl began, faintly:

"I never heard George speak of you, Mr. Jackson, but, of course, I don't know all his friends—yet. But this is very kind of you. Of course, George told you something of—of our plans?"

"Well, I have a sort of—general idea," replied Jack, cautiously, conscious that his ideas concerning anybody's plans—even his own—were very general at that moment.

"I'm afraid you must think me a very dreadful kind of girl—"

"Not at all!" said Jack, quite conscientiously.

"Fearfully wild and reckless!"

"By no means!"

"But really I couldn't—I couldn't marry that great, elderly, red-faced Mr. Bullworthy, although he was papa's best friend, and has heaps of money. I don't want money—I want Ge-or-ge!" protested the young lady, finishing with a sob.

"And you're going to have him, if I can work it!" was Jack's vow, mentally adding as a reservation, "though George is a tin-pot sort of a chap for a gilded girl like you!"

"Of course Mr. Bullworthy is a heap too old for you, Miss Armitage," he said aloud, making a ready snap at his fair passenger's name from the obvious clue she had dropped; "the idea is preposterous!"

"That's what Aunt Nancy says. She says it's wicked!" exclaimed Miss Armitage tearfully. "She says no girl ought to be forced to marry a man twice her own age. But papa won't hear of George, and he's set on this dreadful marriage. And it was to be to-morrow morning. All the horrible, horrible presents have come, and—oh, I hate the sight of them! I wish someone would take them all away and hide them!"

Mr. Huntley did not mention that he had already obliged in that particular. He steered the Daimler neatly past a big market cart, and merely dropped the tentative observation: "So you and George—"

"And auntie—auntie planned it, too!" said the girl, hurriedly. "George was to bring his car to-night and take me to Aunt Nancy's; and we—George and I—were to be married ever so early in the morning. And auntie said she would face it out with papa and Mr. Bullworthy afterwards."

"I bet George wouldn't!" commented Jack inwardly. "He hasn't got the grit!"

They were approaching Guildford now, and he slowed down. "See, I almost forget where your aunt lives?" he remarked.

"Oh, it's right through the town; a white cottage on the Shalford road. I'll show you," said Miss Armitage. Then she eagerly added: "Perhaps George has got there first, after all?"

Mr. Huntley hardly thought it probable; but he made no remark, and a few minutes later halted the car, under Miss Armitage's direction, outside a pretty cottage, standing back from the road, and looking very white and prim in the moonlight.

"This is auntie's! Oh, I wonder if George is here?" exclaimed the girl.

Jack leapt out and assisted her to alight.

He opened the gate for her and she ran up to the house. The door opened, and Mr. Huntley had the satisfaction of seeing her disappear within, with the sound of a distinctly feminine kiss and the eager inquiry: "Oh, auntie, has George come?"

Jack's next and rapid act was to examine his captive bodily from the receptacle in the car.

That helpless individual appeared to have fainted and remained in a comatose condition during the twenty minutes' run. But the fresh air and Mr. Huntley's timely and resourceful application of a little water sent him on his nose.

## ON THE FARM.

### STARTING A FLOCK OF SHEEP.

To give my actual experience, I began one fall with 12 yearling ewes and a pure Cotswold ram for \$5, writes Mr. C. Shinnerer. In due time my ewes all brought twin lambs except one and raised them all. About the end of September I butchered the best one and sold 22 a few days later to a neighbor for \$100. I then got a full blood Oxford ram and the next crop of lambs was fully as good, if not better. To start a flock, my way would be to get the desired number of lambs in the fall preferably full bloods, but good grades will do and to breed from them, then keep them all and in the spring they should shear from 12 to 15 pounds of wool. In the fall I would get a well bred Oxford ram for breeding.

I rather favor early lambs, but you must have a warm stable and more feed will be needed. The ewes may have less wool than if the lambs come late. If you are likely to become overstocked you can get rid of lambs at good prices. The ewes will be fat in the fall to sell or in prime fix to breed again. To have good lambs ready for Easter you must push them all you can besides feeding the mothers strong feeds. I always have an extra pen for the lambs to go into, where I give them sugar to get them started eating. Then I give oats and corn meal bran, mil wheat, sugar beets and in fact anything they will eat, along with plenty of good clover hay. If I want to keep them I dock all of them within two weeks from birth. Those I intend to sell I omit.

For the ewes a good, roomy stable should be provided during the winter and also for summer use, to keep them away from sun and flies. The ewes must have plenty of exercise, even in winter time. Their main feed should be clover hay or alfalfa, if you have it with some good corn fodder. I also give them cut sheaf oats and oats and shelled corn mixed. Oil meal, brar and roots of some kind with salt and sulphur adds to their flesh. You must be careful not to over-feed, and should manage your flock so as to sell the ewes after the first or second lambing, to keep up the vitality of the general flock. Do not overstock. A small flock does better than a large one.

#### FARM NOTES.

This is our general receipt for getting rid of weeds: Keep the land so full of good things that there is no space left for bad ones.

Milk becomes contaminated in many ways in the process of milking, that it is extremely difficult to secure free from germs, but this has been done in an experimental way a sufficient number of times to prove that milk as formed in the milk glands of a healthy cow is germ free.

"Farming is a profession requiring more shrewdness than law, more technical training than medicine, more uprightness than theology, more brains and resourcefulness than pedagogy. It is its own reward. God made farmers. The other professions are parasites." The world is becoming more and more cognizant of the importance of farmers and their profession.

After the wheat is out of the way mow the stubble over as soon as weeds begin to show up a few inches high. Better not do this when it is very dry and hot, or, if you must, then set cut-bar high. Keep watch and mow again if necessary, before any weeds get far enough along possibly to ripen any seeds. Remember what you are after, to keep all weeds clipped off so they cannot seed, then do it. Don't wait until the mischief is done and then mow. Mow on time. It is not unusual to see someone mow a wheat stubble after some weed has got far enough along so the ground will be completely sown

hundreds of electors belonging to the poorer classes would be disfranchised, and a meeting of the citizens was held to protest. The meeting was attended by nearly 5,000 working men.

A considerable difference of opinion as to the policy to be pursued had just been made clear when a female figure was seen advancing from the entrance through the crowd of workmen toward the platform. The attention of the entire audience was drawn to this surprising invasion, and dead silence prevailed.

During the meeting Rolph mounted the platform and produced such an effect on those present that a committee was appointed to organize open rebellion, and she was elected president. The outbreak took place on Jan. 17, and proved to be a most formidable revolt.

Elizabeth Rolph was the soul of the whole movement. She led the mob in an attack on the wealthy quarters of the town, where dozens of shops were entered and plundered, booty to the value of many hundreds of pounds sterling being seized and carried off by the rioters.

Severe street fighting took place before the combined forces of troops and police were able to subdue the revolutionary mob. Elizabeth Rolph was wounded and captured.

### A QUEER STORY.

#### French Girl Who Has Three Distinct Figures on the White of Her Eye.

In Tudy Island, at the point of Finis-terre, France, there dwells a couple who have a little girl, four years of age, who has an extraordinary eye. For several months little Marie Le Guen—this is the child's name—has been visited by numerous people, who have examined her left eye, in the corner of which, a little lower than the pupil, are to be seen the figures 22.4.

The figures are perfectly visible and well formed. Doctors and specialists have examined the girl, but their opinion on the subject of the figures varies. Dr. Guevel, the well-known Paris oculist, offers three explanations of the figures. He declares that the child may have had relatives afflicted with nervous maladies, such as hysteria, and that a neurologist should be asked to say if heredity does not explain and phenomenon. A second explanation is that it is a freak of nature and only a mark similar to that found occasionally on fruits, ears of wheat, vegetables, etc. The third reason suggested is that the figures may have been the result of an operation in which nitrate of silver was used on the eyes. But the girl's parents say that she has never had an operation.

A singular coincidence is recorded. A fishing boat in the neighboring port of Douarnenez bears the figures 22.4. With this boat little Marie's father had something to do. It could be seen entering port from the Le Guen's house. Old women neighbors declare little Marie's numbers are only a birthmark as just before her birth her mother watched anxiously every night for the fishing boat. Little Marie is to be taken to Paris and will be examined by oculists and several scientists.

### THEN SHE WAS NOT PLEASED.

"What I like," she said, "is a person who is frank—one who says just what he means, without beating about the bush."

"Well," he replied, "I'll be straight-forward. There is something I wanted to tell you for an hour or more but—"

"Yes," she urged, with suppressed excitement, seeing that he hesitated; "what is it?"

"There is a big black streak down one side of your nose. I think it's soot."

### DEFINED.

Tommy—Pop, what is a monologue? Tommy's Pop—A monologue, my son is a conversation a woman carries on with her husband.

"Hop in, Daisy," he ordered, gripping the young man's arm.

The indecisive one opened his mouth, but the revolver touched his temple and he shut it again. That impelled him also to crawl into the receptacle without further delay.

Small though he was, it seemed a pretty tight fit, but Mr. Huntley considerably assisted him with his foot. Then he shut the door and fastened it. It had a bolt outside.

There was a small slot in the door. Jack dropped a crisp word of warning through this: "Shut your mouth and keep still, or I'll pop a bullet through here. You haven't room to dodge it, you know."

The whole thing had been accomplished in record time. In less than thirty seconds Jack Huntley had boarded the car. About three seconds more sufficed him to slip on the bearskin coat which lay on the seat, and a motor-cap that had fallen off his captive's head.

The footsteps in the lane behind were very close now.

Jack rammed the side lamp into its place, dropped into the seat, and seized the steering-wheel with one hand, groping for the starting lever with the other. As his fingers touched it, somebody sprang into the car and fell upon the seat beside him. Before he could turn, a pair of arms were flung round his neck and a feminine voice cried, in a series of little jerks, "Start off, George! start off—pa's coming!"

Jack had reasons of his own for not wishing to delay. He touched off, and the car went buzzing down the lane. The arms lightened a little, then half-a-dozen quick-fire kisses were dropped promiscuously in the neighborhood of Jack's lips and chin, then the arms were suddenly withdrawn, and there came a sharp little cry:

"George, where's your moustache? Oh, it isn't George, it's too big!"

There was a flutter of skirts, as Mr. Huntley's impulsive passenger got up hurriedly and seemed about to spring from the car, although it was then going pretty fast.

"Sit down; you'll fall out and hurt yourself," he said. And Jack's voice was very suave and soothing, though firm.

The girl sat down. She was silent with fear or bewilderment. Still, she tried to edge away. Mr. Huntley put in a bit of high-speed thinking.

The management of the big Daimler did not trouble him at all; he had run a motor before. But the control of the situation bothered him not a little. He was inclined to fancy that George might be the young man in the box behind. But not knowing what George's part in the programme was to have been, he was rather puzzled how to act as his understudy.

In part, the difficulty was solved in a moment.

"Who are you?" faltered the girl.

A break in the trees, letting through a beam of moonlight, gave Jack a momentary glimpse of the face beside him—a remarkably pretty little face, in spite of its tears and pallor.

"I'm not George," he said. And the touch of regret in his tone was quite genuine. Then he added with ready uncertainty:

"I'm George's friend—Bob Jackson. George was detained, so he asked me to run the car round. He gave me the time and place—"

"But didn't he explain?" interjected the lady.

"He hadn't time to explain anything. He merely said I was to wait for a young lady and take my directions from her. By the way, where are we bound for?"

"Oh, didn't George tell you that? Why, to Aunt Nancy's, of course! Aunt Nancy's at Guildford," exclaimed the girl, in a tone of surprise.

Mr. Huntley's knowledge of Surrey roads was extensive and exact. He steered the car round and they were soon buzzing off in the direction of Guildford. Jack did not particularly want to go to Guildford, but he realized that any place at a convenient distance from Surbiton would be convenient for him for the next hour or so.

Jack's next and rapid act was to ex-hume his captive bodily from the receptacle in the car.

That helpless individual appeared to have fainted and remained in a comatose condition during the twenty minutes' run. But the fresh air and Mr. Huntley's timely and resourceful application of a little motor-spirit to his nose, restored him to something like mental competency.

Jack hastened the process by a gentle and the abrupt demand: "Are you George?"

"Yes; Geo-rge P-peploe!" stammered the bewildered youth. "But, oh, I say, what—"

"Never mind all that!" cut in Jack, shortly: "If you're George, there's a jolly fine girl waiting for you in that house!"

"W-what—Agnes? Miss Armitage?" "Yes, Agnes," was the curt response. "And, look here, George; Agnes is just champagne to your ginger-pop. And, by thunder! if you don't bunk up there sharp and claim her, we'll deal again, and I'll have a cut in for her myself!"

Mr. Huntley assisted George through the gate with a gentle shove, and having seen that belated Romeo making his way unsteadily up the garden path towards the house, he hastily doffed the bear-skin coat and motor-cap.

Then, reclaiming the baize-lined bag from under the seat, he abandoned the commandeered car and struck out by a short cut to the railway-station.—London Answers.

### BELGIAN VILLAGE PAGEANT.

#### Days of Crusaders Commemorated by Quaint Procession.

One of the most interesting religious festivals held in Europe was the procession through the streets of Furnes, Belgium, the other Sunday, originally organized in commemoration of the presentation of a fragment of the true Cross of the Abbey of Furnes by Robert of Jerusalem, in the twelfth century. This picturesque spectacle includes a series of forty tableaux portraying well-known Biblical scenes, mounted on cars and costumed in sixteenth century style.

The procession was headed by a car representing the sacrifice of Abraham, with Abraham in blue plush, with up-lifted sword, little Isaac in brown, and a docile donkey laden with faggots. The cars following showed Moses in the wilderness, David as psalmist, king and penitent respectively, and John the Baptist as the forerunner of Christ, surrounded by shepherds, herdsmen and hermits.

A large car carried by penitents, representing a cow-shed with a thatched roof, portrayed the birthplace of Christ. A waxen child lay in a manger on some straw, while the Virgin and Joseph stood near by surrounded by an angel choir composed of little girls dressed in white, with pink gauze wings fastened to their shoulders. Two plaster oxen gazed placidly on the group.

Then came shepherds on foot, escorting the three kings in gorgeous ermine-trimmed mantles. Succeeding tableaux showed the flight into Egypt, the court of Herod, Christ disputing in the Temple and the entrance of Christ into Jerusalem. The incidents of the Crucifixion were graphically depicted while the last car showed the Ascension—Christ standing on a green mound surrounded by the Apostles, and with the Virgin at His feet.

The procession owes its origin to Robert of Jerusalem, who, on returning from the Holy Land, vowed during a storm at sea that he would present a fragment of the true Cross to the first church he saw if he escaped shipwreck. The first church he saw on landing proved to be the Abbey of Furnes, where the relic was installed with great pomp.

When a man gets a chance to dispose of his troubles he always heaps up the measure.

get far enough along possibly to-ripe any seeds. Remember what you are a ter, to keep all weeds clipped off so the cannot seed, then do it. Don't wait until the mischief is done and then move on time. It is not unusual to see someone mow a wheat stubble after some weed has got far enough along the ground will be completely sown with the seeds, later to make trouble after years. One slip of this kind and years of care may go for naught.

One of the most important things to be considered by the younger farmer especially, and by older ones, as well is for us to decide where we prefer to live.

The only producers who make money at the prevailing prices of milk are the few wiser ones or more progressive ones who have worked out the 1,000, 1,500 and the 2,000-quart cows and their stead have worked in the 2,500 the 3,000 and the 4,000-quart cows.

There is such a thing as being economical in the use of grain feeds. Manure that has a good grain element combined with it will be much richer than that which is made of clear hay. Some of the goodness of the grain will come through undigested; and even if this were not so, there are parts in the grain which must necessarily not be used by the animal that eats it, and this will go out with the manure to make the farm better.

### LIVE STOCK NOTES.

In using kerosene in killing lice on stock, mix it with lard about half an half, or it may take all of the hair off if it does not otherwise injure the stock.

Oats are the material which the good roadster will turn into travel. A little careful observance will enable one to determine how much grain the horse ought to have.

There can always be found young strongly built cows that have not been starved or pampered, that can be bought reasonably at private sale, with a responsible seller's guarantee, that are all ready to be pushed for all the are worth and make the owner a fair profit.

Concerning the color of eggs we would simply emphasize the suggestion. You can control this in the breeds by selecting the desired colored eggs for hatching. Whatever be the object, you will be surprised at the rapidity with which you may acquire it through selection. If you wish large, well formed eggs use only such for hatching. In three to five years, by selection alone we can entirely change the type of a flock of hens by selecting close to the standard we have made.

A flock of sheep may not bring in a very large sum, and yet be profitable because of the small amount of capital invested.

For brood sows, choose the young from your best, most prolific and most early old sows, always with the desire for feeding in mind, and in the fullness of time you will declare that you have the best breed of hogs on earth, regardless of which breed you started with.

It is not economy to select for milkers cows that are light feeders. The light feeder may cost her owner \$4 or \$5 less per year for feed than the heavy feeder would cost him, but she will give him only 3,000 pounds of milk a year while the large feeder will give him 5,000 or 7,000, or 10,000 pounds of milk. That is to say, for \$5 a year more to feed the heavy milker will give her owner 2,000 to 6,000 pounds more of milk.

Halter pulling is very common among horses improperly handled. Fortunately, the remedy is simple and effective breaking up the habit in a very short time. Fasten a long rope to the halter, shipping the loose end through the tying ring. Pass the unengaged end of the rope between the forelegs and then over the back, bringing it over on the other side and fastening it to the rope between the forelegs in a slip knot. When the horse pulls in the halter the large noose tightens up on its body and it soon gives up the pulling. Another good way to fasten the rope is to tie it to one of the hind legs. If the horse pulls, it simply pulls itself off its feet.

## CUSTOM TAILORING.

ARE YOU TIED  
TO ANY TAILOR

If you're not, don't make up your mind about anything—cloth, style or price—until you see what's going on here this season.

Perhaps we'll surprise you by making you clothes to order for less money than you think. We certainly will if you have been paying extravagant prices.

Suits to Order, \$15, 17 to 23

Overcoats to Order \$14 to 22

Trousers to Order, \$3.50 to \$7

We are always busy making clothes for people who know our work, and have come back for more. Wouldn't you like a good fitting, well made suit—if so we can make one for you.

We have but one grade of Tailoring—the best we can do—that is the best there is.

### J. L. BOYES.

## THE BEST FLOUR.

DAFOE'S NONESUCH  
DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

NAPANEE,

16th January, 1906.

Coal Facts.

Now is the time to get in your stock of Coal for the winter before your lawn gets soft. If you want the best grade of Anthracite, Steam or Cannel Coal you can get it by calling on VanLaven's Office, Phone 92. All coal kept under cover and well screened before delivering.

Parish of Camden.

Services in Parish of Camden East on Sunday, September 9th, will be (D. V.) as follows: Yarker, St. Anthony's at 10.30 a. m.; Newburgh, St. John's church at 3 p. m. and Camden East, St. Luke's church at 7.30 p. m., when the Rev. L. Norman Tucker, D. C. L. General Secretary of the Missionary Society of the Church of England in Canada, will preach (D. V.) All are welcome.

## PERSONALS.

Miss Marion Stevens is the guest of Miss Marguerite Abell, Toronto.

Mr. and Mrs. M. J. Getty returned to Toronto on Wednesday.

Mrs. Joseph Lloyd, Roblin, was a caller at our office on Friday.

Hon. A. B. Aylesworth, Minister of Justice, Ottawa, was the guest of Mr. and Mrs. D. C. McNaughton on Saturday.

Mr. Robt. Samson, Kingsford, was a caller at our office on Friday.

Miss Olive Asseltine, Portsmouth, spent a few days this week the guest of Mrs. Andrew Madden.

Mrs. Tulloch, Napanee, is visiting Mrs. John Foote, Deseronto.

Mrs. Thos. Mooney, Brainerd, Minn. who had been visiting in Napanee, left last week for her home, accompanied by Mrs. Sarah Sheehan, Miss Mooney, of Napanee, and William Mooney of New York. They intend spending some time in Detroit, Chicago, St. Paul, Minneapolis and Duluth before returning home.

Mr. Harry Sproule, of Brampton, is spending the vacation in Napanee, and vicinity visiting relatives and renewing acquaintances.

Mr. W. Fletcher Loucks, a Napanee old boy, has resigned his position at Waskada, Man., and accepted the Principalship of Melita High School.

Miss Nettie Pringle, nurse-in-training, of New York, is home for a six weeks' vacation at her father's, Mr. S. W. Pringle, Centre street.

Miss Sampson arrived home on Tuesday last from Rochester, where she spent the past three weeks visiting her sister, Mrs. T. Hopkins.

Miss Mabel Mills spent the past two weeks visiting friends at Macdonald.

Mr. Frank Milling, Bathurst street Toronto, is spending two weeks visiting Mr. H. Milling, Belleville road, and other friends.

Mr. Jas. Evans, of Moscow, was in town a couple of days this week the guest of Mr. and Mrs. Hugh Campbell.

Mr. and Mrs. Henry Wilson left on Wednesday for New York to visit their son, Mr. J. Wilson and family.

Mr. S. T. McCoy spent last week in Boston, Mass., the guest of his brother Mr. M. C. Carlisle.
